This paper considers the development of a reusable object-oriented array library, as well as the use of this library in the construction of finite difference and finite element codes. The classes in this array library are also generic enough to be used to construct other classes specific to finite difference and finite element methods. The authors demonstrate the usefulness of this library by inserting it into two existing object-oriented scientific codes developed at Sandia National Laboratories. One of these codes is based on finite difference methods, while the other is based on finite element methods. Previously, these codes were separately maintained across a variety of sequential and parallel computing platforms. The use of object-oriented programming allows both codes to make use of common base classes. This offers a number of advantages related to optimization and portability. Optimization efforts, particularly important in large scientific codes, can be focused on a single library. Furthermore, by encapsulating machine dependencies within this library, the optimization of both codes on different architectures will only involve modification to a single library.

25430 (SAND–93-0908C) **Kerberos a UNIX–TCP/IP network authentication system.** Rahe, W.H.; Machin, G.D. Sandia National Labs., Albuquerque, NM (United States). [1993]. 11p. Sponsored by USDOE, Washington, DC (United States). DOE Contract AC04-76DP00789. (CONF-9305151–5: 15. computer security group training conference: mission possible - connected and protected, Albuquerque, NM (United States), 3-6 May 1993). Order Number DE93011677. Source: OSTI; NTIS (US Sales Only); GPO Dep.

Vulnerabilities inherent in network transmissions reduce the security protections provided by multiple remote authentication processes. The "trusted systems' concept also provides potential for inadvertent or deliberate abuse of computing resources. Additionally, since the owner of a workstation potentially has complete control of a particular workstation, including the ability to edit all files and add customer accounts through the use of privileged accounts, additional security concerns exist including file integrity, file privacy, and customer masquerade. for remote access and remote file storage. In a networked computing environment, both the customer/client and the server identities become more difficult to assure. The possibility of disclosure and non-assurance of information integrity transmitted on the network media are markedly increased In recognition of these difficulties, (DEC) International Business Machines (IBM) provided funding for the creation of Project Athena at (MIT) whose charter was to address distributed computing including security. Kerberos is an application developed by this project to provide centralized "third-party" authentication in a distributed network. Network access control may be provided by Kerberos for each of the computing resources within either a local or remote network. Kerberos contains a database of principals and encryption keys in a Key Distribution Center (KDC). The KDC contains the keys (passwords) or all customers and must reside on a tightly controlled, limited access system. The KDC provides non-corruptible authentication credentials which are used in conjunction with the local authorization file and local services to perform the authentication and authorization functions for local and remote customer requests.

25431 (SAND–93-0955) **Bringing theory to practice: The reality of interprocessor communication.** Greenberg, D.S.; McCurley, K.S. Sandia National Labs., Albuquerque, NM (United States). [1993]. 5p. Sponsored by USDOE, Washington, DC (United States). DOE Contract AC04-76DP00789. (CONF-9304140–1: Workshop on analyzing scalibility of parallel algorithms, Newport Beach, CA (United States), 13 Apr 1993). Order Number DE93012346. Source: OSTI; NTIS; GPO Dep.

Determining the best topology for the interconnection network of a scalable processor is not possible via theoretical models. However, we might hope that theoretical results would at least help researchers to make the most efficient use possible of existing machines. Unfortunately theoretical work often stops short of providing everything which the practitioner requires. In this paper two communication problems broadcast, are used to illustrate the additional effort required to make the theoretical practical.

25432 (SAND–93-0956C) **Beyond core: Making parallel computer I/O practical.** Womble, D. (Sandia National Labs., Albuquerque, NM (United States)); Greenberg, D.; Wheat, S.; Riesen, R. Sandia National Labs., Albuquerque, NM (United States). [1993]. 8p. Sponsored by USDOE, Washington, DC (United States). DOE Contract AC04-76DP00789. (CONF-9306157–1: Parallel I/O and databases symposium, Hanover, NH (United States), 21-30 Jun 1993). Order Number DE93012347. Source: OSTI; NTIS; GPO Dep.

The solution of Grand Challenge Problems will require computations which are too large to fit in the memories of even the largest machines. Inevitably new designs of I/O systems will be necessary to support them. Through our implementations of an out-of-core LU factorization we have learned several important lessons about what I/O systems should be like. In particular we believe that the I/O system must provide the programmer with the ability to explicitly manage storage. One method of doing so is to have a partitioned secondary storage in which each processor owns a logical disk. Along with operating system enhancements which allow overheads such as buffer copying to be avoided, this sort of I/O system meets the needs of high performance computing.

25433 (SLAC-PUB–5895) **Optimal routing of IP packets to multi-homed servers.** Swartz, K.L. Stanford Linear Accelerator Center, Menlo Park, CA (United States). Aug 1992. 9p. Sponsored by USDOE, Washington, DC (United States). DOE Contract AC03-76SF00515. (CONF-9210331–2: 6. Usenix Systems Administration conference on large installation system administration, Long Beach, CA (United States), 19-23 Oct 1992). Order Number DE93010949. Source: OSTI; NTIS; INIS; GPO Dep.

Multi-homing, or direct attachment to multiple networks, offers both performance and availability benefits for important servers on busy networks. Exploiting these benefits to their fullest requires a modicum of routing knowledge in the clients. Careful policy control must also be reflected in the routing used within the network to make best use of specialized and often scarce resources. While relatively straightforward in theory, this problem becomes much more difficult to solve in a real network containing often intractable implementations from a variety of vendors. This paper presents an analysis of the problem and proposes a useful solution for a typical campus network. Application of this solution at the Stanford Linear Accelerator Center is studied and the problems and pitfalls encountered are discussed, as are the workarounds used to make the system work in the real world.

25434 (UCRL-ID–113953) **Comments on computational underwater acoustics.** Hedstrom, G. Lawrence Livermore National Lab., CA (United States). Apr 1993. 6p. Sponsored by USDOE, Washington, DC (United States); Department of Defense, Washington, DC (United States). DOE Contract W-7405-ENG-48. Order Number DE93013789. Source: OSTI; NTIS; GPO Dep.

Two fundamental facts control the choice of computational methods in underwater acoustics. One is that over most of the ocean the sound speed varies much more rapidly with depth than in the horizontal directions. The other is that upon going down from the surface, the sound speed usually decreases to a minimum and then increases from there to the bottom. These properties of the medium imply that the ocean often acts as a waveguide, with energy trapped in a depth-band about the sound-speed minimum. One consequence of these facts is that approximation by normal modes is valid over large regions of the ocean, particularly if correction is made for the slow variation of the modes caused by variation in bottom depth and horizontal variation in sound speed. In portions of the ocean where approximation by normal modes is not valid, we may still often use a paraxial approximation. Paraxial approximations may be used when the wave motion is primarily in a single direction, with slow variation of the signal in directions tangent to the wave front. They are often called "parabolic" equations in ocean acoustics, but the term "paraxial" is standard in other branches of physics, inducting optics and seismology. Finite-difference approximations are also sometimes used in underwater acoustics, but they are much more computationally intensive than

normal modes or paraxial approximations. Finite differences are therefore ordinarily used only where these other methods are not valid, such as in shallow water with rapidly varying depth. One could also use finite elements in these instances, but for acoustics problems finite elements are a special class of finite-difference methods. We discuss finite differences only briefly in this report, because they are not generally used in long-range acoustics.

25435 (UCRL-JC–111212) **PC viruses: How do they do that?.** Pichnarczyk, K. Lawrence Livermore National Lab., CA (United States). Jul 1992. 10p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-9208108–2: Workshop on computer security incident handling, Denver, CO (United States), Aug 1992). Order Number DE93012581. Source: OSTI; NTIS; GPO Dep.

The topic of PC Viruses has been an issue for a number of years now. They've been reported in every major newspaper, tabloids, television and radio. People from all fields get viruses: government, private sector businesses, home computers, schools, computer software suppliers. A definition is proposed to introduce the virus phenomenon. Virus authors come from a variety of communities. Motives and ideologies of authors are discussed, and examples of viruses are offered. Also mentioned is the growing number of viruses developed, isolated, and never distributed to the public at large, but kept within the antivirus research community. Virus examples are offered as well. Viruses are distributed not only through bulletin boards and shareware, but also from areas previously assumed to be safe, including the threat of receiving a virus through a standard in-house function, such as an in-house hardware maintenance shop. Three categories of viruses are presented: File Infecter viruses, Boot Sector Infecters, and the new category of Directory Entry Infecter virus. Also discussed are crossover viruses, that is, viruses which utilize a variety of techniques to ensure survival. An explanation of what is occurring within every stage of various viruses is given. Replication strategies common to all three types is noted, mainly the two different replication strategies of memory resident infecters and active selection infecters. A detailed definition, description and application of a stealth virus is presented. Detection strategies are discussed as each topic in this section is completed; a high level schemata of the operation of various virus detection programs ispresented. Since most eradication today is done using virus detection/eradication software, this paper attempts to reveal the techniques used by these packages.Included in the paper is the topic of manual eradication.

25436 (UCRL-JC–111224) **Generalized smooth models.** Glosup, J. Lawrence Livermore National Lab., CA (United States). 23 Jul 1992. 17p. Sponsored by USDOE, Washington, DC (United States); National Science Foundation, Washington, DC (United States). DOE Contract W-7405-ENG-48. Grant DMS 8802722. (CONF-920893–7: Joint statistical meetings of the American Statistical Association, the Biometric Society and the Institute of Mathematical Statistics, Boston, MA (United States), 9-13 Aug 1992). Order Number DE93013045. Source: OSTI; NTIS; GPO Dep.

The class of gene linear models is extended to develop a class of nonparametric regression models known as generalized smooth models. The technique of local scoring is used to estimate a generalized smooth model and the estimation procedure based on locally weighted regression is shown to produce local likelihood estimates. The asymptotically correct distribution of the deviance difference is derived and its use in comparing the fits of generalized linear models and generalized smooth models is illustrated. The relationship between generalized smooth models and generalized additive models is discussed, also.

25437 (UCRL-JC–111227) **Some aspects of sheet forming simulation using explicit finite element techniques.** Whirley, R.G.; Engelmann, B.E.; Logan, R.W. Lawrence Livermore National Lab., CA (United States). 28 Jul 1992. 9p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-921110–49: Winter annual meeting of the American Society of Mechanical Engineers (ASME), Anaheim, CA (United States), 8-13 Nov 1992). Order Number DE93012479. Source: OSTI; NTIS; GPO Dep.

This paper discusses some aspects of the application of the explicit nonlinear finite element code DYNA3D to the numerical simulation of sheet forming processes. Although DYNA3D is intrinisically a code for transient dynamic response, it has been successfully applied to the quasistatic sheet forming problem by slow application of the loads. Although somewhat nontraditional, this approach has proven very robust in application to large-scale problems. This paper discusses the components of a successful sheet forming analysis, including constitutive modeling, contact definition, guidelines for load application, and some suggestions for solution evaluation. Further, this paper illustrates the use of DYNA3D to compute the Limiting Draw Ratio as a function of material anisotropy and compares the computed results for 3-D forming problems with experimental data.

25438 (UCRL-JC–111883) **Uniform user and group IDs on a large network.** Crispin, K. Lawrence Livermore National Lab., CA (United States). Oct 1992. 7p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-9210353–1: CRAY User Group meeting, Washington, DC (United States), 9-13 Oct 1992). Order Number DE93013047. Source: OSTI; NTIS; GPO Dep.

Over the past few years the Livermore Computer Center has converted from a "home grown system" facility to a more or less standard UNIX environment. As a result we have several hundred UNIX on our network ranging from the UNICOS Crays to Sun workstations. For the usual reasons we want to maintain a single UID space across all these systems. This paper describes some of the problems and issues we have encountered in pursuit of this goal.

25439 (UCRL-JC–111956) **Deconvolution for positive signals.** Goodman, D.M. Lawrence Livermore National Lab., CA (United States). Oct 1992. 10p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-9206371–1: Symposium on fundamentals of discrete time systems, Chicago, IL (United States), 26-27 Jun 1992). Order Number DE93013044. Source: OSTI; NTIS; GPO Dep.

We consider estimating an unknown positive signal from an observed signal that has been corrupted by known linear dynamics and additive noise. In many experiments the goal is to estimate energy or power as a function of time; consequently, the positive deconvolution problem occurs frequently in a wide variety of scientific disciplines. We present two new methods. One is based on Mallows' C_L statistic, and the other is based on conjugate gradients. We describe several other methods. This paper considers "small sample" problems. This fact and the imposition of positivity constrants makes analytic comparisons of the methods impossible. Therefore, we include preliminary Monte-Carlo comparisons.

25440 (UCRL-JC–112015) **Connecting UNICOS data migration to a UniTree storage system.** Hamilton, P.; Minton, J. Lawrence Livermore National Lab., CA (United States). Oct 1992. 17p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-9209204–5: Cray users group meeting, Washington, DC (United States), 14-18 Sep 1992). Order Number DE93012576. Source: OSTI; NTIS; GPO Dep.

Files are produced much faster than they are destroyed on supercomputer file systems. Data migration is one solution to the "disk full" problem. A data migration system is described that connects a UNICOS file system to a UniTree storage system.

25441 (UCRL-JC–112016) **The PVM systems: An in-depth analysis and documenting study – Concise edition.** Grant, B.K.; Skjellum, A. Lawrence Livermore National Lab., CA (United States). Nov 1992. 20p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-930773–1: 9. international conference on systems engineering (ICSE '93), Las Vegas, NV (United States), 14-16 Jul 1993). Order Number DE93011959. Source: OSTI; NTIS; GPO Dep.

PVM (Parallel Virtual Machine) is a basic message-passing system for heterogeneous collections of networked computers, developed at Oak Ridge National Laboratory, University of Tennessee and Emory University. This report is our "third-party" effort to answer most common questions about PVM, and to dispel many misconceptions regarding its capabilities. We strive to present an accurate assessment of the system, while adding our own opinions

regarding the system, and offering a few suggestions for the future of the system. PVM version 2.4-1, the latest version at the time of the writing of this report, is summarized within this document; our forthcoming full report includes significantly more detailed information. Information on how to get the full report is included.

25442 (UCRL-JC–112022) **The Zipcode message-passing system.** Skjellum, A. (Lawrence Livermore National Lab., CA (United States)); Smith, S.G.; Still, C.H.; Leung, A.P.; Morari, M. Lawrence Livermore National Lab., CA (United States). 12 Nov 1992. 18p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-930331–9: 6. Society for Industrial and Applied Mathematics (SIAM) conference on parallel processing for scientific computing, Norfolk, VA (United States), 21-24 Mar 1993). Order Number DE93011958. Source: OSTI; NTIS; GPO Dep.

Zipcode is a message-passing system developed originally by the first author, beginning at Caltech in the Summer of 1988 and continuing to-date absent in then-existing message-passing systems. Currently, Zipcode continues to serve as a vehicle to demonstrate high-level message-passing research concepts and, more importantly, to provide the basis for supporting vendor-independent scalable concurrent libraries; notably, the Multicomputer Toolbox. The basic assertion of Zipcode is that carefully managed, expressive message-passing is an effective way to program multicomputers and distributed computers, while low-level message passing is admittedly both error-prone and difficult. The purpose of Zipcode is to manage the message-passing process within parallel codes in an open-ended way. This is done so that large-scale software can be constructed in a multicomputer application, with reduced likelihood that software so constructed will conflict in its dynamic resource use, thereby avoiding potentially hard-to-resolve, source-level conflicts. Furthermore, the message-passing-notations provided are to reflect the algorithms and data organizations of the concurrent algorithms, rather than predefined typing strategies. Typing, while generic and easy-to-understand, proves too low-level to support manageable application development well. Notational abstractions provide a means for the user to incorporate information through which the Zipcode library may make optimizations when a code runs on systems with specific hardware features. Abstraction is therefore seen as a means to higher performance, and notation is seen as a means towards more understandable, easier-to-develop and maintain concurrent software. Context registry provides a "social contract" within which multiple libraries and codes can coexist reasonably.

25443 (UCRL-JC–112301) **Practical authorization in large heterogeneous distributed systems.** Fletcher, J.G.; Nessett, D.M. Lawrence Livermore National Lab., CA (United States). Nov 1992. 11p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-930245–1: Privacy and Security Research Group workshop on network and distributed systems security, San Diego, CA (United States), 11-12 Feb 1993). Order Number DE93013192. Source: OSTI; NTIS; INIS; GPO Dep.

Requirements for access control, especially authorization, in practical computing environments are listed and discussed. These are used as the basis for a critique of existing access control mechanisms, which are found to present difficulties. A new mechanism, fire of many of these difficulties, is then described and critiqued.

25444 (UCRL-JC–112597) **Optimal hemicube sampling.** Max, N. (Lawrence Livermore National Lab., CA (United States)). Lawrence Livermore National Lab., CA (United States). 17 Dec 1992. 14p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-930881–1: Siggraph '93 conference, Anaheim, CA (United States), 2-6 Aug 1993). Order Number DE93010499. Source: OSTI; NTIS; GPO Dep.

Radiosity algorithms for global illumination, either "gathering" or "shooting" versions, depend on the calculation of form factors. It is possible to calculate the form factors analytically, but this is difficult when occlusion is involved, so sampling methods are usually preferred. The necessary visibility information can be obtained by ray tracing in the sampled directions. However, area coherence makes it more efficient to project and scan-convert the scene onto a number of planes, for example, the faces of a hemicube. The hemicube faces have traditionally been divided into equal square pixels, but more general subdivisions are practical, and can reduce the variance of the form factor estimates. The hemicube estimates of form factors are based on a finite set of sample directions. We obtain several optimal arrangements of sample directions, which minimize the variance of this estimate. Four approaches are changing the size of the pixels, the shape of the pixels, the shape of the hemicube, or using non-uniform pixel grids. The best approach reduces the variance by 43%. The variance calculation is based on the assumption that the errors in the estimate are caused by the projections of single edges of polygonal patches, and that the positions and orientations of these edges are random.

25445 (UCRL-JC–112601) **Smooth transitions between bump rendering algorithms.** Becker, B.G. Max, N.L. (California Univ., Davis, CA (United States)). Lawrence Livermore National Lab., CA (United States). 4 Jan 1993. 37p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-930881–2: Siggraph '93 conference, Anaheim, CA (United States), 2-6 Aug 1993). Order Number DE93012504. Source: OSTI; NTIS; GPO Dep.

A method is described for switching smoothly between rendering algorithms as required by the amount of visible surface detail. The result will be more realism with less computation for displaying objects whose surface detail can be described by one or more bump maps. The three rendering algorithms considered are bidirectional reflection distribution function (BRDF), bump-mapping, and displacement-mapping. The bump-mapping has been modified to make it consistent with the other two. For a given viewpoint, one of these algorithms will show a better trade-off between quality, computation time, and aliasing than the other two. Thus, it needs to be determined for any given viewpoint which regions of the object(s) will be rendered with each algorithm The decision as to which algorithm is appropriate is a function of distance, viewing angle, and the frequency of bumps in the bump map.

25446 (UCRL-JC–112806) **Virtual sound for virtual reality.** Blattner, M.M. (Anderson (M.D.) Cancer Center, Houston, TX (United States). Dept. of Biomathematics); Papp, A.L. III. Lawrence Livermore National Lab., CA (United States); California Univ., Davis, CA (United States). Feb 1993. 7p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-9303127–1: Virtual reality system '93, New York, NY (United States), 15-17 Mar 1993). Order Number DE93010519. Source: OSTI; NTIS; GPO Dep.

The computational limitations of real-time interactive computing do not meet our requirements for producing realistic images for virtual reality in a convincing manner. Regardless of the real-time restrictions on virtual reality interfaces, the representations can be no better than the graphics. Computer graphics is still limited in its ability to generate complex objects such as landscapes and humans. Nevertheless, useful and convincing visualizations are made through a variety of techniques. The central theme of this article is that a similar situation is true with sound for virtual reality. It is beyond our abilityto create interactive soundscapes that create a faithful reproduction of real world sounds, however, by choosing one's application carefully and using sound to enhance a display rather than only mimic real-world scenes, a very effective use of sound can be made.

25447 (UCRL-JC–112808) **Simplified quantitative treatment of uncertainty and interindividual variability in health risk assessment.** Bogen, K.T. Lawrence Livermore National Lab., CA (United States). Jan 1993. 12p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. Order Number DE93010520. Source: OSTI; NTIS; INIS; GPO Dep.

A distinction between uncertainty (or the extent of lack of knowledge) and interindividual variability (or the extent of person-to-person heterogeneity) regarding the values of input variates must be maintained if a quantitative characterization of uncertainty in population risk or in individual risk is sought. Here, some practical methods are presented that should facilitate implementation of the analytic framework for uncertainty and variability proposed by Bogen and Spear. (1,2) Two types of methodology are discussed: one that facilitates the distinction between uncertainty and variability per se, and another that may be used to simplify quantitative

analysis of distributed inputs representing either uncertainty or variability. A simple and a complex form for modeled increased risk are presented and then used to illustrate methods facilitating the distinction between uncertainty and variability in reference to characterization of both population and individual risk. Finally, a simple form of discrete probability calculus is proposed as an easily implemented, practical alternative to Monte-Carlo based procedures to quantitative integration of uncertainty and variability in risk assessment.

25448 (UCRL-JC–113531) **Networks of real-time processes.** Yates, R.K. Lawrence Livermore National Lab., CA (United States). 8 Mar 1993. 17p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. (CONF-930898–1: 4. international conference on concurrency theory, Hildesheim (Germany), 23-26 Aug 1993). Order Number DE93013049. Source: OSTI; NTIS; GPO Dep.

Networks of real-time processes we prove that the input-output function computed by a network of asynchronous real-time processes is described by the unique fixed point of a network functional even though the components of the network may compute nonmonotonic functions. The techniques used are those of contractive functions on metric spaces rather than the usual Scott continuity on partial orders. Thus a well-known principle of Kahn is extended to an important model of parallel systems that has been resistant to the traditional approach using Scott continuity.

25449 (UCRL-MA–108965-Rev.1) **PML user's manual for PML Version 2.0: Revision 1.** Brown, S.A.; Braddy, D. Lawrence Livermore National Lab., CA (United States). 4 Jan 1993. 36p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. Order Number DE93013132. Source: OSTI; NTIS (documentation only); ESTSC (complete software package), P.O. Box 1020, Oak Ridge, TN 37831-1020; GPO Dep.

There are many mathematics libraries currently enjoying widespread use. At the time that PML was begun, however, there were very few written in C and fewer still written with portability in mind. The temptation has all too often been to program to a specific hardware platform and forget portability. More recently some very good work has been published by Press, Flannery, Teulkovsky, and Vetterling, Numerical Recipes in C, which is highly portable. No one library is apt to have everything that a given application needs and there are other considerations such as interfaces and related functionality to drive the development of a math library. The reason for writing PML hasn't changed in spite of this. PML (Portable Mathematics Library) was developed initially as a repository for any routines of a mathematical nature in what has become the PACT system. More recently, I have tried to systematize the library and organize it for future growth. The library has two fundamental parts. First are the many pure math routines such as equation solvers. Second are the structure definitions and some related functions. The structures which PML supports are provided to aid C programmers in organizing their mathematical computations in a mathematical way. That is, they are encouraged to give primary consideration to the mathematics not the implementation of the mathematics. This also is intended to add to the mathematical rigor of simulations and promote the use of some of the more abstract but critical ideas of mathematics by giving application developers concrete representations of abstract structures. The data structures for PML are presented first since they support most of the library. A summary of the mathematical functions comes next. A set of examples completes this manual.

25450 (UCRL-MA–108975) **PDBDiff user's manual.** Brown, S.A. Lawrence Livermore National Lab., CA (United States). 7 Jan 1992. 10p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. Order Number DE93013200. Source: OSTI; NTIS (documentation only); ESTSC (complete software package), P.O. Box 1020, Oak Ridge, TN 37831-1020; GPO Dep.

The SABrE system provides a number of tools for working with PDB files in a fairly generic fashion. In particular, PDBDiff compares the contents of two PDB files and displays the differences (in a manner similar but not identical to the UNIX utility diff). PDBDiff can also be run in an interactive mode which lets a user compare two PDB files on an item by item basis. The PDB tools, PDBView, PDBLS, PDBDiff, and PDBComp, are all SX programs. SX is a dialect of the LISP programming language which consists of extensions to the SCHEME dialect of LISP. The extensions provide functionality for graphics, binary data handling, and other areas of functionality. PDBDiff has a "help" command which lists its commands.

25451 (UCRL-MA–108976) **SCORE user's manual.** Brown, S.A. Lawrence Livermore National Lab., CA (United States). 7 Jan 1992. 28p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. Order Number DE93013091. Source: OSTI; NTIS; GPO Dep.

SABrE is a set of tools to facilitate the development of portable scientific software and to visualize scientific data. As with most constructs, SABRE has a foundation. In this case that foundation is SCORE. SCORE (SABRE CORE) has two main functions. The first and perhaps most important is to smooth over the differences between different C implementations and define the parameters which drive most of the conditional compilations in the rest of SABRE. Secondly, it contains several groups of functionality that are used extensively throughout SABRE. Although C is highly standardized now, that has not always been the case. Roughly speaking C compilers fall into three categories: ANSI standard; derivative of the Portable C Compiler (Kernighan and Ritchie); and the rest. SABRE has been successfully ported to many ANSI and PCC systems. It has never been successfully ported to a system in the last category. The reason is mainly that the "standard" C library supplied with such implementations is so far from true ANSI or PCC standard that SABRE would have to include its own version of the standard C library in order to work at all. Even with standardized compilers life is not dead simple. The ANSI standard leaves several crucial points ambiguous as "implementation defined." Under these conditions one can find significant differences in going from one ANSI standard compiler to another. SCORE's job is to include the requisite standard headers and ensure that certain key standard library functions exist and function correctly (there are bugs in the standard library functions supplied with some compilers) so that, to applications which include the SCORE header(s) and load with SCORE, all C implementations look the same.

25452 (UCRL-MA–111145) **Fortran graphics routines for the Macintosh.** Shore, B.W. Lawrence Livermore National Lab., CA (United States). Jun 1992. 15p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. Order Number DE93013092. Source: OSTI; NTIS; GPO Dep.

The Language Systems MPW Fortran is a popular Fortran compiler for the Macintosh. Unfortunately, it does not have any built-in calls to graphics routines (such as are available with Graflib on the NLTSS), so there is no simple way to make x-y plots from calls within Fortran. Instead, a file of data must be created and a commercial plotting routine (such as IGOR or KALEIDAGRAPH) or a spreadsheet with graphics (such as WINGZ) must be applied to post-process the data. The Macintosh does have available many built-in calls (to the Macintosh Toolbox) that allow drawing shapes and lines with quickdraw, but these are not designed for plotting functions and are difficult to learn to use. This work outlines some Fortran routines that can be called from LS Fortran to make the necessary calls to the Macintosh toolbox to create simple two-dimensional plots or contour plots. The source code DEMOGRAF.F shows how these routines may be used. DEMOGRAF.F simply demonstrates some Fortran subroutines that can be called with language systems MPW Fortran on the Macintosh to plot arrays of numbers. The subroutines essentially mimic the functionality that has been available at LTSS and NLTSS and UNICOS at LLNL. The graphics primitives are kept in four separate files, each containing several subroutines. The subroutines are compiled and stored in a library file, LIBgraf.o. Makefile is used to link this library to the source code. A discussion is included on requirements for interactive plotting of functions.

25453 (UCRL-MA–112087) **PACT user's guide.** Brown, S.A.; Braddy, D. Lawrence Livermore National Lab., CA (United States). 4 Jan 1993. 26p. Sponsored by USDOE, Washington, DC (United States). DOE Contract W-7405-ENG-48. Order Number DE93013093. Source: OSTI; NTIS; GPO Dep.

In a computing landscape which has many different hardware architectures and supporting software systems ranging from compilers to operating systems, there is an obvious and strong need for a philosophy of software development that lends itself to the design and construction of portable code systems. The current efforts to standardize software bear witness to this need. PACT is an effort to implement a software development environment which is itself portable and promotes the design and construction of portable applications. PACT does not include such important tools as editors and compilers. Well built tools of that kind are readily available across virtually all computer platforms. The areas that PACT addresses are at a higher level involving issues such as data portability, portable inter-process communication, and graphics. In its current conception, PACT is a set of 10 tools. Nine of these are implemented as libraries, and two of them provide both libraries and executable applications. PACT is entirely coded in C but was designed with a view toward support of other languages, notably FORTRAN.

25454 (DPW–4461) **Trip report to Washington AEC to discuss document distribution: Trip report, January 11, 1952.** Andrews, J.C. Du Pont de Nemours (E.I.) and Co., Wilmington, DE (United States). 1952. 5p. Sponsored by USDOE, Washington, DC (United States). DOE Contract AC09-76SR00001. (SR/H–461). Order Number DE93011156. Source: OSTI; NTIS (US Sales Only); GPO Dep.

On Friday January 11, 1952, a meeting was held in Washington, DC to discuss a new category "Technology-Savannah River" to be added to the standard distribution lists for the US AEC research and development reports and to discuss the distribution of du Pont reports within the framework of these lists. During this meeting, it was decided that the category "Technology-Savannah River" would be added to the standard distribution; du Pont (DP) reports would be circulated according to the US AEC standard distribution; DP reports would be included in the publication "Abstracts of Classified Reports"; the Technical Information Service (TIS) would be responsible for the reproduction and distribution of DP reports; and internal reports would not be distributed by TIS unless the Savannah River Operations Office had an official request for the report.

25455 (GSF–10/92) **Information system 'Environmentally hazardous materials'. Final report.** Voigt, K. (GSF - Forschungszentrum fuer Umwelt und Gesundheit GmbH, Neuherberg (Germany). Projektgruppe Umweltgefaehrdungspotentiale von Chemikalien (PVC)); Pepping, T. GSF - Forschungszentrum fuer Umwelt und Gesundheit GmbH, Neuherberg (Germany). Mar 1992. 122p. (In German). Order Number DE93792033. Source: OSTI; NTIS (US Sales Only).

A computer-assisted information system was developed which permits and optimizes access to data on environmentally hazardous materials. Data-basis were established on the basis of the available data sources. The information system was tested for the parameter 'Concentrations' (in water, soil, air, foodstaffs and drinking water) for 68 environmentally relevant substances. The communication software NPF-UIX (= Network Pass Through Facility) was developed for access to online databases. (BBR).

25457 (INDC(NDS)–204/GSp) **Report on the 9. IAEA consultants' meeting of the nuclear reaction data centres: Including the 20. four-centres meeting of the neutron data centers and the 10. meeting on charged particle nuclear data compilation.** Lemmel, H.D. (ed.). International Atomic Energy Agency, Vienna (Austria). International Nuclear Data Committee. Apr 1988. [152p.] (CONF-871026–: IAEA Data Networking meeting, Upton, NY (United States), 26-30 Oct 1987). Order Number DE93626597. Source: OSTI; NTIS (US Sales Only); INIS.

This report summarizes the 1987 co-ordination meeting of the national and regional nuclear reaction data centers, convened by the IAEA at regular intervals. The main topics are: the international exchange of nuclear reaction data by means of the "EXFOR" system, and the further development of this system; the "CINDA" system as an international index and bibliography to neutron reaction data; the sharing of the workload for speedy and reliable data compilation; the exchange and documentation of evaluated data libraries in ENDF format, with the goal of rendering data center services to data users in IAEA Member States by means of computer retrievals and printed materials. (author). Refs, figs and tabs.

25458 (INDC(NDS)–204/GSp, pp. 59-87) **National Nuclear Data Center status report.** International Atomic Energy Agency, Vienna (Austria). International Nuclear Data Committee. Apr 1988. The report presents the activities of the IAEA Nuclear Data Section concerning CINDA, EXFOR system, data evaluation, publications. Included are the request statistics for 1989-1991 and the NDS meeting calendar for 1991-1994. Tabs.

25474 (ORAU–88/C-71) **Emergency management: An annotated bibliography.** Oak Ridge Associated Universities, Inc., TN (United States). Mar 1988. 17p. Sponsored by USDOE, Washington, DC (United States). DOE Contract AC05-76OR00033. Order Number DE93013315. Source: OSTI; NTIS; GPO Dep.

Training Resources and Data Exchange (TRADE) is an organization designed to increase communication and exchange of ideas, information, and resources among US Department of Energy contractors and DOE personnel. Oak Ridge Associated Universities, located in Oak Ridge, Tennessee, manages TRADE for the DOE. The Emergency Preparedness Special Interest Group (EP SIG) is a group formed within TRADE for emergency preparedness coordinators and trainers to share information about emergency preparedness training and other EP resources. This bibliography was prepared for the EP SIG as a resource for EP training and planning activities.

25475 (ORNL/FTR–4245) **[Document description and processing languages]: Foreign trip report, 24 April–11 May 1992.** Mason, J.D. Oak Ridge National Lab., TN (United States). 26 May 1992. 45p. Sponsored by USDOE, Washington, DC (United States). DOE Contract AC05-84OR21400. Order Number DE93011079. Source: OSTI; NTIS (US Sales Only); GPO Dep.

As DOE seeks to move towards electronic production, management, and dissemination of scientific and technical information and the adoption of government and international standards to support that effort, it has for several years been involved in the development of such international standards for text preparation and interchange. In support of this effort, the traveler serves as Convenor of ISO/IEC JTC1/SC18/WG8; during this trip he convened the Spring 1992 meeting of WG8 in Copenhagen, Denmark, and then represented WG8 at the annual Plenary of SC18, the committee including WG8, in Stockholm, Sweden.

The amendments made by this Act concern the levying of fees to be decided by the King for the State or approved organisations to cover the costs of control, administration and emergency planning. (NEA).

Corporate Author Index

This index lists the corporate authors responsible for issuing the documents in this publication which are identified primarily by report number. The corporate names are entered in standardized forms as defined in ETDE/PUB–3, *International Energy: Research Organizations 1986–1990*. Each entry under a corporate name includes the document title and citation number. Three items of information may appear in parentheses: (1) an abbreviation to identify the document type, such as a report; (2) the country of publication, indicated by International Organization for Standardization (ISO) country code; and (3) the language of the document if non-English (R;CA;In French). Author affiliations are not listed in this index.

Study of hydrocarbon miscible solvent slug injection process for improved recovery of heavy oil from Schrader Bluff Pool, Milne Point Unit, Alaska: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22795 (R;US)

Alberta Research Council, Edmonton, AB (Canada)
Advanced direct coal liquefaction concepts: Quarterly report, October 1, 1992–December 31, 1992, 18:22715 (R;US)
Advanced direct coal liquefaction concepts: Quarterly report, August 1–September 30, 1992, 18:22716 (R;US)

Allied-Signal Aerospace Co., Kansas City, MO (United States). Kansas City Div.
Annual site environmental report for calendar year 1991, Kansas City Plant, Kansas City, Missouri, 18:24750 (R;US)
Characterization of the personal computer based computed tomography system: Final report, 18:23941 (R;US)

Establishing a comprehensive recycling process at KCD, 18:23836 (R;US)
Machine tool error analysis: Final report, 18:24160 (R;US)

American Electric Power Service Corp., Columbus, OH (United States)
Tidd PFBC Demonstration Plant operation and testing, 18:22756 (R;US)
Tidd PFBC Demonstration Project fourth quarterly technical progress report, CY 1992, 18:22757 (R;US)

Ames Lab., IA (United States)
Characterization, Monitoring and Sensor Technology Integrated Program, 18:23133 (R;US)
Crack propagation in high strain regions of Sequoyah containment, 18:23655 (R;US)
Gas atomized Er_3Ni powder for cryocooler applications, 18:24981 (R;US)
Low temperature pathways to Chevrel phases via reduced molybdenum sulfide cluster complexes, 18:24033 (R;US)
Particle attraction effects on the centrifugal casting and extrusion of alumina, 18:23975 (R;US)
System 80+™ containment: Structural design review, 18:23503 (R;US)

AN SSSR, Leningrad (Russian Federation). Inst. Yadernoj Fiziki
Account for temperature distribution heterogeneity in research reactor kinetics calculations: KINO program, 18:23486 (R;RU;In Russian)
Advanced irradiation of indicative vessel samples in the PIK reactor core, 18:23598 (R;RU;In Russian)
On boiling out of the PIK reactor liquid regulator in the case of the emergency, 18:23530 (R;RU;In Russian)

AN SSSR, Novosibirsk (Russian Federation). Inst. Yadernoj Fiziki
Photodesorption experiments on SSC collider beam tube configurations, 18:24424 (R;US)

AN Ukrainskoj SSR, Kharkov (Ukraine). Fiziko-Tekhnicheskij Inst.
Accelerating section for short-pulse operation of a resonance electron linac, 18:24356 (IA;RU;In Russian)
Acceleration of power pulse ion beams in plasma-filled magnetic channels, 18:25268 (IA;RU;In Russian)
Analysis of transverse instability on a chain of resonators accounting for bunch trajectory disturbance, 18:24316 (IA;RU;In Russian)
Application of H(2s) atom photoionization electrons for measuring energy of H^- ion beam, 18:24359 (IA;RU;In Russian)
Automated control system in charged particle accelerators, 18:24300 (IA;RU;In Russian)
Calculation of characteristics of diaphragmatic waveguide with different period, 18:24353 (IA;RU;In Russian)
Effect of beam holes on collective transition radiation, 18:24320 (IA;RU;In Russian)
EH_{11} wave reflection effecting on the dynamics of beam transverse instability in an electron linac, 18:24318 (IA;RU;In Russian)
Experimental study on beam parameters of the 60 MeV compact electron accelerator, 18:24357 (IA;RU;In Russian)
Ion injector beam potential, 18:24351 (IA;RU;In Russian)
Maximum water purity in cooling systems of electrophysical equipment, 18:24352 (IA;RU;In Russian)
On construction of numerical methods in problems of beam control, 18:24315 (IA;RU;In Russian)
Physical design of electron cooling of the AN Ukrainian SSR IYal accelerating-storage complex, 18:24429 (IA;RU;In Russian)
Polarized electron beam production for a linear accelerator by the method of electron beam shock ionization of polarized hydrogen, 18:24355 (IA;RU;In Russian)
Production of polarized electron beam from dielectrics surface, 18:24354 (IA;RU;In Russian)
Protection system of electron linac accelerating structures, 18:24360 (IA;RU;In Russian)
Spectrum of a circular resonator with diffraction grating loading, 18:24358 (IA;RU;In Russian)
System for measuring accelerated particle bunch charge, 18:24319 (IA;RU;In Russian)
Transition radiation in a waveguide during sequence intersection by a charged particle of waveguide walls, 18:24321 (IA;RU;In Russian)
Transverse dynamics of a beam in a chain of uncoupled resonators, 18:24317 (IA;RU;In Russian)

Anderman/Smith Operating Co., Denver, CO (United States)
Secondary oil recovery from selected Carter sandstone oilfields, Black Warrior Basin, Alabama, 18:22801 (R;US)

Appalachian Oil and Natural Gas Research Consortium, Morgantown, WV (United States)
Measuring and predicting reservoir heterogeneity in complex deposystems: Quarterly technical report, January–March 1993, 18:22792 (R;US)

Argonne National Lab., Idaho Falls, ID (United States)
Advanced control system for the Integral Fast Reactor fuel pin processor, 18:22877 (R;US)
Integral Fast Reactor fuel pin processor, 18:22876 (R;US)
Remote real time x-ray examination of fuel elements in a hot cell environment, 18:24477 (R;US)

Argonne National Lab., Idaho Falls, ID (United States). Fuel Cycle Div.
Automated Fuel Element Closure Welding System, 18:23510 (R;US)
Simplified probabilistic risk assessment in fuel reprocessing, 18:22878 (R;US)

Argonne National Lab., IL (United States)
Analysis of fission gas behavior and foaming of molten uranium-aluminum alloy fuel for nuclear reactors: New Production Reactors Program, 18:23547 (R;US)
Atomic structures and compositions of internal interfaces: Progress report, September 1, 1992–August 31, 1993, 18:23929 (R;US)
Battery testing at Argonne National Laboratory, 18:23694 (R;US)
COMMIX-PPC: A three-dimensional transient multicomponent computer program for analyzing performance of power plant condensers: Volume 1, Equations and numerics, 18:23326 (R;US)
Corrosion performance of iron aluminides, 18:23914 (R;US)
Crack growth behavior of candidate waste container materials in simulated underground water, 18:22916 (R;US)
Database computing in HEP: Progress report, 18:24340 (R;US)
Determination of the shape of a plutonium deposit from a leaking crucible, 18:23456 (R;US)
Emergency exercise methodology, 18:24935 (R;US)
Factors influencing chemical durability of nuclear waste glasses, 18:22912 (R;US)
Fundamental mode rf power dissipated in a waveguide attached to an accelerating cavity, 18:24339 (R;US)
Heat and Seed Recovery Technology Project, 18:23781 (R;US)
Integral measurement of $^9Be(n,2n)^8Be$ in the $^9Be(d, n)$ neutron spectrum, 18:25086 (R;US)
Integrated, flexible, and rapid geophysical surveying, 18:24948 (R;US)
Interim fatigue design curves for carbon, low-alloy, and austenitic stainless steels in LWR environments, 18:23371 (R;US)
Lead exposures and biological responses in military weapons systems: Aerosol characteristics and acute lead effects among US Army artillerymen: Final report, 18:24917 (R;US)
Managing nuclear waste: Social and economic impacts, 18:22914 (R;US)
Modeling of erosion and redeposition processes, 18:25287 (R;US)
Molten fuel fragmentation experiments: Stage 1: New Production Reactors Program, 18:23619 (R;US)
Numerical predictions of natural convection in a uniformly heated pool, 18:23621 (R;US)
Ozone nonattainment: Implications for NO_x and VOC compliance by the electric power industry, 18:23349 (R;US)
Plutonium recovery from spent reactor fuel by uranium displacement, 18:22888 (PA;US)
Progress and status of the Integral Fast Reactor (IFR) fuel cycle development, 18:23457 (R;US)
Shake table tests of long period isolation system for nuclear facilities at soft-soil sites: Volume 1: New Production Reactors Program, 18:23618 (R;US)
Site characterization for the in situ bioremediation of the vadose zone, 18:24658 (R;US)
Study on the colloids generated from testing of high-level nuclear waste glasses, 18:22911 (R;US)

The impact of recent visibility litigation on siting/modifying power plants: Survey and analysis, 18:23352 (R;US)
Toward a verifiable approach to the design of concurrent computations, 18:25385 (R;US)
Transient analysis of dissolution of a reactor bottom head into a melt pool, 18:23620 (R;US)
Wear-mechanism modelling: Final report, 18:23964 (R;US)

Argonne National Lab., IL (United States). Advanced Photon Source Accelerator Systems Div.
The insertion device magnetic measurement facility: Prototype and operational procedures, 18:24338 (R;US)

Requirements on radioactive wastes to be disposed and measures for product control of radioactive wastes - Morsleben repository for radioactive wastes (ERAM) - as of November 1992, 18:22918 (R;DE;In German)

Bundesanstalt fuer Gewaesserkunde, Koblenz (Germany)
Development of a simple bacteria test for routine measurements in waste water. Summary of the final reports of the part projects, 18:24835 (R;DE;In German)

Bundesgesundheitsamt, Berlin (Germany). Inst. fuer Wasser-, Boden- und Lufthygiene
Volume of baseline data on radioactivity in drinking water, ground water, waste water, sewage sludge, residues and wastes of the annual report 1988 'Environmental radioactivity and radiation exposure', 18:24891 (I;DE;In German)

Bundesministerium fuer Forschung und Technologie, Bonn (Germany)
Characterising the mechanical properties of carbon fiber reinforced high-output compound materials. Final report, 18:24015 (R;DE;In German)
Development and practical use of a mobile lidar system to measure the ozone concentration in the troposphere up to 13 km high by means of differential absorption. Final report, 18:24586 (I;DE;In German)
Development of plant technique for large scale separation of thin films from amorphous silicon and silicon compounds. Final report, 18:23260 (I;DE;In German)
Further development of the methodical instruments to calculate ground water movements at repository sites, 18:22977 (R;DE;In German)
Studies into primary gas releases into the reactor building of modular HTR. Project task: Computation of specific pathways. Final report, 18:23622 (R;DE;In German)
System studies on rational energy supply and use of mineralized carbon in the Merseburg region. Final report, 18:23717 (I;DE;In German)

Bundesministerium fuer Umwelt, Naturschutz und Reaktorsicherheit, Bonn (Germany)
Establishment of a real-time electronic expert system to estimate and limit radiological consequences of nuclear facility accidents in the Federal Republic of Germany. Final report, 18:23544 (R;DE;In German)
Value and reliability of findings from previous epidemiologic studies in the assessment of radiation-related cancer risks. Pt. 3. Radiation-related risk of the breast, 18:24870 (R;DE;In German)

Bundesministerium fuer Wirtschaft, Bonn (Germany)
Economy in figures '92, 18:23764 (I;DE;In German)

Bureau of Reclamation, Boise, ID (United States). Pacific Northwest Region
Modeling the system: How computers are used in Columbia River planning, 18:23217 (R;US)

^{243}Am targets for nuclear fission experiments: Requirements and realisation, 18:25119 (RA;XA)
11. IAEA consultants' meeting of the nuclear reaction data centers. Obninsk, 7-11 October 1991: Summary report, 18:25464 (R;XA)
7. meeting of the Atomic and Molecular Data Centre Network, Oak Ridge National Laboratory, Oak Ridge, TN, 9-11 November 1987: Summary report, 18:25241 (R;XA)
A and M data needs for the neutral beam heating system for next-step fusion devices, 18:25266 (RA;XA)
Activation cross section measurement and evaluation for the ^{23}Na(n,2n)^{22}Na reaction, 18:25125 (RA;XA)
Activation cross section measurement for the ^{179}Hf(n,2n)^{178m2}Hf reaction, 18:25126 (RA;XA)
Activation cross sections for the generation of long-lived radionuclides of importance in fusion reactor technology: Texts of papers presented at the 1. meeting of a co-ordinated research programme held in Vienna, 11-12 November 1991, 18:25124 (R;XA)
Activities in the A and M data at ENEA Bologna, Italy. November, 1987, 18:25245 (RA;XA)
Analytic fits of the recommended electron impact ionization cross sections for Be and B ions and atoms, 18:25260 (RA;XA)
Appendix 1, 18:24976 (RA;XA)
Appendix 2, 18:23170 (RA;XA)
Appendix 5, 18:24977 (RA;XA)
Atomic and molecular data for radiotherapy: Summary report of 1. research co-ordination meeting, Vienna, 30 January - 2 February, 18:25187 (R;XA)
Calculations of long-lived isomer production in neutron reactions, 18:25133 (RA;XA)
CDFE for photonuclear researches, 18:25107 (RA;XA)
CDFE progress report - 1991, 18:25122 (RA;XA)
CJD progress report, 18:25465 (RA;XA)
Collisions of Be^{q+} and B^{q+} ions with H, H_2 and He, 18:25191 (RA;XA)
Compilation and evaluation of fission yield nuclear data: Summary report of a consultants' meeting held in Vienna, 27-29 September 1989, 18:25121 (R;XA)
Consistent activation cross section calculations for all stable isotopes of V, Cr, Mn, Fe, Co, Ni, 18:25132 (RA;XA)
Controlled-Fusion Atomic Data Center: Progress report, 18:25242 (RA;XA)
Data activities in RIKEN nuclear data group: Status report, 18:25469 (RA;XA)
Data centers on atomic spectroscopy at the National Bureau of Standards, 18:25171 (RA;XA)
Data needs for electron transfer processes of MeV heavy (positive and negative) ions, applied to electro-magnetic field measurements in plasmas, 18:25265 (RA;XA)
Data on charged-particle-induced reactions: Some problems, 18:25105 (RA;XA)
Database for collision processes involving helium atoms and ions, 18:25189 (RA;XA)
Evaluation of isomeric excitation functions in neutron induced reactions, 18:25134 (RA;XA)
Examples of problems caused by impurities in targets and/or research samples, 18:25115 (RA;XA)
Excitation functions of ^{151}Eu(n,2n)^{150m}Eu and ^{159}Tb(n,2n)^{158}Tb reactions, 18:25128 (RA;XA)
Fission foil characteristics, 18:25118 (RA;XA)
GAPHYOR Data Center. Progress report 1986-1987, 18:25176 (RA;XA)
IAEA advisory group meeting on atomic and molecular data for metallic impurities in fusion plasmas: Summary report, 18:25256 (R;XA)
IAEA advisory group meeting on atomic and molecular data for fusion plasma impurities: Summary report, 18:25262 (R;XA)
IAEA consultants' meeting on atomic data base and fusion applications interface, Vienna, 9-13 May 1988: Summary report, 18:25250 (R;XA)
IAEA consultants' meeting on atomic data base for Be and B: Summary report, 18:25259 (R;XA)
IAEA consultants' meeting on He-beam data base for alpha particle diagnostics of fusion plasmas: Summary report, 18:25257 (R;XA)
IAEA consultants' meeting on thermal response of plasma facing materials and components: Summary report, 18:25307 (R;XA)
IAEA Nuclear Data Section. Progress report, 18:25473 (RA;XA)
IAEA specialists' meeting on carbon and oxygen collision data for fusion plasma research: Summary report, 18:25247 (R;XA)
IAEA specialists' meeting on required atomic database for neutral beam penetration in large tokamaks: Summary report, 18:25251 (R;XA)
Implications of the IAEA CRP on long-lived activation cross sections on waste disposal and materials recycling for fusion reactor materials, 18:25135 (RA;XA)
Intermediate energy nuclear data at the Radium Institute, 18:25123 (RA;XA)
Japan charged-particle nuclear reaction data groupe: Status report, 18:25470 (RA;XA)
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)
Measurement and analysis of ^{165}Ho(n,γ)^{166m}Ho reaction cross section, 18:25127 (RA;XA)
Measurement and analysis of double-differential neutron emission spectra in (P,N) and (α,N) reactions: Summary report, 18:25108 (R;XA)
Measurements and calculations of some activation cross sections for generation of long-lived radionuclides, 18:25129 (RA;XA)
Measurements of activation cross sections for some long-lived nuclides important in fusion reactor technology, 18:25136 (RA;XA)
Measurements of long-lived activation cross sections at 14.7 MeV in the inter-laboratory collaboration with ANL/LANL/JAERI, 18:25130 (RA;XA)
National Nuclear Data Center status report, 18:25458 (RA;XA)
National Nuclear Data Center. Status report, 18:25472 (RA;XA)
NDS status report to the 1987 NRDC meeting, 18:25460 (RA;XA)
NEA Data Bank progress report to the nuclear reaction data centres, 18:25459 (RA;XA)
NEA Data Bank progress report to the NRDC meeting in Obninsk/Moscow, October 1991, 18:25471 (RA;XA)
Nuclear data activities in China, 18:25463 (RA;XA)
Nuclear data needed for neutron therapy: Summary report of the 1. research co-ordination meeting held in Vienna, 17-20 November 1987, 18:24861 (R;XA)

Nuclear data needed for neutron therapy: Summary report of the 2. research co-ordination meeting held in Vienna, 24-27 January 1989, 18:24862 (R;XA)
On the fast neutron spectra shape in the nuclear constant measurement experiments with an electrostatic accelerator, 18:25113 (RA;XA)
On the importance of target parameters in heavy ion positron spectroscopy, 18:25117 (RA;XA)
On the influence of sample and target properties on the results of energy-dependent cross section measurements, 18:25111 (RA;XA)
On the necessity of alternative methods to determine sample thicknesses and masses, 18:25059 (RA;XA)
Present status of fast neutron therapy survey of the clinical data and of the clinical research programmes, 18:24863 (RA;XA)
Problems associated with the production of monoenergetic neutrons, 18:25114 (RA;XA)
Problems of tritium targets, 18:24978 (RA;XA)
Progress and future activities at the Joint Institute for Laboratory Astrophysics (JILA), 18:25186 (RA;XA)
Progress on nuclear data work in China, 18:25467 (RA;XA)
Progress report of atomic data group, IPP/Nagoya 1986 - 1987, 18:25243 (RA;XA)
Progress report of the A and M Data Unit, 18:25246 (RA;XA)
Radiative losses and electron cooling rates for carbon and oxygen plasma impurities, 18:25261 (R;XA)
Recommended data base for electron impact excitation and ionization of helium atoms, 18:25188 (RA;XA)
Recommended data for electron impact excitation and ionisation of Be^{q+} and B^{q+} ions, 18:25190 (RA;XA)
Remarks on tritium applications and handling at Oak Ridge National Laboratory, 18:24154 (RA;XA)
Report of CAJaD, 18:25466 (RA;XA)
Report of the working group on the spectroscopic and electron-impact collision data base for C^{q+} and O^{q+} ions, 18:25248 (RA;XA)
Report of the working group on the data base for collisions of C^{q+} and O^{q+} ions with H, H_2 and He, 18:25249 (RA;XA)
Report on the 9. IAEA consultants' meeting of the nuclear reaction data centres: Including the 20. four-centres meeting of the neutron data centers and the 10. meeting on charged particle nuclear data compilation, 18:25457 (R;XA)
Semiconductor detectors for the calibration of the targets from fissile radionuclides, 18:24440 (RA;XA)
Some general considerations on the influence of sample characteristics on nuclear data measurements, 18:25058 (RA;XA)
Spectroscopic and electron-ion collision data for plasma impurities, 18:25263 (RA;XA)
Status of thorium cycle nuclear data evaluations: Comparison of cross-section line shapes of JENDL-3 and ENDF-B-VI files for ^{230}Th, ^{232}Th, ^{231}Pa, ^{233}Pa, ^{232}U, ^{233}U and ^{234}U, 18:25120 (R;XA)
Status report of RIKEN Nuclear Data Group, 18:25462 (RA;XA)
Studies of the effect of the properties of neutron producing targets and sample backings on neutron cross section measurements, 18:25109 (RA;XA)
Summary of charged particle data collections, 18:25106 (RA;XA)
Summary report of the IAEA advisory group meeting on nuclear data for neutron multiplication in fusion-reactor first-wall and blanket materials, 18:25308 (R;XA)
Supply of samples and targets by CBNM, Geel, Belgium, 18:23171 (RA;XA)
Survey of atomic data base needs and accuracies for helium beam stopping and alpha particle diagnostics for ITER, 18:25258 (RA;XA)
Target development for medical radioisotope production at a cyclotron, 18:23172 (RA;XA)
The activities on CENDL, EXFOR, CINDA and WRENDA in China, 18:25468 (RA;XA)
The Atomic and Molecular Data Centre at Queen's University Belfast: Progress report, 18:25244 (RA;XA)
The future of high-let radiation in cancer therapy. Justification of the heavy-ion therapy programmes, 18:24864 (RA;XA)
The influence of target and sample properties on nuclear data measurements: Summary report of the IAEA advisory group meeting in co-operation with the International Nuclear Target Development Society (INTDS), held in Darmstadt, Germany, 5-9 September 1988, 18:25057 (R;XA)
The influence of target impurities on the accuracy of reaction cross section measurements, 18:25110 (RA;XA)
The influence of target properties on nuclear spectroscopy measurements, 18:25060 (RA;XA)
The influence of water absorption in a sample for neutron cross section measurements, 18:25112 (RA;XA)
The JAERI activities on A and M data for fusion. Status report, November 1987, 18:25185 (RA;XA)
The main results of the USSR neutron data activities in 1986-1987, 18:25461 (RA;XA)
The present status of A and M data research in China. The introduction of CRAAMD, 18:25456 (RA;XA)
The supply of stable and active isotopes and targets from the Harwell Laboratory, 18:23173 (RA;XA)
The target for heavy ion physics, 18:25116 (RA;XA)
Total neutron cross-section of U-238 as measured with filtered neutrons of 55 keV and 144 keV, 18:25137 (R;XA)
Tritium solid targets for intense D-T neutron production and its related problems, 18:24979 (RA;XA)
Tritium-processing operations at the Oak Ridge National Laboratory with emphasis on safe-handling practices, 18:24155 (RA;XA)
Use of Rutherford Backscattering to determine uranium deposit uniformity, 18:24980 (RA;XA)
Working group report on atomic data status and needs concerning plasma impurities colliding with H, H_2 and He, 18:25264 (RA;XA)
Working group report on electron-impact processes: Recommended database for electron impact excitation and ionization, 18:25253 (RA;XA)
Working group report on electron removal: Recommended database for charge exchange and ionization, 18:25255 (RA;XA)
Working group report on ion-impact excitation: Recommended database for ion-impact excitation of atomic hydrogen, 18:25254 (RA;XA)
Working group report on the required atomic database for neutral hydrogen beam penetration in large tokamaks, 18:25252 (RA;XA)

Radionuclide solubility and speciation studies for the Yucca Mountain site characterization project, 18:22998 (R;US)
Single fracture aperture patterns: Characterization by slit-island fractal analysis, 18:23002 (R;US)
Some new/old approaches to QCD, 18:25029 (R;US)
Spectroscopic studies of Synechococcus sp PCC 7002 phycobilisome core mutants, 18:23262 (R;US)
The effect of crystal tilt on high resolution micrographs of small metal particles, 18:24084 (R;US)
The method of Laplace Transform MultiQuadrics (LTMQ) for the solution of the groundwater flow equation, 18:24250 (R;US)
The role of fault zones in affecting multiphase flow at Yucca Mountain, 18:23003 (R;US)
Theoretical examination of transfer cavities in a standing-wave free- electron laser Two-Beam Accelerator, 18:24377 (R;US)
Tris(Cyclopentadienyl)Uranium-t-Butyl: Synthesis, reactions, and mechanisms, 18:24110 (R;US)

Lawrence Livermore National Lab., CA (United States)
3D gyrokinetic particle-in-cell simulation of fusion plasma microturbulence on parallel computers, 18:25285 (R;US)
A comparison of energy-window and spectral-fitting methods for the estimation of carbonate content in rocks using neutron-induced gamma rays, 18:24530 (RA;US)
A Fabry–Perot microinterferometer for visible wavelengths, 18:24473 (R;US)
A fast frame rate 512 x 512 CCD digital camera system, 18:24476 (R;US)
A fiber optic array for continuous energy coverage in a gamma ray spectrometer, 18:24465 (R;US)
A fugacity approach for modeling the transport of airborne organic chemicals in an air/plant/soil system, 18:24647 (R;US)
A guide for thermal testing transport package for radioactive material: Hypothetical accident conditions, 18:22904 (R;US)
A magnetically contained Mach three expansion, 18:24555 (R;US)
A methodology for calculating the response of structures to earthquakes on specific faults, 18:24181 (R;US)
A modeling perspective on cloud radiative forcing, 18:24643 (R;US)
A new three-dimensional radiation-hydrodynamics code, 18:24534 (RA;US)
A numerical study of inviscid, supersonic mixing layers, 18:24202 (RA;US)
A second-order closure for supersonic turbulent flows application to the supersonic mixing, 18:24223 (RA;US)
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer, 18:24654 (R;US)
A simulation model for uranium recovery processes, 18:23158 (R;US)
A strategy for improving pump and treat ground water remediation, 18:24797 (R;US)
A two-dimensional turbulence-ablation model to simulate the helix in PINEX LOS pipes, 18:24537 (RA;US)
A zeroth order statistical model for fracture in rock in compression: Revision 1, 18:24962 (R;US)
A "SUPERCODE" for systems analysis of tokamak experiments and reactors, 18:25325 (R;US)
Absence of superconductivity in $(Pr_{1.5}Ce_{0.5})Sr_2Cu_2NbO_{10}$: A general correlation with magnetic ordering, 18:23982 (R;US)
Absorption and damage thresholds of low defect density hafnia deposited with activated oxygen, 18:23983 (R;US)
AMIP: Diagnostic subproject on the variability in the tropics: Synoptic to intraseasonal time scales, 18:24965 (R;US)
AMIP: The Atmospheric Model Intercomparison Project, 18:24644 (R;US)
AMIP: The Atmospheric Model Intercomparison Project: Program for Climate Model Diagnosis and Intercomparison: Revision 1, 18:24645 (R;US)

An approach for using data supplied by the former Soviet Union to improve US treaty monitoring, 18:23896 (R;US)
An evaluation of a teleoperated waste-site survey technique, 18:24791 (R;US)
An experimental study of turbulent mixing by Rayleigh-Taylor instabilities and a two-fluid model of the mixing phenomena, 18:24188 (RA;US)
An on-site system for scanning NTS boreholes for artificial gamma-emitting nuclides, 18:24531 (RA;US)
Analysis of beam loading in electrostatic columns, 18:24427 (R;US)
Analysis of shock-interface and shock-turbulence interactions by direct simulation and turbulence transport modeling, 18:24219 (RA;US)
Analysis techniques for directly and indirectly driven hydrodynamic experiments on Nova, 18:25283 (R;US)
Application of a two-equation turbulence mix model, 18:24201 (RA;US)
Application of an interactive controlled gantry robot in a glove box environment, 18:24180 (R;US)
Application of linear inverse theory to borehole gravity data, 18:24532 (RA;US)
Application of the Ames/Salmonella assay to routine industrial hygiene work, 18:24650 (R;US)
Application to selected sites of the DG-1015 methodology to determine probabilistic controlling earthquakes, 18:24960 (R;US)
Arms control and nonproliferation technologies: Fourth quarter 1992, 18:23890 (R;US)
Automated net shaped molding of continuous fiber composites, 18:24052 (R;US)
Bacterial distribution and metabolic activity in subsurface sediments from a gasoline spill, 18:22845 (R;US)
Beam quality improvements in copper vapor laser oscillators, 18:22871 (RA;US)
Calculations of ground motion on Pahute Mesa, 18:24542 (RA;US)
Catalytic activity of oxidized (combusted) oil shale for removal of nitrogen oxides with ammonia as a reductant in combustion gas streams, Part 1, 18:22862 (R;US)
Cavity collapse safety system, 18:24546 (RA;US)
Cavity pressure measurements on DISKO ELM, 18:24544 (RA;US)
Characterization of ground water contamination at the LLNL main site: A case study, 18:24795 (R;US)
Characterization of high-power RF structures using time-domain field codes, 18:25329 (R;US)
Chemical and biological factors affecting bioavailability of contaminants in seawater, 18:24836 (R;US)
Chemical health risk assessment for hazardous and mixed waste management units at Lawrence Livermore National Laboratory: Volume 1, 18:23045 (R;US)
Closure of Building 624 incinerator, 18:23052 (R;US)
Closure report for Building 875 sump encased in concrete, 18:23048 (R;US)
Cloud radiative forcing: A modeling perspective, 18:24648 (R;US)
Comments on computational underwater acoustics, 18:25434 (R;US)
Comments on possible causes of recent global warming, 18:24656 (R;US)
Comparison of weak-shock reflection factors for wedges, cylinders and blast waves, 18:25005 (R;US)
Compatibility specifications for AVI equipment in California, 18:23830 (R;US)
Compressibility in turbulence generation and mixing, 18:24199 (RA;US)
Compressibility influences on boundary-layer transition, 18:24189 (RA;US)
Compressible, fully de-aliased, two-dimensional spectral method simulations of fluid and magneto-fluid turbulence, 18:24212 (RA;US)
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain, 18:25204 (R;US)
Computations of supersonic flows: Shears, shocks, and detonations, 18:24231 (RA;US)
Computer operation of the sensitive neutron counter, 18:25154 (R;US)
Connecting UNICOS data migration to a UniTree storage system, 18:25440 (R;US)
Construction quality assurance closure report, Lawrence Livermore National Laboratory Site 300, Pits 1 and 7: Volume 1, Text, tables, figures, and appendices A–D, 18:23046 (R;US)
Construction quality assurance closure report, Lawrence Livermore National Laboratory Site 300, Pits 1 and 7: Volume 2, Appendices E–P, 18:23047 (R;US)
Containment phenomenology using a new shear-strain-based computational damage model for TUFF, 18:24541 (RA;US)
Conventional Strategic Deterrence, 18:24499 (R;US)
Coupled ocean-atmosphere GCM simulation of Southern Oscillation phenomena, 18:24652 (R;US)
Creation and enhancement of turbulent mixing zones due to high mach number shock-interface interaction, 18:24226 (RA;US)
Critical issues for vacuum systems in B factories, 18:24426 (R;US)
Cryocooler producibility, within a MODIL concept, 18:24563 (R;US)
Dalhart post shot investigation, 18:24545 (RA;US)
Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL, 18:24475 (R;US)
Damping measurements for ultra-high carbon steel/brass laminates, 18:24053 (R;US)
Deconvolution for positive signals, 18:25439 (R;US)
Demonstration of automated robotic workcell for hazardous waste characterization, 18:24182 (R;US)
Determining the controlling earthquake from probabilistic hazards for the proposed Appendix B, 18:23677 (R;US)
Development and evaluation of a HEPA filter for increased strength and resistance to elevated temperature, 18:23508 (R;US)
Development and evaluation of a HEPA filter for increased strength and resistance to elevated temperature: Revision 1, 18:23148 (R;US)
Discussion of the role of many-electron motions in multiphoton ionization and excitation, 18:25194 (R;US)
DISKO ELM box A environment calculations, 18:24535 (RA;US)
DISKO ELM pipe flow calculations, 18:24536 (RA;US)
Distributed absorption and inhibited heat transport, 18:25326 (R;US)
DMS project, attachment 1: Final report and user's manual for the Analog and Driver Breadboard and Test Set, 18:24286 (R;US)
Dose-to-risk conversion factors for low-level tritium exposures, 18:24853 (R;US)
Effect of particulate additives on heat transfer from a shock-induced turbulent boundary layer, 18:24210 (RA;US)
Effect of Y on cation and anion grain boundary diffusion in chromia, 18:23980 (R;US)
Effective stress model for rocks, 18:24539 (RA;US)
Effects of aqueous solution compositions on Aerocapacitor energy density, 18:23693 (R;US)
Electrical characteristics of short pulse gated microchannel plate detectors, 18:25324 (R;US)
Electromechanical batteries and the electric utilities: An estimate of the potential market for high-strength fibers, 18:23689 (R;US)
Electron temperature measurements of x-ray laser plasmas, 18:25284 (R;US)
Electroplating waste minimization at Lawrence Livermore National Laboratory, 18:23842 (R;US)
Enhancing aquifer cleanup with reinjection, 18:24793 (R;US)
Environmental transport and human exposure: A multimedia approach in health-risk policy, 18:24798 (R;US)
Essentially non-oscillatory shock capturing methods applied to turbulence amplification in shock wave calculations, 18:24232 (RA;US)
ETA-II accelerator upgrades, 18:25322 (R;US)
Euler equation of one-dimensional compressible gas and locally-equilibrium molecular dynamics, 18:24213 (RA;US)
Evaluating safeguards effectiveness against protracted theft of special nuclear material by insiders, 18:23156 (R;US)
Evaluation of austenitic alloys 304L and 316L and alloy 825 under tuff-repository conditions, 18:23950 (R;US)
Evidence of Rayleigh-Taylor instabilities in tri-layer targets, 18:24224 (RA;US)
Evolution of the laser ablatively driven Rayleigh-Taylor mix layer, 18:24191 (RA;US)

Experimental A&PCT research and development efforts to characterize mixed-waste forms, 18:23053 (R;US)
Experimental investigation of turbulent mixing by Rayleigh-Taylor instability, 18:24239 (RA;US)
Experimental observations of shock stability and shock-induced turbulence, 18:24218 (RA;US)
Experimental research of gravitational instability and turbulization of flow at the noble gases interface, 18:24238 (RA;US)
Extension of second-moment turbulence models in cases with large density non-uniformity, 18:24206 (RA;US)
Fabry Perot velocimetry on detonating LX-17 in planar and spherically divergent geometries, 18:24527 (R;US)
Feasibility assessment of electromechanical batteries for electric vehicles, 18:23697 (R;US)
Fiber-optic cable replacement for NTS applications, 18:24556 (R;US)
Field measurements of tracer gas transport induced by barometric pumping, 18:24548 (RA;US)
Flow visualization of shock propagation in baffle systems, 18:24500 (R;US)
Formal methods in the development of safety critical software systems: Version 3.0, 18:23535 (R;US)
Formation elastic parameters from acoustic and density logs in emplacement holes, 18:24533 (RA;US)
Formation of textured YBCO films by laser ablation, 18:23981 (R;US)
Fortran graphics routines for the Macintosh, 18:25452 (R;US)
Four-GHz analog data acquisition system using high-frequency guided-wave modulators, 18:24487 (R;US)
Gamma-insensitive optical focal plane array, 18:24463 (R;US)
Gamma-ray and surface organic results of the robotic survey of Pit 9 at INEL: Technical evaluations report for work done at the raiological waste management complex at the Idaho National Engineering Laboratory, Summer, 1991, 18:24788 (R;US)
Gas dynamics in the central cavity of HYLIFE-II reactor, 18:25318 (R;US)
Gas flow calculations and measurements for the Ledoux event, 18:24551 (RA;US)

The cloud radiative feedback of a midlatitude squall line system and implication for climate study, 18:24653 (R;US)
The dissolution rate of UO_2 in the alkaline regime under oxidizing conditions using a simplified ground water analog, 18:23050 (R;US)
The Energy Economics Modeling Project and the Lawrence Laboratories Energy Model, 18:23724 (R;US)
The impact of horizontal resolution on moist processes in the ECMWF model, 18:24947 (R;US)
The importance of hard core repulsion in models of activity coefficients in aqueous electrolyte solutions: Illustration in the case of hydration theory, 18:24113 (R;US)
The intensity of knock in an internal combustion engine: An experimental and modeling study: Revision 1, 18:23861 (R;US)
The interaction of a supernova remnant with interstellar clouds using high order local adaptive mesh refinement methods, 18:24228 (RA;US)
The LLNL interactive system for nuclear data evaluation, 18:25061 (R;US)
The national machine tool partnership: Final report and recommendations of the Machine Tool Task Team, 18:24183 (R;US)
The optical constants and spectral specular reflectivity of highly oriented pyrolytic graphite (HOPG), 18:24055 (R;US)
The PVM systems: An in-depth analysis and documenting study – Concise edition, 18:25441 (R;US)
The role of data management and decision support systems in the implementation of smart pump and treat, 18:24799 (R;US)
The role of human activity and land use change in atmospheric chemistry and air quality, 18:24657 (R;US)
The role of ITER in the US MFE Program Strategy, 18:25335 (R;US)
The role of x-ray induced damage in biological micro-imaging, 18:24913 (R;US)
The stability of vortex arrays, 18:24197 (RA;US)
The structure of supersonic turbulent boundary layers: What we know and what we think we know, 18:24214 (RA;US)
The urban combat computer assisted training system, UCCATS, 18:24503 (R;US)
The utility and role of treaties in Nuclear Arms Control, 18:23887 (R;US)
The Zipcode message-passing system, 18:25442 (R;US)
Thermodynamic evolution of nuclear cavities, 18:24543 (RA;US)
Three dimensional time-dependent hydrodynamic and propagation modeling of x-ray laser emission, 18:25327 (R;US)
Time-dependent dynamics of an atom in an intense laser field, 18:25198 (R;US)
Tools and techniques for estimating high intensity RF effects, 18:24502 (R;US)
Towards the development of a global inventory for black carbon emissions, 18:24649 (R;US)
Transmission electron microscopy studies of multilayer structures: Report on work through November 30, 1991, 18:25218 (R;US)
Travel to Institut d'Astronomie et d'Astrophysique to teach and to pursue research in various problems in nuclear astrophysics: Foreign trip report, 1 January–1 September 1992, 18:24987 (R;US)
Treatment of ground water contaminated with volatile organic compounds using second generation ultraviolet light technology, 18:24790 (R;US)
Truck accident involving unirradiated nuclear fuel, 18:22905 (R;US)
Turbulent jump relations in the interaction of a shock wave with a turbulent region, 18:24221 (RA;US)
Two dimensional model study of atmospheric transport using carbon-14 and strontium-90 as inert tracers, 18:24651 (R;US)
U-AVLIS program overview, 18:22869 (RA;US)
Ultraviolet/hydrogen peroxide oxidation as an alternative to incineration for Rocky Flats combustible wastes, 18:24802 (R;US)
Underground radionuclide migration at the Nevada Test Site, 18:24789 (R;US)
Uniform user and group IDs on a large network, 18:25438 (R;US)
Use of three-dimensional, high-resolution seismic technology to optimize the location of remedial systems, 18:24801 (R;US)
Virtual sound for virtual reality, 18:25446 (R;US)
Vortex formation in the wake of a flat plate for subsonic and supersonic freestream mach numbers, 18:24198 (RA;US)
Vortex shedding and merging in high-speed confined shear flows, 18:24205 (RA;US)
Waste disposal of HYLIFE II structure: Issues and assessment, 18:23951 (R;US)
Waste salt recovery, recycle, and destruction, 18:23055 (R;US)
Wavelength considerations in soft x-ray projection lithography, 18:24290 (R;US)
Whistler wave driven plasma thruster, 18:23854 (R;US)
X-ray conversion in preformed plasmas, 18:25169 (R;US)
X-ray lasers as sources for x-ray microscopy, 18:23182 (R;US)
X-ray production ~130 Å from laser-produced plasmas for projection x-ray lithography applications, 18:25181 (R;US)
Zerodur polishing process for high surface quality and high efficiency, 18:24054 (R;US)
[Travel to France to study the large ultra-precision machine tools for the SDI sponsored Alpha Laser Program]: Foreign trip report, August 19–September 6, 1992, 18:24148 (R;US)

Lawrence Livermore National Lab., El Segundo, CA (United States)
Turbulent wall jet in blast wave precursor, 18:25008 (R;US)

Lehigh Univ., Bethlehem, PA (United States)
Binding and catalytic reduction of NO by transition metal aluminosilicates: Final technical progress report, September 1989–August 1992, 18:24100 (R;US)
High octane ethers from synthesis gas-derived alcohols: Quarterly technical progress report, April–June 1992, 18:22704 (R;US)

Little (Arthur D.), Inc., Cambridge, MA (United States)
Study of long term options for electric vehicle air conditioning, 18:23869 (R;US)

Loegstoer Roer A/S (Denmark)
Oxygen occurrence in total district-heating systems with a large number of plastic district heating pipes, 18:23849 (R;DK;In Danish)

Lomax Exploration Co., Salt Lake City, UT (United States)
Green River Formation Water Flood Demonstration Project, Uinta Basin, Utah: Quarterly technical progress report, January 1–March 31, 1993, 18:22802 (R;US)

Los Alamos Economic Development Corp., NM (United States)
[Los Alamos National Laboratory industrial applications and technology transfer]: Final report, 18:23749 (R;US)
[Los Alamos National Laboratory industrial applications and technology transfer]: Annual report, [October 1990–September 1991], 18:23750 (R;US)

Los Alamos National Lab., NM (United States)
$\mu^+ \rightarrow e^+\gamma$, 18:25044 (R;US)
A continuation method for computing non-linear 3-D free surface flows, 18:24828 (R;US)
A new chopper spectrometer for neutron Brillouin scattering and low-angle neutron inelastic scattering: PHAROS (Phase 1), 18:24448 (R;US)
A new limit on the rate-density of evaporating black holes, 18:24999 (R;US)
A study of the role of homogeneous process in heterogeneous high explosives, 18:24523 (R;US)
Advanced computers and simulation, 18:24325 (R;US)
Advanced Field Artillery System gun mount thermal management study: Phase 1 summary, 18:24163 (R;US)
Advanced magnetic flux compression generator development issues: A comparison of coaxial and disk generators, 18:23782 (R;US)
Advanced oxidation and reduction processes: Closed-loop applications for mixed waste, 18:22996 (R;US)
An investigation of sulfur concentrations in soils and pine needles in Bandelier National Monument, New Mexico, 18:24754 (R;US)
An investigation of sulfur concentrations in soils and pine needles in Canyonlands National Park, Utah, 18:24755 (R;US)
An investigation of sulfur concentrations in soils and pine needles in Chaco Culture National Historical Park, New Mexico, 18:24756 (R;US)
Analytic score distributions and moments for a spatially continuous tridirectional Monte Carlo transport problem, 18:25162 (R;US)

Application of geographic information systems to waste minimization efforts at Los Alamos National Laboratory, 18:22995 (R;US)
Beam position monitoring in the 100-MHz to 500-MHz frequency range using the log-ratio technique, 18:24372 (R;US)
Characterization of metal-loaded plastics: [Final report], 18:24519 (R;US)
Comments on "global defense and strategic stability", 18:24559 (R;US)
Completing fault models for abductive diagnosis, 18:25408 (R;US)
Computer modeling program for fragment trajectories within a bomb stack: Final report, 18:24520 (R;US)
DARHT operations and maintenance manual, 18:24371 (R;US)
Depleted uranium risk assessment at Aberdeen Proving Ground, 18:24761 (R;US)
Destruction of nitrates, organics, and ferrocyanides by hydrothermal processing, 18:22992 (R;US)
Development of an operational tool for biomonitoring using constant pressure respirometry: [Final report], 18:24827 (R;US)
Distributed processor Monte Carlo: MCNP results on a 16-node IBM cluster, 18:25163 (R;US)
Dynamic buckling of containments: The influence of damping, 18:23647 (R;US)
Ecological risk assessment of depleted uranium in the environment at Aberdeen Proving Ground: Annual report, 1991, 18:24759 (R;US)
Electrocatalysis issues in polymer electrolyte fuel cells, 18:23791 (R;US)
Elemental composition of background soils from Arches National Park, Utah, 18:24753 (R;US)
Engineering assessment of mixed waste management options: Volume 2: [Final report], 18:22989 (R;US)
Eta production at the LAMPF P^3 channel, 18:25043 (R;US)
Expectations for a second US Hot Dry Rock Site, 18:23303 (R;US)
Experimental observations of resistive cooling in a Penning trap, 18:25196 (R;US)
Fast interceptors for theater boost-phase intercept, 18:24560 (R;US)
Funneling experience at Los Alamos: Experiments and designs, 18:24375 (R;US)
Genetic algorithms for DNA sequence assembly, 18:24852 (R;US)
HELGA HPGe detectors: Final report, 18:24446 (R;US)
High temperature heat pipe experiments in low earth orbit, 18:24161 (R;US)
High-energy density physics at Los Alamos, 18:25315 (R;US)
Hybrid S_N/Monte Carlo research and results, 18:25164 (R;US)
Hydrodynamic calculations of 20-TeV beam interactions with the SSC beam dump, 18:24374 (R;US)
Hypernuclear physics with a neutral meson spectrometer, 18:25153 (R;US)
Imaging of magnetospheric dynamics using low energy neutral atom detection, 18:24994 (R;US)
Impact of DOE Orders on Waste Management Operation: Volume 1: [Final report], 18:22988 (R;US)
Instrumentation and procedures for moisture corrections to passive neutron coincidence counting assays of bulk PuO_2 and MOX powders, 18:23893 (R;US)
Ion anisotropy driven waves in the earth's magnetosheath and plasma depletion layer, 18:24996 (R;US)
Jet initiation thresholds of nitromethane, 18:24522 (R;US)
KIVA-3: A KIVA program with block-structured mesh for complex geometries, 18:24135 (R;US)
Laboratory and field studies related to the Hydrology/Radionuclide Migration Project: Progress report, October 1, 1991–September 30, 1992, 18:24757 (R;US)
MACCS versus GENII: Code comparison, 18:24894 (R;US)
Manipulating remotely-sensed data with Khoros, 18:24762 (R;US)
Material containment enclosure, 18:24168 (PA;US)
Material removal processes: Engineering mechanics consideration, 18:24162 (R;US)
Measurements of electron densities and collision frequencies in high power microwave breakdown plasmas in low pressure air: Final report, 18:25197 (R;US)
Metal oxide varistor feasibility study, 18:24278 (R;US)
MHD simulation of deuterium-fiber-initiated Z-pinches with two-fluid effects, 18:25273 (R;US)
Micromechanical strength effects in shock compression of solids, 18:23942 (R;US)
Migration barrier covers for radioactive and mixed waste landfills, 18:22993 (R;US)
Natural-circulation flow pattern during the gamma-heating phase of an LBLOCA in a heavy-water moderated reactor, 18:23645 (R;US)
New Mexico Geochronology Research Laboratory: Zuni-Bandera volcanic field road log, 18:24957 (R;US)
Next stages in HDR technology development, 18:23302 (R;US)
No-lost "Theorem" for parity violating nucleon-nucleon scattering experiments, 18:25046 (R;US)
On application of SAMFT1D and SAMFT2D codes to the carbon tetrachloride data from Westinghouse Hanford Corporation of the 200 West Area at Hanford, 18:24758 (R;US)
Operational characteristics of a 100-mA, 2-MeV radio-frequency quadrupole, 18:24373 (R;US)
Oxygen sparging of residue salts, 18:22994 (R;US)
Parity nonconservation in proton scattering at higher energies, 18:25020 (R;US)
Partitioning high-level waste from alkaline solution: A literature survey, 18:22987 (R;US)
Polarization diagnostics and optical pumping development for OPPIS and LAMPF, 18:24376 (R;US)
Pore scale flow and examination of the effects of scaling on improved oil recovery processes: Final report, 18:22821 (R;US)
Prediction of alumina penetration, 18:23976 (R;US)
Preliminary toxicology study of 3,6-diamino-1,2,4,5-tetrazine, 18:24930 (R;US)
Proceedings of the first geological materials constitutive modeling workshop, 18:24955 (R;US)
Programmable spectral imaging method and apparatus, 18:24086 (PA;US)
Quality assurance for environmental chemistry, 1991: Volume 1, 18:24081 (R;US)
Quality assurance for environmental chemistry, 1991: Volume 2, 18:24082 (R;US)
Quantum Monte Carlo by message passing, 18:25202 (R;US)
Quasifree $(\vec{p}, \vec{n})$ reactions and enhancement of pionic processes, 18:25152 (R;US)
Radiological hazard classification of DOE facilities by DOE STD-1027-92: LANL nuclear facility list, 18:23135 (R;US)
Recommendations for future low-level and mixed waste management practices at Los Alamos National Laboratory, 18:22991 (R;US)
Regional climatology sensitivity studies, 18:24595 (R;US)
Remote sensing, image processing and GIS training and technical assistance for Commission Ejecutiva Hidroelectrica Del Rio Lempa (CEL), San Salvador, El Salvador, 18:23218 (R;US)
Report on dipole-dipole resistivity and technology transfer at the Ahuachapan Geothermal field Ahuachapan, El Salvador, 18:23297 (R;US)
Report on high energy neutron dosimetry workshop, 18:24895 (R;US)
Rietveld refinement of magnetic structures from pulsed-neutron-source powder-diffraction data, 18:25215 (R;US)
SCDAP/RELAP5 independent peer review, 18:23644 (R;US)
Schemes for the use of conducting polymers as active materials in electrochemical supercapacitors, 18:24035 (R;US)
Search for UHE emission from Cygnus X-3, 18:24997 (R;US)
Search for ultra-high energy emission from Geminga and five unidentified EGRET sources, 18:24998 (R;US)
Silicon-based elementary particle tracking system: Materials science and mechanical engineering design, 18:24447 (R;US)
Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids, 18:25230 (R;US)
Simplified dynamic buckling assessment of steel containments, 18:23646 (R;US)
Solar wind channels for MeV particles, 18:24995 (R;US)
Some outstanding issues in pion scattering at energies above the Δ resonance, 18:25045 (R;US)

Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch, 18:25177 (R;US)
Special design problems and solutions for high powered continuous duty linacs, 18:24303 (R;US)
Status of the PSR improvement program, 18:24430 (R;US)
Superlattice electroabsorption radiation detector, 18:24445 (R;US)
Survey for bats in the Los Alamos National Environmental Research Park, with special emphasis on the spotted bat, Euderma maculatum, 18:24760 (R;US)
Synthesis and characterization of 1,4-dinitroglycoluril (DINGU), 18:24518 (R;US)
Synthesis of organic ligands for f-element separations: Final report, 18:24083 (R;US)
Temperature effects on failure thickness and deflagration-to-detonation transition in PBX 9502 and TATB, 18:24521 (R;US)
The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point, 18:25053 (R;US)
The FBI wavelet/scalar quantization standard for gray-scale fingerprint image compression, 18:25409 (R;US)
The Lathrop Wells volcanic center: Status of field and geochronology studies, 18:22990 (R;US)
The nondestructive assay of 55-gallon drums containing uranium and transuranic waste using passive-active shufflers, 18:22986 (R;US)
The superfluid Stirling refrigerator, a new method for cooling below 0.5 K, 18:24982 (R;US)
Theory of nonlinear elastic behavior in rock, 18:24956 (R;US)
Treating water-reactive wastes, 18:22997 (R;US)
Two-dimensional simulations of foil implosion experiments on the Los Alamos capacitor bank, 18:25274 (R;US)
USSOUTHCOM Counterdrug Modeling and Simulation System (CMASS) report: Final report, 18:24490 (R;US)
[Los Alamos National Laboratory industrial applications and technology transfer]: Final report, 18:23749 (R;US)
[Los Alamos National Laboratory industrial applications and technology transfer]: Annual report, [October 1990–September 1991], 18:23750 (R;US)

Louisiana State Univ., Baton Rouge, LA (United States). Dept. of Physics and Astronomy
The structure of nuclei far from stability: Progress report, May 15, 1992–May 14, 1993, 18:25067 (R;US)

Lovelace Biomedical and Environmental Research Inst., Albuquerque, NM (United States). Inhalation Toxicology Research Inst.
Health effects models for nuclear power plant accident consequence analysis: Modification of models resulting from addition of effects of exposure to alpha-emitting radionuclides: Revision 1, Part 2, Scientific bases for health effects models, Addendum 2, 18:23545 (R;US)
Inhalation Toxicology Research Institute annual report, October 1, 1991–September 30, 1992, 18:24896 (R;US)

Lovelace Medical Foundation, Albuquerque, NM (United States)
Nuclear magnetic resonance studies of granular flows: Technical progress report for the quarter ending March 31, 1993, 18:24248 (R;US)

M

Marine Biological Lab., Woods Hole, MA (United States)
Summer investigations into the metabolic diversity of the microbial world: Progress report, May 5, 1992–April 30, 1993, 18:24866 (R;US)

Marine Biological Lab., Woods Hole, MA (United States). Ecosystems Center
Origins and fates of DOM along the New England continental margin: Techical progress report, Year 1, 18:24815 (R;US)

Martin Marietta Astro Space, Philadelphia, PA (United States)
GPHS-RTGs in support of the Cassini mission: Semi annual technical report, 28 September 1992–28 March 1993, 18:23183 (R;US)

Martin Marietta Energy Systems, Inc., Piketon, OH (United States)
Engineering performance metrics, 18:25381 (R;US)

Maryland Univ., College Park, MD (United States)
Experimental gyroklystron research at the University of Maryland for application to TeV linear colliders, 18:24345 (R;US)

Maryland Univ., College Park, MD (United States). Dept. of Chemistry
Mass and charge distributions in iron-induced reactions and excitation energy division between the fragments of the 672-MeV $^{56}Fe + {}^{165}Ho$ reaction, 18:25100 (R;US)

Maryland Univ., College Park, MD (United States). Dept. of Chemistry and Biochemistry
Mass and charge distributions in chlorine-induced nuclear reactions, 18:25098 (R;US)
The decay of hot nuclei formed in La-induced reactions at E/A=45 MeV, 18:25099 (R;US)

Maryland Univ., College Park, MD (United States). Dept. of Materials and Nuclear Engineering
Procedure for analysis of common-cause failures in probabilistic safety analysis, 18:23660 (R;US)

Massachusetts Inst. of Tech., Cambridge, MA (United States)
Conversion of light hydrocarbon gases to metal carbides for production of liquid fuels and chemicals: Quarterly technical status report, January 1–March 31, 1993, 18:22857 (R;US)

Massachusetts Inst. of Tech., Cambridge, MA (United States). Dept. of Materials Science and Engineering
Transport phenomena in welds with emphasis on free surface phenomena, 18:23916 (R;US)

Massachusetts Inst. of Tech., Cambridge, MA (United States). Plasma Fusion Center
[Travel by Plasma Fusion Center personnel to attend conferences in Austria, Belgium, and Germany concerning plasma and fission physics]: Foreign trip report, June 27, 1992–July 11, 1992, 18:25303 (R;US)
[Travel to Japan Atomic Energy Research Institute, Tokai, Japan to observe the second DPC-EX test]: Foreign trip report, July 11–27, 1992, 18:25228 (R;US)

Massachusetts Univ., Amherst, MA (United States). Dept. of Physics and Astronomy
A review of two photon production of jets at PEP and PETRA energies, 18:25033 (R;US)

Max-Planck-Institut fuer Meteorologie, Hamburg (Germany)
Biomes computed from simulated climatologies, 18:24574 (I;DE)
Optimal fingerprints for the detection of time dependent climate change, 18:24588 (I;DE)
Scale aggregation in semi-smooth flow, 18:24571 (I;DE)
Signal-to-noise analysis of time-dependent greenhouse warming experiments. Pt. 1. Pattern analysis, 18:24590 (I;DE)
Simulation of the present-day climate with the ECHAM model: Impact of model physics and resolution, 18:24589 (I;DE)

Medical Univ. of South Carolina, Charleston, SC (United States). Dept. of Biostatistics, Epidemiology, and System Sciences
Cancer and birth defects surveillance system for communities around the Savannah River Site: Savannah River Region Health Information System (SRRHIS): Annual progress report, 18:24883 (R;US)

Melbourne Univ., Parkville, VIC (Australia). School of Physics
Preparation and characterisation of the compound $Tl_{0.65}Bi_{0.35}Ca_{0.8}Sr_{1.7}Cu_2O_y$ using oxalate coprecipitation and analytical CBED and an initial preparation of $Bi_2Ca_{n-1}Sr_2Cu_nO_{4+2n}$ for n=5, 18:23984 (R;AU)

Memphis State Univ., TN (United States). Dept. of Biology
Physiologically anaerobic microorganisms of the deep subsurface: Progress report, June 1, 1990–May 30, 1991, 18:24728 (R;US)
Physiologically anaerobic microorganisms of the deep subsurface: Progress report, June 1, 1991–May 31, 1992, 18:24729 (R;US)

Michigan State Univ., East Lansing, MI (United States). Dept. of Chemistry
Direct probing of chromatography columns by laser-induced fluorescence: Technical progress report, September 1, 1989–February 28, 1993, 18:24844 (R;US)

Michigan State Univ., East Lansing, MI (United States). Dept. of Metallurgy, Mechanics and Material Science
High temperature stability, interface bonding, and mechanical behavior in β-NiAl and Ni_3Al matrix composites with reinforcements modified by ion beam enhanced deposition: Progress summary report, June 1, 1993–May 31, 1994, 18:24011 (R;US)

Michigan Univ., Ann Arbor, MI (United States). Dept. of Nuclear Engineering
Support of nuclear engineering education and research at the University of Michigan: Progress report, May 15, 1992–May 14, 1993, 18:23551 (R;US)

Michigan Univ., Ann Arbor, MI (United States). Div. of Nuclear Medicine
New techniques for positron emission tomography in the study of human neurological disorders: Progress report, June 1990–June 1993, 18:24857 (R;US)

Middle Tennessee State Univ., Murfreesboro, TN (United States). Dept. of Chemistry and Physics
Nuclear structure studies via neutron interactions: Progress report, 1 July 1992–30 June 1993, 18:25097 (R;US)

Midwest Power, Des Moines, IA (United States)
Process performance of Ahlstrom Pyroflow PCFB pilot plant, 18:22760 (R;US)

Ministerium fuer Ernaehrung, Landwirtschaft und Forsten des Landes Niedersachsen, Hannover (Germany)
Research into the energetic utilization of biomass, 18:23206 (I;DE;In German)

Ministerium fuer Umwelt, Raumordnung und Landwirtschaft des Landes Nordrhein-Westfalen, Duesseldorf (Germany)
Investigations into the chemistry of atmospheric peroxides. Final report. Pt. A and B, 18:24587 (I;DE;In German)

Ministerium fuer Wirtschaft, Mittelstand und Technologie des Landes Nordrhein-Westfalen, Duesseldorf (Germany)
Report on the activities of the mining authorities in the Land North-Rhine Westphalia in 1991, 18:22747 (I;DE;In German)

Ministry of Agriculture, Fisheries and Food, Lowestoft (United Kingdom). Directorate of Fisheries Research
A review of radioactivity in the Irish Sea: A report prepared for the Marine Pollution Monitoring Management Group, 18:24829 (R;GB)

Ministry of the Environment, Helsinki (Finland)
Aulanko meeting on models to describe the geographic extent and time evolution of acidification and air pollution damage: Abstracts, 18:24629 (R;FI)

Ministry of Trade and Industry, Helsinki (Finland). Energy Dept.
Combustion and gasification: Master plan for an energy technology research programme 1993-1998, 18:22770 (R;FI;In Finnish)
Finnish industry as users of IEA Coal Research Services, 18:22649 (R;FI;In Finnish)

Minnesota Univ., Minneapolis, MN (United States)
[Homogeneous-hetergeneous combustion: Thermal and chemical coupling: Annual report], 18:24134 (R;US)

Mission Research Corp., San Diego, CA (United States)
Evaluation of using cyclocranes to support drilling and production of oil and gas in wetland areas: Third quarterly technical progress report, First quarter, 1993, 18:22846 (R;US)

Montana Dept. of Natural Resources and Conservation, Helena, MT (United States)
A regulatory guide to leasing, permitting, and licensing in Idaho, Montana, Oregon, and Washington, 18:23298 (R;US)

Montreal Univ., PQ (Canada). Dept. of Physics
Double semi-leptonic charm decay in helios-I 450 GeV/c p-Be data: Appendix 1, 18:25034 (R;US)

Morton Thikol, Inc., Brigham City, UT (United States). Utah Operations
Computer modeling program for fragment trajectories within a bomb stack: Final report, 18:24520 (R;US)

Mound, Miamisburg, OH (United States)
Cable friction study of molybdenum disulfide solid lubricant on 3x7 stainless steel cable, 18:24141 (R;US)
Estimation of strain in 1-kW primary containment vessels by microstructural examination, 18:24164 (R;US)
The Mound site survey project for the characterization of radioactive materials in site soils, 18:24763 (R;US)

Automatic radiometric control system of technological process, 18:24166 (R;RU;In Russian)
Interface device of the IUS/IRPS interfaces for linking of the SM 1634 host computer system with the scales unit, 18:23514 (R;RU;In Russian)
Study on the influence of phase characteristics of the amplifier track on the errors for sodium flow rate measurements by correlation method, 18:23462 (R;RU;In Russian)
Technology of information processing on the complex of primary investigations of fuel assemblies and pins, 18:23513 (R;RU;In Russian)

Nauchno-Issledovatel'skij Inst. Ehlektrofizicheskoj Apparatury, Leningrad (Russian Federation)
Countercurrent converters for beam current measurement and determination of the position of its center of gravity in a induction linear accelerator, 18:24378 (R;RU;In Russian)

Naval Civil Engineering Lab., Port Hueneme, CA (United States)
Development of a vortex combustor (VC) for space/water heating applications (combustion tests): Final report, 18:22762 (R;US)

Naval Underwater Systems Center, Newport, RI (United States)
Ocean acoustic processing: A model-based approach, 18:24961 (R;US)

Netherlands Energy Research Foundation (ECN), Petten (Netherlands)
Direct and preequilibrium effects in the fission-product mass range: Papers presented in the NEANSC Specialists' Meeting on Fission Product Nuclear Data, 25-27 May 1992, JAERI, Japan, 18:25160 (R;NL)
Quantummechanical multi-step direct models for nuclear data applications, 18:25083 (R;NL)
Status of statistical model capture calculations, 18:25103 (R;NL)

Nevada Nuclear Waste Project Office, Carson City, NV (United States)
Expert judgment in assessing radwaste risks: What Nevadans should know about Yucca Mountain: [Final report], 18:23010 (R;US)
Mesozoic and Cenozoic structural geology of the CP Hills, Nevada Test Site, Nye County, Nevada; and regional implications, 18:23012 (R;US)
Quaternary tectonics and basin history of Pahrump and Stewart Valleys, Nevada and California, 18:23011 (R;US)
Social impacts of hazardous and nuclear facilities and events: Implications for Nevada and the Yucca Mountain high-level nuclear waste repository: [Final report], 18:23009 (R;US)

Nevada Univ., Las Vegas, NV (United States)
Heat transfer in unsaturated, porous media, 18:24247 (R;US)
Quarterly progress report on the Waste Package Project at the University of Nevada, Las Vegas, January 1, 1993–March 31, 1993, 18:22952 (R;US)

Nevada Univ., Las Vegas, NV (United States). Harry Reid Center for Environmental Studies
Identification and characterization of conservative organic tracers for use as hydrologic tracers for the Yucca Mountain Site Characterization Project: Quality Assurance Project Plan: Quarterly technical progress report, January 1, 1993–March 31, 1993, 18:22951 (R;US)

Nevada Univ., Reno, NV (United States)
Mesozoic and Cenozoic structural geology of the CP Hills, Nevada Test Site, Nye County, Nevada; and regional implications, 18:23012 (R;US)
Quaternary tectonics and basin history of Pahrump and Stewart Valleys, Nevada and California, 18:23011 (R;US)

Nevada Univ., Reno, NV (United States). Quaternary Sciences Center
A gabled wooden lodge in an archaeological context: Archaeological investigations at sample unit U19adPL, Nevada Test Site, Nye County, Nevada, 18:23718 (R;US)
Archaeological investigations at Sample Unit U19aq, Nevada Test Site, Nye County, Nevada, 18:24733 (R;US)
Archaeological investigations at drill hole U19bg, Nevada Test Site Nye County, Nevada, 18:24736 (R;US)
Lithic technology studies: Archaeological research at drill hole U19ba, Nye County, Nevada, 18:24735 (R;US)
Prehistoric spatial patterning and subsistence studies: Archaeological investigations at Sample Unit U19arP4, Nevada Test Site, Nye County, Nevada, 18:24732 (R;US)
Temporary camps at drill hole U19aq on Pahute Mesa, Nye County, Nevada, 18:24737 (R;US)
The archaeology of drill hole U20bc, Nevada Test Site, Nye County, Nevada, 18:24734 (R;US)

New Energy and Industrial Technology Development Organization, Tokyo (Japan)
Analysis on factors affecting energy consumptions and CO2 emissions and their regional and sectoral differences, 18:23739 (R;JP;In Japanese)
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (the United Kingdom), 18:23774 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (the U.S.A.), 18:23772 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (Canada), 18:23773 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (France), 18:23775 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (Germany), 18:23776 (R;JP;In Japanese)
Technology to make waste RDF and study of its applicability to the power generation system. 2, 18:23331 (R;JP;In Japanese)

New Jersey Inst. of Tech., Newark, NJ (United States). Particulate Flow Research Lab.
Particulate Flow Research Laboratory quarterly progress report, October 1, 1992–December 31, 1992, 18:24479 (R;US)

New Mexico Inst. of Mining and Technology, Socorro, NM (United States)
Small scale laboratory studies of flow and transport phenonmena in pores and fractures, Phase II: Second yearly progress report, 18:24730 (R;US)

New Mexico Inst. of Mining and Technology, Socorro, NM (United States). Center for Explosives Technology Research
Characterization of metal-loaded plastics: [Final report], 18:24519 (R;US)

New Mexico Inst. of Mining and Technology, Socorro, NM (United States). New Mexico Petroleum Recovery Research Center
Field verification of CO_2-foam: [Quarterly] report, January 1–March 31, 1993, 18:22805 (R;US)

New Mexico State Univ., Las Cruces, NM (United States)
Development of an operational tool for biomonitoring using constant pressure respirometry: [Final report], 18:24827 (R;US)

New Mexico Univ., Albuquerque, NM (United States). Dept. of Chemistry
Synthesis of organic ligands for f-element separations: Final report, 18:24083 (R;US)

New York State Energy Research and Development Authority, Albany, NY (United States)
Binghamton/Johnson City Joint Sewage Treatment Plant cogeneration project: Final report, 18:23851 (R;US)

New York Univ. Medical Center, NY (United States). Dept. of Environmental Medicine
Measurement and apportionment of radon source terms for modeling indoor environments: Final progress report, March 1990–August 1992, 18:23811 (R;US)

New York Univ., NY (United States). Dept. of Environmental Medicine
The oncogenic action of ionizing radiation on rat skin: Final progress report, May 1, 1990–April 30, 1992, 18:24878 (R;US)

Noell GmbH, Wuerzburg (Germany)
Research into the energetic utilization of biomass, 18:23206 (I;DE;In German)

Nordisk Gasteknisk Center, Hoersholm (Denmark)
CO_2 technology: A literature study on the extraction and deposition of CO_2 from flue gases, 18:24625 (R;DK;In Norwegian)
Methane reduction by catalysts for natural gas motors: Status report, 18:24627 (R;DK;In Swedish)

North Carolina State Univ., Raleigh, NC (United States)
Theoretical treatment of the bulk and surface properties of fluids containing long, flexible molecules, 18:25200 (R;US)

North Carolina State Univ., Raleigh, NC (United States). Dept. of Chemical Engineering
Novel approaches to the production of higher alcohols from synthesis gas: Quarterly Technical progress report No. 8, July 1, 1992–September 30, 1992, 18:23215 (R;US)

North Carolina State Univ., Raleigh, NC (United States). Dept. of Materials Science and Engineering
The study of structure-processing-property relations in copper oxide based high T_c superconductors: Progress report, July 1992–June 1993, 18:23973 (R;US)

North Dakota Univ., Grand Forks, ND (United States). Energy and Environmental Research Center
Addendum to industrial market assessment of the products of mild gasification, 18:22695 (R;US)
Catalytic fabric filtration for simultaneous NO_x and particulate control: Quarterly technical progress report, October 1–December 31, 1992, 18:23335 (R;US)
Development of an advanced, continuous mild gasification process for the production of co-products: Task 4.6, Economic evaluation, 18:22696 (R;US)
EERC pilot-scale CFBC evaluation facility Project CFB test results: Topical report, Task 7.30, 18:22754 (R;US)

Northeastern Univ., Boston, MA (United States)
New fluorescence methodology for detecting DNA adducts: Progress report, May 1, 1991–May 21, 1993, 18:24927 (R;US)

Northwestern Univ., Evanston, IL (United States)
Mixing of immiscible fluids in chaotic flows and related issues: Progress report, June 1, 1992–May 31, 1993, 18:24244 (R;US)
Optimization and eigenvalue computation with application to meteorology and oceanography: Progress report, August 1, 1992–July 31, 1993, 18:25392 (R;US)
Structures and shear response of lipid monolayers: Progress report, August 1, 1990–July 31, 1993, 18:24010 (R;US)
Thinning and rupture of a thin liquid film on a heated surface: Progress report, September 15, 1992–September 14, 1993, 18:24242 (R;US)

Northwestern Univ., Evanston, IL (United States). Dept. of Materials Science and Engineering
Atomic structures and compositions of internal interfaces: Progress report, September 1, 1992–August 31, 1993, 18:23929 (R;US)

Notre Dame Univ., IN (United States). Dept. of Physics
A scintillating fiber detector for the D0 upgrade, 18:24437 (R;US)

Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations: Management training manual, 18:25344 (R;US)
Environmental Sciences Division annual progress report for period ending September 30, 1992, 18:24567 (R;US)
Environmental surveillance data report for the third quarter of 1992, 18:24771 (R;US)
Environmental Surveillance data report for the fourth quarter of 1992, 18:24831 (R;US)
Evaluation of possible biological effects from exposure to gaseous SF_6 breakdown products, 18:24925 (R;US)
Evaluation of the computerized utilities and energy monitoring and control system installed at the US Army, Europe, 222D Base Support Battalion, Baumholder, Germany, 18:23852 (R;US)
Evaluation of the energy-conservation effectiveness and utilization of the UEMCS installed at the 409th BSB in Germany: Foreign trip report, September 4–19, 1992, 18:23853 (R;US)
Experimental investigation of thermal limits in parallel plate configuration for the Advanced Neutron Source Reactor, 18:23550 (R;US)
Experiments in mobile robot navigation and range imaging, 18:24147 (R;US)
Fast Fourier Transform analysis of computer-acquired friction data, 18:23966 (R;US)
Fatigue design curves for 6061-T6 aluminum, 18:23925 (R;US)
Flux-pinning related defect structures in melt-processed $YBa_2Cu_3O_{7-x}$, 18:23968 (R;US)
Formation and decay of toroidal and bubble nuclei and the nuclear equation of state, 18:25093 (R;US)
Formation of positronium compounds in slow positron beams, 18:25199 (RA;US)
Fourth annual Walker Branch Watershed research symposium: Program and abstracts, 18:24717 (R;US)
Fundamental parameters and interactions of positrons with molecules, 18:25182 (RA;US)
Fusion reactor materials semiannual progress report for period ending September 30, 1992, 18:25301 (R;US)
G. DeSaussure's early work, 18:25156 (R;US)
Gas fueled space conditioning heat pump research in the United States, 18:23807 (R;US)
Guidance on management of non-residential indoor air quality, 18:24576 (R;US)
Heavy-section steel technology program: Foreign trip report, July 4–October 1, 1992, 18:23505 (R;US)
HEMP emergency planning and operating procedures for electric power systems: Power Systems Technology Program, 18:24552 (R;US)
High flux positron beams for positron reemission microscopy and positron annihilation microprobe defect studies, 18:23918 (RA;US)
High resolution microscopy of ceramic surfaces, 18:25209 (R;US)
HIGHWAY 3.1: An enhanced HIGHWAY routing model: Program description, methodology, and revised user's manual, 18:22901 (R;US)
Human-factors-based implementation of the remote characterization system high-level control station, 18:24718 (R;US)
Implementation of in situ vitrification technology for remediation of Oak Ridge contaminated soil sites: Past results and future plans, 18:23106 (R;US)
Improving neutron dosimetry using bubble detector technology, 18:24899 (R;US)
In-situ crystallization of silicate glass films deposited on α- Al_2O_3, 18:24001 (R;US)
Influence of dissipation of the population and decay of compound nuclei, 18:25072 (R;US)
INTERLINE 5.0 – An expanded railroad routing model: Program description, methodology, and revised user's manual, 18:22900 (R;US)
Ion implantation effects on surface-mechanical properties of metals and polymers, 18:23180 (R;US)
ITER EDA design confinement capability, 18:25293 (R;US)
Liquid and Gaseous Waste Operations Department annual operating report, CY 1992, 18:23014 (R;US)
Looking beyond ITER: Toroidal concept improvement, 18:25292 (R;US)
Low-expansion ceramics initiative, 18:23859 (R;US)
Measurement of glass transitions and other properties of polymers by positron spectroscopy, 18:23995 (RA;US)
Measurements of transverse energy and forward energy in high-energy nuclear collisions, 18:25094 (R;US)
Mechanism of HDS/HDN reactions, 18:22692 (R;US)
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic, 18:23967 (R;US)
Multiple Antenna Implementation System (MAntIS), 18:25316 (R;US)
New switchgrass biofuels research program for the Southeast, 18:23192 (R;US)
Nuclear superdeformation, 18:25066 (R;US)
Overview of the West Valley Vitrification Facility transfer cart control system, 18:24144 (R;US)
Participation in the COMPSTAT 1992 symposium on computation statistics: Foreign trip report, August 22–September 12, 1992, 18:25414 (R;US)
Participation in the European research conference on effects of elevated CO_2 levels, air pollutants and climate change on natural plant ecosystems: Foreign trip report, March 30–April 13, 1992, 18:24931 (R;US)
Participation in the WA93 Collaboration meeting at CERN, and the second international workshop on software engineering, artificial intelligence, and expert systems for high energy and nuclear physics: Foreign trip report, January 3–20, 1992, 18:25013 (R;US)
Pipe break testing of primary loop piping similar to Department of Energy's New Production Reactor-Heavy Water Reactor, 18:23549 (R;US)
Planning for and managing environmental restoration waste, 18:22927 (R;US)
Positron annihilation in materials science with a pulsed positron beam of variable energy, 18:23903 (RA;US)
Positron annihilation in novel materials, 18:23906 (RA;US)
Positron annihilation induced auger electron spectroscopy, 18:23904 (RA;US)
Positron lifetime spectroscopy in oxides, 18:23965 (RA;US)
Positron microscopy in materials sciences, 18:23902 (RA;US)
Positron spectroscopy for the study of materials, 18:23898 (RA;US)
Positron studies applied to microelectronics technology, 18:23992 (RA;US)

Potential applications of PAS techniques to industrial research in polymeric materials, 18:23909 (RA;US)
Potential change in flaw geometry during pressurized-thermal-shock transients, 18:23381 (R;US)
Potential effect of natural gas wells on alluvial groundwater contamination at the Kansas City Plant, 18:24773 (R;US)
Potential impact of DOE's performance objective for protection of inadvertent intruders on low-level waste disposals at Oak Ridge National Laboratory, 18:22929 (R;US)
Power compensators for phased operation of antenna arrays on JET and DIII-D, 18:25295 (R;US)
Present and future status of positrons in industrial research, 18:23899 (RA;US)
Present status of design study for the positron factory, 18:23905 (RA;US)
Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (Poster Session), 18:25417 (R;US)
Publications of the Fossil Energy Advanced Research and Technology Development Materials Program, April 1, 1991–March 31, 1993, 18:23911 (R;US)
Radiological survey results for the Peek Street site properties, Schenectady, New York, 18:23091 (R;US)
Remote excavation using the telerobotic small emplacement excavator, 18:24146 (R;US)
Research update, existing buildings research, 1989–1991, 18:23816 (R;US)
Resolution of dose and reduction factor questions in Army Pulse Radiation Facility experiments: Renormalization of calculated and measured data, 18:24900 (R;US)
Results of the radiological survey at the former Alba Craft Laboratory site properties, Oxford, Ohio (OXO001), 18:24772 (R;US)
Review Meeting for the Modular High-Temperature Gas-Cooled Reactor Corrosion, Migration, et Distribution Irradiation Experiment Fission Product Transport Program in France: Foreign trip report, March 26, 1992–April 5, 1992, 18:23448 (R;US)
Site and facility waste transport planning documents (SPDs) status and findings, 18:22891 (R;US)
Spatial simulation of smallmouth bass in streams, 18:23220 (R;US)
Surface radiological investigations at environmental research area 11, ^{137}Cs- and ^{60}Co-contaminated plots at Oak Ridge National Laboratory, Oak Ridge, Tennessee: Environmental Restoration Program, 18:24764 (R;US)
The application of positron spectroscopy to materials sciences the perspective from the Idaho National Engineering Laboratory, 18:23900 (RA;US)
The application of positron spectroscopy to materials science in China, 18:23901 (RA;US)
The Fermion Dynamical Symmetry Model and superdeformation, 18:25064 (R;US)
The initiation of an environmental restoration project incorporating the bidirectional (US-Germany) transfer of environmental management technologies: Foreign trip report, February 23–29, 1992, 18:24766 (R;US)
The KSR1: Experimentation and modeling of poststore, 18:25416 (R;US)
The MASH 1.0 code system: Utilization of morse in the adjoint mode, 18:25157 (R;US)
The significance of interactions of humic substances and organisms in the environment, 18:24813 (R;US)
Theoretical aspects of positron annihilation in condensed matter, 18:23907 (RA;US)
Theoretical study of fission dynamics with muons, 18:25092 (R;US)
Thermal response of gator system internal components, 18:24524 (R;US)
Thermographic properties of eight blue-emitting phosphors, 18:24000 (R;US)
Transport mechanisms acting in toroidal devices: A theoretician's view, 18:25276 (R;US)
Transportation energy data book: Edition 13, 18:23829 (R;US)
Travel to Germany and France to present two talks at the international conference on interaction of iron based materials with water and steam: Foreign trip report, May 16, 1992–June 10, 1992, 18:24111 (R;US)
Travel to Germany to attend the 37th American Society for Mechanical Engineers gas turbine and aeroengine congress and exposition: Foreign trip report, May 29, 1992–June 10, 1992, 18:23860 (R;US)
Travel to Italy to participate in a particle accelerator conference: Foreign trip report, May 30, 1992–June 6, 1992, 18:24379 (R;US)
Travel to Japan to participate in a discussion session at the fourth international symposium on advanced nuclear research: Foreign trip report, January 21, 1992–February 8, 1992, 18:23599 (R;US)
Travel to Japan to present lecture on ORNL/CESAR intelligent machines research and development at the International Specialists meeting on artificial intelligence and robotics for nuclear power plants (AIR'92): Foreign trip report, May 17–27, 1992, 18:23532 (R;US)
Travel to Karlsruhe, Germany to exchange information on the in situ destruction of volatile organic compounds: Foreign trip report, February 10–16, 1992, 18:24765 (R;US)
Travel to Luso, Portugal, to participate in a NATO Advanced Study Institute workshop on the use of biomarkers in assessing health and environmental impacts of chemical pollutants: Foreign trip report, May 29, 1992–June 10, 1992, 18:24932 (R;US)
Travel to Sweden to participate in the Seminar on the Dynamic Behavior of Radionuclides in Forests: Foreign trip report, May 16–23, 1992, 18:24898 (R;US)
Travel to Sweden, Denmark, and Norway to and participate in the international symposium on experimental manipulations of biota and biogeochemical cycling in ecosystems: Foreign trip report, May 16–24, 1992, 18:24767 (R;US)
Travel to Switzerland to attend the 1992 meeting of the International Cooperative Group on Irradiation-Assisted Stress Corrosion Cracking: Foreign trip report, March 9–14, 1993, 18:23945 (R;US)
Trends in advanced reactor development and the role of the IAEA, 18:23353 (R;US)
Two dimensional ACAR measurements in high-$T_c$materials; recent results and future perspectives, 18:25227 (RA;US)
Understanding heat and fluid flow in linear GTA welds, 18:23917 (R;US)
Unusually amplified summer or winter indoor levels of radon, 18:24720 (R;US)
US Department of Energy, Office of Technology Development, mixed-waste treatment research, development, demonstration, testing, and evaluation, 18:22926 (R;US)
Vapor stripping of VOC-contaminated clay soils, 18:24721 (R;US)
Warm prestress effects in fracture-margin assessment of PWR-RPVs, 18:23629 (R;US)
Waste-to-energy: Decision making and the decisions made, 18:23843 (R;US)
Whole-arm obstacle avoidance system conceptual design, 18:24167 (R;US)
[A trip to Austria to participate in the "Technical Committee on the Impact of the New ICRP Recommendations on the IAEA Regulations for the Safe Transport of Radioactive Materials"]: Foregin trip report, March 12–20, 1993, 18:22899 (R;US)
[A trip to Japan to present a lecture entitled "The DOE Ceramic Technology Project – 10 Years of Progress"]: Foreign trip report, March 12–20, 1993, 18:23977 (R;US)
[Advanced Light Water Reactor (ALWR) Utility Requirements Document Program]: Foreign trip report, September 27–October 4, 1992, 18:23666 (R;US)
[Application of positron annihilation spectroscopy], 18:23908 (RA;US)
[Development, processing, properties, and applications on advanced alloys, ceramics, polymers, and composites]: Foreign trip report, December 9–20, 1991, 18:23944 (R;US)
[Document description and processing languages]: Foreign trip report, 24 April–11 May 1992, 18:25475 (R;US)
[Electricity and the environment]: Foreign trip report, May 11–18, 1991, 18:23351 (R;US)
[High-temperature corrosion and protection of materials]: Foreign trip report, May 23–June 4, 1992, 18:23947 (R;US)
[International Atomic Energy Agency Coordinated Research Program on the Validation of Assessment Model Predictions for urban, aquatic, terrestrial, and multiple pathway systems, and

the first technical meeting of the second phase of the International Biospheric Model Validation Study, in Austria]: Foreign trip report, February 28–March 14, 1992, 18:24631 (R;US)
[International Atomic Energy Agency's gas-cooled reactor technology development activities]: Foreign trip report, April 19, 1991–November 4, 1992, 18:23449 (R;US)
[International Geosphere-Biosphere Program workshop on global soils data]: Foreign trip report, October 5–10, 1992, 18:24769 (R;US)
[Nuclear reactor surveillance and diagnostics in France]: Foreign trip report, September 19–23, 1992, 18:23533 (R;US)
[Parallel processing conferences in France]: Foreign trip report, August 31–September 9, 1992, 18:25413 (R;US)
[Physics research in Denmark, Sweden, and Japan]: Foreign trip report, March 9–28, 1993, 18:25168 (R;US)
[Polymer applications], 18:23996 (RA;US)
[Principles and criteria for radioactive waste disposal]: Foreign trip report, October 24–30, 1992, 18:23013 (R;US)
[Resonant nuclear scattering seminar presentations]: Foreign trip report, August 15–25, 1992, 18:25216 (R;US)
[Safe transport of radioactive materials]: Foreign trip report, October 3–10, 1992, 18:22898 (R;US)
[Travel by ORNL personnel to Japan concerning testing of a field emission gun-transmission electron microscope and for discussion of electron holography]: Foreign trip report, March 13–20, 1992, 18:24481 (R;US)
[Travel relating to the Advanced Neutron Source project]: Foreign trip report, July 12–24, 1992, 18:23179 (R;US)
[Travel to attend the NATO Advanced Study Institute held at Il Ciocco, Italy]: Foreign trip report, July 10–26, 1992, 18:25047 (R;US)
[Travel to Australia for meetings on materials science and electron microscopy]: Foreign trip report, February 5–22, 1992, 18:24085 (R;US)
[Travel to England and Germany to discuss sustainable agriculture and global landscape change research]: Foreign trip report, March 10–21, 1993, 18:24869 (R;US)
[Travel to Finland for a review of the carbon balance of peatlands and climate change project]: Foreign trip report, September 26, 1992–October 3, 1992, 18:24768 (R;US)
[Travel to France and Austria to visit the IAEA Nuclear Data Section]: Foreign trip report, April 5–17, 1992, 18:25085 (R;US)
[Travel to France and New Orleans to discuss the analysis and testing work at the New Production Reactor-Heavy Water Reactor]: Foreign trip report, June 10–25, 1992, 18:23600 (R;US)
[Travel to France to attend and present two invited talks at the international workshop on the physics techniques of secondary nuclear beams at Dourdan, France]: Foreign trip report, March 21–26, 1992, 18:25071 (R;US)
[Travel to France to participate in the 10th workshop of the scientific group on methodologies for the safety evaluation of chemicals]: Foreign trip report, March 5–15, 1993, 18:24943 (R;US)
[Travel to Gaborone, Botswana to participate in the African Energy Policy Research Network sixth workshop on energy policy and planning research in east and southern African countries]: Foreign trip report, April 6–10, 1992, 18:23723 (R;US)
[Travel to Germany for studies on carbon materials technology]: Foreign trip report, June 17–July 6, 1992, 18:24039 (R;US)
[Travel to Germany to attend the Third international conference on the new diamond science and technology]: Foreign trip report, August 29–September 10, 1992, 18:24040 (R;US)
[Travel to Italy, Switzerland, and Germany for meetings on electrostatic accelerator and associated boosters]: Foreign trip report, May 30, 1992–June 11, 1992, 18:24304 (R;US)
[Travel to Japan for collaborative research on the high-temperature phase stability of austenitic stainless steels]: Foreign trip report, December 1, 1991–May 8, 1992, 18:23946 (R;US)
[Travel to Japan for the 10th international symposium on the packaging and transportation of radioactive materials]: Foreign trip report, September 14, 1992–October 2, 1992, 18:22897 (R;US)
[Travel to Japan for the international symposium on ultra-high temperature materials]: Foreign trip report, November 30–December 9, 1991, 18:23912 (R;US)
[Travel to Switzerland and France to discuss current scintillation crystal technology]: Foreign trip report, May 5–9, 1992, 18:24451 (R;US)
[Travel to Switzerland to attend a meeting of the WA93 Collaboration]: Foreign trip report, January 5–12, 1992, 18:24450 (R;US)
[Travel to Turin, Italy, to attend and participate in an international workshop entitled "Biological sequences: Finding structure and function by neural networks"]: Foreign trip report, June 29, 1992–July 15, 1992, 18:24847 (R;US)
[Workshops concerning environmental carbon dioxide and terrestrial carbon]: Foreign trip report, February 27–March 6, 1993, 18:24770 (R;US)

Oak Ridge National Lab., TN (United States). Carbon Dioxide Information Analysis Center
Adapting to sea-level rise in the US Southeast: The influence of built infrastructure and biophysical factors on the inundation of coastal areas, 18:24830 (R;US)

Oak Ridge Y-12 Plant, TN (United States)
A model for uranium lung clearance at the Y-12 Plant, 18:24915 (R;US)
Enterprise Technologies Deployment for Agile Manufacturing, 18:24187 (R;US)
Migration of nuclear criticality safety software from a mainframe to a workstation environment, 18:24185 (R;US)
Process Improvement Workbook, 18:25384 (R;US)
RCRA Closure Plan for the Bear Creek Burial Grounds B Area and Walk-In Pits at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Energy Systems Environmental Restoration Program; Y-12 Environmental Restoration Program, 18:22953 (R;US)
Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 18:23127 (R;US)
Report on official foreign travel to Sweden and Germany, June 4–21, 1992, 18:23189 (R;US)
Technical basis for the internal dosimetry program at the Y-12 Plant, 18:24916 (R;US)
Ultrasonic cleaning as a replacement for chlorinated solvents, 18:24186 (R;US)
Y-12 Development Division technical progress report: Part 3, Metal processing period ending December 1, 1992, 18:23963 (R;US)

OECD Nuclear Energy Agency, 75 - Paris (France)
DIAMANT-2: Transport Code for Regular Triangular Geometry, 18:25400 (CM;DE)

Oedegaard og Danneskiold-Samsoee ApS, Copenhagen (Denmark)
Concepts for offshore exploration on pack-ice areas - phase 2: Summary report, 18:22789 (R;DK)

Ohio Coal Development Office, Columbus, OH (United States)
A novel coal feeder system: Final report, 18:22750 (R;US)
A novel three phase fluidized bed process for simultaneous selective flocculation and microbial desulfurization of high sulfur coal: Final report, 18:22658 (R;US)
Advanced wet flue gas desulfurization and denitrification process, Miami Fort station: Volume 1: Final report, 18:23347 (R;US)
Advanced wet flue gas desulfurization and denitrification process, Miami Fort station: Volume 2: Final report, 18:23348 (R;US)
Catalytic filter bags for NO_x and particulate removal: Final report, 18:23343 (R;US)
Modification, relocation and operation of the Pedco Rotary Cascading Bed Boiler: Final report, 18:23333 (R;US)
Ohio Coal Development Office test program at TRW's Cleveland, Ohio entrained coal combustion facility: Final report, 18:23345 (R;US)
SO_x-NO_x-Rox Box systems integrations study, 18:23346 (R;US)
Study of in-duct spray drying using condensation aerosol: Final report, June 16, 1990–June 15, 1992, 18:23344 (R;US)

Ohio State Univ., Columbus, OH (United States)
A novel three phase fluidized bed process for simultaneous selective flocculation and microbial desulfurization of high sulfur coal: Final report, 18:22658 (R;US)

Ohio Univ., Athens, OH (United States)
Study of in-duct spray drying using condensation aerosol: Final report, June 16, 1990–June 15, 1992, 18:23344 (R;US)

Oklahoma Geological Survey, Norman, OK (United States)
Continued support of "The Natural Resources Information System (NRIS) for the State of Oklahoma": Quarterly technical progress report, January 1, 1993–March 31, 1993, 18:22831 (R;US)

Fire safety lessons learned from the design and operation of commercial nuclear reactor facilities, 18:23669 (R;US)
Free-exciton recombination in GaAs, 18:24044 (R;US)
Fusion of LADAR and SAR for terminal guidance, 18:24498 (R;US)
Heavy Water New Production Reactor design review guidelines: Volume 2, Appendices: Final report, 18:23672 (R;US)
Heavy Water New Production Reactor design review guidelines: Volume 1, Main report: Final report, 18:23671 (R;US)
High power z pinches as x-ray laser photopumps, 18:24281 (R;US)
High spatial resolution x-ray microanalysis: Comparison of experiment and incoherent scattering calculations, 18:25217 (R;US)
High-flux testing of heat pipes for point-focus solar collector systems, 18:23272 (R;US)
Improved Many-On-Many ROUTE software description, 18:24497 (R;US)
Incentives for use of inelastic analysis in RAM transport container design, 18:24172 (R;US)
INMM International Safeguards Division status report, 18:23762 (R;US)
Integration of rapid prototyping into design and manufacturing, 18:24176 (R;US)
Intrinsic and interfacial recombination in OMVPE- and MBE-prepared GaAs/$Al_xGa_{1-x}As$ heterostructures, 18:24047 (R;US)
Investigation of fracture-matrix interaction: Preliminary experiments in a simple system, 18:23041 (R;US)
Investigations of deteriorated concrete from the liner of the Waste Isolation Pilot Plant Waste Shaft, 18:23035 (R;US)
Kerberos a UNIX–TCP/IP network authentication system, 18:25430 (R;US)
Manufacturing technology: A Sandia technology bulletin, 18:23841 (R;US)
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems, 18:25420 (R;US)
MatResLib: A reusable, object-oriented material response library, 18:25424 (R;US)
Measurements and analysis of the equivalent circuit of the GEC RF Reference Cell, 18:24282 (R;US)
Micromachined chemical sensor with integrated microelectronics, 18:24484 (R;US)
Multiple-frequency acoustic wave devices for chemical sensing and materials characterization in both gas and liquid phase, 18:24482 (PA;US)
Participation in the 3rd international conference on nuclear microprobe technology and applications held in Uppsala, Sweden: Foreign trip report, June 3–13, 1992, 18:25212 (R;US)
Photocatalysis for the treatment of waste water: Applications involving the removal of metals, 18:23268 (R;US)
Physical optics modelling of soft x-ray projection lithography (SXPL) imaging experiments, 18:25166 (R;US)
Portable Reconfigurable Line Sensor (PRLS), 18:23155 (R;US)
Preparation of carbon monoliths having tailored pore structure from porous polymer precursors, 18:24048 (R;US)
Procedure for analysis of common-cause failures in probabilistic safety analysis, 18:23660 (R;US)
Proton transport methods for satellite shield modeling, 18:25165 (R;US)
Rapid thermal processing for strained-layer semiconductor devices, 18:24050 (R;US)
Sandia Ocean Modeling System programmer's guide and user's manual, 18:24833 (R;US)
Scoping studies of boiling phenomena associated with the flooded cavity design of the Heavy Water New Production Reactor, 18:23453 (R;US)
Sensor Based Process Control (SBPC) Laboratories Directed Research and Development (LDRD): Final report, 18:23840 (R;US)
Separate effects testing to investigate liner tearing of the 1:6-scale reinforced concrete containment building, 18:23674 (R;US)
Si Atomic Layer Epitaxy based on Si_2H_6 and remote He plasma bombardment, 18:23181 (R;US)
Stagnation dynamics and heating mechanisms for wire array z-pinch implosions, 18:25231 (R;US)
Surface-emitting laser-based optical switching: An update, 18:24284 (R;US)
Test phase plan for the Waste Isolation Pilot Plant: Revision 1, 18:22961 (R;US)
Test plan appendix: WIPP simulated RH TRU waste add-on tests (Additional rock mechanics and waste package performance), 18:22935 (R;US)
Test plan: Air intake shaft performance test – Addendum for obtaining cores in the Culebra for radionuclide retardation studies, 18:22934 (R;US)
Test plan: Gas-threshold-pressure testing of the Salado Formation in the WIPP underground facility, 18:22941 (R;US)
Test plan: Intermediate scale borehole test–WIPP in situ testing, 18:22940 (R;US)
Test plan: WIPP horizon in situ permeability measurements, 18:22936 (R;US)
Test plan: WIPP Materials Interface Interactions Test (MIIT), 18:22932 (R;US)
Test plan: WIPP simulated CH and RH TRU waste tests: Technology experiments (TRU TE) (Container durability, backfill interactions, and nuclide migration), 18:22933 (R;US)
Test series C of the small scale seal performance tests, 18:22938 (R;US)
Testing technology: A Sandia technology bulletin, 18:23754 (R;US)
The Authenticated Tracking and Monitoring System (ATMS) concept, 18:23895 (R;US)
The d-edge shortest-path problem for a Monge graph, 18:25421 (R;US)
The experimental determination of impact forces for modeling of armored vehicle survivability, 18:24493 (R;US)
The use of formal and informal expert judgments when interpreting data for performance assessments, 18:23036 (R;US)
Three-dimensional finite element simulation of creep deformation in rock salt, 18:23037 (R;US)
Travel to Bermuda to attend meetings of the JOIDES Panel Chairs Committee and the JOIDES Planning Committee for discussion of the Ocean Drilling Program: Foreign trip report, November 30–December 5, 1992, 18:24951 (R;US)
Travel to Japan to learn about III-V passivation and other III-V processing work, and to participate in the LAMP '92 conference: Foreign trip report, June 6–17, 1992, 18:24014 (R;US)
Tree reconstruction from partial orders, 18:25426 (R;US)
UNICOS® security testing, 18:25428 (R;US)
Updated recommendations for low-level waste performance assessment, 18:23038 (R;US)
VFGEN: A parallel volume fraction generator for hydrocodes, 18:25423 (R;US)
Violence-of-reaction experiments, 18:24526 (R;US)

Waste component recycle, treatment, and disposal integrated demonstration (WeDID) nuclear weapon dismantlement activities, 18:23886 (R;US)
Waste Isolation Pilot Plant Salado hydrology program data report No. 2, 18:23043 (R;US)
Waste minimization/pollution prevention at R&D facilities: A cradle-to-grave tracking and information system for Sandia National Laboratories, 18:22903 (R;US)
Waste retrieval plan for the Waste Isolation Pilot Plant: Revision 1, 18:22962 (R;US)
What is IAQ, 18:23819 (R;US)
[A trip to Germany to present four lectures on flow turbulence and combustion]: Foreign trip report, September 12–30, 1992, 18:24245 (R;US)
[International conference on computational engineering science]: Foreign trip report, December 15–24, 1992, 18:24140 (R;US)
[Meeting of the IAEA standing advisory group on safe transport of radioactive materials (SAGSTRAM)]: Foreign trip report, October 3–10, 1992, 18:22892 (R;US)
[Space nuclear technology]: Foreign trip report, September 11–October 12, 1992, 18:23467 (R;US)
[Technical interchange with scientists from the two Russian weapons institutes, Arzamas-16 and Chelyabinsk-70 for environmental research]: Foreign trip report, October 2–11, 1992, 18:23086 (R;US)
[Travel to Germany to participate in the ITER meeting on divertor and first wall]: Foreign trip report, June 22–July 1, 1992, 18:25305 (R;US)
[Travel to Honduras to discuss plans to incorporate renewable energy technologies into rural electrification and water pumping programs]: Foreign trip report, October 28–November 12, 1992, 18:23745 (R;US)
[Travel to the Heavy Ion Research Center and the Nuclear Research Center, Germany and the conference on physics of high energy density in matter, Austria]: Foreign trip report, January 24, 1993–February 7, 1993, 18:24346 (R;US)
[Travel to United Kingdom to attend and present a paper at the first European conference on smart structures and materials]: Foreign trip report, May 10–20, 1992, 18:23910 (R;US)

Sandia National Labs., Livermore, CA (United States)
A laser-based technique to continuously monitor metal aerosol emissions, 18:24641 (R;US)
Dynamic response of a transducer mounted at one end of an acoustical cavity, 18:24485 (R;US)
Travel to Australia to participate in the the 24th international symposium on combustion: Foreign trip report, June 29–July 16, 1992, 18:24469 (R;US)
[Initiate an experimental and modeling collaboration with Russian scientists on hydrogen isotope retention and release from plasma- facing materials]: Foreign trip report, June 29–July 10, 1992, 18:25304 (R;US)
[Travel to Australia to attend the 24th international symposium on combustion at the University of Sydney]: Foreign trip report, June 29–July 19, 1992, 18:22752 (R;US)
[Travel to Lisbon, Portugal to present a paper at the sixth international symposium of applications of laser techniques to fluid mechanics and travel to Cambridge University to visit the Shell Thornton Research Centre]: Foreign trip report, July 18–29, 1992, 18:24267 (R;US)
[Travel to Trondheim, Norway to participate in the IEA task leaders meeting]: Foreign trip report, June 20–27, 1992, 18:22753 (R;US)

Savannah River Ecology Lab., Aiken, SC (United States)
Energetics of free-living box turtles (Terrapene carolina) near Aiken, South Carolina, 18:24725 (R;US)
Wetland vegetation establishment in L-Lake, 18:24834 (R;US)

Savannah River Lab., Aiken, SC (United States)
Test plan: WIPP Materials Interface Interactions Test (MIIT), 18:22932 (R;US)

Science Applications International Corp., Idaho Falls, ID (United States)
Waste minimization for commercial radioactive materials users generating low-level radioactive waste: Revision 1, 18:22967 (R;US)

Science Applications International Corp., McLean, VA (United States)
Trends and developments in the proliferation of ballistic missiles and weapons of mass destruction seminar, February 17, 1993: Final report, 18:23889 (R;US)

Science Applications International Corp., Oak Ridge, TN (United States)
Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 18:23127 (R;US)

Science Applications International Corp., Pleasanton, CA (United States)
An evaluation of a teleoperated waste-site survey technique, 18:24791 (R;US)

Science Applications International Corp., Reston, VA (United States)
Survey and assessment of conventional software verification and validation methods, 18:23531 (R;US)

Science Applications International Corp., San Diego, CA (United States)
Safety analysis, 200 Area, Savannah River Plant H-Canyon operations: Supplement 5, 18:23130 (R;US)

Science Research Lab., Inc., Somerville, MA (United States)
The plasma centrifuge (A compact, low cost, stable isotope separator): Progress report, [September 15, 1991–September 14, 1992], 18:23169 (R;US)

SCS Engineers, Inc., West Nyack, NY (United States)
Binghamton/Johnson City Joint Sewage Treatment Plant cogeneration project: Final report, 18:23851 (R;US)

Selma Univ., AL (United States). Div. of Natural Sciences
Degradation of mix hydrocarbons by immobilized cells of mix culture using a trickle fluidized bed reactor: Annual progress report, June 1992–May 1993, 18:24742 (R;US)

Service Central de Protection contre les Rayonnements Ionisants, 78 - Le Vesinet (France)
Monthly results of measurements; December 1992, 18:24642 (R;FR;In French)

Sinor (J.E.) Consultants, Inc., Niwot, CO (United States)
Addendum to industrial market assessment of the products of mild gasification, 18:22695 (R;US)

Slovak Nuclear Society, Bratislava (Slovakia)
A computerized event and maintenance data system at Loviisa nuclear power plant, 18:23404 (RA;CS)
A high fidelity model and code generator for the simulation of BOP systems, 18:24249 (RA;CS)
A new advanced software platform for nuclear power plant process information systems, 18:23425 (RA;CS)
A new diagnostic concept for the primary circuit of WWER 1000 reactors, 18:23426 (RA;CS)
ABB engagement in efforts to improve the safety of RBMK reactors, 18:23446 (RA;CS)
Advanced core monitoring technology for WWER reactors, 18:23423 (RA;CS)
Advanced repair methods for enhanced reactor safety, 18:23496 (RA;CS)
Advanced systems for training in emergency operating procedures, 18:23364 (RA;CS)
Advances in instrumentation and data processing, 18:23367 (RA;CS)
An enhanced preventive maintenance concept for NPP's, 18:23497 (RA;CS)
An investigation of axial xenon stability in WWER-1000 reactor designs, 18:23527 (RA;CS)
Automatic creation of simulation configuration: The SIPA workshop: SWORD, 18:25403 (RA;CS)
Automatic eddy current inspection system, 18:24259 (RA;CS)
Backfitting experience, Loviisa nuclear power plant, Finland, 18:23414 (RA;CS)
Computer aided training in nuclear power engineering at the Gdansk Technical University, 18:23358 (RA;CS)
Computer systems in the operation, maintenance and technical support of Loviisa NPS, 18:23427 (RA;CS)
Computerized management of plant intervention tasks, 18:23499 (RA;CS)

Containment backfitting, 18:23366 (RA;CS)
Decision making concept of risk control: integration of decision criteria, top level risk indices and plant performance indices, 18:23360 (RA;CS)
Detailed containment model for the Paks NPP full-scope simulator, 18:23401 (RA;CS)
Development of an effective man-machine interface for the Sizewell B main control room, 18:23394 (RA;CS)
Development of an intelligent CAI system for a distributed processing environment, 18:23420 (RA;CS)
Development of MAAP-WWER, 18:23416 (RA;CS)
Digital I and C for nuclear power plant, 18:23528 (RA;CS)
Digital nuclear instrumentation application to nuclear power plant, 18:23526 (RA;CS)
DIMOS: a new generation of nuclear power plant process monitoring systems, 18:23421 (RA;CS)
Efficient and reliable inspection through the use of optimised NDT, 18:24258 (RA;CS)
Electrical penetrations for use in WWER nuclear power plant containment vessels, 18:23413 (RA;CS)
Erosion-corrosion prediction and inspection program for Krsko NPP, 18:24260 (RA;CS)
Experience of PSA based back-fitting, 18:23451 (RA;CS)
French load follow technology, 18:23419 (RA;CS)
Hydrogen management techniques in German LWR-containments, 18:23410 (RA;CS)
In-service inspection of WWER steam generators, 18:23403 (RA;CS)
Innovation of safety systems of the V-1 Bohunice plant, 18:23392 (RA;CS)
Inspection and repair of nuclear components, 18:23405 (RA;CS)
Inspection validation and its role in the UK nuclear power programme, 18:23402 (RA;CS)
Inspection, maintenance and component replacement: A systematic and safety related approach, 18:23498 (RA;CS)
Introductory statement for the panel discussion 'Safety Culture in Plant Operation and Maintenance', 18:23386 (RA;CS)
Maintenance organization and outage planning in NPPs, 18:23387 (RA;CS)
Measures taken to improve nuclear safety on EdF PWRs in operation, 18:23412 (RA;CS)
Motor-operated valve analysis program to address the design basis review requirements of the US NRC's Generic Letter 89-10, 18:23368 (RA;CS)
NPP evaluation, backfitting and life extension - an engineering viewpoint, 18:23365 (RA;CS)
Nuclear power plant safety under military threats, 18:23417 (RA;CS)
Nuclear valves latest development, 18:23501 (RA;CS)
Occupational radiation exposures during maintenance shutdown at Czechoslovak NPPs, 18:24884 (RA;CS)
Operator aid systems under critical circumstances, 18:23424 (RA;CS)
Organizational aspects of recruiting, training, maintaining the level of professional skills and retraining of NPP operations personnel in Russia, 18:23400 (RA;CS)
Overview on development of in-plant emergency operating procedures, 18:23395 (RA;CS)
Preparing and organizing inspection and maintenance, 18:23388 (RA;CS)
PWR reload safety evaluation methodology, 18:23409 (RA;CS)
Replacement of process computer during full power operation, 18:23390 (RA;CS)
Safety culture in plant operation and maintenance, 18:23357 (RA;CS)
Safety culture in the operation of nuclear power plants in CSFR, 18:23385 (RA;CS)
Safety of existing installations under dynamic loads: observations on nonlinear response of piping systems - experiments, numerical analyses, 18:23500 (RA;CS)
Safety principles for nuclear power plants, 18:23355 (RA;CS)
Safety trends and design progress of future French-German Pressurized Water Reactor, 18:23383 (RA;CS)
Safety, a key factor for the future of nuclear energy, 18:23354 (RA;CS)
Seismic assessment of Kozloduy WWER-440, model 230 nuclear power plant, 18:23415 (RA;CS)
SEJV2 software package for radiation monitoring system of WWER 440 NPP, 18:23422 (RA;CS)
SIPA-SWORD: a 'configurable' simulator for safety, 18:23393 (RA;CS)
Staff training and education: Eastern point of view, 18:23384 (RA;CS)
Steam generator replacement - European experience, 18:23389 (RA;CS)
Steam generator replacement at Doel 3 NPP (Belgium), 18:23408 (RA;CS)
STRATEG - an incident training system for thermohydraulic effects and principles, 18:23398 (RA;CS)
The Belgian experience with the safety reassessment of nuclear power plants, 18:23407 (RA;CS)
The extension of the Paks full-scale simulator to severe accidents, 18:23399 (RA;CS)
The model experiments on the stationary outflow in the retaining system, 18:23411 (RA;CS)
The multi-function simulator, 18:23359 (RA;CS)
The training simulator: a powerful tool in the hands of the instructor, 18:23356 (RA;CS)
The Westinghouse approach - an I and C modernization program for WWERs, 18:23418 (RA;CS)
Three-dimensional reactor model for the Paks NPP full-scope simulator, 18:23397 (RA;CS)
Topform '92: the safe and reliable operation of LWR NPPs. Vol. I: Invited plenary session papers, 18:23638 (R;CS)
Topform '92: the safe and reliable operation of LWR NPPs. Vol. II: Poster papers, 18:23396 (R;CS)
Total data management in the La Hague reprocessing plant, 18:22884 (RA;CS)
Towards world nuclear safety standards, 18:23639 (RA;CS)
Trends in information processing and configuration of plant automation, 18:23525 (RA;CS)
Upgrading requirements, 18:23391 (RA;CS)
Validation of emergency procedures for improved safety and reliability, 18:23406 (RA;CS)
Valve monitoring ITI-MOVATS, 18:23502 (RA;CS)

Dynamic response analysis of the LBL Advanced Light Source synchrotron radiation storage ring, 18:24306 (R;US)
Effect of betatron motion on the spetum flux in superslow extraction at the SSC, 18:24420 (R;US)
Effective stress of a 4.2 K beam tube in a quenching collider 50 mm dipole magnet for the SSC, 18:24401 (R;US)
Effective stress of the SSC 80-K synchrotron radiation liner in a quenching dipole magnet, 18:24423 (R;US)
Emittance growth in MEB and its control, 18:24335 (R;US)
Head-on and long-range beam-beam tune shift spread in the SSC, 18:24332 (R;US)
Leak Checker Data Acquisition System, 18:24389 (R;US)
Longitudinal head-tail instability in a non-harmonic potential well, 18:24327 (R;US)
Low conductivity water plants – Issues of process control, 18:24390 (R;US)
Low energy booster radio frequency cavity structural analysis, 18:24399 (R;US)
Measurements of the ground motion vibrations at the SSC, 18:24305 (R;US)
Method of fabricating a completely ordered wound coil, 18:24398 (R;US)
Modification of the short straight sections of the high energy booster of the SSC, 18:24415 (R;US)
Non linear effects in ferrite tuned cavities, 18:24334 (R;US)
Parameters and conceptual design of a vertical bending magnet for the Super Collider, 18:24406 (R;US)
Photodesorption experiments on SSC collider beam tube configurations, 18:24424 (R;US)
Physics requirements of commissioning diagnostics for SSCL linac, 18:24421 (R;US)
Preliminary design of sector cryogenic shaft transfer line system, 18:24388 (R;US)
Quark and lepton masses, 18:25054 (R;US)
Quench and quench protection for the SSC collider correctors, 18:24414 (R;US)
Quench simulation of the 40 mm aperture SSC-Quadrupole Magnet connected in series with 50 mm aperture SSC-Dipole Magnets, 18:24394 (R;US)
Reducing the energy requirements of quench protection heaters for SSC dipoles – Test results, 18:24409 (R;US)
RF system analyses for the SSC collider rings, 18:24418 (R;US)
Simulation of the transverse dipole mode multibunch instability for the SSC Collider, 18:24405 (R;US)

SSCL DD2 driver port and project update, 18:24391 (R;US)
Status of the SSC, 18:24307 (R;US)
Strain gauge pack in process measurement system for the collider quadrupole, design and technology transfer, 18:24410 (R;US)
Stress analysis on SSC cryogenic shaft transfer line suspension system, 18:24386 (R;US)
Structural and thermal analysis of a solid-cooled, low energy booster, radio-frequency-cavity tuner at the Superconducting Super Collider, 18:24397 (R;US)
Structural behavior of the six-strut support system, 18:24407 (R;US)
Submicron beam position sensor for the SSC, 18:24383 (R;US)
Supplier Performance Evaluation and Rating System (SPEARS), 18:24392 (R;US)
System-level description of the SDC detector, 18:24462 (R;US)
Systems analysis determining critical items, critical assembly processes, primary failure modes and corrective actions on ASST magnets, 18:24385 (R;US)
Test performance of the QSE series of 5 cm aperture quadrupole model magnets, 18:24404 (R;US)
The Accelerator Systems String Test cryogenics, 18:24393 (R;US)
The Accelerator Systems String Test Program, 18:24413 (R;US)
The heat load of an 80 K liner for the SSC, 18:24412 (R;US)
The longitudinal coupling impedance of a slot on the SSC Collider linear, 18:24395 (R;US)
Three-dimensional model of a liquid-cooled, low energy booster radio- frequency cavity tuner at the Superconducting Super Collider, 18:24396 (R;US)
Tune shift effect due to the sextupole longitudinal periodic structure in the superconducting dipole magnets, 18:24331 (R;US)
Using a ceramic chamber in kicker magnets, 18:24408 (R;US)
ZBEAM, charge tracing code for the SSC environment, 18:24328 (R;US)

Surtek, Inc., Golden, CO (United States)
Detailed evaluation of the West Kiehl alkaline-surfactant-polymer field project and it's application to mature Minnelusa waterfloods: Technical progress report, January–March 1993, 18:22794 (R;US)
Investigation of oil recovery improvement by coupling and interfacial tension agent and a mobility control agent in light oil reservoirs: Technical progress report, January–March 1993, 18:22799 (R;US)

Swarthmore Coll., PA (United States)
Thermographic properties of eight blue-emitting phosphors, 18:24000 (R;US)

Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2, *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

The Danish OML model (Standard Danish atmopsheric dispersion model for regulatory use.), 18:24608 (RA;DK)
The potential use of Lagrangian stochastic models for short-range dispersion, 18:24614 (RA;DK)
UK-ADMS - a new approach to modelling dispersion in the earth's atmospheric boundary layer, 18:24607 (RA;DK)
Use of dispersion models in real time for environmental monitoring: A case study: The Sostanj experimental campaign, 18:24619 (RA;DK)
Environmental Effects
Acidic deposition and air pollution: Implications for forest management, 18:24680 (RA;CA)
Bayreuth Institute of Terrestrial Ecosystem Research (BITOEK). Interim report 1991, 18:24929 (I;DE;In German)
Multiple use implications of acid rain and forest resources, 18:24681 (RA;CA)
Forecasting
Stochastic models for real time forecast and control of pollution episodes, 18:24615 (RA;DK)
Forests
Bayreuth Institute of Terrestrial Ecosystem Research (BITOEK). Interim report 1991, 18:24929 (I;DE;In German)
Information Systems
Tracer experiment data sets for the verification of local and meso-scale atmospheric dispersion models including topographic effects: Acquisition, storage and distribution of the data sets, 18:24622 (RA;DK)
Long-Range Transport
Heavy metal contamination of terrestrial ecosystems from long-range atmospheric transport, 18:24700 (RA;CA)
Mathematical Models
Analytical solutions of advection-diffusion equation as a tool for a next generation of atmospheric dispersion models, 18:24611 (RA;DK)
Atmospheric dispersion models for real-time application in the decision support system being developed within the CEC, 18:24603 (RA;DK)
Large-eddy modelling as a data-base for practical air pollution models, 18:24613 (RA;DK)
Model evaluation criteria using tracer experimental data, 18:24618 (RA;DK)
Objectives for next generation of practical short-range atmospheric dispersion models: Proceedings of the workshop, 18:24596 (R;DK)
Quality criteria for air pollution models, standardisation and model development in the Netherlands, 18:24605 (RA;DK)
Standards for the development of new dispersion models, 18:24620 (RA;DK)
Summary of a UK meeting to discuss harmonisation of atmospheric dispersion models, 18:24604 (RA;DK)
The Dutch standard on the description of air pollution models, 18:24623 (RA;DK)
Soils
Bayreuth Institute of Terrestrial Ecosystem Research (BITOEK). Interim report 1991, 18:24929 (I;DE;In German)
Statistical Models
The role of statistical models, 18:24616 (RA;DK)

AIR POLLUTION ABATEMENT
Carbon-dioxide free gasoline fueled car, 18:23875 (IA;JP;In Japanese)
Economic Commission for Europe NO_x Task Force 'Operating experience with NO_x abatement at stationary sources', 18:24592 (I;DE)
Economics, ethics, and climate policy, 18:23736 (R;US)
Standardization in the field of air quality: Activities of ISO and CEN, 18:24597 (RA;DK)

AIR POLLUTION CONTROL
Development of the integrated environmental control model: Technical progress report, [October 1–December 31, 1992], 18:23342 (R;US)

AIR POLLUTION MONITORING
See also AEROSOL MONITORING
Characteristics of a third generation regulatory models, 18:24624 (RA;DK)

AIR POLLUTION MONITORS
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring: Technical progress report, September 25, 1992–December 31, 1992, 18:24581 (R;US)

AIR QUALITY
Air pollution by polycyclic aromatic hydrocarbons (PAH) in the city of Hamburg, 18:24591 (I;DE;In German)
Continuous spectrum analysis: An approach for analyzing alternatives and impacts of potential projects, 18:23743 (R;US)
Guidance on management of non-residential indoor air quality, 18:24576 (R;US)

AIRBORNE PARTICLES

Fuel Element Failure
Experimental data report for Test TS-2 reactivity initiated accident test in NSRR with pre-irradiated BWR fuel rod, 18:23369 (R;JP)

Isolation Condensers
Prediction of BWR performance under the influence of Isolation Condenser-using RAMONA-4 code, 18:23362 (R;US)

Meltdown
Boiling Water Reactor Core Melt Progression Phenomena Program: Foreign trip report, September 19–October 10, 1992, 18:23665 (R;US)

Pipes
Benchmark analysis for the design of piping systems in advanced reactors, 18:23363 (R;US)
Preliminary evaluation of snubber single failures, 18:23664 (R;US)

Power Generation
[Advanced Light Water Reactor (ALWR) Utility Requirements Document Program]: Foreign trip report, September 27–October 4, 1992, 18:23666 (R;US)

Pressure Control
Prediction of BWR performance under the influence of Isolation Condenser-using RAMONA-4 code, 18:23362 (R;US)

Reactivity
Experimental data report for Test TS-2 reactivity initiated accident test in NSRR with pre-irradiated BWR fuel rod, 18:23369 (R;JP)

Reactor Accidents
MELCOR Verification, Benchmarking, and Applications experience at BNL, 18:23627 (R;US)

Reactor Components
Interim fatigue design curves for carbon, low-alloy, and austenitic stainless steels in LWR environments, 18:23371 (R;US)

Reactor Control Systems
Digital I and C for nuclear power plant, 18:23528 (RA;CS)

Reactor Decommissioning
A computer program for estimating decommissioning costs for light water reactors, 18:23668 (R;US)

Reactor Instrumentation
Digital I and C for nuclear power plant, 18:23528 (RA;CS)

Reactor Noise
Study on statistical analysis of nonlinear and nonstationary reactor noises, 18:23529 (R;JP;In Japanese)

Reactor Protection Systems
A compilation of reports of the Advisory Committee on Reactor Safeguards: 1992 Annual: Volume 14, 18:23650 (R;US)

Reactor Safety
A compilation of reports of the Advisory Committee on Reactor Safeguards: 1992 Annual: Volume 14, 18:23650 (R;US)
Proceedings of the US Nuclear Regulatory Commission twentieth water reactor safety information meeting: Volume 3, Aging research developments, Primary system integrity, Structural and seismic engineering, Earth sciences, Probabilistic risk assessment topics, 18:23654 (R;US)
Proceedings of the US Nuclear Regulatory Commission twentieth water reactor safety information meeting: Volume 1, Plenary session, Advanced reactor research, Advanced passive LWRs, Advanced instrumentation and control hardware, Advanced control system technology, Human factors research, EPRI's nuclear safety research and development, 18:23652 (R;US)
Proceedings of the US Nuclear Regulatory Commission twentieth water reactor safety information meeting: Volume 2, Severe accident research, Thermal hydraulics, 18:23653 (R;US)

Risk Assessment
On fire risk/methodology for the next generation of reactors and nuclear facilities, 18:23676 (R;US)

Technology Assessment
[Advanced Light Water Reactor (ALWR) Utility Requirements Document Program]: Foreign trip report, September 27–October 4, 1992, 18:23666 (R;US)

Transients
Feasibility study for improved steady-state initialization algorithms for the RELAP5 computer code: Phase 1 improved steady-state initialization algorithms for computer codes, 18:25412 (R;US)
SCDAP/RELAP5 independent peer review, 18:23644 (R;US)

Valves
Motor-operated valve analysis program to address the design basis review requirements of the US NRC's Generic Letter 89-10, 18:23368 (RA;CS)

C

CABLES
Cable friction study of molybdenum disulfide solid lubricant on 3×7 stainless steel cable, 18:24141 (R;US)

CADMIUM SELENIDES

Study on cyclic gasification catalyst. 2, 18:22829 (IA;JP;In Japanese)

Chemical Analysis
New catalyst for CO2 reduction, 18:24575 (IA;JP;In Japanese)

Chemical Preparation
Alternative formulations of regenerable flue gas cleanup catalysts: Progress report, December 1, 1992–February 28, 1993, 18:23334 (R;US)
Preparation of ultrafine catalyst powders using a flow-through hydrothermal process, 18:22730 (R;US)
Results of catalyst testing using iron-based catalysts, 18:22729 (R;US)
Study in deNOx catalysts for lean-burn gas engines, 18:23877 (IA;JP;In Japanese)

Chemical Reaction Kinetics
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)

Coal Liquefaction
Fe(CO)5/sulfur-catalyzed coal liquefaction using steam or alcohol as hydrogen source, 18:22669 (IA;JP;In Japanese)

Cobalt
Catalytic hydrocracking reaction of nascent coal volatile matter under high pressure in a two-stage reactor, 18:22673 (IA;JP;In Japanese)
Studies on cobalt catalyst for fischer-tropsch synthesis.: Effect of surface acidity and pore structure of SiO2-Al2O3 supports on the composition of their products, 18:22689 (IA;JP;In Japanese)

Composite Materials
Coprocessing of coal with heavy oil over composite catalysts, 18:22667 (IA;JP;In Japanese)

Crystallization
New catalyst for CO2 reduction, 18:24575 (IA;JP;In Japanese)

Excitation
New catalyst for CO2 reduction, 18:24575 (IA;JP;In Japanese)

Excited States
Photochemical CO2 reduction using modified titanium oxide catalyst, 18:23733 (IA;JP;In Japanese)

Gasification
Study on cyclic gasification catalyst. 2, 18:22829 (IA;JP;In Japanese)

Impregnation
NA/CA catalyzation of Illinois coals for gasification: Technical report, December 1, 1992–February 28, 1993, 18:22722 (R;US)

Iron Carbonates
Fe(CO)5/sulfur-catalyzed coal liquefaction using steam or alcohol as hydrogen source, 18:22669 (IA;JP;In Japanese)

Iron Ions
Degradation of environmental pollutants by solar energy. Part 3.: Visible light enhancement of the degradation of organophosphorous compounds by hydrogen peroxide in presence of iron salt, 18:24115 (IA;JP;In Japanese)

Lanthanum
Recent trend of automotive catalysts, 18:23856 (IA;JP;In Japanese)

Lithium Chlorides
Coprocessing of coal with heavy oil over composite catalysts, 18:22667 (IA;JP;In Japanese)

Mechanical Properties
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)

Molybdenum
Catalytic hydrocracking reaction of nascent coal volatile matter under high pressure in a two-stage reactor, 18:22673 (IA;JP;In Japanese)
Coprocessing of coal with heavy oil over composite catalysts, 18:22667 (IA;JP;In Japanese)
Hydrodenitrogenation of coal liquids by phenol addition, 18:22690 (IA;JP;In Japanese)

Molybdenum Sulfides
New catalyst for CO2 reduction, 18:24575 (IA;JP;In Japanese)

Nickel
Catalytic hydrocracking reaction of nascent coal volatile matter under high pressure in a two-stage reactor, 18:22673 (IA;JP;In Japanese)
Coprocessing of coal with heavy oil over composite catalysts, 18:22667 (IA;JP;In Japanese)
Study on cyclic gasification catalyst. 2, 18:22829 (IA;JP;In Japanese)
Study on solar chemical heat pump system.: Experiment on dehydrogenation of 2-propanol and distillation of products, 18:23833 (IA;JP;In Japanese)
Thermochemical conversion of cellulose with nickel metal catalyst, 18:23194 (IA;JP;In Japanese)

Nickel Chlorides
Coprocessing of coal with heavy oil over composite catalysts, 18:22667 (IA;JP;In Japanese)
Oxidizers
Degradation of environmental pollutants by solar energy. Part 3.: Visible light enhancement of the degradation of organophosphorous compounds by hydrogen peroxide in presence of iron salt, 18:24115 (IA;JP;In Japanese)
Palladium
Recent trend of automotive catalysts, 18:23856 (IA;JP;In Japanese)
Performance
Study on cyclic gasification catalyst. 2, 18:22829 (IA;JP;In Japanese)
Performance Testing
Conversion of aqueous ethanol to oily products and combustion of coke produced, on Pt-TiO2/SiO2, 18:22691 (IA;JP;In Japanese)
Ph Value
Hydrodenitrogenation of coal liquids by phenol addition, 18:22690 (IA;JP;In Japanese)
Photochemical Reactions
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)
Degradation of environmental pollutants by solar energy. Part 3.: Visible light enhancement of the degradation of organophosphorous compounds by hydrogen peroxide in presence of iron salt, 18:24115 (IA;JP;In Japanese)
Platinum
Conversion of aqueous ethanol to oily products and combustion of coke produced, on Pt-TiO2/SiO2, 18:22691 (IA;JP;In Japanese)
Recent trend of automotive catalysts, 18:23856 (IA;JP;In Japanese)
Porosity
Hindered diffusion of coal liquids: Quarterly report No. 2, December 18, 1992–March 17, 1993, 18:22726 (R;US)
Potassium Chlorides
Coprocessing of coal with heavy oil over composite catalysts, 18:22667 (IA;JP;In Japanese)
Precursor
Fe(CO)5/sulfur-catalyzed coal liquefaction using steam or alcohol as hydrogen source, 18:22669 (IA;JP;In Japanese)
Reaction Intermediates
Degradation of environmental pollutants by solar energy. Part 3.: Visible light enhancement of the degradation of organophosphorous compounds by hydrogen peroxide in presence of iron salt, 18:24115 (IA;JP;In Japanese)
Reduction
New catalyst for CO2 reduction, 18:24575 (IA;JP;In Japanese)
Rhodium
Recent trend of automotive catalysts, 18:23856 (IA;JP;In Japanese)
Silicon Oxides
Conversion of aqueous ethanol to oily products and combustion of coke produced, on Pt-TiO2/SiO2, 18:22691 (IA;JP;In Japanese)
Sols
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)
Structural Chemical Analysis
Reverse micelle synthesis of nanoscale metal containing catalysts, 18:24112 (R;US)
Sulfur
Fe(CO)5/sulfur-catalyzed coal liquefaction using steam or alcohol as hydrogen source, 18:22669 (IA;JP;In Japanese)
Surface Area
New catalyst for CO2 reduction, 18:24575 (IA;JP;In Japanese)
Synthesis
Reverse micelle synthesis of nanoscale metal containing catalysts, 18:24112 (R;US)
Titanium Oxides
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)
Conversion of aqueous ethanol to oily products and combustion of coke produced, on Pt-TiO2/SiO2, 18:22691 (IA;JP;In Japanese)
Photochemical CO2 reduction using modified titanium oxide catalyst, 18:23733 (IA;JP;In Japanese)
Tungsten Sulfides
New catalyst for CO2 reduction, 18:24575 (IA;JP;In Japanese)
Ultraviolet Radiation
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)
Wavelengths
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)
Zeolites
Selective reducing reaction of NO using zeolite-based catalyst, 18:23880 (IA;JP;In Japanese)
Zirconium
Recent trend of automotive catalysts, 18:23856 (IA;JP;In Japanese)

CATALYTIC CONVERTERS
Methane reduction by catalysts for natural gas motors: Status report, 18:24627 (R;DK;In Swedish)
Study in deNOx catalysts for lean-burn gas engines, 18:23877 (IA;JP;In Japanese)

CATAPHORESIS
See ELECTROPHORESIS

CATHODE RAY TUBES
Cavity resonance absorption in ultra-high bandwidth CRT deflection structure, 18:24279 (PA;US)

CAUSTIC FLOODING
Detailed evaluation of the West Kiehl alkaline-surfactant-polymer field project and it's application to mature Minnelusa waterfloods: Technical progress report, January–March 1993, 18:22794 (R;US)
Investigation of oil recovery improvement by coupling and interfacial tension agent and a mobility control agent in light oil reservoirs: Technical progress report, January–March 1993, 18:22799 (R;US)

CAVITIES
See also BOREHOLES
SALT CAVERNS
Cavity collapse safety system, 18:24546 (RA;US)
Cavity pressure measurements on DISKO ELM, 18:24544 (RA;US)
Estimation of partial decoupling of cavity events, 18:24553 (R;US)
Gas flow calculations and measurements for the Ledoux event, 18:24551 (RA;US)
RAMS data for selected LANL events, 18:24547 (RA;US)
Sensitivities of calculated residual stress to separation distances of two simultaneous events, 18:24540 (RA;US)
Sustained growth of multiple gas-driven fractures, 18:24550 (RA;US)
Thermodynamic evolution of nuclear cavities, 18:24543 (RA;US)

CAVITY RESONATORS
See also SUPERCONDUCTING CAVITY RESONATORS
Maximum water purity in cooling systems of electrophysical equipment, 18:24352 (IA;RU;In Russian)
Spectrum of a circular resonator with diffraction grating loading, 18:24358 (IA;RU;In Russian)

CDF
See FERMILAB COLLIDER DETECTOR

CEA MARCOULE
Order of 24 July 1992 on the licensing of gaseous radioactive effluent releases from the large nuclear installations called Atalante at the nuclear research centre in the Rhone valley on the Marcoule nuclear site, 18:23166 (I;XN;In French)
Order of 24 July 1992 on the licensing of liquid radioactive effluent releases from the large nuclear installation called Atalante at the nuclear research centre in the Rhone valley on the Marcoule nuclear site, 18:23165 (I;XN;In French)

CELL CULTURES
Biological upgrading of coal liquids: Quarterly report, October–December 31, 1992, 18:22718 (R;US)

COAGULANTS
Separan for water treatment, 18:23591 (R;US)

COAL
See also BROWN COAL
COAL FINES
SUBBITUMINOUS COAL

Agglomeration
Advanced direct coal liquefaction concepts: Quarterly report, October 1, 1992–December 31, 1992, 18:22715 (R;US)

Ash Content
Study of slurryability, 18:22749 (IA;JP;In Japanese)

Ashes
Engineering design and analysis of advanced physical fine coal cleaning technologies: Technical progress report No. 28, 18:22650 (R;US)
Suppression of fine ash formation in pulverized coal flames: Quarterly technical progress report No. 2, January 1, 1993–March 31, 1993, 18:22768 (R;US)

Australia
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)

Biodegradation
Characterization of the organic-sulfur-degrading enzymes: [Quarterly] technical report, December 1, 1992–February 28, 1993, 18:22720 (R;US)

Bulk Density
Operation of the coal moisture control plant at Kashima No.2 coke battery, 18:22685 (IA;JP;In Japanese)

Carbonization
Gas permeability of coal plastic layer, 18:22679 (IA;JP;In Japanese)
Investigation of coking pressure during carbonization of coke oven, 18:22680 (IA;JP;In Japanese)
Second-generation pressurized fluidized bed combustion plants for electric power generation, 18:22761 (R;US)

Chemical Activation
Production of carbon molecular sieves from Illinois coal: Technical report, December 1, 1992–February 28, 1993, 18:24068 (R;US)

Chemical Bonds
Protocols for the selective cleavage of carbon-sulfur bonds in coal: Technical report, December 1, 1992–February 28, 1993, 18:24105 (R;US)

Chemical Composition
Advanced direct coal liquefaction concepts: Quarterly report, August 1–September 30, 1992, 18:22716 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 3, April 1–June 30, 1987, 18:22706 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 5, October 1–December 31, 1987, 18:22708 (R;US)

Chemical Reaction Yield
Effect of asphaltene in bitumen on co-processing of coal/bitumen, 18:22666 (IA;JP;In Japanese)

Cleaning
Non-intrusive measurement of particle charge: Electrostatic dry coal cleaning: Technical progress report No. 6, October 1, 1992–December 31, 1992, 18:22651 (R;US)

Coal Gasification
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)

Coal Industry
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)

Coal Preparation
Study of slurryability, 18:22749 (IA;JP;In Japanese)

Coal Rank
Non-covalent bonding in coal strucutre and novel applications, 18:22662 (IA;JP;In Japanese)

Cocombustion
Modification, relocation and operation of the Pedco Rotary Cascading Bed Boiler: Final report, 18:23333 (R;US)

Coke Ovens
Investigation of coking pressure during carbonization of coke oven, 18:22680 (IA;JP;In Japanese)

Combined-Cycle Power Plants
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)

Combustion
Characterization of air toxics from a laboratory coal-fired combustor and utility scale power plants: Quarterly progress report No. 6, January–March 1993, 18:23337 (R;US)
Combustion of dense streams of coal particles: Quarterly progress report No. 10, November 29, 1992–February 28, 1993, 18:22763 (R;US)
Corrosion performance of materials in coal-combustion environments, 18:23327 (R;US)
Development of a vortex combustor (VC) for space/water heating applications (combustion tests): Final report, 18:22762 (R;US)
Healy Clean Coal Project, Healy FCM testing at Niro Air Pollution Control Pilot Facility: Final report, 18:23338 (R;US)
Modification, relocation and operation of the Pedco Rotary Cascading Bed Boiler: Final report, 18:23333 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, October 1, 1992–December 31, 1992, 18:23339 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, January 1, 1992–March 31, 1992, 18:22765 (R;US)
Suppression of fine ash formation in pulverized coal flames: Quarterly technical progress report No. 2, January 1, 1993–March 31, 1993, 18:22768 (R;US)
[Travel to Australia to attend the 24th international symposium on combustion at the University of Sydney]: Foreign trip report, June 29–July 19, 1992, 18:22752 (R;US)

Combustion Products
Characterization of air toxics from a laboratory coal-fired combustor and utility scale power plants: Quarterly progress report No. 6, January–March 1993, 18:23337 (R;US)

Comparative Evaluations
EERC pilot-scale CFBC evaluation facility Project CFB test results: Topical report, Task 7.30, 18:22754 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, October 1, 1992–December 31, 1992, 18:23339 (R;US)
Process performance of Ahlstrom Pyroflow PCFB pilot plant, 18:22760 (R;US)

Control
Operation of the coal moisture control plant at Kashima No.2 coke battery, 18:22685 (IA;JP;In Japanese)

Conversion Ratio
Effect of asphaltene in bitumen on co-processing of coal/bitumen, 18:22666 (IA;JP;In Japanese)

Coprocessing
Effect of asphaltene in bitumen on co-processing of coal/bitumen, 18:22666 (IA;JP;In Japanese)
Effect of pretreating of host oil on coprocessing: Quarterly progress report, July 1, 1992–September 30, 1992, 18:22717 (R;US)
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)

Cost
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)

Denitrification
A novel coal feeder for production of low sulfur fuel: Quarterly technical progress report, October 1, 1992–January 1, 1993, 18:22701 (R;US)

Depolymerization
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 5, October 1–December 31, 1987, 18:22708 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 8, July 1–September 30, 1988, 18:22711 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 4, July 1–September 30, 1987, 18:22707 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 3, April 1–June 30, 1987, 18:22706 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 7, April 1–June 30, 1988, 18:22710 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 2, January 1–March 31, 1987, 18:22705 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 6, January 1–March 31, 1988, 18:22709 (R;US)

Desulfurization
A novel coal feeder for production of low sulfur fuel: Annual technical progress report, October 1, 1991–October 1, 1992, 18:22700 (R;US)
A novel coal feeder for production of low sulfur fuel: Quarterly technical progress report, October 1, 1992–January 1, 1993, 18:22701 (R;US)
Heteronuclear probes of coal structure and reactivity: Quarterly report, October 30, 1992–January 31, 1993, 18:22727 (R;US)
Microbial strain improvement for organosulfur removal from coal: Technical report, December 1, 1992–February 28, 1993, 18:22723 (R;US)

Protocols for the selective cleavage of carbon-sulfur bonds in coal: Technical report, December 1, 1992–February 28, 1993, 18:24105 (R;US)
Studies of incipient oxidation of coal-pyrite for improved pyrite rejection: Technical Progress report, January 1, 1993–March 31, 1993, 18:22655 (R;US)

Devolatilization
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, October 1, 1992–December 31, 1992, 18:23339 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, January 1, 1992–March 31, 1992, 18:22765 (R;US)
Second-generation pressurized fluidized bed combustion plants for electric power generation, 18:22761 (R;US)

Dissolution
Active species in Zn-butyl iodide system for coal solubilization, 18:22663 (IA;JP;In Japanese)

Dryers
Operation of the coal moisture control plant at Kashima No.2 coke battery, 18:22685 (IA;JP;In Japanese)

Drying
An investigation of the role of water on retrograde/condensation reactions and enhanced liquefaction yields: Quarterly progress report, January 1, 1993–March 31, 1993, 18:22714 (R;US)

Electron Spin Resonance
Molecular accessibility in solvent swelled coals: Quarterly report, May 1993, 18:22735 (R;US)

Electrons
Molecular movement of electronic acceptor-doped coal and its interaction with solvent.: Change of intermolecular cohesion in coal by heat treatment, 18:22732 (IA;JP;In Japanese)

Energy Accounting
Present situation in new energy related cooperation and its future direction (Germany), 18:23776 (R;JP;In Japanese)

Exports
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)

Fluidization
Gas permeability of coal plastic layer, 18:22679 (IA;JP;In Japanese)

Fluidized-Bed Combustion
EERC pilot-scale CFBC evaluation facility Project CFB test results: Topical report, Task 7.30, 18:22754 (R;US)
Emissions of NOx and N2O from a circulating fluidized bed combustor, 18:22751 (IA;JP;In Japanese)
Geochemistry of FBC waste-coal slurry solid mixtures: Technical report, December 1, 1992–February 28, 1993, 18:22767 (R;US)
Process performance of Ahlstrom Pyroflow PCFB pilot plant, 18:22760 (R;US)
Second-generation pressurized fluidized bed combustion plants for electric power generation, 18:22761 (R;US)
Tidd PFBC Demonstration Plant operation and testing, 18:22756 (R;US)
Tidd PFBC Demonstration Project fourth quarterly technical progress report, CY 1992, 18:22757 (R;US)

Fuel Feeding Systems
Emissions of NOx and N2O from a circulating fluidized bed combustor, 18:22751 (IA;JP;In Japanese)

Fuel Slurries
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)

Fuels
Statement for early commercialization of solid oxide fuel cell, 18:23789 (IA;JP;In Japanese)

Gases
Gas permeability of coal plastic layer, 18:22679 (IA;JP;In Japanese)

Gasification
[Travel to Gaborone, Botswana to participate in the African Energy Policy Research Network sixth workshop on energy policy and planning research in east and southern African countries]: Foreign trip report, April 6–10, 1992, 18:23723 (R;US)

Grinding
Development of an on-line image analysis for assessment of pyrite liberation: Technical report, December 1, 1992–February 28, 1993, 18:24470 (R;US)

Hydrogen
Effect of asphaltene in bitumen on co-processing of coal/bitumen, 18:22666 (IA;JP;In Japanese)

Hydrogenation
Effect of asphaltene in bitumen on co-processing of coal/bitumen, 18:22666 (IA;JP;In Japanese)
Fundamental studies in production of C_2-C_4 hydrocarbons from coal: Final report, 1 September 1988–31 August 1992, 18:22699 (R;US)

Image Processing
Development of an on-line image analysis for assessment of pyrite liberation: Technical report, December 1, 1992–February 28, 1993, 18:24470 (R;US)

Information Centers
Finnish industry as users of IEA Coal Research Services, 18:22649 (R;FI;In Finnish)

Intermolecular Forces
Non-covalent bonding in coal strucutre and novel applications, 18:22662 (IA;JP;In Japanese)
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)

Layers
Gas permeability of coal plastic layer, 18:22679 (IA;JP;In Japanese)
Investigation of coking pressure during carbonization of coke oven, 18:22680 (IA;JP;In Japanese)

Macerals
Gas permeability of coal plastic layer, 18:22679 (IA;JP;In Japanese)

Market
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)

Mass Spectroscopy
Mass spectral study of organic sulfur in the polymeric matrix of coal: Technical report, December 1, 1992–February 28, 1993, 18:22738 (R;US)

Mixing
Investigation of coking pressure during carbonization of coke oven, 18:22680 (IA;JP;In Japanese)

Moisture
Operation of the coal moisture control plant at Kashima No.2 coke battery, 18:22685 (IA;JP;In Japanese)

Molecular Structure
Empirical evalution of affinity between macromolecular strucutre of coal and penetrating molecule, 18:22733 (IA;JP;In Japanese)
Studies on coal chemical structure based on combined data of solid state NMR spectroscopy and thermal pyrolysis, 18:22734 (IA;JP;In Japanese)

Nuclear Magnetic Resonance
An investigation of the role of water on retrograde/condensation reactions and enhanced liquefaction yields: Quarterly progress report, January 1, 1993–March 31, 1993, 18:22714 (R;US)

Oil Yields
Effect of asphaltene in bitumen on co-processing of coal/bitumen, 18:22666 (IA;JP;In Japanese)

Organic Solvents
Roles of non-covalent interactions in coal structure, 18:22731 (IA;JP;In Japanese)

Particle Size
Study of slurryability, 18:22749 (IA;JP;In Japanese)

Plastics
Gas permeability of coal plastic layer, 18:22679 (IA;JP;In Japanese)

Polymers
Empirical evalution of affinity between macromolecular strucutre of coal and penetrating molecule, 18:22733 (IA;JP;In Japanese)
Porosity
Characterization of porosity via secondary reactor: Quarterly technical progress report, 1 October 1992–31 December 1992, 18:22737 (R;US)
Prices
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)
Productivity
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)
Pulverized Fuels
Product properties in coal flash pyrolysis, 18:22672 (IA;JP;In Japanese)
Study of slurryability, 18:22749 (IA;JP;In Japanese)
Pyrolysis
A novel coal feeder for production of low sulfur fuel: Annual technical progress report, October 1, 1991–October 1, 1992, 18:22700 (R;US)
A novel coal feeder for production of low sulfur fuel: Quarterly technical progress report, October 1, 1992–January 1, 1993, 18:22701 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, October 1, 1992–December 31, 1992, 18:23339 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, January 1, 1992–March 31, 1992, 18:22765 (R;US)
Production of carbon molecular sieves from Illinois coal: Technical report, December 1, 1992–February 28, 1993, 18:24068 (R;US)
Weak links and interfacial chemistry in coal, 18:22661 (R;US)
Reliability
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)
Separation Processes
Non-intrusive measurement of particle charge: Electrostatic dry coal cleaning: Technical progress report No. 6, October 1, 1992–December 31, 1992, 18:22651 (R;US)
Solubility
Roles of non-covalent interactions in coal structure, 18:22731 (IA;JP;In Japanese)
Solvents
Product properties in coal flash pyrolysis, 18:22672 (IA;JP;In Japanese)
Sorptive Properties
Production of carbon molecular sieves from Illinois coal: Technical report, December 1, 1992–February 28, 1993, 18:24068 (R;US)
Staged Combustion
Evaluation of gas-reburning and low NO_x burners on a wall fired boiler: Technical progress report No. 10, January 1–March 31, 1993, 18:22764 (R;US)
Stagnation
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)
Storage
Power Department, 18:23601 (R;US)
Structural Chemical Analysis
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 7, April 1–June 30, 1988, 18:22710 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 8, July 1–September 30, 1988, 18:22711 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 6, January 1–March 31, 1988, 18:22709 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 4, July 1–September 30, 1987, 18:22707 (R;US)
Supply and Demand
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)
Swelling
Molecular accessibility in solvent swelled coals: Quarterly report, May 1993, 18:22735 (R;US)
Synthetic Fuels
Fundamental studies in production of C_2-C_4 hydrocarbons from coal: Final report, 1 September 1988–31 August 1992, 18:22699 (R;US)
Technology Assessment
Non-covalent bonding in coal strucutre and novel applications, 18:22662 (IA;JP;In Japanese)
Texaco Gasification Process
Statement for early commercialization of solid oxide fuel cell, 18:23789 (IA;JP;In Japanese)
Texture
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)
Roles of non-covalent interactions in coal structure, 18:22731 (IA;JP;In Japanese)
Thermal Expansion
Investigation of coking pressure during carbonization of coke oven, 18:22680 (IA;JP;In Japanese)
Thermodynamic Molecular Model
Molecular movement of electronic acceptor-doped coal and its interaction with solvent.: Change of intermolecular cohesion in coal by heat treatment, 18:22732 (IA;JP;In Japanese)
Uses
Finnish industry as users of IEA Coal Research Services, 18:22649 (R;FI;In Finnish)
Wages
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)
Water
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)

COAL FINES
A novel three phase fluidized bed process for simultaneous selective flocculation and microbial desulfurization of high sulfur coal: Final report, 18:22658 (R;US)
Bench-scale testing of the multi-gravity separator in combination with Microcel: Second Quarterly report, January 1, 1993–March 31, 1993, 18:22652 (R;US)
Evaluation of hyperbaric filtration for fine coal dewatering: Second Quarterly technical progress report, December 1, 1992–February 28, 1993, 18:22656 (R;US)
Fire and explosion hazards with powdered coal. 1.: Its heat generating and spontaneous ignition characteristics, 18:22774 (IA;JP;In Japanese)
Fire and explosion hazards with powdered coal. 2.: Coal dust explosion characteristics, 18:22775 (IA;JP;In Japanese)

COAL GASIFICATION
See also FLASH HYDROPYROLYSIS PROCESS
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, October 1, 1992–December 31, 1992, 18:22694 (R;US)
Fundamental studies in production of C_2-C_4 hydrocarbons from coal: Final report, 1 September 1988–31 August 1992, 18:22699 (R;US)
High octane ethers from synthesis gas-derived alcohols: Quarterly technical progress report, April–June 1992, 18:22704 (R;US)
Investigation of a sulfur reduction technique for mild gasification char: Technical report, December 1, 1992–February 28, 1993, 18:22724 (R;US)
Novel process for depolymerization of coal to C_2-C_4 hydrocarbons: Progress report No. 13, September 1, 1992–November 30, 1992, 18:22702 (R;US)

Adsorbents
Stabilization of spent sorbents from coal gasification: Technical report, December 1, 1992–February 28, 1993, 18:22721 (R;US)
Benzene
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Carbon Dioxide
Effect of melting ash on reactivity of coal char gasification at high temperature, 18:22676 (IA;JP;In Japanese)
Catalysts
NA/CA catalyzation of Illinois coals for gasification: Technical report, December 1, 1992–February 28, 1993, 18:22722 (R;US)
Chemical Reaction Kinetics
Effect of melting ash on reactivity of coal char gasification at high temperature, 18:22676 (IA;JP;In Japanese)
Coal Fines
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Combined-Cycle Power Plants
New technology development for realization of the coal gasification combined cycle power generation system, 18:22674 (IA;JP;In Japanese)
Conversion Ratio
Pore structure of char derived from coal gasification at high temperature, 18:22677 (IA;JP;In Japanese)
Entrainment
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Flash Hydropyrolysis Process
Development of a new coal hydrogenation process by Osaka Gas and British Gas, 18:22675 (IA;JP;In Japanese)
Fluidized Beds
Mild temperature gasification: Partitioning sulfur to gas as H_2S: Technical report, December 1, 1992–February 28, 1993, 18:22725 (R;US)
Gas Flow
New technology development for realization of the coal gasification combined cycle power generation system, 18:22674 (IA;JP;In Japanese)
Hydrogen Production
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Hydrogenation
Development of a new coal hydrogenation process by Osaka Gas and British Gas, 18:22675 (IA;JP;In Japanese)
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Market
Addendum to industrial market assessment of the products of mild gasification, 18:22695 (R;US)
Material Balance
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Partial Oxidation Processes
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Temperature Range 1000-4000 K
Effect of melting ash on reactivity of coal char gasification at high temperature, 18:22676 (IA;JP;In Japanese)
Pore structure of char derived from coal gasification at high temperature, 18:22677 (IA;JP;In Japanese)
Test Facilities
High-pressure coal fuel processor development: Task 1, Proof of principle testing, 18:22697 (R;US)
Toluene
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
Xylenes
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)

COAL GASIFICATION PLANTS
Development of a coal gasifier with circulating solid particles as heat medium, 18:22678 (IA;JP;In Japanese)
Development of an advanced, continuous mild gasification process for the production of co-products: Task 4.6, Economic evaluation, 18:22696 (R;US)

COAL LIQUEFACTION
See also FLASH HYDROPYROLYSIS PROCESS
Advanced direct coal liquefaction concepts: Quarterly report, August 1–September 30, 1992, 18:22716 (R;US)
Advanced direct coal liquefaction concepts: Quarterly report, October 1, 1992–December 31, 1992, 18:22715 (R;US)
Effect of pretreating of host oil on coprocessing: Quarterly progress report, July 1, 1992–September 30, 1992, 18:22717 (R;US)
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, December 1992–March 1993, 18:22713 (R;US)
Fe(CO)5/sulfur-catalyzed coal liquefaction using steam or alcohol as hydrogen source, 18:22669 (IA;JP;In Japanese)
Fundamental studies in production of C_2-C_4 hydrocarbons from coal: Final report, 1 September 1988–31 August 1992, 18:22699 (R;US)
Hindered diffusion of coal liquids: Quarterly report No. 2, December 18, 1992–March 17, 1993, 18:22726 (R;US)
Low severity coal liquefaction promoted by cyclic olefins: Quarterly report, October–December 1992, 18:22719 (R;US)
Novel process for depolymerization of coal to C_2-C_4 hydrocarbons: Progress report No. 13, September 1, 1992–November 30, 1992, 18:22702 (R;US)
Preconversion processing of bituminous coals: New directions to improved direct catalytic coal liquefaction: Quarterly report, January 1, 1993–March 31, 1993, 18:22712 (R;US)
Preparation of ultrafine catalyst powders using a flow-through hydrothermal process, 18:22730 (R;US)
Results of catalyst testing using iron-based catalysts, 18:22729 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 7, April 1–June 30, 1988, 18:22710 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 5, October 1–December 31, 1987, 18:22708 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 6, January 1–March 31, 1988, 18:22709 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 8, July 1–September 30, 1988, 18:22711 (R;US)
Travel to Alberta, Canada to discuss the research on Advanced direct coal liquefaction concepts: Foreign trip report, October 18–21, 1992, 18:22693 (R;US)

COAL LIQUIDS
Addendum to industrial market assessment of the products of mild gasification, 18:22695 (R;US)
Biological upgrading of coal liquids: Quarterly report, October–December 31, 1992, 18:22718 (R;US)
Boiling point prediction of coal derived oil by group contribution method, 18:22665 (IA;JP;In Japanese)
High temperature ceramic membrane reactors for coal liquid upgrading: Final report, September 21, 1989–November 20, 1992, 18:22703 (R;US)
Hydrodenitrogenation of coal liquids by phenol addition, 18:22690 (IA;JP;In Japanese)
Mechanism of HDS/HDN reactions, 18:22692 (R;US)
Novel process for depolymerization of coal to C_2-C_4 hydrocarbons: Progress report No. 13, September 1, 1992–November 30, 1992, 18:22702 (R;US)
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 2, January 1–March 31, 1987, 18:22705 (R;US)
Use of promoters to enhance hydrodenitrogenation and hydrodeoxygenation catalysis, 18:22660 (R;US)

COAL MINES
Tracing by a member of the rescue party at Mitsui Miike Coal Mine.: Mainly on coal dust explosion and CO poisoning disaster at Mikawa Coal Mine, 18:22773 (IA;JP;In Japanese)

COAL MINING
Ecological stability of landscape - ecological infrastructure - ecological management, 18:22743 (I;CS)
Economy, ecology and market needs. Example of the coal mining industry, 18:22772 (IA;CS;In Czech)
Restoration of territorial system of ecological stability in the North-Bohemian brown coal basin, 18:22744 (RA;CS)

COAL PREPARATION
Bench-scale testing of on-line control of column flotation using a novel analyzer: Quarterly technical progress report, September 21, 1992–December 31, 1992, 18:22653 (R;US)
Engineering design and analysis of advanced physical fine coal cleaning technologies: Technical progress report No. 28, 18:22650 (R;US)
Micro-agglomerate flotation for deep cleaning of coal: Quarterly progress report, January 1–March 31, 1993, 18:22654 (R;US)

COAL PREPARATION PLANTS
Geochemistry of FBC waste-coal slurry solid mixtures: Technical report, December 1, 1992–February 28, 1993, 18:22767 (R;US)

COAL SEAMS
Well stimulation technology.: Hydraulic fracturing for coal bed methane, 18:22854 (IA;JP;In Japanese)

COAL TAR
Vapor pressures and heats of vaporization of primary coal tars: Quarterly technical progress report, 1 October 1992–31 December 1992, 18:22739 (R;US)

COAL-DERIVED LIQUIDS
See COAL LIQUIDS

COAL-OIL MIXTURES
See COAL
FUEL OILS
FUEL SLURRIES

COALTEK PROCESS
See FUEL FEEDING SYSTEMS

COARSE MESH METHOD
See FINITE DIFFERENCE METHOD

COATINGS
See also ELECTRODEPOSITED COATINGS
REFLECTIVE COATINGS
Application of TiO2 thin film photocatalyst: construction materials with deodorizing function, 18:23803 (IA;JP;In Japanese)
Surface modification on zirconium and its reactivity, 18:23921 (IA;JP;In Japanese)

COAXIAL CABLES
Fiber-optic cable replacement for NTS applications, 18:24556 (R;US)

COBALT
Bioextraction of cobalt from complex metal sulfides, 18:23935 (R;US)

COBALT 59 TARGET
Consistent activation cross section calculations for all stable isotopes of V, Cr, Mn, Fe, Co, Ni, 18:25132 (RA;XA)

COBALT 60
Environmental Surveillance data report for the fourth quarter of 1992, 18:24831 (R;US)
Environmental surveillance data report for the third quarter of 1992, 18:24771 (R;US)

COBALT 68
Measurement of beta decay periods for Fe-Ni neutrons rich isotopes, 18:25077 (R;FR;In French)

COBALT 69
Measurement of beta decay periods for Fe-Ni neutrons rich isotopes, 18:25077 (R;FR;In French)

COBALT BASE ALLOYS
Solubility of cobalt in primary circuit solutions, 18:23379 (R;FR)

COBALT ORES
Bioextraction of cobalt from complex metal sulfides, 18:23935 (R;US)

COBALT OXIDES
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic, 18:23967 (R;US)

COGEMA LA HAGUE
Purex process improvements for the UP3 spent fuel reprocessing plant at La Hague, France, 18:22879 (R;FR)
Total data management in the La Hague reprocessing plant, 18:22884 (RA;CS)

COGENERATION
Binghamton/Johnson City Joint Sewage Treatment Plant cogeneration project: Final report, 18:23851 (R;US)
Cogeneration: A regulatory guide to leasing, permitting, and licensing in Idaho, Montana, Oregon, and Washington, 18:23834 (R;US)
Study of cogeneration system in molten carbonate fuel cell power generation plant, 18:23788 (IA;JP;In Japanese)

COILS (ELECTRIC)
See ELECTRIC COILS

COKE
Addendum to industrial market assessment of the products of mild gasification, 18:22695 (R;US)
Conversion of aqueous ethanol to oily products and combustion of coke produced, on Pt-TiO2/SiO2, 18:22691 (IA;JP;In Japanese)
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, October 1, 1992–December 31, 1992, 18:22694 (R;US)

COKE OVENS
Hot repair technique of oven wall, 18:22687 (IA;JP;In Japanese)
Influence of coke oven width on coking time, 18:22688 (IA;JP;In Japanese)
Operation of the coal moisture control plant at Kashima No.2 coke battery, 18:22685 (IA;JP;In Japanese)
Study of gas flow pattern in commercial coke oven chamber, 18:22681 (IA;JP;In Japanese)

COKING
Preheating of coal for continuous coke making process, 18:22684 (IA;JP;In Japanese)
Suppression of product coke in the hydrotreating process of heavy oil, 18:22827 (IA;JP;In Japanese)

COKING PLANTS
Denitrification of special waste waters using external carbon sources, 18:24822 (I;DE;In German)

COLD STORAGE
Cold storage system operated only by renewable energy.: Development of "solar J box", 18:23255 (IA;JP;In Japanese)

COLLIDER DETECTOR AT FERMILAB
See FERMILAB COLLIDER DETECTOR

COLLIDING BEAMS
Head-on and long-range beam-beam tune shift spread in the SSC, 18:24332 (R;US)
[Electron accelerator and collider research]: Foreign trip report, July 18, 1992–August 2, 1992, 18:24344 (R;US)

COLLIERIES

DEHUMIDIFICATION
Studies of open cycle absorption dehumidifying/drying system. Part 9.: Simulation model for a natural convective glazed solar regenerator, 18:23280 (IA;JP)

DEHYDROGENASES
See OXIDOREDUCTASES

DELETIONS (CHROMOSOMAL)
See CHROMOSOMAL ABERRATIONS

DELTA RESONANCES (BARYON)
See N*BARYONS

DELTA-1232 BARYONS
Some outstanding issues in pion scattering at energies above the Δ resonance, 18:25045 (R;US)

DELTA-1236 RESONANCES
See DELTA-1232 BARYONS

DEMOLITION
Remote laser machining for nuclear site under dismantling (ROLD Program), 18:24153 (R;XE;In French)

DEMONSTRATION PLANTS
Launching toward phosphoric acid fuel cell commercialization, 18:23785 (IA;JP;In Japanese)

DENITRIFICATION
See also SELECTIVE CATALYTIC REDUCTION
Hydrodenitrogenation of coal liquids by phenol addition, 18:22690 (IA;JP;In Japanese)
Study in deNOx catalysts for lean-burn gas engines, 18:23877 (IA;JP;In Japanese)
Use of promoters to enhance hydrodenitrogenation and hydrodeoxygenation catalysis, 18:22660 (R;US)

DENMARK
Danish energy taxation in general, 18:23722 (R;DK)
Denmark 1900-1991: Energy consumption, GDP and energy prices, 18:23770 (I;DK;In Danish)
Divisia amount and price index for energy consumption, 18:23721 (I;DK;In Danish)
Energy consumption and energy prices: A comparison of the development in 9 OECD lands 1951-1990, 18:23771 (I;DK;In Danish)
Environmental measurements - External noise. "Windflower", Denmark, 18:23311 (I;DK;In Danish)
Freight transport in towns: Main report, 18:23826 (R;DK;In Danish)
Freight transport in towns: Summary report (Denmark), 18:23827 (R;DK;In Danish)
Integrated energy and environmental analyses, 18:24628 (R;DK;In Danish)
Numerical method to describe the deformation of chalk reservoirs, 18:22786 (I;DK)
Order of 23 May 1991 on electron accelerators using energies of from 1 MeV to 50 MeV for the treatment of patients, 18:23164 (I;XN;In Danish)
Sinding-Oerre biogas plant, 18:23203 (RA;DK)
Solar heating systems. Part 1: Quantitative section, 18:23225 (R;DK;In Danish)
Solar heating systems: Qualitative investigation of the attitudes of "owners" and "waverers", 18:23226 (R;DK;In Danish)
The Danish code of practice for loads and reliability of wind turbines, 18:23308 (RA;DK)
The commercialization of biogas production, 18:23208 (RA;DK)
Use of solar heat in industry: Perspectives and possibilities for development. Final report, 18:23286 (R;DK;In Danish)

DENSITY
Calculating atomic number densities for uranium compounds, 18:22867 (R;US)
Extension of second-moment turbulence models in cases with large density non-uniformity, 18:24206 (RA;US)
Mixing patterns and the generation of vorticity in a density stratified shear layer, 18:24204 (RA;US)

DEOXIDATION
See REDUCTION

DEOXYPENTOSE NUCLEIC ACID
See DNA

DEOXYRIBONUCLEIC ACID
See DNA

DEPLETED URANIUM
Depleted uranium risk assessment at Aberdeen Proving Ground, 18:24761 (R;US)
Ecological risk assessment of depleted uranium in the environment at Aberdeen Proving Ground: Annual report, 1991, 18:24759 (R;US)

DESALINATION
Study on the natural circulating type desalination system by the solar heat, 18:23281 (IA;JP;In Japanese)

DESERTRON
See SUPERCONDUCTING SUPER COLLIDER

DESICCANTS
Effective thermal conductivity of a silica gel bed used in the desiccant/regenerator, 18:23276 (IA;JP;In Japanese)
Reflectance and absorptance of silica gel bed used in the desiccant/regenerator, 18:23275 (IA;JP;In Japanese)

DESIGN
Broad Application Test Reactor cost reduction study, 18:23582 (R;US)
Technologies for offshore marginal oil field development.: Application of subsea systems, 18:22817 (IA;JP;In Japanese)
Theoretical design of selective emissivity film. 2.: Improvement of radiative cooling power of silicon oxide film on Al substrate, 18:23999 (IA;JP;In Japanese)
DESOXYRIBONUCLEIC ACID
See DNA
DESULFURIZATION
Advanced wet flue gas desulfurization and denitrification process, Miami Fort station: Volume 1: Final report, 18:23347 (R;US)
Low temperature pathways to Chevrel phases via reduced molybdenum sulfide cluster complexes, 18:24033 (R;US)
DETECTION
See also NUCLEAR EXPLOSION DETECTION
Evaluation on performance of fire property identifying system, 18:23800 (IA;JP;In Japanese)
DETECTION (NUCLEAR EXPLOSIONS)
See NUCLEAR EXPLOSION DETECTION
DETECTORS (RADIATION)
See RADIATION DETECTORS
DETONATION LIMITS
Measurement of reaction limits of TEOS, H2, NH3 and ClF3, 18:24512 (IA;JP;In Japanese)
DETONATION WAVES
Turbulent wall jet in blast wave precursor, 18:25008 (R;US)
DETONATIONS
Computer modeling program for fragment trajectories within a bomb stack: Final report, 18:24520 (R;US)
Evaluation on explosion force of solid substances by measuring detonation pressures, 18:24507 (IA;JP;In Japanese)
Flash reducing performance and explosion force dissipating effect of a metal-screen type flame arrestor, 18:24510 (IA;JP;In Japanese)
DETONATORS
Cable friction study of molybdenum disulfide solid lubricant on 3×7 stainless steel cable, 18:24141 (R;US)
Testing technology: A Sandia technology bulletin, 18:23754 (R;US)
DEUTERIUM
Experiments with energetic μd and μt emitted from solid hydrogen, 18:25233 (R;US)
Hot muonic deuterium and tritium from cold targets, 18:25159 (R;US)
DEUTERIUM IONS
Charged fusion product and fast ion loss in TFTR, 18:25279 (R;US)
Dynamics of dissociation versus ionization in strong laser fields, 18:25192 (R;US)
DEUTERIUM OXIDE
See HEAVY WATER
DEUTERIUM TARGET
Pontecorvo reactions as a general class of antiproton annihilation on nuclei, 18:25149 (R;RU)
Relativistic impulse approximation and deuteron spin structure, 18:25150 (R;RU)
DEUTERIUM-LITHIUM HIGH FLUX NEUTRON SOURCE FACILITY
See NEUTRON SOURCE FACILITIES
DEUTERON REACTIONS
An experiment of the A-dependence of the cross section for relativistic deuteron fragmentation into cumulative pions, 18:25144 (IA;RU)
DEUTERON-DEUTERON INTERACTIONS
See DEUTERIUM TARGET
DEUTERON REACTIONS

[Travel to Honduras to discuss plans to incorporate renewable energy technologies into rural electrification and water pumping programs]: Foreign trip report, October 28–November 12, 1992, 18:23745 (R;US)
DEVICES
See EQUIPMENT
DIAGNOSIS
On-line supervision system for benzol recovery plant, 18:22682 (IA;JP;In Japanese)
DIAGRAMS
See also PHASE DIAGRAMS
Analysis on performance of PV-array I-V curve tracer by the capacitive load method, 18:23241 (IA;JP;In Japanese)
Finding minimum-quotient cuts in planar graphs, 18:25422 (R;US)
DIAMOND DRILLING EQUIPMENT
See DRILLING EQUIPMENT
DIAMONDS
Correlations of the growth, structure and stress with the adhesion of diamond films on tungsten, 18:24049 (R;US)
Investigation of PACVD protective coating processes using advanced diagnostics techniques: Performance report, 1 September 1992–30 April 1993, 18:23969 (R;US)
Radiation effects in glasses and crystals, 18:23178 (IA;CS;In Czech)
[Travel to Germany to attend the Third international conference on the new diamond science and technology]: Foreign trip report, August 29–September 10, 1992, 18:24040 (R;US)
DIAPHRAGMS (THERMONUCLEAR DEVICE)
See LIMITERS
DICHROMATES
Half-plant low dichromate evaluation at KW Reactor: Production Test-176: Final report, 18:23581 (R;US)
DIELECTRIC MATERIALS
Effects of surface defects on the local electric field in inhomogeneous media, 18:24042 (R;US)
DIELECTRIC TRACK DETECTORS
Silicon-based elementary particle tracking system: Materials science and mechanical engineering design, 18:24447 (R;US)
DIELECTRICS
See DIELECTRIC MATERIALS
DIESEL ENGINES
Biodiesel/Aquatic Species Project report, FY 1992, 18:23885 (R;US)
Catalytic engine, 18:23876 (IA;JP;In Japanese)
Combustion and smoke formation characteristics and their mechanisms in D.I. diesel engines, 18:23873 (IA;JP;In Japanese)

High-pressure coal fuel processor development: Final report, 18:22698 (R;US)
High-pressure coal fuel processor development: Task 1, Proof of principle testing, 18:22697 (R;US)
Low-expansion ceramics initiative, 18:23859 (R;US)
Pulsed plasma processing for control of diesel engine emissions, 18:23882 (R;US)

DIESEL FUELS
Site characterization for the in situ bioremediation of the vadose zone, 18:24658 (R;US)

DIESEL MOTORS
See DIESEL ENGINES

DIESEL OIL (FRACTION)
See DIESEL FUELS

DIFFUSION
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer, 18:24654 (R;US)
Global advective transport of passive tracers emitted from Japan, 18:23729 (IA;JP;In Japanese)
[Study of multicomponent diffusion and transport phenomena]: Progress report, 18:25201 (R;US)

DIGESTER GAS
See METHANE

DILUTE ALLOYS
Quantum Monte Carlo by message passing, 18:25202 (R;US)

DIMETHYL KETONE
See ACETONE

DIMETHYL SULFIDE
Binary homogeneous nucleation: Temperature and relative humidity fluctuations and non-linearity, 18:24637 (R;US)

DIMETHYLSULFIDE

DISPLACEMENT FLUIDS
Improving reservoir conformance using gelled polymer systems: Second quarterly report, December 25, 1992–March 24, 1993, 18:22796 (R;US)
Investigation of oil recovery improvement by coupling and interfacial tension agent and a mobility control agent in light oil reservoirs: Technical progress report, January–March 1993, 18:22799 (R;US)

DISPOSAL (WASTES)
See WASTE DISPOSAL

DISPOSAL WELLS
662-E solid waste silo-plug lifting analysis, 18:23085 (R;US)

DISPROPORTIONATION
See OXIDATION
REDUCTION

DISSOCIATION
Progress and future activities at the Joint Institute for Laboratory Astrophysics (JILA), 18:25186 (RA;XA)

DISSOLUTION
The dissolution rate of UO_2 in the alkaline regime under oxidizing conditions using a simplified ground water analog, 18:23050 (R;US)

DISSOLVED MATERIALS
See SOLUTES

DISSOLVED OXYGEN
See OXYGEN

DISTILLATE FUEL
See HEATING OILS

DISTILLATE FUEL OIL
See HEATING OILS

DISTILLATION EQUIPMENT
On-line chemical composition analyzer development: Status report, February 1, 1993–April 30, 1993, 18:24066 (R;US)

DISTRIBUTED DATA PROCESSING
A proposal for a user-level, message passing interface in a distributed memory environment, 18:25415 (R;US)
Practical authorization in large heterogeneous distributed systems, 18:25443 (R;US)
Privacy and Security Research Group workshop on network and distributed system security: Proceedings, 18:25388 (R;US)
Toward a verifiable approach to the design of concurrent computations, 18:25385 (R;US)

DISTRICT COOLING
A novel concept for heat transfer fluids used in district cooling systems: Progress report, September 25, 1990–December 31, 1990, 18:23844 (R;US)
Development of advanced low-temperature heat transfer fluids for district heating and cooling: Final report, September 25, 1990–September 24, 1991, 18:23847 (R;US)
Effects of emulsifier on particle size of a phase change material in a mixture with water: Progress report, March 31, 1991–June 30, 1991, 18:23846 (R;US)

DISTURBANCES
Application of the environmental temperature oscillation method to a continuous tank type reactor. 2.: Monitoring the reaction run-away starting temperature using transient response measurement, 18:24092 (IA;JP;In Japanese)

DIVERTORS
Modeling of erosion and redeposition processes, 18:25287 (R;US)
Simulations of DIII-D divertor biasing with the LEDGE code, 18:25321 (R;US)
[Travel to Germany to participate in the ITER meeting on divertor and first wall]: Foreign trip report, June 22–July 1, 1992, 18:25305 (R;US)

DNA
Field-flow fractionation of chromosomes: Final technical report, July 1, 1989–January 31, 1993, 18:24851 (R;US)

DNA ADDUCTS
New fluorescence methodology for detecting DNA adducts: Progress report, May 1, 1991–May 21, 1993, 18:24927 (R;US)

DNA SEQUENCING
Genetic algorithms for DNA sequence assembly, 18:24852 (R;US)
[Travel to Turin, Italy, to attend and participate in an international workshop entitled "Biological sequences: Finding structure and function by neural networks"]: Foreign trip report, June 29, 1992–July 15, 1992, 18:24847 (R;US)

DNA-CLONING
[Hydroxyproline: Rich glycoproteins of the plant and cell wall]: Annual technical progress report, 1993, 18:23195 (R;US)

DOEL-1 REACTOR
DIMOS: a new generation of nuclear power plant process monitoring systems, 18:23421 (RA;CS)

The Belgian experience with the safety reassessment of nuclear power plants, 18:23407 (RA;CS)
Upgrading requirements, 18:23391 (RA;CS)

DOEL-2 REACTOR
DIMOS: a new generation of nuclear power plant process monitoring systems, 18:23421 (RA;CS)
The Belgian experience with the safety reassessment of nuclear power plants, 18:23407 (RA;CS)
Upgrading requirements, 18:23391 (RA;CS)

DOEL-3 REACTOR
Steam generator replacement - European experience, 18:23389 (RA;CS)
Steam generator replacement at Doel 3 NPP (Belgium), 18:23408 (RA;CS)
Upgrading requirements, 18:23391 (RA;CS)

DOLOMITE
Test plan: Air intake shaft performance test – Addendum for obtaining cores in the Culebra for radionuclide retardation studies, 18:22934 (R;US)

DOMESTIC WASTES
See MUNICIPAL WASTES

DOPED MATERIALS
Kinetics of high concentration arsenic deactivation at moderate to low temperatures, 18:24292 (R;US)

DORMITORIES
See RESIDENTIAL BUILDINGS

DOSIMETRY

FERMI-DIRAC GAS
See FERMI GAS
FERMILAB ACCELERATOR
Operational experience with the Fermilab Linac, 18:24313 (R;US)
FERMILAB COLLIDER DETECTOR
Database computing in HEP: Progress report, 18:24340 (R;US)
The Dv software trigger, 18:24348 (R;US)
FERMILAB TEVATRON
Tevatron studies report, 18:24311 (R;US)
FERNALD PRODUCTION PLANT
See FEED MATERIALS PRODUCTION CENTER
FERRIC COMPOUNDS
See IRON COMPOUNDS
FERROCYANIDES
Infrared imaging systems for the ferrocyanide waste tanks at the US Department of Energy's Hanford Site, 18:23068 (R;US)
Quantitative measurement of cyanide species in simulated ferrocyanide Hanford waste, 18:23024 (R;US)
FERROUS COMPOUNDS
See IRON COMPOUNDS
FERTILIZERS
Heavy metals and other pollutants in fertilizers. Literature evaluation and analyses, 18:24786 (R;DE;In German)
FFTF REACTOR
Status of fuel, blanket, and absorber testing in the Fast Flux Test Facility, 18:23463 (R;US)
FIBER OPTICS
A fiber optic array for continuous energy coverage in a gamma ray spectrometer, 18:24465 (R;US)
FIBERS
See also OPTICAL FIBERS
Electromechanical batteries and the electric utilities: An estimate of the potential market for high-strength fibers, 18:23689 (R;US)
FIELD TESTS
Enhanced oil recovery.: Field pilot test on CO2 flood, 18:22813 (IA;JP;In Japanese)
Heavy oil EOR technology.: Monitoring technology for EOR process, 18:22810 (IA;JP;In Japanese)
FIELD THEORIES
See also QUANTUM FIELD THEORY
Renormalizations in supersymmetric and nonsupersymmetric non-abelian Chern-Simons field theories with matter, 18:25017 (R;RU)
FIELDS (ELECTROMAGNETIC)
See ELECTROMAGNETIC FIELDS
FIELDS (MAGNETIC)
See MAGNETIC FIELDS
FILMS
See also THIN FILMS
Effects of surface defects on the local electric field in inhomogeneous media, 18:24042 (R;US)
Production Test IP-485-A – Fuel element film formation studies, 18:23592 (R;US)
FILTERS
See also AIR FILTERS
FABRIC FILTERS
OPTICAL FILTERS
Backpulse and filter feed velocity effects on Norton filter performance, 18:23078 (R;US)
FINANCIAL MANAGEMENT
See PROGRAM MANAGEMENT
FINANCING
Amendment of the Act of 29 March 1958 on protection of the population against the hazards of ionizing radiation, 18:25476 (I;XN;In French)
FINGERPRINTING (OIL SPILLS)
See PATTERN RECOGNITION
FINGERS
The FBI wavelet/scalar quantization standard for gray-scale fingerprint image compression, 18:25409 (R;US)
FINITE DIFFERENCE METHOD
Development of generic field classes for finite element and finite difference problems, 18:25429 (R;US)

FINITE ELEMENT METHOD
Development of generic field classes for finite element and finite difference problems, 18:25429 (R;US)
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems, 18:25420 (R;US)

FINLAND
Research overview 1990-1991, 18:23752 (I;FI)
[Travel to Finland for a review of the carbon balance of peatlands and climate change project]: Foreign trip report, September 26, 1992–October 3, 1992, 18:24768 (R;US)

FIRE DETECTORS
See also SMOKE DETECTORS
Accessibility of smoke, heat and CO gas to three-element fire sensor, 18:23802 (IA;JP;In Japanese)
Evaluation on performance of fire property identifying system, 18:23800 (IA;JP;In Japanese)

FIRE EXTINGUISHERS
Firewater system inadvertent actuation frequencies, 18:23634 (R;US)

FIRE HAZARDS
Numerical study on non-fire alarm due to cigarette smoke, 18:24129 (IA;JP;In Japanese)

FIRE PREVENTION
Flash reducing performance and explosion force dissipating effect of a metal-screen type flame arrestor, 18:24510 (IA;JP;In Japanese)

FIREDAMP
See METHANE

FIRES
Fire and explosion hazards with powdered coal. 1.: Its heat generating and spontaneous ignition characteristics, 18:22774 (IA;JP;In Japanese)
Fire and explosion hazards with powdered coal. 2.: Coal dust explosion characteristics, 18:22775 (IA;JP;In Japanese)
Measurement of flash point and ignition point of brake fluids, 18:23871 (IA;JP;In Japanese)
On fire risk/methodology for the next generation of reactors and nuclear facilities, 18:23676 (R;US)
Reaction in ammonium perchlorate-magnesium-water system, 18:23732 (IA;JP;In Japanese)

FIRST WALL
Modeling of erosion and redeposition processes, 18:25287 (R;US)
Thermal shock tests of carbon materials with high power beam, 18:25313 (IA;JP)
[Initiate an experimental and modeling collaboration with Russian scientists on hydrogen isotope retention and release from plasma- facing materials]: Foreign trip report, June 29–July 10, 1992, 18:25304 (R;US)
[Travel to Germany to participate in the ITER meeting on divertor and first wall]: Foreign trip report, June 22–July 1, 1992, 18:25305 (R;US)

FISCHER-TROPSCH SYNTHESIS
Fischer-Tropsch synthesis in supercritical reaction media: Progress report, January 1, 1993–March 31, 1993, 18:24106 (R;US)
Studies on cobalt catalyst for fischer-tropsch synthesis.: Effect of surface acidity and pore structure of SiO2-Al2O3 supports on the composition of their products, 18:22689 (IA;JP;In Japanese)

FISHES
Environmental Sciences Division annual progress report for period ending September 30, 1992, 18:24567 (R;US)
Pilot study risk assessment for selected problems at the Savannah River Site (SRS), 18:24873 (R;US)

FISSILE MATERIALS
Multi-state modeling in ASSESS, 18:23157 (R;US)
Nonintrusive and intrusive sensing of environmentally important objects, 18:24707 (RA;US)
The need of coupled differential and integral spectral radiation measurements, 18:24184 (R;US)

FISSION
Fission foil characteristics, 18:25118 (RA;XA)

FISSION FRAGMENTS
Theoretical study of fission dynamics with muons, 18:25092 (R;US)

FISSION PRODUCT RELEASE
Health effects models for nuclear power plant accident consequence analysis: Modification of models resulting from addition of effects of exposure to alpha-emitting radionuclides: Revision 1, Part 2, Scientific bases for health effects models, Addendum 2, 18:23545 (R;US)

FISSION PRODUCTS
A magnetically contained Mach three expansion, 18:24555 (R;US)
Dalhart post shot investigation, 18:24545 (RA;US)
Direct and preequilibrium effects in the fission-product mass range: Papers presented in the NEANSC Specialists' Meeting on Fission Product Nuclear Data, 25-27 May 1992, JAERI, Japan, 18:25160 (R;NL)
Extensions to the SCDAP/RELAP5 code for the modeling of debris oxidation and materials interactions preliminary design report, 18:23382 (R;US)
Review Meeting for the Modular High-Temperature Gas-Cooled Reactor Corrosion, Migration, et Distribution Irradiation Experiment Fission Product Transport Program in France: Foreign trip report, March 26, 1992–April 5, 1992, 18:23448 (R;US)
Transport of radioactive material in liquid sodium, 18:23464 (R;US)

FISSION YIELD
Compilation and evaluation of fission yield nuclear data: Summary report of a consultants' meeting held in Vienna, 27-29 September 1989, 18:25121 (R;XA)
Nuclear data activities in China, 18:25463 (RA;XA)

FISSIONABLE MATERIALS MANAGEMENT
See NUCLEAR MATERIALS MANAGEMENT

FIXATION (WASTE TREATMENT)
See SOLIDIFICATION

FLAME PROPAGATION
Is a laminar flame front a passive surface of the turbulent field?, 18:24196 (RA;US)

FLAME TEMPERATURE
See COMBUSTION PROPERTIES

FLASH HYDROPYROLYSIS PROCESS
Catalytic hydrocracking reaction of nascent coal volatile matter under high pressure in a two-stage reactor, 18:22673 (IA;JP;In Japanese)

FLASH POINT

a Codes
AREST: The next generation, 18:23031 (R;US)

Aerodynamics
New aerodynamic information obtained from the solution of the inverse problem for aerofoils, 18:24254 (R;JP;In Japanese)

Boundary Layers
New aerodynamic information obtained from the solution of the inverse problem for aerofoils, 18:24254 (R;JP;In Japanese)

Computerized Tomography
Imaging techniques applied to the study of fluids in porous media: Scaling up in Class 1 reservoir type rock, 18:22823 (R;US)

Laplace Equation
New aerodynamic information obtained from the solution of the inverse problem for aerofoils, 18:24254 (R;JP;In Japanese)

Mathematical Models
A continuation method for computing non-linear 3-D free surface flows, 18:24828 (R;US)
Investigation of fracture-matrix interaction: Preliminary experiments in a simple system, 18:23041 (R;US)

Measuring Methods
Neural network approaches to tracer identification as related to PIV research, 18:24240 (R;US)

Meetings
[A trip to Germany to present four lectures on flow turbulence and combustion]: Foreign trip report, September 12–30, 1992, 18:24245 (R;US)

Mixing
Compressibility in turbulence generation and mixing, 18:24199 (RA;US)

Monitoring
Waste Isolation Pilot Plant Salado hydrology program data report No. 2, 18:23043 (R;US)

Nuclear Magnetic Resonance
Nuclear magnetic resonance studies of granular flows: Technical progress report for the quarter ending March 31, 1993, 18:24248 (R;US)

Numerical Solution
New aerodynamic information obtained from the solution of the inverse problem for aerofoils, 18:24254 (R;JP;In Japanese)

Pressure Measurement
New aerodynamic information obtained from the solution of the inverse problem for aerofoils, 18:24254 (R;JP;In Japanese)

Research Programs
Mixing of immiscible fluids in chaotic flows and related issues: Progress report, June 1, 1992–May 31, 1993, 18:24244 (R;US)

Reynolds Number
New aerodynamic information obtained from the solution of the inverse problem for aerofoils, 18:24254 (R;JP;In Japanese)

Stability
Flow instability and flow reversal in heated annular multichannels with initial downward flow, 18:23609 (R;US)
Flow instability testing of annular geometry fuel elements for LOCA and slow ramp transient with upflow of coolant, 18:23684 (R;US)

Turbulence
[A trip to Germany to present four lectures on flow turbulence and combustion]: Foreign trip report, September 12–30, 1992, 18:24245 (R;US)

Vortices
The stability of vortex arrays, 18:24197 (RA;US)

FLUID INJECTION

Encouraging partnerships: Cooperative research and development agreements between government and industry, 18:22769 (RA;US)

On-line, multielement ICP spectrometer for application to high temperature and pressure fossil fuel process streams, 18:24067 (R;US)
Proceedings of the 1st Meeting of the Japan Institute of Energy and the 70th Foundation Anniversary Meeting, 18:23767 (I;JP;In Japanese)
Towards the development of a global inventory for black carbon emissions, 18:24649 (R;US)
Viewpoint on global warming from fossil fuel reserves.: Study subjects for the next century, 18:23768 (IA;JP;In Japanese)

FOSSIL-FUEL POWER PLANTS
Air
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Air Pollution Abatement
A novel carbon-based process for flue gas cleanup: Seventh quarterly technical progress report, January 1–March 31, 1993, 18:23341 (R;US)
Air Pollution Control
Advanced separation technology for flue gas cleanup: Quarterly Technical Report No. 3, January 1993, 18:23340 (R;US)
Catalytic fabric filtration for simultaneous NO_x and particulate control: Quarterly technical progress report, October 1–December 31, 1992, 18:23335 (R;US)
Catalytic filter bags for NO_x and particulate removal: Final report, 18:23343 (R;US)
Development of the integrated environmental control model: Technical progress report, [October 1–December 31, 1992], 18:23342 (R;US)
Healy Clean Coal Project, Healy FCM testing at Niro Air Pollution Control Pilot Facility: Final report, 18:23338 (R;US)
Ohio Coal Development Office test program at TRW's Cleveland, Ohio entrained coal combustion facility: Final report, 18:23345 (R;US)
SO_x-NO_x-Rox Box systems integrations study, 18:23346 (R;US)
Carbon Dioxide
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Coal Fines
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Coal Gasification
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Combined-Cycle Power Plants
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Cost Benefit Analysis
Applying environmental externalities to US Clean Coal Technologies for Asia, 18:22742 (R;US)
Desulfurization
Advanced wet flue gas desulfurization and denitrification process, Miami Fort station: Volume 1: Final report, 18:23347 (R;US)
Environmental Effects
Applying environmental externalities to US Clean Coal Technologies for Asia, 18:22742 (R;US)
Flue Gas
Advanced wet flue gas desulfurization and denitrification process, Miami Fort station: Volume 2: Final report, 18:23348 (R;US)
Fuel Systems
Study of CO2 recovery on P.F ombustion with oxygen/flue gas recycle, 18:24264 (IA;JP;In Japanese)
Injection
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Liquefied Natural Gas
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Methanol
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Oxygen
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Pilot Plants
Healy Clean Coal Project, Healy FCM testing at Niro Air Pollution Control Pilot Facility: Final report, 18:23338 (R;US)
Pollution Control
Ozone nonattainment: Implications for NO_x and VOC compliance by the electric power industry, 18:23349 (R;US)
Power Range 100-1000 Mw
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Study of CO2 recovery on P.F ombustion with oxygen/flue gas recycle, 18:24264 (IA;JP;In Japanese)
Procurement
Combustion 2000: Planning and procuring an engineering development program, 18:23330 (RA;US)
Reformer Processes
CO recovery from thermal power generation plants, 18:23738 (R;JP;In Japanese)
Research Programs
Combustion 2000: Planning and procuring an engineering development program, 18:23330 (RA;US)
Scrubbers
Advanced separation technology for flue gas cleanup: Quarterly Technical Report No. 3, January 1993, 18:23340 (R;US)
Recovery and utilization of gypsum and limestone from scrubber sludge: Technical report, December 1, 1992–February 28, 1993, 18:22741 (R;US)
Sorbent Injection Processes
Ohio Coal Development Office test program at TRW's Cleveland, Ohio entrained coal combustion facility: Final report, 18:23345 (R;US)

FOXES
San Joaquin kit fox (Vulpes velox macrotis) program, Camp Roberts, California: Progress report, fiscal years 1991–1992, 18:24839 (R;US)

FRACTURE PROPERTIES
Fracture behavior of nuclear graphites under compressive impact loading, 18:24029 (RA;XA)
The effects of specimen geometry and size on the fracture toughness of nuclear graphites, 18:24027 (RA;XA)

FRACTURE STRENGTH

RESIDUAL FUELS
Application of HSC residue for in-plant boiler fuel, 18:22828 (IA;JP;In Japanese)
Emission characteristic in pre-vaporizing pre-mixing combustion with multi-fuels, 18:23855 (IA;JP;In Japanese)
FUEL PELLETS
Evaluations of the fracture mechanical properties of fuel compacts for the HTTR, with emphasis on thermal shock resistances and neutron irradiation effects, 18:23431 (RA;XA)
FUEL PENCILS
See FUEL PINS
FUEL PINS
Advanced control system for the Integral Fast Reactor fuel pin processor, 18:22877 (R;US)
Integral Fast Reactor fuel pin processor, 18:22876 (R;US)
Pin Monitoring System, 18:23519 (R;US)
FUEL PLATES
Experimental investigation of thermal limits in parallel plate configuration for the Advanced Neutron Source Reactor, 18:23550 (R;US)
Weekly report, September 7–11, 1953, Sylvania Electric Products Company (25730-700), 18:23558 (R;US)
FUEL REPROCESSING
See REPROCESSING
FUEL REPROCESSING PLANTS
See also COGEMA LA HAGUE
IDAHO CHEMICAL PROCESSING PLANT
SELLAFIELD REPROCESSING PLANT
Advanced control system for the Integral Fast Reactor fuel pin processor, 18:22877 (R;US)
Demonstration test on the safety of a cell ventilation system during a hypothetical explosive burning in a fuel reprocessing plant, 18:22885 (R;JP;In Japanese)
Integral Fast Reactor fuel pin processor, 18:22876 (R;US)
Large-scale demonstration tests of solvent fire and boilover burning during the fire in fuel-reprocessing plant, 18:22887 (R;JP;In Japanese)
FUEL ROD CONSOLIDATION
See FUEL RODS

FUEL RODS
Field measurements to support IAEA procedures development for fuel assembly and fuel rod active length verification, 18:23154 (R;US)
On studying the reactor fuel element local temperatures under nonstationary conditions, 18:23460 (R;RU;In Russian)
On the eigenfrequencies of fuel rod vibration in NPPs, 18:23485 (R;HU)
Technology of information processing on the complex of primary investigations of fuel assemblies and pins, 18:23513 (R;RU;In Russian)
FUEL SHEATHS
See FUEL CANS
FUEL SLUGS
See FUEL RODS
FUEL SLURRIES
Agglomeration
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Atomization
Rheological properties essential for the atomization of coal water slurries (CWS): Quarterly progress report, December 15, 1992–March 15, 1993, 18:22766 (R;US)
Testing of electrostatic agglomerator: Second quarterly report, May–July 1988, 18:22758 (R;US)
Chemical Preparation
Advanced coal-fueled industrial cogeneration gas turbine system: Annual report, June 1991–June 1992, 18:22755 (R;US)
Coal
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Study of slurryability, 18:22749 (IA;JP;In Japanese)
Combustion
Advanced coal-fueled industrial cogeneration gas turbine system: Annual report, June 1991–June 1992, 18:22755 (R;US)
Combustion Products
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Combustion Properties
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Comminution
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Demonstration Plants
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Hydraulic Transport
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Materials Handling
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Nitrogen Oxides
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Ph Value
Study of slurryability, 18:22749 (IA;JP;In Japanese)
Physical Properties
Study of slurryability, 18:22749 (IA;JP;In Japanese)
Quantity Ratio
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Study of slurryability, 18:22749 (IA;JP;In Japanese)
Rheology
Rheological properties essential for the atomization of coal water slurries (CWS): Quarterly progress report, December 15, 1992–March 15, 1993, 18:22766 (R;US)
Storage
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Surfactants
Study of slurryability, 18:22749 (IA;JP;In Japanese)
Water
Demonstration test of coal-water slurry fuel, 18:22748 (IA;JP;In Japanese)
Study of slurryability, 18:22749 (IA;JP;In Japanese)
FUEL SOLUTIONS
Evaluation of effect of solution-density formula on criticality parameters, 18:24159 (R;JP;In Japanese)
FUEL STORAGE POOLS
Non-fuel bearing hardware melting technology, 18:23021 (R;US)
FUEL SUBSTITUTION
Analysis on factors affecting energy consumptions and CO2 emissions and their regional and sectoral differences, 18:23739 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (Canada), 18:23773 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (France), 18:23775 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (Germany), 18:23776 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (the U.S.A.), 18:23772 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (the United Kingdom), 18:23774 (R;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (the U.S.A.), 18:23772 (R;JP;In Japanese)
FUEL SUSPENSIONS

GRANULAR MATERIALS
Development of a coal gasifier with circulating solid particles as heat medium, 18:22678 (IA;JP;In Japanese)
Nuclear magnetic resonance studies of granular flows: Technical progress report for the quarter ending March 31, 1993, 18:24248 (R;US)

GRAPHITE
[Travel to Germany for studies on carbon materials technology]: Foreign trip report, June 17–July 6, 1992, 18:24039 (R;US)

Boron Additions
Irradiation behavior of boronated graphite for the HTTR, 18:23440 (RA;XA)

Coordinated Research Programs
The status of graphite development for gas cooled reactors: Proceedings of a specialists' meeting held in Tokai, Japan, 9-12 September 1991, 18:24016 (R;XA)

Corrosion
Corrosion tests of matrix graphites, 18:24025 (RA;XA)
Radiolytic corrosion of graphite surveillance and lessons drawn from the operation of the BUGEY-1 reactor, 18:23442 (RA;XA)

Creep
Capsule design, fabrication and irradiation for tensile creep test on HTGR graphites at 1200 deg. C in the JMTR, 18:24031 (RA;XA)

Deformation
Graphite surveillance in N Reactor, 18:23443 (RA;XA)

Desorption
Behavior of gas desorption and gas permeability of carbon materials, 18:24024 (RA;XA)
Relation between gasification rates and gas desorption behavior with metallic impurities of carbon and graphite materials for the HTTR, 18:23595 (RA;XA)

Fabrication
Fabrication of HTGR core components by the method of volume gas-phase impregnation of porous media with pyrocarbon - main characteristics of the materials and products, 18:24020 (RA;XA)

Fatigue
Cumulative fatigue damage on HTGR graphite, 18:24028 (RA;XA)

Fracture Properties
Effect of atmosphere on the bend strength of nuclear graphite, 18:24023 (RA;XA)
Fracture behavior of nuclear graphites under compressive impact loading, 18:24029 (RA;XA)
The effects of specimen geometry and size on the fracture toughness of nuclear graphites, 18:24027 (RA;XA)

Gases
Relation between gasification rates and gas desorption behavior with metallic impurities of carbon and graphite materials for the HTTR, 18:23595 (RA;XA)

Impurities
Quantitative analysis of trace amounts of impurities contaminating pure graphite with ICP-MS and metal atomizer FLAAS, 18:24076 (RA;XA)

Materials Testing
Development of graphite for fuel element sleeves in advanced gas cooled reactors, 18:24021 (RA;XA)
The effect of volume on the tensile strength of several nuclear-grade graphites, 18:24026 (RA;XA)

Mechanical Properties
Mechanical properties and thermal shock resistances of recently developed high performance graphites, 18:24022 (RA;XA)

Mechanical Tests
Evaluation for material inspection of graphite inspection standard in High Temperature Engineering Test Reactor, 18:23597 (R;JP;In Japanese)

Meetings
The status of graphite development for gas cooled reactors: Proceedings of a specialists' meeting held in Tokai, Japan, 9-12 September 1991, 18:24016 (R;XA)
Moderator Pellets
Corrosion behavior of sintered pellet of graphite and boron carbide in helium containing water vapor, 18:23450 (RA;XA)
Neutron Reflectors
Chemical analysis of high purity graphite: Preparation of certified reference materials and development of analytical methods, 18:24034 (R;JP;In Japanese)
Nondestructive Testing
Evaluation for material inspection of graphite inspection standard in High Temperature Engineering Test Reactor, 18:23597 (R;JP;In Japanese)
Optical Properties
The optical constants and spectral specular reflectivity of highly oriented pyrolytic graphite (HOPG), 18:24055 (R;US)
Permeability
Behavior of gas desorption and gas permeability of carbon materials, 18:24024 (RA;XA)
Physical Radiation Effects
Corrosion tests of matrix graphites, 18:24025 (RA;XA)
Irradiation behavior of boronated graphite for the HTTR, 18:23440 (RA;XA)
Mechanical properties and thermal shock resistances of recently developed high performance graphites, 18:24022 (RA;XA)
Post-Irradiation Examination
Graphite surveillance in N Reactor, 18:23443 (RA;XA)
Quality Assurance
Development of graphite for fuel element sleeves in advanced gas cooled reactors, 18:24021 (RA;XA)
Quantitative Chemical Analysis
Quantitative analysis of trace amounts of impurities contaminating pure graphite with ICP-MS and metal atomizer FLAAS, 18:24076 (RA;XA)
Radiation Effects
Graphite radiation damage as a reactor operational problem, 18:23590 (R;US)
Radiolysis
Radiolytic corrosion of graphite surveillance and lessons drawn from the operation of the BUGEY-1 reactor, 18:23442 (RA;XA)
Reflectivity
The optical constants and spectral specular reflectivity of highly oriented pyrolytic graphite (HOPG), 18:24055 (R;US)
Sample Preparation
The effects of specimen geometry and size on the fracture toughness of nuclear graphites, 18:24027 (RA;XA)
Specifications
The status of graphite development for gas cooled reactors: Proceedings of a specialists' meeting held in Tokai, Japan, 9-12 September 1991, 18:24016 (R;XA)
Structural Models
A microstructurally based fracture model for nuclear graphite, 18:24017 (RA;XA)
Tensile Properties
Capsule design, fabrication and irradiation for tensile creep test on HTGR graphites at 1200 deg. C in the JMTR, 18:24031 (RA;XA)
Effect of atmosphere on the bend strength of nuclear graphite, 18:24023 (RA;XA)
Spatial variability in the tensile strength of an extruded nuclear-grade graphite, 18:24019 (RA;XA)
The effect of volume on the tensile strength of several nuclear-grade graphites, 18:24026 (RA;XA)
Vickers Hardness
The correlation of hardness with Young's modulus and strengths of nuclear carbon materials, 18:24030 (RA;XA)
Young Modulus
The correlation of hardness with Young's modulus and strengths of nuclear carbon materials, 18:24030 (RA;XA)

GREENHOUSE EFFECT
Adapting to sea-level rise in the US Southeast: The influence of built infrastructure and biophysical factors on the inundation of coastal areas, 18:24830 (R;US)
Comments on possible causes of recent global warming, 18:24656 (R;US)
Global warming.: Macrometeorology, 18:23728 (IA;JP;In Japanese)
Present situation in new energy related cooperation and its future direction (the United Kingdom), 18:23774 (R;JP;In Japanese)
Signal-to-noise analysis of time-dependent greenhouse warming experiments. Pt. 1. Pattern analysis, 18:24590 (I;DE)

GREENHOUSE GASES
Economics, ethics, and climate policy, 18:23736 (R;US)
[Workshops concerning environmental carbon dioxide and terrestrial carbon]: Foreign trip report, February 27–March 6, 1993, 18:24770 (R;US)

GREENHOUSES
Heat transfer characteristics of underground ducts for utilizing soil heat of a greenhouse. 3rd Report.: Experiments on the porous drain pipe ducts, 18:23277 (IA;JP;In Japanese)
Sprinkler floting-collector-type solar pond, 18:23278 (IA;JP;In Japanese)
Study on optimization of the system parameter of the ground thermal storage in the greenhouse, 18:23293 (IA;JP;In Japanese)

GREENLAND
Concepts for offshore exploration on pack-ice areas - phase 2: Summary report, 18:22789 (R;DK)

GROUND MOTION
Calculations of ground motion on Pahute Mesa, 18:24542 (RA;US)
Containment phenomenology using a new shear-strain-based computational damage model for TUFF, 18:24541 (RA;US)
Earthquake ground motion evaluations for the proposed new production reactor at the Idaho National Engineering Laboratory: Volume 2, Probabilistic evaluation, 18:23633 (R;US)
Measurements of the ground motion vibrations at the SSC, 18:24305 (R;US)

GROUND WATER
Acidification
The influence of naturally-occurring organic acids on model estimates of lakewater acidification using the model of acidification of groundwater in catchments (MAGIC): Summary of research conducted during year 1, 18:24722 (R;US)
Chemical Analysis
1990 annual ground-water report K-1407-B and K-1407-C interim status units Oak Ridge K-25 Site, 18:24752 (R;US)
Environmental Surveillance data report for the fourth quarter of 1992, 18:24831 (R;US)
Environmental surveillance data report for the third quarter of 1992, 18:24771 (R;US)
F-Area Seepage Basins groundwater monitoring report: Fourth quarter 1992 and 1992 summary, 18:24808 (R;US)
Mixed Waste Management Facility (MWMF) groundwater monitoring report: Third quarter 1992, 18:24806 (R;US)
P-Area Acid/Caustic Basin groundwater monitoring report: Fourth quarter 1992 and 1992 summary, 18:24809 (R;US)
Quadrant III RFI draft report: Appendix B-I, Volume 3, 18:24784 (R;US)
Contamination
Characterization of ground water contamination at the LLNL main site: A case study, 18:24795 (R;US)

Evaluation of the proposed pilot groundwater pump and treat demonstration for the Paducah Gaseous Diffusion Plant: Environmental Restoration Program, 18:23134 (R;US)
Innovative characterization techniques and decision support systems for ground water contamination projects, 18:24796 (R;US)
Pilot study risk assessment for selected problems at the Fernald Environmental Management Project (FEMP), 18:23726 (R;US)
Savage Island Project borehole completion report, 18:24774 (R;US)
Summary of FY 1992 operations of the vapor extraction system at the Hanford Site, Washington, 18:23066 (R;US)

Flow Models
The method of Laplace Transform MultiQuadrics (LTMQ) for the solution of the groundwater flow equation, 18:24250 (R;US)

Flow Rate
Further development of the methodical instruments to calculate ground water movements at repository sites, 18:22977 (R;DE;In German)
In situ permeable flow sensor: A device for measuring groundwater flow velocity, 18:24710 (RA;US)
The colloidal borescope an instrument for in situ assessment of local subsurface flow parameters, 18:24712 (RA;US)

Fluid Flow
1990 annual ground-water report K-1407-B and K-1407-C interim status units Oak Ridge K-25 Site, 18:24752 (R;US)
AREST: The next generation, 18:23031 (R;US)
Characterization of ground water contamination at the LLNL main site: A case study, 18:24795 (R;US)
F-Area Seepage Basins groundwater monitoring report: Fourth quarter 1992 and 1992 summary, 18:24808 (R;US)
Investigation of fracture-matrix interaction: Preliminary experiments in a simple system, 18:23041 (R;US)
Mixed Waste Management Facility (MWMF) groundwater monitoring report: Third quarter 1992, 18:24806 (R;US)
Modeling groundwater flow at the chemical plant area of the Weldon Spring Site, 18:23094 (R;US)
Non-invasive multilevel groundwater samplers, 18:24664 (R;US)
Selected hydraulic test analysis techniques for constant-rate discharge tests, 18:24958 (R;US)
Sensitivity and uncertainty analyses applied to one-dimensional radionuclide transport in a layered fractured rock: MULTFRAC –Analytic solutions and local sensitivities: Phase 2, Iterative performance assessment: Volume 1, 18:23006 (R;US)
Simulation of radionuclides in the saturated zone at the E-Area low- level radioactive waste disposal facility, Savannah River Site, 18:23073 (R;US)
The use of formal and informal expert judgments when interpreting data for performance assessments, 18:23036 (R;US)
Three-dimensional finite element simulation of creep deformation in rock salt, 18:23037 (R;US)
Travel to Karlsruhe, Germany to exchange information on the in situ destruction of volatile organic compounds: Foreign trip report, February 10–16, 1992, 18:24765 (R;US)
Updated recommendations for low-level waste performance assessment, 18:23038 (R;US)
Using QA classification to guide design and manage risk, 18:22930 (R;US)
Waste Isolation Pilot Plant Salado hydrology program data report No. 2, 18:23043 (R;US)

Fulvic Acids
Comparative study of humic and fulvic substances in groundwaters. Pt. 3: Metal complexation with humic substances, 18:22945 (R;GB)

Humic Acids
Comparative study of humic and fulvic substances in groundwaters. Pt. 3: Metal complexation with humic substances, 18:22945 (R;GB)

Mapping
The development of the high resolution S-wave reflection technique as a tool for improving subsurface characterization and groundwater studies, 18:24714 (RA;US)

Monitoring
1990 annual ground-water report K-1407-B and K-1407-C interim status units Oak Ridge K-25 Site, 18:24752 (R;US)
F- and H-Area Sewage Sludge Application Sites groundwater monitoring report, third quarter 1992, 18:24807 (R;US)
F-Area Seepage Basins groundwater monitoring report: Fourth quarter 1992 and 1992 summary, 18:24808 (R;US)
H-Area Seepage Basins groundwater monitoring report, third quarter 1992, 18:24805 (R;US)
Mixed Waste Management Facility (MWMF) groundwater monitoring report: Third quarter 1992, 18:24806 (R;US)
P-Area Acid/Caustic Basin groundwater monitoring report: Fourth quarter 1992 and 1992 summary, 18:24809 (R;US)

Pollution
Shemya AFB, Alaska 1992 IRP field investigation report: Volume 1: Final report, 18:24745 (R;US)
Shemya AFB, Alaska 1992 IRP field investigation report: Volume 3, Appendixes B, C, and D: Final report, 18:24746 (R;US)

Pumping
Evaluation of the proposed pilot groundwater pump and treat demonstration for the Paducah Gaseous Diffusion Plant: Environmental Restoration Program, 18:23134 (R;US)
The role of data management and decision support systems in the implementation of smart pump and treat, 18:24799 (R;US)

Qualitative Chemical Analysis
Ground-penetrating radar (GPR) for remotely controlled site characterization, 18:24708 (RA;US)

Quantitative Chemical Analysis
Characterization and monitoring of total organic chloride vapors, 18:24060 (RA;US)
In situ fiberoptic monitors for site characterization, 18:24703 (RA;US)
Passive multi-layer groundwater samplers, 18:24705 (RA;US)
Progress in the development of indwelling probes for chlorinated organic solvents, 18:24059 (RA;US)

Radiation Monitoring
Savage Island Project borehole completion report, 18:24774 (R;US)

Radioactivity
Volume of baseline data on radioactivity in drinking water, ground water, waste water, sewage sludge, residues and wastes of the annual report 1988 'Environmental radioactivity and radiation exposure', 18:24891 (I;DE;In German)

Radionuclide Migration
Columbia River monitoring: Distribution of tritium in Columbia River water at the Richland Pumphouse, 18:23093 (R;US)
Laboratory and field studies related to the Hydrology/Radionuclide Migration Project: Progress report, October 1, 1991–September 30, 1992, 18:24757 (R;US)
Pilot study risk assessment for selected problems at the Savannah River Site (SRS), 18:24873 (R;US)
Radionuclide solubility and speciation studies for the Yucca Mountain site characterization project, 18:22998 (R;US)
Simulation of radionuclides in the saturated zone at the E-Area low- level radioactive waste disposal facility, Savannah River Site, 18:23073 (R;US)
Tritium concentrations in the Columbia River at Richland, 18:24832 (R;US)
Underground radionuclide migration at the Nevada Test Site, 18:24789 (R;US)

Remedial Action
A strategy for improving pump and treat ground water remediation, 18:24797 (R;US)
Applications of microwave radiation environmental remediation technologies, 18:22913 (R;US)
Enhancing aquifer cleanup with reinjection, 18:24793 (R;US)
Environmental remediation of the 200 Areas, Hanford Site, Washington, 18:24804 (R;US)
Poster session: Integrated demonstration for remediation of volatile organic compounds at arid sites, 18:24779 (R;US)
Technologies for environmental cleanup: Soil and ground water, 18:24800 (R;US)
The development of the high resolution S-wave reflection technique as a tool for improving subsurface characterization and groundwater studies, 18:24714 (RA;US)
The role of data management and decision support systems in the implementation of smart pump and treat, 18:24799 (R;US)

Treatment of ground water contaminated with volatile organic compounds using second generation ultraviolet light technology, 18:24790 (R;US)

Sampling

A multilayer groundwater sampler for characterizing contaminant plumes: Final report, 18:24663 (R;US)

High-level waste management and treatment program for The Analytical Laboratory, 18:23022 (R;US)

Logs of wells and boreholes drilled during hydrogeologic studies at Lawrence Livermore National Laboratory Site 300, January 1, 1991–September 1, 1992: Addendum 2, 18:24787 (R;US)

Non-invasive multilevel groundwater samplers, 18:24664 (R;US)

Water Pollution

Annual site environmental report for calendar year 1991, Kansas City Plant, Kansas City, Missouri, 18:24750 (R;US)

Water Quality

Quadrant III RFI draft report: Volume 1, 18:23032 (R;US)

Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 18:23127 (R;US)

GROUND-WATER RESERVES

Environmental and economic assessment of discharges from Gulf of Mexico region oil and gas operations: Quarterly technical progress report, 1 January–31 March 1993, 18:22842 (R;US)

GUNS

Advanced Field Artillery System gun mount thermal management study: Phase 1 summary, 18:24163 (R;US)

GYPSUM

Recovery and utilization of gypsum and limestone from scrubber sludge: Technical report, December 1, 1992–February 28, 1993, 18:22741 (R;US)

GYROTRONS

See MICROWAVE AMPLIFIERS

H

H CODES

HECAR program package to calculate the cross sections for 2→3 reaction in electroweak interaction theory, 18:25038 (R;RU;In Russian)

HADRON-HADRON INTERACTIONS

Analysis of the KW distribution using a generalization of the Meijer's G-function, 18:25042 (R;HU)

HAFNIUM 176 TARGET

Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)

HAFNIUM 178 TARGET

Calculations of long-lived isomer production in neutron reactions, 18:25133 (RA;XA)

HAFNIUM 179 TARGET

Activation cross section measurement for the $^{179}Hf(n,2n)^{178m2}Hf$ reaction, 18:25126 (RA;XA)

Calculations of long-lived isomer production in neutron reactions, 18:25133 (RA;XA)

Evaluation of isomeric excitation functions in neutron induced reactions, 18:25134 (RA;XA)

Implications of the IAEA CRP on long-lived activation cross sections on waste disposal and materials recycling for fusion reactor materials, 18:25135 (RA;XA)

Measurements of long-lived activation cross sections at 14.7 MeV in the inter-laboratory collaboration with ANL/LANL/JAERI, 18:25130 (RA;XA)

HAFNIUM 180 TARGET

Activation cross section measurement for the $^{179}Hf(n,2n)^{178m2}Hf$ reaction, 18:25126 (RA;XA)

Calculations of long-lived isomer production in neutron reactions, 18:25133 (RA;XA)

Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)

HAFNIUM OXIDES

Absorption and damage thresholds of low defect density hafnia deposited with activated oxygen, 18:23983 (R;US)

HALL GENERATORS

Manufacturing Section semiannual summary report, period ending June 30, 1967, 18:23574 (R;US)

Reactor Operation Branch monthly reports, January–December 1955, 18:23586 (R;US)

Single pass reactors: Operations Division semiannual summary report period ending June 30, 1970, 18:23576 (R;US)
Single pass reactors: Operations Division semiannual summary report period ending December 31, 1970, 18:23577 (R;US)

Water Chemistry
An analysis of the behavior of arsenic in Hanford reactor systems, 18:23538 (R;US)
An analysis of the behavior of arsenic in Hanford reactor systems, 18:23548 (R;US)
Dichromate evaluation, 18:23578 (R;US)
Half-plant low dichromate evaluation at KW Reactor: Production Test-176: Final report, 18:23581 (R;US)
K Reactor dichromate test results, 18:23580 (R;US)
Memorandum of process standards 9-16M sodium dichromate and pH requirements, K Reactors, 18:23579 (R;US)

Water Treatment
Water treatment test facility studies, July 1964–July 1967, 18:23575 (R;US)

HANFORD RESERVATION

Commercial Sector
[Hanford Department Histories]: Village Operation, Part 2, 18:22910 (R;US)

Environment
Environmental surveillance master sampling schedule, 18:24776 (R;US)

Fftf Reactor
Transport of radioactive material in liquid sodium, 18:23464 (R;US)

Geology
Selected hydraulic test analysis techniques for constant-rate discharge tests, 18:24958 (R;US)

Historical Aspects
[Hanford Department Histories]: Instrument Department, 18:23602 (R;US)
[Hanford Department Histories]: Village Operation, Part 2, 18:22910 (R;US)
[The Hanford story, Chapters 9–11], 18:23604 (R;US)

Hydrology
Selected hydraulic test analysis techniques for constant-rate discharge tests, 18:24958 (R;US)

Information Dissemination
List of currently classified documents relative to Hanford Production Facilities Operations originated on the Hanford Site between 1961 and 1972, 18:24910 (R;US)

Management
[Hanford Department Histories]: Instrument Department, 18:23602 (R;US)

Occupational Safety
Risk management of onsite transportation of nuclear waste, 18:22907 (R;US)

Operation
[The Hanford story, Chapters 9–11], 18:23604 (R;US)

Pilot Plants
Waste water pilot plant research, development, and demonstration permit application: Revision 1A, 18:22955 (R;US)

Radiation Monitoring
Atmospheric radionuclide concentrations measured by Pacific Northwest Laboratory since 1961, 18:24633 (R;US)
Overview of the Hanford Environmental Thermoluminescent Dosimetry Program, 18:23144 (R;US)

Radiation Protection
Development and maintenance of the Hanford Site Radiological Control Manual, 18:24904 (R;US)

Radioactive Effluents
Estimation of 1945 to 1957 food consumption: Hanford Environmental Dose Reconstruction Project: Draft, 18:24909 (R;US)
Hanford Environmental Dose Reconstruction Project monthly report, March 1993, 18:24906 (R;US)
Integrated task plans for the Hanford Environmental Dose Reconstruction Project, FY 1992 through May 1994, 18:24907 (R;US)
Iodine-131 releases from the Hanford Site, 1944–1947: Volume 1, Text: Hanford Environmental Dose Reconstruction Project, 18:24908 (R;US)
List of currently classified documents relative to Hanford Production Facilities Operations originated on the Hanford Site between 1961 and 1972, 18:24910 (R;US)

Radioactive Waste Disposal
Performance assessment for low-level radioactive waste management and disposal at DOE facilities: Requirements, review process, and lessons learned, 18:23019 (R;US)
Tank waste decision analysis report: Draft, 18:23058 (R;US)

Radioactive Waste Management
100 Area soil washing treatability test plan, 18:22956 (R;US)
Integrated instrument platform for in situ characterization of tank wastes, 18:22925 (RA;US)
Remote chemical characterization, 18:22924 (RA;US)
Tank 241-CX-70 waste removal and packaging, 18:23065 (R;US)

Radioactive Waste Processing
106-AN grout pilot-scale test HGTP-93-0501-02, 18:23017 (R;US)
Hanford Waste Vitrification Plant project overview and status, 18:23062 (R;US)
Hanford Waste Vitrification Project Building limited scope risk assessment, 18:23059 (R;US)
Low temperature hydrothermal processing of organic contaminants in Hanford tank waste, 18:23029 (R;US)
Mechanical design of the storage tubes in the Hanford Waste Vitrification Plant Canister Storage Building, 18:23064 (R;US)
Waste salt recovery, recycle, and destruction, 18:23055 (R;US)

Radioactive Waste Storage
Tank waste chemistry: A new understanding of waste aging, 18:23026 (R;US)

Radioactive Wastes
Quantitative measurement of cyanide species in simulated ferrocyanide Hanford waste, 18:23024 (R;US)

Recreational Areas
[Hanford Department Histories]: Village Operation, Part 2, 18:22910 (R;US)

Remedial Action
Implementing and operating the Hanford Environmental Information System and applying it to the carbon tetrachloride expedited response action, 18:24782 (R;US)
Polyethylene encapsulation of single shell tank low-level wastes, 18:22920 (R;US)
Summary of FY 1992 operations of the vapor extraction system at the Hanford Site, Washington, 18:23066 (R;US)

Risk Assessment
Risk management study for the retired Hanford Site facilities: Volume 2, Risk evaluation work procedure for the retired Hanford Site facilities, 18:23605 (R;US)

Steam Generators
Continuous spectrum analysis: An approach for analyzing alternatives and impacts of potential projects, 18:23743 (R;US)

Waste Management
Tank waste decision analysis report: Draft, 18:23058 (R;US)
Tri-party agreement milestone summary, September 1992, 18:23067 (R;US)

Waste Processing Plants
Hanford Waste Vitrification Project Building limited scope risk assessment, 18:23059 (R;US)

Water Treatment Plants
Separan for water treatment, 18:23591 (R;US)
Waste water pilot plant research, development, and demonstration permit application: Revision 1A, 18:22955 (R;US)

HAPO
100 and 300 Areas monthly report, December 1954, 18:23585 (R;US)
Information on irradiation facilities and supporting laboratories at HAPO, 18:23588 (R;US)
Power Department, 18:23601 (R;US)
Summary analysis of the Redox Plant sand filter radiation measurements, 18:22883 (R;US)
[Hanford Department Histories]: Maintenance Department, 18:23603 (R;US)

HARD FACING
Investigation of PACVD protective coating processes using advanced diagnostics techniques: Performance report, 1 September 1992–30 April 1993, 18:23969 (R;US)

HARD SURFACING
See HARD FACING

HAZARDOUS MATERIALS
See also TOXIC MATERIALS

Combustion
Effluent testing for the Oak Ridge mixed waste incinerator: Emissions test for August 27, 1990, 18:22985 (R;US)

Computerized Tomography
Experimental A&PCT research and development efforts to characterize mixed-waste forms, 18:23053 (R;US)

Containment
Material containment enclosure, 18:24168 (PA;US)

Emergency Plans
Emergency exercise methodology, 18:24935 (R;US)

Extraction
Engineering scaleup of electrical soil heating for soil decontamination, 18:24777 (R;US)

Ground Disposal
Construction quality assurance closure report, Lawrence Livermore National Laboratory Site 300, Pits 1 and 7: Volume 2, Appendices E–P, 18:23047 (R;US)
Regulatory issues in vitrification research: A case study of circuit board reclamation, 18:23075 (R;US)

Heating
Engineering scaleup of electrical soil heating for soil decontamination, 18:24777 (R;US)

Information Systems
Assessment of needs and requirements for a geographic information system for Brookhaven National Laboratory, 18:24936 (R;US)
Information system 'Environmentally hazardous materials'. Final report, 18:25455 (R;DE;In German)

Quantitative Chemical Analysis
Contaminant analysis automation, 18:24061 (RA;US)
Integrated instrument platform for in situ characterization of tank wastes, 18:22925 (RA;US)
The radiological and hazardous material measurement system (RHMMS), 18:23102 (RA;US)

Radioactive Waste Management
Mixed waste characterization strategy, 18:23103 (RA;US)
RCRA Closure Plan for the Bear Creek Burial Grounds B Area and Walk-In Pits at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Energy Systems Environmental Restoration Program; Y-12 Environmental Restoration Program, 18:22953 (R;US)

Remedial Action
Buried Waste Integrated Demonstration FY-93 Deployment Plan, 18:22970 (R;US)
Buried Waste Integrated Demonstration Strategy Plan, 18:22971 (R;US)
Buried waste integrated demonstration fiscal year 1992 closeout report, 18:22972 (R;US)

Risk Assessment
Shemya AFB, Alaska 1992 IRP field investigation report: Volume 1: Final report, 18:24745 (R;US)

Sorting
Demonstration of automated robotic workcell for hazardous waste characterization, 18:24182 (R;US)

Underground Disposal
Construction quality assurance closure report, Lawrence Livermore National Laboratory Site 300, Pits 1 and 7: Volume 1, Text, tables, figures, and appendices A–D, 18:23046 (R;US)

Underground Storage
Closure report for Building 875 sump encased in concrete, 18:23048 (R;US)

Vitrification
Implementation of in situ vitrification technology for remediation of Oak Ridge contaminated soil sites: Past results and future plans, 18:23106 (R;US)
Regulatory issues in vitrification research: A case study of circuit board reclamation, 18:23075 (R;US)

Waste Disposal
Closure report for Building 875 sump encased in concrete, 18:23048 (R;US)

Waste Management
Chemical health risk assessment for hazardous and mixed waste management units at Lawrence Livermore National Laboratory: Volume 1, 18:23045 (R;US)

Waste Transportation
Savannah River Site offsite hazardous waste shipment data validation report, 18:22893 (R;US)

HCLWR TYPE REACTORS
Safety analyses of a high conversion LWR with BWR type tight lattice core, 18:23642 (R;JP;In Japanese)

HD 8077
See NICKEL BASE ALLOYS

HDO
See HEAVY WATER

HEALTH HAZARDS
See also RADIATION HAZARDS
Chemical health risk assessment for hazardous and mixed waste management units at Lawrence Livermore National Laboratory: Volume 1, 18:23045 (R;US)
Health effects models for nuclear power plant accident consequence analysis: Modification of models resulting from addition of effects of exposure to alpha-emitting radionuclides: Revision 1, Part 2, Scientific bases for health effects models, Addendum 2, 18:23545 (R;US)

HEALTH PHYSICS
See RADIATION PROTECTION

HEART
Estimation on ventricular fibrillation current at high-frequency electric shocks, 18:23688 (IA;JP;In Japanese)

HEAT
Analysis on solar cogeneration system with thermoelectric devices, 18:23256 (IA;JP;In Japanese)
Optimum design of composite panel with photovoltaic-thermo module, 18:23257 (IA;JP;In Japanese)
Present status and future aspects of combustion technologies to establish the advanced utilization of thermal energy, 18:24265 (IA;JP;In Japanese)

HEAT DISTRIBUTION SYSTEMS
Oxygen occurrence in total district-heating systems with a large number of plastic district heating pipes, 18:23849 (R;DK;In Danish)

HEAT EFFECTS
See TEMPERATURE DEPENDENCE

HEAT EXCHANGERS
Development of advanced low-temperature heat transfer fluids for district heating and cooling: Final report, September 25, 1990–September 24, 1991, 18:23847 (R;US)
[Heat exchangers for Savannah River Reactors], 18:23562 (R;US)
[Report on construction progress of the Explosives Department at the Savannah River Plant], 18:23553 (R;US)

HEAT PIPES
High temperature heat pipe experiments in low earth orbit, 18:24161 (R;US)
High-flux testing of heat pipes for point-focus solar collector systems, 18:23272 (R;US)

HEAT PUMPS
See also GAS HEAT PUMPS
Photovoltaic generating system of EMH (Energy Management House), 18:23233 (IA;JP;In Japanese)

HEAT RESISTANT MATERIALS
See also HEAT RESISTING ALLOYS
[Development, processing, properties, and applications on advanced alloys, ceramics, polymers, and composites]: Foreign trip report, December 9–20, 1991, 18:23944 (R;US)

Projected radionuclide inventories of DWPF glass from current waste at time of production: Revision 1, 18:23081 (R;US)
Tank waste decision analysis report: Draft, 18:23058 (R;US)
The Product Composition Control System at Savannah River: The statistical process control algorithm: Revision 1, 18:23069 (R;US)
Waste glass melting stages, 18:23027 (R;US)
[Travel to Mol, Belgium and Karlsruhe, Germany to discuss decommissioning technology and noble metals testing]: Foreign trip report, June 29–July 17, 1992, 18:22944 (R;US)

HIGH-PURITY GE DETECTORS
Beta/gamma test problems for ITS, 18:24877 (R;US)
HELGA HPGe detectors: Final report, 18:24446 (R;US)

HIGH-TC SUPERCONDUCTORS
Challenges for positron analysis in materials science, 18:25226 (RA;US)
Development of commercially viable high-T_cBi-2223 superconductor tapes, 18:25224 (R;US)
High resolution electron energy loss studies of surface vibrations: Progress report, November 1, 1990–May 1, 1993, 18:23971 (R;US)
Quasi two-dimensional vortex fluctuations in high-T_c superconductors, 18:25229 (RA;DK)
The study of structure-processing-property relations in copper oxide based high $T_c$superconductors: Progress report, July 1992–June 1993, 18:23973 (R;US)
Two dimensional ACAR measurements in high-$T_c$materials; recent results and future perspectives, 18:25227 (RA;US)
[The molecular precursor strategy for the production of superconducting oxides]: Progress report, 18:23970 (R;US)

HIGHLY ENRICHED URANIUM
A simulation model for uranium recovery processes, 18:23158 (R;US)
Validation of MCNP, a comparison with SCALE: Part 2, Highly enriched uranium metal systems, 18:23488 (R;US)
Validation of the CSAS25 module of SCALE: Part 2, Highly enriched uranium metal systems, 18:23489 (R;US)
Validation of the CSAS25 module of SCALE: Part 3, Highly enriched uranium oxide systems, 18:23490 (R;US)

HIGHWAYS
See ROADS

HILACS
Simulation of heavy ion fusion beams, 18:25328 (R;US)
Steering algorithms for a heavy-ion recirculating accelerator, 18:25332 (R;US)

HIPURE PROCESS
See DESULFURIZATION

HITREX-2 REACTOR
See ZERO POWER REACTORS

HOLMIUM 165 TARGET
Calculations of long-lived isomer production in neutron reactions, 18:25133 (RA;XA)
Mass and charge distributions in iron-induced reactions and excitation energy division between the fragments of the 672-MeV $^{56}Fe + ^{165}Ho$ reaction, 18:25100 (R;US)
Measurement and analysis of $^{165}Ho(n,\gamma)^{166m}Ho$ reaction cross section, 18:25127 (RA;XA)
Odd-odd nuclei around A = 184, 18:25139 (R;FR)

HOLMIUM 167
Calculations of long-lived isomer production in neutron reactions, 18:25133 (RA;XA)

HOLOGRAPHY
Image reconstruction for x-ray holographic microscopy, 18:25007 (R;US)
[Travel by ORNL personnel to Japan concerning testing of a field emission gun-transmission electron microscope and for discussion of electron holography]: Foreign trip report, March 13–20, 1992, 18:24481 (R;US)

HONDURAS
[Travel to Honduras to discuss plans to incorporate renewable energy technologies into rural electrification and water pumping programs]: Foreign trip report, October 28–November 12, 1992, 18:23745 (R;US)

HOSES
Technologies for offshore marginal oil field development.: Flexible production riser system for deep water, 18:22819 (IA;JP;In Japanese)

HOT PLASMA
On absorption of low frequency electromagnetic fields, 18:25275 (R;CH)

HOT PRESSING
Tribological characteristics of hot-pressed self-lubricating composites, 18:24037 (R;JP;In Japanese)

HOT SPOTS
Infrared imaging systems for the ferrocyanide waste tanks at the US Department of Energy's Hanford Site, 18:23068 (R;US)

HOT WATER HEATERS
See WATER HEATERS

HOT-DRY-ROCK SYSTEMS
Expectations for a second US Hot Dry Rock Site, 18:23303 (R;US)
Next stages in HDR technology development, 18:23302 (R;US)

HOUSEHOLDS
The way to lower electricity consumption: Saving electricity in the homes of Danish consumers, 18:23815 (R;DK;In Danish)

HOUSES
Measurement and apportionment of radon source terms for modeling indoor environments: Final progress report, March 1990–August 1992, 18:23811 (R;US)
Photovoltaic generating system of EMH (Energy Management House), 18:23233 (IA;JP;In Japanese)
Simulation study on energy consumption of single family house with solar heating and PV systems, 18:23254 (IA;JP;In Japanese)
Study on the thermal performance of the passive air circulation house. Part 9: Comparison of the results from simulations and experiments, 18:23805 (IA;JP;In Japanese)
Unusually amplified summer or winter indoor levels of radon, 18:24720 (R;US)

HTGR TYPE REACTORS
See also HTTR REACTOR
THTR-300 REACTOR
A modular gas-cooled cermet reactor system for planetary base power, 18:23468 (R;US)
Bending fatigue behavior of nuclear-grade graphite under impact loading, 18:23433 (RA;XA)
Code and model extensions of the THATCH code for modular high temperature gas-cooled reactors, 18:23447 (R;US)
Experimental study on a simulated primary-pipe rupture accident of HTGR: Experimental results of air ingress behavior, 18:23641 (R;JP;In Japanese)

Fabrication of HTGR core components by the method of volume gas-phase impregnation of porous media with pyrocarbon - main characteristics of the materials and products, 18:24020 (RA;XA)
Review Meeting for the Modular High-Temperature Gas-Cooled Reactor Corrosion, Migration, et Distribution Irradiation Experiment Fission Product Transport Program in France: Foreign trip report, March 26, 1992–April 5, 1992, 18:23448 (R;US)
[International Atomic Energy Agency's gas-cooled reactor technology development activities]: Foreign trip report, April 19, 1991–November 4, 1992, 18:23449 (R;US)
[Travel to Germany for studies on carbon materials technology]: Foreign trip report, June 17–July 6, 1992, 18:24039 (R;US)

HTO
See HEAVY WATER

HTTR REACTOR
Evaluation for material inspection of graphite inspection standard in High Temperature Engineering Test Reactor, 18:23597 (R;JP;In Japanese)
Evaluations of the fracture mechanical properties of fuel compacts for the HTTR, with emphasis on thermal shock resistances and neutron irradiation effects, 18:23431 (RA;XA)
Mechanical properties and thermal shock resistances of recently developed high performance graphites, 18:24022 (RA;XA)
Non-destructive test of HTGR graphite components, 18:23445 (RA;XA)

HUGENHOLTZ-PINES THEORY
See HYDROGEN

HUMAN CHROMOSOME 19
Livermore's pragmatic approach to integrated mapping for chromosome 19, 18:24854 (R;US)

HUMAN POPULATIONS
Dose-to-risk conversion factors for low-level tritium exposures, 18:24853 (R;US)
Estimation of 1945 to 1957 food consumption: Hanford Environmental Dose Reconstruction Project: Draft, 18:24909 (R;US)
Hanford Environmental Dose Reconstruction Project monthly report, March 1993, 18:24906 (R;US)
Integrated task plans for the Hanford Environmental Dose Reconstruction Project, FY 1992 through May 1994, 18:24907 (R;US)
Iodine-131 releases from the Hanford Site, 1944–1947: Volume 1, Text: Hanford Environmental Dose Reconstruction Project, 18:24908 (R;US)
Ionizing radiation burden of the population of the Dolni Rozinka mining region, 18:24889 (IA;CS;In Czech)
List of currently classified documents relative to Hanford Production Facilities Operations originated on the Hanford Site between 1961 and 1972, 18:24910 (R;US)
Pilot study risk assessment for selected problems at the Savannah River Site (SRS), 18:24873 (R;US)
Recommended environmental dose calculation methods and Hanford-specific parameters: Revision 2, 18:24901 (R;US)

HUMAN X CHROMOSOME
Mapping and ordered cloning of the human X chromosome: Progress report, September 1991–November 1992, 18:24850 (R;US)

HUMANS
See HUMAN POPULATIONS

HUMIC ACIDS
Effects of humic substances on the migration of radionuclides: Complexation of actinides with humic substances in natural aquatic systems, 18:24126 (RA;DE)
The significance of interactions of humic substances and organisms in the environment, 18:24813 (R;US)

HUMIDITY
Effective thermal conductivity of a silica gel bed used in the desiccant/regenerator, 18:23276 (IA;JP;In Japanese)
The impact of horizontal resolution on moist processes in the ECMWF model, 18:24947 (R;US)

HUNGARIAN PAKS-1 REACTOR
See PAKS-1 REACTOR

HUNGARY
Current status and prospects of biogas-biomanure production in Hungary, 18:23204 (RA;DK)
District heating master plan study and assessment. Debrecen: Final report, 18:23850 (R;DK)

HURRICANES
Effect of Hurricane Andrew on the Turkey Point Nuclear Generating Station from August 20–30, 1992: [Final report], 18:23430 (R;US)

HYBRID ELECTRIC-POWERED VEHICLES
Make and appraise the performance of SEG hybrid car, 18:23252 (IA;JP;In Japanese)
Technology assessments of advanced energy storage systems for electric and hybrid vehicles, 18:23867 (R;US)

HYBRID SYSTEMS
Analysis on solar cogeneration system with thermoelectric devices, 18:23256 (IA;JP;In Japanese)
Field test and simulation of photovoltaic/wind hybrid generating system, 18:23270 (IA;JP;In Japanese)
Optimum design of composite panel with photovoltaic-thermo module, 18:23257 (IA;JP;In Japanese)

HYDRAULIC FRACTURING
Well stimulation technology.: Field experiment of massive hydraulic fracturing, 18:22853 (IA;JP;In Japanese)

HYDRAULIC RAMS
See PUMPS

HYDRAULICS
Code and model extensions of the THATCH code for modular high temperature gas-cooled reactors, 18:23447 (R;US)
RELAP5/MOD3 code assessment with flow instability testing of an annular geometry fuel assembly, 18:23678 (R;US)

HYDRIDES
See also LITHIUM HYDRIDES
SILANES
Report on official foreign travel to Sweden and Germany, June 4–21, 1992, 18:23189 (R;US)

HYDROCARBON LOGGING
See WELL LOGGING

HYDROCARBONS
See also ALKANES
ANTHRACENE
BENZENE
BENZOPYRENE
POLYCYCLIC AROMATIC HYDROCARBONS
An investigation of molybdenum and molybdenum oxide catalyzed hydrocarbon formation reactions: Progress report, August 1, 1992–April 1, 1993, 18:24098 (R;US)
Bacterial distribution and metabolic activity in subsurface sediments from a gasoline spill, 18:22845 (R;US)
Degradation of mix hydrocarbons by immobilized cells of mix culture using a trickle fluidized bed reactor: Annual progress report, June 1992–May 1993, 18:24742 (R;US)
Fundamental studies in production of C_2-C_4 hydrocarbons from coal: Final report, 1 September 1988–31 August 1992, 18:22699 (R;US)
NOx reduction in diesel exhaust gas by using hydrocarbons, 18:23858 (IA;JP;In Japanese)
Novel process for depolymerization of coal to C_2-C_4 hydrocarbons: Progress report No. 13, September 1, 1992–November 30, 1992, 18:22702 (R;US)
Surface geochemical prospecting.: Development for marine geochemical survey system, 18:22779 (IA;JP;In Japanese)
Synthesis of hydrocarbons from natural gas and carbon dioxide, 18:23187 (IA;JP;In Japanese)
Synthesis of light hydrocarbons from synthesis gas using activated carbon-supported catalysts, 18:23212 (IA;JP;In Japanese)
Thermochemical conversion of cellulose with nickel metal catalyst, 18:23194 (IA;JP;In Japanese)

HYDROCHLORIC ACID
Corrosion by carbonisation gas. Final report, 18:23938 (I;DE;In German)

HYDRODYNAMICS
See also MAGNETOHYDRODYNAMICS
The experimental determination of impact forces for modeling of armored vehicle survivability, 18:24493 (R;US)

HYDROGEN
Adsorption
Report on official foreign travel to Sweden and Germany, June 4–21, 1992, 18:23189 (R;US)
Atom Collisions
Measurements of scattering processes in negative ion-atom collisions: Technical progress report, 1 September 1992–31 August 1993, 18:25183 (R;US)
Atom Transport
Hot muonic deuterium and tritium from cold targets, 18:25159 (R;US)
Atoms
A hydrogen atom in the curved space: orthogonality of radial wave functions with respect to the critical momentum, 18:24970 (R;RU;In Russian)
Chemical Reaction Yield
Conversion of light hydrocarbon gases to metal carbides for production of liquid fuels and chemicals: Quarterly technical status report, January 1–March 31, 1993, 18:22857 (R;US)
Chemical Reactions
Infrared absorption spectroscopy and chemical kinetics of free radicals: Progress report, 18:24116 (R;US)
Consumption Rates
Effect of asphaltene in bitumen on co-processing of coal/bitumen, 18:22666 (IA;JP;In Japanese)
Containment
Hydrogen management techniques in German LWR-containments, 18:23410 (RA;CS)
Controlled Atmospheres
Development of a new coal hydrogenation process by Osaka Gas and British Gas, 18:22675 (IA;JP;In Japanese)
Desorption
Si Atomic Layer Epitaxy based on Si_2H_6 and remote He plasma bombardment, 18:23181 (R;US)
Hartmann Number
Clusterization of quantum states in the Hartmann model, 18:24971 (R;RU;In Russian)
Interactions
An Integral Effects Test to investigate the effects of condensate levels of water and preexisting hydrogen on direct containment heating in the Surtsey Test Facility: The IET-7 experiment, 18:23670 (R;US)
Meetings
[Travel to Paris, France, to attend the 28th International Energy Agency Hydrogen Executive Committee meeting; to attend the 9th World hydrogen energy conference and present a paper on behalf of EPRI and Technology Transition, Inc.]: Foreign trip report, June 17–29, 1992, 18:23186 (R;US)
Mixtures
Opacities of uranium-hydrogen gas mixtures at high temperatures and pressures, 18:23471 (R;US)
Muonic Atoms
Detection of hot muonic hydrogen atoms emitted in vacuum using x-rays, 18:25158 (R;US)
Hot muonic deuterium and tritium from cold targets, 18:25159 (R;US)
Pumping
The pumping of hydrogen and helium by sputter-ion pumps: Revision 3/93, 18:24342 (R;US)
Riemann Space
A hydrogen atom in the curved space: orthogonality of radial wave functions with respect to the critical momentum, 18:24970 (R;RU;In Russian)
Solubility
A novel process for methanol synthesis: Progress report, December 1, 1992–February 28, 1993, 18:23214 (R;US)
Synthesis
Treating water-reactive wastes, 18:22997 (R;US)
HYDROGEN 1 MINUS BEAMS
Application of H(2s) atom photoionization electrons for measuring energy of H^- ion beam, 18:24359 (IA;RU;In Russian)
HYDROGEN 2
See DEUTERIUM
HYDROGEN 3
See TRITIUM
HYDROGEN CHLORIDES
See HYDROCHLORIC ACID
HYDROGEN GENERATORS
Fe(CO)5/sulfur-catalyzed coal liquefaction using steam or alcohol as hydrogen source, 18:22669 (IA;JP;In Japanese)
HYDROGEN HYDROXIDES
See WATER
HYDROGEN IONS
See also HYDROGEN IONS 1 MINUS
Dynamics of dissociation versus ionization in strong laser fields, 18:25192 (R;US)
HYDROGEN IONS 1 MINUS
Measurements of scattering processes in negative ion-atom collisions: Technical progress report, 1 September 1992–31 August 1993, 18:25183 (R;US)
HYDROGEN MINUS 1 BEAMS

INSTRUMENTS (MEASURING)
See MEASURING INSTRUMENTS
INSULATING LIMITERS
See LIMITERS
INSULATION (THERMAL)
See THERMAL INSULATION
INTEGRATED CIRCUITS
Participation in the 3rd international conference on nuclear microprobe technology and applications held in Uppsala, Sweden: Foreign trip report, June 3–13, 1992, 18:25212 (R;US)
Reflection mask defect repair, 18:24291 (R;US)
Testing technology: A Sandia technology bulletin, 18:23754 (R;US)
INTEGRATED COMMUNITY ENERGY SYSTEMS
See ICES PROGRAM
INTERCALATES
See CLATHRATES
INTERCONNECTED POWER SYSTEMS
Development of compact protective control unit for grid connected small residential systems, 18:23235 (IA;JP;In Japanese)
Strategies for controlled islanding of a regional power producer, 18:23769 (R;FI;In Finnish)
INTERFACES
An improved material interface reconstruction algorithm for Eulerian codes, 18:25203 (R;US)
INTERFERENCE
Investigation on the effectiveness of the piping interference removal system for STOL aricraft wind tunnel tests, 18:23822 (R;JP;In Japanese)

INTERMEDIATE RESONANCE
Formation of positronium compounds in slow positron beams, 18:25199 (RA;US)

INTERMETALLIC COMPOUNDS
ABSTRACTS: Seventh annual conference on fossil energy materials, 18:23913 (R;US)
[Development, processing, properties, and applications on advanced alloys, ceramics, polymers, and composites]: Foreign trip report, December 9–20, 1991, 18:23944 (R;US)

INTERMOLECULAR FORCES
Non-covalent bonding in coal strucutre and novel applications, 18:22662 (IA;JP;In Japanese)
Roles of non-covalent interactions in coal structure, 18:22731 (IA;JP;In Japanese)

INTERNAL COMBUSTION ENGINES
See also DIESEL ENGINES
GAS TURBINE ENGINES
Methane reduction by catalysts for natural gas motors: Status report, 18:24627 (R;DK;In Swedish)
Study in deNOx catalysts for lean-burn gas engines, 18:23877 (IA;JP;In Japanese)
The intensity of knock in an internal combustion engine: An experimental and modeling study: Revision 1, 18:23861 (R;US)
[Travel to Lisbon, Portugal to present a paper at the sixth international symposium of applications of laser techniques to fluid mechanics and travel to Cambridge University to visit the Shell Thornton Research Centre]: Foreign trip report, July 18–29, 1992, 18:24267 (R;US)

INTERNATIONAL ATOMIC ENERGY AGENCY
See IAEA

INTERNATIONAL COMMISSION RADIATION UNITS
See ICRU

INTERNATIONAL ENERGY AGENCY
Finnish industry as users of IEA Coal Research Services, 18:22649 (R;FI;In Finnish)
[Travel to Trondheim, Norway to participate in the IEA task leaders meeting]: Foreign trip report, June 20–27, 1992, 18:22753 (R;US)

INTERNATIONAL ORGANIZATIONS

ICRU
INTERNATIONAL ENERGY AGENCY
OECD
INMM International Safeguards Division status report, 18:23762 (R;US)

INTERNATIONAL REGULATIONS
Future development of the demands on therapy dosemeters with ionization chambers, 18:24459 (RA;DE;In German)

INTERSECTING BEAMS
See COLLIDING BEAMS

INTERSTELLAR GRAINS
The interaction of a supernova remnant with interstellar clouds using high order local adaptive mesh refinement methods, 18:24228 (RA;US)

INTRUSION DETECTION SYSTEMS
Portable Reconfigurable Line Sensor (PRLS), 18:23155 (R;US)

INVERSE SCATTERING PROBLEM
Exactly solvable three-body with two-center potentials, 18:24972 (R;RU;In Russian)

INVISCID FLOW
See IDEAL FLOW

IODINE
Travel to Germany and France to present two talks at the international conference on interaction of iron based materials with water and steam: Foreign trip report, May 16, 1992–June 10, 1992, 18:24111 (R;US)

IODINE 127 TARGET
Status report of RIKEN Nuclear Data Group, 18:25462 (RA;XA)

IODINE 131
Iodine-131 releases from the Hanford Site, 1944–1947: Volume 1, Text: Hanford Environmental Dose Reconstruction Project, 18:24908 (R;US)

IODINE IODIDES
See IODINE

ION BEAMS
See also HYDROGEN 1 MINUS BEAMS
RADIOACTIVE ION BEAMS
Acceleration of power pulse ion beams in plasma-filled magnetic channels, 18:25268 (IA;RU;In Russian)
Bunched beam longitudinal instability: Coherent dipole motion, 18:24310 (R;US)
Crystal deflector for relativistic ion colliders, 18:24362 (R;RU)
Funneling experience at Los Alamos: Experiments and designs, 18:24375 (R;US)
[Travel to the Heavy Ion Research Center and the Nuclear Research Center, Germany and the conference on physics of high energy density in matter, Austria]: Foreign trip report, January 24, 1993–February 7, 1993, 18:24346 (R;US)

ION BLOCKING
See ION CHANNELING

ION CHANNELING
Determination of channeling perspectives for complex crystal structures, 18:25222 (R;US)

ION CLUSTERS
See ION PAIRS

ION CYCLOTRON-RESONANCE HEATING
See ICR HEATING

ION EXCHANGE MEMBRANES
See MEMBRANES

ION PAIRS
Photodissociation and spectroscopy of gas phase bimetallic clusters: Annual progress report, 18:24118 (R;US)

ION SOURCES
See also DUOPLASMATRONS
ELECTRON BEAM ION SOURCES
Characteristics of a new microwave ion source for plasma-wall interaction studies, 18:25312 (IA;JP)
Fundamental processes determining the highly charged ion production in ECR ion sources, 18:24364 (R;RU)
Generation and acceleration of highly ionized metallic ions with the 'point pinch diode', 18:25311 (IA;JP)
Intense positive and negative ion sources for fusion applications, 18:25310 (IA;JP)
Polarization diagnostics and optical pumping development for OPPIS and LAMPF, 18:24376 (R;US)
The multiply charged ion production in ECR ion sources, 18:24363 (R;RU)

ION-ATOM COLLISIONS
A and M data needs for the neutral beam heating system for next-step fusion devices, 18:25266 (RA;XA)
Collisions of Be^{q+} and B^{q+} ions with H, H_2 and He, 18:25191 (RA;XA)
Data needs for electron transfer processes of MeV heavy (positive and negative) ions, applied to electro-magnetic field measurements in plasmas, 18:25265 (RA;XA)
Database for collision processes involving helium atoms and ions, 18:25189 (RA;XA)
IAEA advisory group meeting on atomic and molecular data for fusion plasma impurities: Summary report, 18:25262 (R;XA)
Progress report of atomic data group, IPP/Nagoya 1986 - 1987, 18:25243 (RA;XA)
Progress report of the A and M Data Unit, 18:25246 (RA;XA)
Report of the working group on the data base for collisions of C^{q+} and O^{q+} ions with H, H_2 and He, 18:25249 (RA;XA)
Working group report on atomic data status and needs concerning plasma impurities colliding with H, H_2 and He, 18:25264 (RA;XA)
Working group report on ion-impact excitation: Recommended database for ion-impact excitation of atomic hydrogen, 18:25254 (RA;XA)

ION-ION COLLISIONS
Data needs for electron transfer processes of MeV heavy (positive and negative) ions, applied to electro-magnetic field measurements in plasmas, 18:25265 (RA;XA)

ION-MOLECULE COLLISIONS
A and M data needs for the neutral beam heating system for next-step fusion devices, 18:25266 (RA;XA)
Collisions of Be^{q+} and B^{q+} ions with H, H_2 and He, 18:25191 (RA;XA)
IAEA advisory group meeting on atomic and molecular data for fusion plasma impurities: Summary report, 18:25262 (R;XA)
Progress report of the A and M Data Unit, 18:25246 (RA;XA)
Report of the working group on the data base for collisions of C^{q+} and O^{q+} ions with H, H_2 and He, 18:25249 (RA;XA)

IONIC REACTIONS

Ion shaking in the 200 MeV XLS-ring, 18:24309 (R;US)

IONS (MOLECULAR)
See MOLECULAR IONS

IRIDIUM 191 TARGET
Implications of the IAEA CRP on long-lived activation cross sections on waste disposal and materials recycling for fusion reactor materials, 18:25135 (RA;XA)

IRIDIUM 193 TARGET
Evaluation of isomeric excitation functions in neutron induced reactions, 18:25134 (RA;XA)

IRISH SEA
A review of radioactivity in the Irish Sea: A report prepared for the Marine Pollution Monitoring Management Group, 18:24829 (R;GB)

IRON
Corrosion by carbonisation gas. Final report, 18:23938 (I;DE;In German)
Development of a cost-effective environmental compliance technology for stripper well brines: Quarterly report, October 1, 1992–December 31, 1992, 18:22839 (R;US)
Modeling of reactive chemical transport of leachates from a utility fly-ash disposal site, 18:23350 (R;US)

IRON 54 TARGET
Consistent activation cross section calculations for all stable isotopes of V, Cr, Mn, Fe, Co, Ni, 18:25132 (RA;XA)
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)

IRON 56 REACTIONS
Mass and charge distributions in iron-induced reactions and excitation energy division between the fragments of the 672-MeV $^{56}Fe + {}^{165}Ho$ reaction, 18:25100 (R;US)

IRON 56 TARGET
Analysis of Fe(n,xγ) cross sections using the TNG nuclear reaction model code, 18:25080 (R;US)

IRON 65
Measurement of beta decay periods for Fe-Ni neutrons rich isotopes, 18:25077 (R;FR;In French)

IRON 68
Measurement of beta decay periods for Fe-Ni neutrons rich isotopes, 18:25077 (R;FR;In French)

IRON ALLOYS
See also ALLOY-NI59CR30FE9
ALLOY-NI76CR15FE8
IRON BASE ALLOYS
ABSTRACTS: Seventh annual conference on fossil energy materials, 18:23913 (R;US)
Constitution and deformation of $Fe_3(AlSi)$-based intermetallic phases, 18:23939 (R;DE;In German)
Ion implantation effects on surface-mechanical properties of metals and polymers, 18:23180 (R;US)
Monte Carlo simulations of phase transformations in Fe-Cr alloys, 18:23955 (R;US)
Statics and kinetics of phase transformations in bcc Fe-Cr, 18:23957 (R;US)

IRON BASE ALLOYS
See also STEELS
Corrosion by carbonisation gas. Final report, 18:23938 (I;DE;In German)
Corrosion performance of iron aluminides, 18:23914 (R;US)
Processing, properties, and wear resistance of aluminides, 18:23936 (R;US)
Solubility of cobalt in primary circuit solutions, 18:23379 (R;FR)

IRON CHLORIDES
Sequential low-temperature depolymerization and liquefaction of US coals: Progress report No. 6, January 1–March 31, 1988, 18:22709 (R;US)

IRON COMPOUNDS
See also IRON CHLORIDES
IRON NITRIDES
IRON OXIDES
Results of catalyst testing using iron-based catalysts, 18:22729 (R;US)

IRON NITRIDES
Fundamental studies of new high-energy permanent magnet materials: Progress report, June 19, 1992–June 18, 1993, 18:23974 (R;US)

IRON OXIDES
Electrostatic dust ignition mechanism for priming materials. 2, 18:24506 (IA;JP;In Japanese)

IRRADIATION CAPSULES
Capsule design, fabrication and irradiation for tensile creep test on HTGR graphites at 1200 deg. C in the JMTR, 18:24031 (RA;XA)

IRRADIATION PLANTS
Information on irradiation facilities and supporting laboratories at HAPO, 18:23588 (R;US)

ISOBARS (NUCLEON)
See N*BARYONS

ISOMERASES
[The first steps of chlorophyll synthesis: RNA involvement and regulation]: Progress report, January 1990–June 1992, 18:24840 (R;US)

ISOTOPE PRODUCTION
Target development for medical radioisotope production at a cyclotron, 18:23172 (RA;XA)

ISOTOPE SEPARATION PLANTS
See also GASEOUS DIFFUSION PLANTS
The plasma centrifuge (A compact, low cost, stable isotope separator): Progress report, [September 15, 1991–September 14, 1992], 18:23169 (R;US)

ITALY
Results of a demonstration project: The Marsciano cooperative plant, 18:23200 (RA;DK)

ITER TOKAMAK
Heat load analysis on the cable-in-conduit with central core conductor for the TF coil Rebut layer design, 18:25319 (R;US)
ITER EDA design confinement capability, 18:25293 (R;US)
Opportunities for US industry in the ITER project, 18:25334 (R;US)
Status and plans for ITER, 18:25333 (R;US)
The role of ITER in the US MFE Program Strategy, 18:25335 (R;US)
Tokamak plasma power balance calculation code (TPC code) outline and operation manual, 18:25271 (R;JP;In Japanese)

ITERATIVE METHODS
See also FINITE DIFFERENCE METHOD
NEWTON METHOD
Deconvolution for positive signals, 18:25439 (R;US)
Parallel inverse iteration with reorthogonalization, 18:25418 (R;US)

IVORY COAST
The Agency's Technical Co-operation programme with Cote d'Ivoire, 1982-1992. Country programme summaries, 18:25365 (R;XA)

J

JAPAN
Global advective transport of passive tracers emitted from Japan, 18:23729 (IA;JP;In Japanese)
Present and future status of positrons in industrial research, 18:23899 (RA;US)
[Travel to Japan for the 10th international symposium on the packaging and transportation of radioactive materials]: Foreign trip report, September 14, 1992–October 2, 1992, 18:22897 (R;US)

JAPANESE ORGANIZATIONS
Record of TRC's activities in the fiscal year 1991, 18:22835 (I;JP;In Japanese)

JECCO PROCESS

LOSS OF COOLANT
Analysis of ROSA-IV/LSTF experiment simulating a steam generator tube rupture design basis incident by using RELAP5/MOD2 code, 18:23643 (R;JP;In Japanese)
Analysis of ROSA-IV/LSTF experiment simulating the Mihama Unit-2 steam generator U-tube rupture incident by using RELAP5/MOD2 code, 18:23428 (R;JP;In Japanese)
Calculational and experimental investigations of void effect. A new model for leakage treatment of heterogeneous assemblies, 18:23373 (R;FR)

LOSSES (ENERGY)
See ENERGY LOSSES

LOVIISA-1 REACTOR
A computerized event and maintenance data system at Loviisa nuclear power plant, 18:23404 (RA;CS)
Backfitting experience, Loviisa nuclear power plant, Finland, 18:23414 (RA;CS)
Computer systems in the operation, maintenance and technical support of Loviisa NPS, 18:23427 (RA;CS)

LOVIISA-2 REACTOR
Computer systems in the operation, maintenance and technical support of Loviisa NPS, 18:23427 (RA;CS)

LOW ALLOY STEELS
Improvement of corrosion fatigue behaviour of high-strength steel welds by means of optimized post weld treatments, 18:23943 (R;DE;In German)
Y-12 Development Division technical progress report: Part 3, Metal processing period ending December 1, 1992, 18:23963 (R;US)

LOW BTU GAS
High-pressure coal fuel processor development: Final report, 18:22698 (R;US)

LOW-LEVEL RADIOACTIVE WASTES
Combustion
Effluent testing for the Oak Ridge mixed waste incinerator: Emissions test for August 27, 1990, 18:22985 (R;US)
Encapsulation
Polyethylene encapsulation of single shell tank low-level wastes, 18:22920 (R;US)
Polyethylene encapsulation of single-shell tank low-level wastes: Annual progress report, 18:22922 (R;US)

Ground Disposal
Construction quality assurance closure report, Lawrence Livermore National Laboratory Site 300, Pits 1 and 7: Volume 2, Appendices E–P, 18:23047 (R;US)
Mixed Waste Treatment Project – Scope and status, 18:23051 (R;US)

Leaching
Characteristics of low-level radioactive decontamination waste: Annual report for Fiscal Year 1992: Volume 3, 18:23370 (R;US)

Minimization
Waste minimization for commercial radioactive materials users generating low-level radioactive waste: Revision 1, 18:22967 (R;US)

Radioactive Waste Disposal
Greater-than-Class C Low-Level Radioactive Waste Program 1992 baseline strategy, 18:22950 (R;US)
Nevada Test Site defense waste acceptance criteria, certification, and transfer requirements: Revision 1, 18:23008 (R;US)
Simulation of radionuclides in the saturated zone at the E-Area low- level radioactive waste disposal facility, Savannah River Site, 18:23073 (R;US)

Radioactive Waste Management
Engineering assessment of mixed waste management options: Volume 2: [Final report], 18:22989 (R;US)
Management plan for revision for DOE Order 5820.2A: National Low-Level Waste Management Program, 18:22948 (R;US)
Recommendations for future low-level and mixed waste management practices at Los Alamos National Laboratory, 18:22991 (R;US)
[Information exchange on current and planned low-level and transuranic waste management practices]: Foreign trip report, November 1–12, 1992, 18:22983 (R;US)

Radioactive Waste Processing
Advanced oxidation and reduction processes: Closed-loop applications for mixed waste, 18:22996 (R;US)
Low-level waste sorting of small packages, 18:23034 (R;US)
Molten salt oxidation as an alternative to incineration, 18:24138 (R;US)
Tank waste decision analysis report: Draft, 18:23058 (R;US)
Treatment of mixed F006 contaminated material to meet the new EPA debris rule at the Savannah River Site, 18:23074 (R;US)

Radioactive Waste Storage
Greater-than-Class C Low-Level Radioactive Waste Program 1992 baseline strategy, 18:22950 (R;US)
Safety analysis and inventory control of transuranic and low-level waste in common storage, 18:23060 (R;US)

Radiochemical Analysis
Low-level radioactive waste from nuclear power generating stations: Characterization, classification and assessment of activated metals and waste streams, 18:23023 (R;US)

Radiolysis

Boiling point prediction of coal derived oil by group contribution method, 18:22665 (IA;JP;In Japanese)
Correlation of DSC measurement results on benzene monocyclic derivative with its chemical structure, 18:24515 (IA;JP;In Japanese)

MOLECULE-MOLECULE COLLISIONS
IAEA consultants' meeting on atomic data base and fusion applications interface, Vienna, 9-13 May 1988: Summary report, 18:25250 (R;XA)

MOLECULES
Dynamics of dissociation versus ionization in strong laser fields, 18:25192 (R;US)
Empirical evalution of affinity between macromolecular strucutre of coal and penetrating molecule, 18:22733 (IA;JP;In Japanese)
Fundamental parameters and interactions of positrons with molecules, 18:25182 (RA;US)

MOLTEN CARBONATE FUEL CELLS
Development of 25kW class multiple large capacity type molten carbonate fuel cell, 18:23787 (IA;JP;In Japanese)

MOLTEN SALT COOLANTS
See MOLTEN SALTS

MOLTEN SALTS
Dialkylimidazolium chloroaluminates: Ab initio calculations, Raman and neutron scattering measurements, 18:24089 (R;US)
Oxygen sparging of residue salts, 18:22994 (R;US)
Study on vapor explosiveness of molten LiCl-water system, 18:24509 (IA;JP;In Japanese)
Travel to Belgium for the 1992 EuChem Molten Salt Conference: Foreign trip report, March 23–April 3, 1992, 18:24013 (R;US)

MOLYBDENUM
An investigation of molybdenum and molybdenum oxide catalyzed hydrocarbon formation reactions: Progress report, August 1, 1992–April 1, 1993, 18:24098 (R;US)
Transmission electron microscopy studies of multilayer structures: Report on work through November 30, 1991, 18:25218 (R;US)

MOLYBDENUM 92 TARGET
Formation and decay of toroidal and bubble nuclei and the nuclear equation of state, 18:25093 (R;US)

MOLYBDENUM 98 TARGET
Measurements of activation cross sections for some long-lived nuclides important in fusion reactor technology, 18:25136 (RA;XA)

MOLYBDENUM ALLOYS
Ion implantation effects on surface-mechanical properties of metals and polymers, 18:23180 (R;US)

MOLYBDENUM COMPOUNDS
See also MOLYBDENUM NITRIDES
MOLYBDENUM OXIDES
MOLYBDENUM SULFIDES
Novel approaches to the production of higher alcohols from synthesis gas: Quarterly Technical progress report No. 8, July 1, 1992–September 30, 1992, 18:23215 (R;US)

MOLYBDENUM NITRIDES
Fundamental studies of new high-energy permanent magnet materials: Progress report, June 19, 1992–June 18, 1993, 18:23974 (R;US)

MOLYBDENUM OXIDES
An investigation of molybdenum and molybdenum oxide catalyzed hydrocarbon formation reactions: Progress report, August 1, 1992–April 1, 1993, 18:24098 (R;US)

MOLYBDENUM SULFIDES
Low temperature pathways to Chevrel phases via reduced molybdenum sulfide cluster complexes, 18:24033 (R;US)

MONGOLIAN PEOPLES REPUBLIC
Country programme review. Mongolia, 18:25375 (R;XA)

NATURAL CONVECTION
Effects of inclination angles to perpendicular direction on PMMA flat plate imposed on burning behavior, 18:24128 (IA;JP;In Japanese)

NATURAL GAS
See also LIQUEFIED NATURAL GAS
Deep gas, 18:22849 (IA;JP;In Japanese)
Direct conversion of natural gas to liquid fuel, 18:22858 (IA;JP;In Japanese)
Effects of cavern spacing on the performance and stability of gas-filled storage caverns, 18:22859 (R;US)
Evaluation of gas-reburning and low NO_x burners on a wall fired boiler: Technical progress report No. 10, January 1–March 31, 1993, 18:22764 (R;US)
Low pressure storage of natural gas on activated carbon, 18:23883 (R;US)
Methane reduction by catalysts for natural gas motors: Status report, 18:24627 (R;DK;In Swedish)
Origin of natural gas, 18:22848 (IA;JP;In Japanese)
Study in deNOx catalysts for lean-burn gas engines, 18:23877 (IA;JP;In Japanese)
Synthesis of hydrocarbons from natural gas and carbon dioxide, 18:23187 (IA;JP;In Japanese)

NATURAL GAS DEPOSITS
Development of gas fields in arctic region, 18:22851 (IA;JP;In Japanese)
Evaluation of using cyclocranes to support drilling and production of oil and gas in wetland areas: Third quarterly technical progress report, First quarter, 1993, 18:22846 (R;US)

NATURAL GAS HYDRATE DEPOSITS
Natural gas hydrate, 18:22850 (IA;JP;In Japanese)
Well log evaluation of natural gas hydrates, 18:22852 (R;US)

NATURAL GAS INDUSTRY
Characterization of oil and gas waste disposal practices and assessment of treatment costs engineering: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22838 (R;US)
Natural gas monthly, April 1993 (Contains glossary), 18:22833 (R;US)
The world economy of petroleum products and the strategy of a petroleum company from exporting country: Cases of

SONATRACH (Algeria), KPC (Kuwait), PEMEX (Mexico), PDVSA (Venezuela). Second volume, 18:22837 (R;FR;In French)
The world economy of petroleum products and the strategy of a petroleum company from exporting country: Cases of SONATRACH (Algeria), KPC (Kuwait), PEMEX (Mexico), PDVSA (Venezuela). First volume, 18:22836 (R;FR;In French)

NATURAL GAS WELLS
Characterization of oil and gas waste disposal practices and assessment of treatment costs engineering: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22838 (R;US)
Continued support of "The Natural Resources Information System (NRIS) for the State of Oklahoma": Quarterly technical progress report, January 1, 1993–March 31, 1993, 18:22831 (R;US)
Development of a cost effective environment compliance technology for stripper brine wells: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22840 (R;US)
Development of a cost-effective environmental compliance technology for stripper well brines: Quarterly report, October 1, 1992–December 31, 1992, 18:22839 (R;US)
Environmental and economic assessment of discharges from Gulf of Mexico region oil and gas operations: Quarterly technical progress report, 1 January–31 March 1993, 18:22842 (R;US)
Evaluation of the freeze-thaw/evaporation process for the treatment of produced waters: Quarterly technical progress report, January 1–March 31, 1993, 18:22841 (R;US)

NATURAL RADIOACTIVITY
Radionuclide migration behavior at the low adsorption region on the aerated soil testing, 2: Effect of inflow volume and migration analysis, 18:24749 (R;JP;In Japanese)

NAVIER-STOKES EQUATION
See NAVIER-STOKES EQUATIONS

NAVIER-STOKES EQUATIONS
A second-order closure for supersonic turbulent flows application to the supersonic mixing, 18:24223 (RA;US)
Compressible, fully de-aliased, two-dimensional spectral method simulations of fluid and magneto-fluid turbulence, 18:24212 (RA;US)
Navier-Stokes simulation of supersonic free shear layer flows, 18:24215 (RA;US)
Numerical simulation of compressible homogeneous turbulence, 18:24220 (RA;US)
Numerical simulation of turbulent mixing in shock-tube experiments, 18:24230 (RA;US)
Numerical simulations with a k-ϵ mixing model in the presence of shock waves, 18:24222 (RA;US)
Turbulent jump relations in the interaction of a shock wave with a turbulent region, 18:24221 (RA;US)

NEA
NEA Data Bank progress report to the NRDC meeting in Obninsk/Moscow, October 1991, 18:25471 (RA;XA)
NEA Data Bank progress report to the nuclear reaction data centres, 18:25459 (RA;XA)

NEODYMIUM NITRIDES
Fundamental studies of new high-energy permanent magnet materials: Progress report, June 19, 1992–June 18, 1993, 18:23974 (R;US)

NEON
Measurements of scattering processes in negative ion-atom collisions: Technical progress report, 1 September 1992–31 August 1993, 18:25183 (R;US)

NEON IONS
The oncogenic action of ionizing radiation on rat skin: Final progress report, May 1, 1990–April 30, 1992, 18:24878 (R;US)

NEOPLASMS
Cancer and birth defects surveillance system for communities around the Savannah River Site: Savannah River Region Health Information System (SRRHIS): Annual progress report, 18:24883 (R;US)
Pilot study risk assessment for selected problems at the Savannah River Site (SRS), 18:24873 (R;US)
Present status of fast neutron therapy survey of the clinical data and of the clinical research programmes, 18:24863 (RA;XA)

NEPA
See US NATIONAL ENVIRONMENTAL POLICY ACT

NEPTUNIUM
Japanese chemical separations (partitioning) and transmutation activities: Foreign trip report, July 17–25, 1992, 18:22880 (R;US)
Radionuclide solubility and speciation studies for the Yucca Mountain site characterization project, 18:22998 (R;US)

NEPTUNIUM COMPLEXES
Further investigations of the humate complexation of very low concentrations of neptunium(V), 18:24125 (RA;DE)

NEPTUNIUM COMPOUNDS
Effects of humic substances on the migration of radionuclides: Complexation of actinides with humic substances. Second progress report, 18:24122 (R;DE)

NETHERLANDS
Financing possibilities and programmes concerning biogas in the Netherlands, 18:23751 (RA;DK)
Operational experinece with large scale biogas production at the promest manure processing plant in Helmond, the Netherlands, 18:23201 (RA;DK)
The Dutch standard on the description of air pollution models, 18:24623 (RA;DK)
The problem of excess manure in the Netherlands: Environment and legislation. Future development and role of biogas production, 18:23777 (RA;DK)

NETWORKS (COMPUTER)
See COMPUTER NETWORKS

NEURAL NETWORKS
Feature discovery on segmented objects in SAR imagery using self-organizing neural networks, 18:24492 (R;US)
Neural network approaches to tracer identification as related to PIV research, 18:24240 (R;US)

NEUTRAL ATOM BEAM INJECTION
IAEA specialists' meeting on required atomic database for neutral beam penetration in large tokamaks: Summary report, 18:25251 (R;XA)
Simulations of beam-fueled supershot-like plasmas near ignition, 18:25317 (R;US)
Survey of atomic data base needs and accuracies for helium beam stopping and alpha particle diagnostics for ITER, 18:25258 (RA;XA)
Working group report on electron-impact processes: Recommended database for electron impact excitation and ionization, 18:25253 (RA;XA)
Working group report on ion-impact excitation: Recommended database for ion-impact excitation of atomic hydrogen, 18:25254 (RA;XA)
Working group report on the required atomic database for neutral hydrogen beam penetration in large tokamaks, 18:25252 (RA;XA)

NEUTRAL-PARTICLE TRANSPORT
See also NEUTRON TRANSPORT
Activities in the A and M data at ENEA Bologna, Italy. November, 1987, 18:25245 (RA;XA)
Hybrid S_N/Monte Carlo research and results, 18:25164 (R;US)
Simulation of non-charged particles, 18:25155 (R;FR;In French)

NEUTRALIZATION (CHEMICAL)
See PH VALUE

NEUTRINOS
Double beta decay: Comparison of theory to experiment, 18:25073 (R;US)
Parton distributions updated, 18:25030 (R;GB)
Sterile neutrinos as dark matter, 18:24989 (R;US)
The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point, 18:25053 (R;US)

NEUTRON ABSORBERS
Chemical analysis of high purity graphite: Preparation of certified reference materials and development of analytical methods, 18:24034 (R;JP;In Japanese)

NEUTRON CAPTURE
See CAPTURE
NEUTRON REACTIONS

NEUTRON CAPTURE THERAPY
Neutron sources for a neutron capture therapy facility, 18:24860 (R;US)

NEUTRON CHOPPERS
A new chopper spectrometer for neutron Brillouin scattering and low-angle neutron inelastic scattering: PHAROS (Phase 1), 18:24448 (R;US)

NEUTRON DETECTORS
Computer operation of the sensitive neutron counter, 18:25154 (R;US)
Improving neutron dosimetry using bubble detector technology, 18:24899 (R;US)

NEUTRON DIFFUSION EQUATION
PDQ7: 1,2 or 3-d few-gp diffusion depletion, 18:25397 (CM;US)

NEUTRON DOSIMETRY
Improving neutron dosimetry using bubble detector technology, 18:24899 (R;US)

NEUTRON FLUENCE
Measured thermal and fast neutron fluence rates, ATR Cycle 99-B, January 24–March 14, 1993, 18:23583 (R;US)

NEUTRON GUIDES
Characteristics of the JRR-3M neutron guide tubes, 18:23596 (R;JP;In Japanese)

NEUTRON LEAKAGE
Calculational and experimental investigations of void effect. A new model for leakage treatment of heterogeneous assemblies, 18:23373 (R;FR)

NEUTRON MONITORS
Digital nuclear instrumentation application to nuclear power plant, 18:23526 (RA;CS)

NEUTRON REACTIONS
Activation cross sections for the generation of long-lived radionuclides of importance in fusion reactor technology: Texts of papers presented at the 1. meeting of a co-ordinated research programme held in Vienna, 11-12 November 1991, 18:25124 (R;XA)
Evaluation of isomeric excitation functions in neutron induced reactions, 18:25134 (RA;XA)
G. DeSaussure's early work, 18:25156 (R;US)
Measurement and analysis of $^{165}Ho(n,\gamma)^{166m}Ho$ reaction cross section, 18:25127 (RA;XA)
Nuclear structure studies via neutron interactions: Progress report, 1 July 1992–30 June 1993, 18:25097 (R;US)
On the influence of sample and target properties on the results of energy-dependent cross section measurements, 18:25111 (RA;XA)
Status of statistical model capture calculations, 18:25103 (R;NL)
Summary report of the IAEA advisory group meeting on nuclear data for neutron multiplication in fusion-reactor first-wall and blanket materials, 18:25308 (R;XA)
The influence of water absorption in a sample for neutron cross section measurements, 18:25112 (RA;XA)

NEUTRON REFLECTORS
Specific behavior of reflector and matrix graphite under high temperature irradiation, 18:23439 (RA;XA)

NEUTRON SOURCE FACILITIES
[Travel relating to the Advanced Neutron Source project]: Foreign trip report, July 12–24, 1992, 18:23179 (R;US)

NEUTRON SOURCES
Evaluation of high energy intense neutron source concepts for fusion materials testing, 18:25309 (IA;JP)
Neutron sources for a neutron capture therapy facility, 18:24860 (R;US)
Rietveld refinement of magnetic structures from pulsed-neutron-source powder-diffraction data, 18:25215 (R;US)
Safety analysis report: Packages SRL 4.5-ton Californium shipping cask (Packaging of fissile and other radioactive materials): Final report, Revision 1, 18:24150 (R;US)

NEUTRON SPECTRA
Logic based feature detection on incore neutron spectra, 18:25407 (R;HU)
Rietveld refinement of magnetic structures from pulsed-neutron-source powder-diffraction data, 18:25215 (R;US)

NEUTRON SPECTROMETERS
A new chopper spectrometer for neutron Brillouin scattering and low-angle neutron inelastic scattering: PHAROS (Phase 1), 18:24448 (R;US)

NEUTRON THERAPY
See also NEUTRON CAPTURE THERAPY
Nuclear data needed for neutron therapy: Summary report of the 1. research co-ordination meeting held in Vienna, 17-20 November 1987, 18:24861 (R;XA)
Nuclear data needed for neutron therapy: Summary report of the 2. research co-ordination meeting held in Vienna, 24-27 January 1989, 18:24862 (R;XA)
Present status of fast neutron therapy survey of the clinical data and of the clinical research programmes, 18:24863 (RA;XA)
The future of high-let radiation in cancer therapy. Justification of the heavy-ion therapy programmes, 18:24864 (RA;XA)

NEUTRON TRANSPORT
An anisotropic scattering treatment for the even parity transport equation, 18:23481 (R;FR)
G. DeSaussure's early work, 18:25156 (R;US)
Importance function by collision probabilities for Monte Carlo code Tripoli, 18:23482 (R;FR)
New improvements in the self-shielding formalism of the Apollo-2 code, 18:25387 (R;FR)
Properties of bilinear functionals in reactor systems and reactivity increment calculation, 18:23524 (R;RU;In Russian)
Tripoli 3: a Monte Carlo code with a powerful and automatic biasing, 18:23458 (R;FR)

NEUTRON TRANSPORT THEORY
See also MULTIGROUP THEORY
The searchlight problem for neutrons in a semi-infinite medium, 18:25161 (R;US)
Verification, validation, and benchmarking report for TRIMHX: A three dimensional hexagonal transient diffusion theory code, 18:23615 (R;US)

NEUTRON-DEFICIENT ISOTOPES
The structure of nuclei far from stability: Progress report, May 15, 1992–May 14, 1993, 18:25067 (R;US)

NEUTRONS
Angular momentum distributions for $^{16}O + ^{144}Nd$, 18:25096 (R;FR)
Dissociation reactions of the ^{11}Be one-neutron halo: the interplay between structure and reaction mechanism, 18:25141 (R;FR)
Inclusive excitation-energy distributions of hot nuclei from 44 MeV/nucleon Ar- and 32 MeV/nucleon Kr-induced reactions, 18:25104 (R;FR)
Measurable distributions of unpolarized neutron decay, 18:25078 (R;HU)
Resolution of dose and reduction factor questions in Army Pulse Radiation Facility experiments: Renormalization of calculated and measured data, 18:24900 (R;US)

NEVADA
Ghostly events: A review of the namesakes of LLNL nuclear tests of the past few years, 18:25338 (R;US)
Processed seismic motion records from Little Skull Mountain, Nevada earthquake of June 29, 1992, recorded at stations in southern Nevada, 18:24954 (R;US)
Quaternary tectonics and basin history of Pahrump and Stewart Valleys, Nevada and California, 18:23011 (R;US)

NEVADA TEST SITE
A gabled wooden lodge in an archaeological context: Archaeological investigations at sample unit U19adPL, Nevada Test Site, Nye County, Nevada, 18:23718 (R;US)
An on-site system for scanning NTS boreholes for artificial gamma-emitting nuclides, 18:24531 (RA;US)

Archaeological investigations at Sample Unit U19aq, Nevada Test Site, Nye County, Nevada, 18:24733 (R;US)
Archaeological investigations at drill hole U19bg, Nevada Test Site Nye County, Nevada, 18:24736 (R;US)
Distribution, life history, management, and current status of Astragalus beatleyae on the US Department of Energy's Nevada Test Site, 18:24743 (R;US)
Fiber-optic cable replacement for NTS applications, 18:24556 (R;US)
Formation elastic parameters from acoustic and density logs in emplacement holes, 18:24533 (RA;US)
Lithic technology studies: Archaeological research at drill hole U19ba, Nye County, Nevada, 18:24735 (R;US)
Mesozoic and Cenozoic structural geology of the CP Hills, Nevada Test Site, Nye County, Nevada; and regional implications (Yucca Mountain Project), 18:23012 (R;US)
Nevada Test Site defense waste acceptance criteria, certification, and transfer requirements laboratory reference document: Revision 1, 18:23007 (R;US)
Nevada Test Site defense waste acceptance criteria, certification, and transfer requirements: Revision 1, 18:23008 (R;US)
Performance assessment for low-level radioactive waste management and disposal at DOE facilities: Requirements, review process, and lessons learned, 18:23019 (R;US)
Prehistoric spatial patterning and subsistence studies: Archaeological investigations at Sample Unit U19arP4, Nevada Test Site, Nye County, Nevada, 18:24732 (R;US)
Temporary camps at drill hole U19aq on Pahute Mesa, Nye County, Nevada, 18:24737 (R;US)
The archaeology of drill hole U20bc, Nevada Test Site, Nye County, Nevada, 18:24734 (R;US)

NEW ENGLAND
See USA

NEW MEXICO
Atmospheric radionuclide concentrations measured by Pacific Northwest Laboratory since 1961, 18:24633 (R;US)
Feasibility study of heavy oil recovery in the Permian Basin (Texas and New Mexico), 18:22822 (R;US)
New Mexico Geochronology Research Laboratory: Zuni-Bandera volcanic field road log, 18:24957 (R;US)

NEWTON METHOD
Newton iterative methods for large scale nonlinear systems: Progress report, 1992–1993, 18:25393 (R;US)
On a convergence of iterative Newton's scheme, 18:25406 (R;RU;In Russian)

NICKEL
Modeling of reactive chemical transport of leachates from a utility fly-ash disposal site, 18:23350 (R;US)

NICKEL 58 TARGET
Consistent activation cross section calculations for all stable isotopes of V, Cr, Mn, Fe, Co, Ni, 18:25132 (RA;XA)
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)
Measurements and calculations of some activation cross sections for generation of long-lived radionuclides, 18:25129 (RA;XA)

NICKEL 60 TARGET
Consistent activation cross section calculations for all stable isotopes of V, Cr, Mn, Fe, Co, Ni, 18:25132 (RA;XA)

NICKEL 61 TARGET
Consistent activation cross section calculations for all stable isotopes of V, Cr, Mn, Fe, Co, Ni, 18:25132 (RA;XA)

NICKEL 62 TARGET
Consistent activation cross section calculations for all stable isotopes of V, Cr, Mn, Fe, Co, Ni, 18:25132 (RA;XA)

NICKEL ALLOYS
See also NICKEL BASE ALLOYS
Corrosion performance of iron aluminides, 18:23914 (R;US)
Gas atomized Er_3Ni powder for cryocooler applications, 18:24981 (R;US)
High temperature stability, interface bonding, and mechanical behavior in β-NiAl and Ni_3Al matrix composites with reinforcements modified by ion beam enhanced deposition: Progress summary report, June 1, 1993–May 31, 1994, 18:24011 (R;US)
Ion implantation effects on surface-mechanical properties of metals and polymers, 18:23180 (R;US)

NICKEL BASE ALLOYS
Machining aspects of nickel-phosphorus coatings, 18:23954 (R;US)
Production of reactive sintered nickel aluminide: Fifth quarterly technical progress report, February 22, 1993–May 22, 1993, 18:23926 (R;US)

NICKEL-CADMIUM BATTERIES
Testing technology: A Sandia technology bulletin, 18:23754 (R;US)

NIGER
The Agency's Technical Co-operation programme with Niger, 1982-1992. Country programme summaries, 18:25367 (R;XA)

RADIOACTIVE WASTE FACILITIES
Classification
Radiological hazard classification of DOE facilities by DOE STD-1027-92: LANL nuclear facility list, 18:23135 (R;US)
Demolition
Risk management study for the retired Hanford Site facilities: Volume 2, Risk evaluation work procedure for the retired Hanford Site facilities, 18:23605 (R;US)
Economics
Analysis of the formation, expression, and economic impacts of risk perceptions associated with nuclear facilities, 18:22909 (R;US)
Environmental Exposure Pathway
Establishment of a real-time electronic expert system to estimate and limit radiological consequences of nuclear facility accidents in the Federal Republic of Germany. Final report, 18:23544 (R;DE;In German)
Maintenance
Guideline to good practices for control and calibration of measuring and test equipment (M&TE) at DOE nuclear facilities, 18:23759 (R;US)
Guideline to good practices for control of maintenance activities at DOE nuclear facilities, 18:23758 (R;US)
Guideline to good practices for maintenance management involvement at DOE nuclear facilities, 18:23760 (R;US)
Guideline to good practices for maintenance organization and administration at DOE nuclear facilities, 18:23756 (R;US)
Guideline to good practices for planning, scheduling, and coordination of maintenance at DOE nuclear facilities, 18:23755 (R;US)

Guideline to good practices for types of maintenance activities at DOE nuclear facilities, 18:23757 (R;US)

Management
Guideline to good practices for maintenance management involvement at DOE nuclear facilities, 18:23760 (R;US)
Guideline to good practices for maintenance organization and administration at DOE nuclear facilities, 18:23756 (R;US)
Report on Subgroup on Data Banks for Risk Assessment, 18:23149 (R;US)

Personnel
31 March 1992 - Royal Order amending Section 133(1) of the General Regulation on safety at Work concerning protection of workers against the hazards of ionizing radiation, 18:23160 (I;XN;In French)

Public Opinion
Analysis of the formation, expression, and economic impacts of risk perceptions associated with nuclear facilities, 18:22909 (R;US)

Radiation Accidents
Report to Congress on abnormal occurrences, October–December 1992: Volume 15, No. 4, 18:23648 (R;US)

Radioactive Effluents
[Technical interchange with scientists from the two Russian weapons institutes, Arzamas-16 and Chelyabinsk-70 for environmental research]: Foreign trip report, October 2–11, 1992, 18:23086 (R;US)

Radioactive Waste Management
Best Available Technology (BAT) guidance for radiological liquid effluents at US Department of Energy Facilities, 18:23025 (R;US)

Radioactive Waste Processing
In situ redox manipulation: Enhancement of contaminant destruction and immobilization, 18:23145 (R;US)

Remedial Action
Characterization of site geochemistry in support of environmental restoration, 18:23100 (RA;US)
In situ redox manipulation: Enhancement of contaminant destruction and immobilization, 18:23145 (R;US)
[Technical interchange with scientists from the two Russian weapons institutes, Arzamas-16 and Chelyabinsk-70 for environmental research]: Foreign trip report, October 2–11, 1992, 18:23086 (R;US)

Risk Assessment
Report on Subgroup on Data Banks for Risk Assessment, 18:23149 (R;US)

Safety Analysis
An effective, non-threatening approach to evaluating safety program performance, 18:23146 (R;US)

Safety Standards
Towards world nuclear safety standards, 18:23639 (RA;CS)

Security
31 March 1992 - Royal Order amending Section 133(1) of the General Regulation on safety at Work concerning protection of workers against the hazards of ionizing radiation, 18:23160 (I;XN;In French)

Site Characterization
Ground-penetrating radar (GPR) for remotely controlled site characterization, 18:24708 (RA;US)
In situ fiberoptic monitors for site characterization, 18:24703 (RA;US)

NUCLEAR FRAGMENTATION
Study of induced reactions by a secondary beam of ^{11}Be in Be, Ti and Au targets, 18:25142 (R;FR;In French)

NUCLEAR FUEL ELEMENTS

Triangle Universities Nuclear Laboratory: Annual report, 1 January 1979–31 December 1979: TUNL XVIII, 18:25055 (R;US)

NUCLEAR POWER PLANTS

Computerized Control Systems
Formal methods in the development of safety critical software systems: Version 3.0, 18:23535 (R;US)

Containment Shells
Simplified dynamic buckling assessment of steel containments, 18:23646 (R;US)

Expert Systems
Survey and assessment of conventional software verification and validation methods, 18:23531 (R;US)

Fission Product Release
Health effects models for nuclear power plant accident consequence analysis: Modification of models resulting from addition of effects of exposure to alpha-emitting radionuclides: Revision 1, Part 2, Scientific bases for health effects models, Addendum 2, 18:23545 (R;US)

Inspection
Inspection, maintenance and component replacement: A systematic and safety related approach, 18:23498 (RA;CS)

Man-Machine Systems
Development of a framework of human-centered automation for the nuclear industry, 18:23523 (R;US)
Mechanical Structures
Continuing the service of aging concrete structures in nuclear power plants, 18:23491 (R;US)
Operation
Lessons learned from pilot errors using automated systems in advanced technology aircraft, 18:23635 (R;US)
Power Generation
Trends in advanced reactor development and the role of the IAEA, 18:23353 (R;US)
Pressure Vessels
Heavy-section steel technology program: Foreign trip report, July 4–October 1, 1992, 18:23505 (R;US)
Process Control
A new advanced software platform for nuclear power plant process information systems, 18:23425 (RA;CS)
Radiation Protection
Safety principles for nuclear power plants, 18:23355 (RA;CS)
Reactor Accidents
MELCOR Verification, Benchmarking, and Applications experience at BNL, 18:23627 (R;US)
Report to Congress on abnormal occurrences, October–December 1992: Volume 15, No. 4, 18:23648 (R;US)
Reactor Channels
Nuclear reactor flow control method and apparatus, 18:23667 (PA;US)
Reactor Components
Effects of nonstandard heat treatment temperatures on tensile and Charpy impact properties of carbon-steel casting repair welds, 18:23504 (R;US)
Procedure for analysis of common-cause failures in probabilistic safety analysis, 18:23660 (R;US)
Reactor Control Systems
Backpropagation architecture optimization and an application in nuclear power plant diagnostics, 18:23518 (R;US)
Development of a framework of human-centered automation for the nuclear industry, 18:23523 (R;US)
Travel to Japan to present lecture on ORNL/CESAR intelligent machines research and development at the International Specialists meeting on artificial intelligence and robotics for nuclear power plants (AIR'92): Foreign trip report, May 17–27, 1992, 18:23532 (R;US)
Reactor Cooling Systems
Nuclear reactor flow control method and apparatus, 18:23667 (PA;US)
Reactor Instrumentation
Backpropagation architecture optimization and an application in nuclear power plant diagnostics, 18:23518 (R;US)
Reactor Licensing
NRC regulatory agenda: Quarterly report, January–March 1993: Volume 12, No. 1, 18:23478 (R;US)
Reactor Monitoring Systems
[Nuclear reactor surveillance and diagnostics in France]: Foreign trip report, September 19–23, 1992, 18:23533 (R;US)
Reactor Operation
Licensed operating reactors: Status summary report data as of December 31, 1992: Volume 17, 18:23361 (R;US)
Reactor Protection Systems
A compilation of reports of the Advisory Committee on Reactor Safeguards: 1992 Annual: Volume 14, 18:23650 (R;US)
Reactor Safety
A compilation of reports of the Advisory Committee on Reactor Safeguards: 1992 Annual: Volume 14, 18:23650 (R;US)
Fire safety lessons learned from the design and operation of commercial nuclear reactor facilities, 18:23669 (R;US)
Safety, a key factor for the future of nuclear energy, 18:23354 (RA;CS)
Risk Assessment
Decision making concept of risk control: integration of decision criteria, top level risk indices and plant performance indices, 18:23360 (RA;CS)
Development and use of a train-level probabilistic risk assessment, 18:23662 (R;US)
On fire risk/methodology for the next generation of reactors and nuclear facilities, 18:23676 (R;US)
Seismic Effects
Determining the controlling earthquake from probabilistic hazards for the proposed Appendix B, 18:23677 (R;US)
On seismic hazards/risk and power plant design, 18:23675 (R;US)
Review of structure damping values for elastic seismic analysis of nuclear power plants, 18:23663 (R;US)
Technology Assessment
Trends in advanced reactor development and the role of the IAEA, 18:23353 (R;US)
Training
Manpower development for nuclear power programme. China. Project findings and recommendations: Terminal report. Report prepared for the Government of China, 18:25377 (R;XA)

OIL WELLS
Brines
Development of a cost effective environment compliance technology for stripper brine wells: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22840 (R;US)
Development of a cost-effective environmental compliance technology for stripper well brines: Quarterly report, October 1, 1992–December 31, 1992, 18:22839 (R;US)
Carbon Dioxide Injection
Field verification of CO_2-foam: [Quarterly] report, January 1–March 31, 1993, 18:22805 (R;US)
Caustic Flooding
Detailed evaluation of the West Kiehl alkaline-surfactant-polymer field project and it's application to mature Minnelusa waterfloods: Technical progress report, January–March 1993, 18:22794 (R;US)
Investigation of oil recovery improvement by coupling and interfacial tension agent and a mobility control agent in light oil reservoirs: Technical progress report, January–March 1993, 18:22799 (R;US)
Directional Drilling
[Branched horizontal well drilling], 18:22820 (R;US)
Drainage
Characterization of the gravity drainage phenomena through numerical and physical simulation, 18:22791 (R;US)
Environmental Impacts
Environmental and economic assessment of discharges from Gulf of Mexico region oil and gas operations: Quarterly technical progress report, 1 January–31 March 1993, 18:22842 (R;US)
Fluid Injection
Improving reservoir conformance using gelled polymer systems: Second quarterly report, December 25, 1992–March 24, 1993, 18:22796 (R;US)
Information Systems
Continued support of "The Natural Resources Information System (NRIS) for the State of Oklahoma": Quarterly technical progress report, January 1, 1993–March 31, 1993, 18:22831 (R;US)
Liquid Wastes
Characterization of oil and gas waste disposal practices and assessment of treatment costs engineering: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22838 (R;US)
Microbial Eor
Microbial field pilot study: Final report, 18:22790 (R;US)
Miscible-Phase Displacement
Scale-up of miscible flood processes, 18:22793 (R;US)
Study of hydrocarbon miscible solvent slug injection process for improved recovery of heavy oil from Schrader Bluff Pool, Milne Point Unit, Alaska: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22795 (R;US)
Production
Measuring and predicting reservoir heterogeneity in complex deposystems: Quarterly technical report, January–March 1993, 18:22792 (R;US)
Reservoir Engineering
Detailed evaluation of the West Kiehl alkaline-surfactant-polymer field project and it's application to mature Minnelusa waterfloods: Technical progress report, January–March 1993, 18:22794 (R;US)
Rod Pumps
Analysis of sucker rod and sinkerbar failures, 18:22825 (R;US)
Solid Wastes
Characterization of oil and gas waste disposal practices and assessment of treatment costs engineering: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22838 (R;US)
Steam Injection
System to inject steam and product oil from the same wellbore through downhole valve switching: Third quarterly report, 18:22804 (R;US)
Waste Water
Characterization of oil and gas waste disposal practices and assessment of treatment costs engineering: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22838 (R;US)
Evaluation of the freeze-thaw/evaporation process for the treatment of produced waters: Quarterly technical progress report, January 1–March 31, 1993, 18:22841 (R;US)
Waterflooding
Green River Formation Water Flood Demonstration Project, Uinta Basin, Utah: Quarterly technical progress report, January 1–March 31, 1993, 18:22802 (R;US)
Integrated approach towards the application of horizontal wells to improve waterflooding performance: [Quarterly] report, January 1–March 31, 1993, 18:22800 (R;US)
Responsive copolymers for enhanced petroleum recovery: Quarterly technical progress report, December 22, 1992–March 21, 1993, 18:22797 (R;US)
Secondary oil recovery from selected Carter sandstone oilfields, Black Warrior Basin, Alabama, 18:22801 (R;US)
OILS

PARAMETRIC ANALYSIS
Study on optimization of the system parameter of the ground thermal storage in the greenhouse, 18:23293 (IA;JP;In Japanese)
PARASYMPATHOMIMETICS
New techniques for positron emission tomography in the study of human neurological disorders: Progress report, June 1990–June 1993, 18:24857 (R;US)
PARITY NONCONSERVATION
See P INVARIANCE
PARTICLE BEAMS
Effect of beam holes on collective transition radiation, 18:24320 (IA;RU;In Russian)
System for measuring accelerated particle bunch charge, 18:24319 (IA;RU;In Russian)
PARTICLE BOOSTERS
Broadband higher-order mode (HOM) damper for SSC LEB ferrite-tuned cavity, 18:24416 (R;US)
Design and preliminary testing of the LEB extraction kicker magnet at the SSC, 18:24400 (R;US)
Emittance growth in MEB and its control, 18:24335 (R;US)
Low energy booster radio frequency cavity structural analysis, 18:24399 (R;US)
Modification of the short straight sections of the high energy booster of the SSC, 18:24415 (R;US)
Non linear effects in ferrite tuned cavities, 18:24334 (R;US)
Structural and thermal analysis of a solid-cooled, low energy booster, radio-frequency-cavity tuner at the Superconducting Super Collider, 18:24397 (R;US)
[Travel to Italy, Switzerland, and Germany for meetings on electrostatic accelerator and associated boosters]: Foreign trip report, May 30, 1992–June 11, 1992, 18:24304 (R;US)
PARTICLE PRODUCTION
Eta production at the LAMPF P^3 channel, 18:25043 (R;US)
Strangeness production with protons and pions, 18:25031 (R;US)
[Travel to attend the NATO Advanced Study Institute held at Il Ciocco, Italy]: Foreign trip report, July 10–26, 1992, 18:25047 (R;US)
PARTICLE SIZE
Flue gas conditioning for improved particle collection in electrostatic precipitators: First topical report, Results of laboratory screening of additives, 18:23336 (R;US)
Study of slurryability, 18:22749 (IA;JP;In Japanese)
PARTICLE TRACKS
Formation of particle tracks in solids and their technological application, 18:23177 (IA;JP)
PARTICULATES
Catalytic fabric filtration for simultaneous NO_x and particulate control: Quarterly technical progress report, October 1–December 31, 1992, 18:23335 (R;US)
Catalytic filter bags for NO_x and particulate removal: Final report, 18:23343 (R;US)
Collaborative research on fluidization employing computer-aided particle tracking: Final report, 18:22759 (R;US)
Combustion of dense streams of coal particles: Quarterly progress report No. 10, November 29, 1992–February 28, 1993, 18:22763 (R;US)

Effect of particulate additives on heat transfer from a shock-induced turbulent boundary layer, 18:24210 (RA;US)
Inhalation Toxicology Research Institute annual report, October 1, 1991–September 30, 1992, 18:24896 (R;US)
Non-intrusive measurement of particle charge: Electrostatic dry coal cleaning: Technical progress report No. 6, October 1, 1992–December 31, 1992, 18:22651 (R;US)
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring: Technical progress report, September 25, 1992–December 31, 1992, 18:24581 (R;US)
Particulate Flow Research Laboratory quarterly progress report, October 1, 1992–December 31, 1992, 18:24479 (R;US)
SO_x-NO_x-Rox Box systems integrations study, 18:23346 (R;US)
The colloidal borescope an instrument for in situ assessment of local subsurface flow parameters, 18:24712 (RA;US)

Meson production from the E-802 and E-866 experiments at the AGS, 18:25090 (R;US)
PIONS MINUS
Clusterization of secondary particles in cumulative hadron and nucleus-nucleus interactions, 18:25143 (IA;RU;In Russian)
PIPE JOINTS
Production technology under high-temperature and corrosive environment.: Corrosion-resistant materials and sealing technology, 18:23937 (IA;JP;In Japanese)
PIPES
A two-dimensional turbulence-ablation model to simulate the helix in PINEX LOS pipes, 18:24537 (RA;US)
Acceptance criteria for corroded carbon steel piping containing weld defects, 18:23960 (R;US)
Advanced repair methods for enhanced reactor safety, 18:23496 (RA;CS)
Benchmark analysis for the design of piping systems in advanced reactors, 18:23363 (R;US)
Erosion-corrosion prediction and inspection program for Krsko NPP, 18:24260 (RA;CS)
Evaluation of stresses in large diameter, thin walled piping at support locations, 18:23509 (R;US)
Evaluation of using cyclocranes to support drilling and production of oil and gas in wetland areas: Third quarterly technical progress report, First quarter, 1993, 18:22846 (R;US)
Pipe break testing of primary loop piping similar to Department of Energy's New Production Reactor-Heavy Water Reactor, 18:23549 (R;US)
Preliminary evaluation of snubber single failures, 18:23664 (R;US)
Safety of existing installations under dynamic loads: observations on nonlinear response of piping systems - experiments, numerical analyses, 18:23500 (RA;CS)
The model experiments on the stationary outflow in the retaining system, 18:23411 (RA;CS)
Thermal response of low heat loss thermal insulation pipe for cyclic temperature fluctuation, 18:23290 (IA;JP;In Japanese)
Treatment of mixed F006 contaminated material to meet the new EPA debris rule at the Savannah River Site, 18:23074 (R;US)
Wall thinning criteria for low temperature-low pressure piping: Task 91-030-1, 18:23617 (R;US)
PITCHES
Production technical development for mesocarbon microbeads, 18:23991 (IA;JP;In Japanese)
PITTSBURGH ENERGY TECHNOLOGY CENTER
Encouraging partnerships: Cooperative research and development agreements between government and industry, 18:22769 (RA;US)
Overview of the Pittsburgh Energy Technology Center, 18:22728 (RA;US)
PIXE ANALYSIS
Ion beam techniques for analyzing polymers irradiated by ions, 18:24032 (IA;JP)
PLANT CELLS
Physiological and biochemical effects of acid deposition on forest vegetation, 18:24921 (RA;CA)
PLANT GROWTH
Environmental restoration using plant-microbe bioaugmentation, 18:24783 (R;US)
PLANTS
See also ALGAE
PHYTOPLANKTON
TREES
Distribution, life history, management, and current status of Astragalus beatleyae on the US Department of Energy's Nevada Test Site, 18:24743 (R;US)
Identification of environmentally derived cesium-137 burdens in a worker population, 18:24903 (R;US)
Photosynthesis of woody plants: The impact of acidic pollutants, oxidants, and heavy metals, 18:24919 (RA;CA)
Radiological survey results for the Peek Street site properties, Schenectady, New York, 18:23091 (R;US)
Sensitivity of forest plant reproduction to acid rain, 18:24920 (RA;CA)
Wetland vegetation establishment in L-Lake, 18:24834 (R;US)
[Travel to attend the biennial meeting of the Federation of European Societies of Plant Physiology, Antwerpen, Belgium]: Foreign trip report, August 21, 1992–September 12, 1992, 18:24867 (R;US)
PLANTS (INDUSTRIAL)
See INDUSTRIAL PLANTS
PLANTS (POWER)
See POWER PLANTS
PLASMA
See also COLLISIONLESS PLASMA
HOT PLASMA

LASER-PRODUCED PLASMA
RELATIVISTIC PLASMA
Highly charged ions in hot, dense plasmas, 18:25170 (R;US)
Measuring opacity of shock generated argon plasmas, 18:25286 (R;US)
Monte Carlo simulation of the OCP freezing transition, 18:25205 (R;US)
Plasma flow in non-circular and asymmetric pipes, 18:24538 (RA;US)
Radiative properties of strongly magnetized plasmas: Progress report, September 1991–December 1992, 18:25232 (R;US)
Stagnation dynamics and heating mechanisms for wire array z-pinch implosions, 18:25231 (R;US)
Whistler wave driven plasma thruster, 18:23854 (R;US)
[Travel to the Heavy Ion Research Center and the Nuclear Research Center, Germany and the conference on physics of high energy density in matter, Austria]: Foreign trip report, January 24, 1993–February 7, 1993, 18:24346 (R;US)

PLASMA (QUARK)
See QUARK MATTER

PLASMA DIAGNOSTICS
IAEA consultants' meeting on He-beam data base for alpha particle diagnostics of fusion plasmas: Summary report, 18:25257 (R;XA)
Measurements and analysis of the equivalent circuit of the GEC RF Reference Cell, 18:24282 (R;US)

PLASMA DRIFT
On absorption of low frequency electromagnetic fields, 18:25275 (R;CH)

PLASMA IMPURITIES
Activities in the A and M data at ENEA Bologna, Italy. November, 1987, 18:25245 (RA;XA)
IAEA advisory group meeting on atomic and molecular data for fusion plasma impurities: Summary report, 18:25262 (R;XA)
IAEA advisory group meeting on atomic and molecular data for metallic impurities in fusion plasmas: Summary report, 18:25256 (R;XA)
Report of the working group on the spectroscopic and electron-impact collision data base for C^{q+} and O^{q+} ions, 18:25248 (RA;XA)

PLASMA MICROINSTABILITIES
3D gyrokinetic particle-in-cell simulation of fusion plasma microturbulence on parallel computers, 18:25285 (R;US)

PLASMA SCRAPE-OFF LAYER
Physics and modelling of scrape-off layer transport, 18:25331 (R;US)

PLASMA SWITCHES
Surface-emitting laser-based optical switching: An update, 18:24284 (R;US)

PLASTIC PROPERTIES
See PLASTICITY

PLASTIC SCINTILLATION COUNTERS
See PLASTIC SCINTILLATION DETECTORS

PLASTIC SCINTILLATION DETECTORS
A scintillating fiber detector for the D0 upgrade, 18:24437 (R;US)

PLASTICITY
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain, 18:25204 (R;US)

PLASTICS
See also POLYSTYRENE
REINFORCED PLASTICS
Characterization of metal-loaded plastics: [Final report], 18:24519 (R;US)

PLATES
Effects of inclination angles to perpendicular direction on PMMA flat plate imposed on burning behavior, 18:24128 (IA;JP;In Japanese)
Experimental technique to launch flier-plates representing orbital debris to hypervelocities, 18:24261 (R;US)
Vortex formation in the wake of a flat plate for subsonic and supersonic freestream mach numbers, 18:24198 (RA;US)

PLATES (FUEL)
See FUEL PLATES

PLATING
See also ELECTROPLATING
Sensor Based Process Control (SBPC) Laboratories Directed Research and Development (LDRD): Final report, 18:23840 (R;US)

PLATINUM METALS
See also PALLADIUM
RHODIUM
Selective reduction of NO on noble metal supported catalysts, 18:23881 (IA;JP;In Japanese)
[Travel to Mol, Belgium and Karlsruhe, Germany to discuss decommissioning technology and noble metals testing]: Foreign trip report, June 29–July 17, 1992, 18:22944 (R;US)

PLESIOTHERAPY
See RADIOTHERAPY

PLUGS
See CLOSURES

PLUMES
Fire plume characteristics in an area where a vertical down-flow exists, 18:23799 (IA;JP;In Japanese)
Measurements of turbulent, anisotropic density fluctuations in a rocket exhaust plume by a cross beam three-axis correlation technique, 18:24217 (RA;US)

PLUNGER PUMPS
See ROD PUMPS

PLUTONIUM
Computer operation of the sensitive neutron counter, 18:25154 (R;US)
Conceptual structure of performance assessments conducted for the Waste Isolation Pilot Plant, 18:23039 (R;US)
Decontamination of alpha-bearing solid wastes and plutonium recovery, 18:22976 (R;XE;In French)
Determination of the shape of a plutonium deposit from a leaking crucible, 18:23456 (R;US)
Implementation impacts of PRL methodology, 18:22917 (R;US)
Japanese chemical separations (partitioning) and transmutation activities: Foreign trip report, July 17–25, 1992, 18:22880 (R;US)
Oxygen sparging of residue salts, 18:22994 (R;US)
Plutonium recovery from spent reactor fuel by uranium displacement, 18:22888 (PA;US)
Reactor Operation Branch monthly reports, January–December 1955, 18:23586 (R;US)
Review of accident analysis calculations, 232-Z seismic scenario: Letter report, 18:23140 (R;US)
Study of plutonium volatility under microwave melting conditions used for glass encapsulation of plutonium sludge wastes: Final report, 18:23049 (R;US)
[Technology transfer concerning plutonium handling]: Trip report, July 19–24, 1992 and August 9–14, 1992, 18:24120 (R;US)
[Travel to the United Kingdom for information exchange on plutonium waste, manufacturing processes, Complex 21 and Rocky Flats programs]: Foreign trip report, March 23–25, 1992, 18:22943 (R;US)

PLUTONIUM 239
Integration of measurements with atmospheric dispersion models: Source term estimation for dispersal of ^{239}Pu due to nonnuclear detonation of high explosive, 18:24655 (R;US)
[Travel to Japan regarding interaction between internally deposited radioactive materials and acute gamma ray exposures in the production of chromosome aberrations]: Foreign trip report, July 11–19, 1992, 18:24880 (R;US)

PLUTONIUM OXIDES
Instrumentation and procedures for moisture corrections to passive neutron coincidence counting assays of bulk PuO_2 and MOX powders, 18:23893 (R;US)

PMMA
Effects of inclination angles to perpendicular direction on PMMA flat plate imposed on burning behavior, 18:24128 (IA;JP;In Japanese)

PNA
See POLYCYCLIC AROMATIC HYDROCARBONS

PNL
See BATTELLE PACIFIC NORTHWEST LABORATORIES

POISEUILLE FLOW
See LAMINAR FLOW
POISONS (CHEMICAL)
See HAZARDOUS MATERIALS
POLAR REGIONS
See also ARCTIC REGIONS
Development of gas fields in arctic region, 18:22851 (IA;JP;In Japanese)
POLARIMETERS
Polarization diagnostics and optical pumping development for OPPIS and LAMPF, 18:24376 (R;US)
POLARIZED BEAMS
Polarized source performance in 1992 for SLC–SLD, 18:24380 (R;US)
POLISHING
Zerodur polishing process for high surface quality and high efficiency, 18:24054 (R;US)
POLLUTANTS
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer, 18:24654 (R;US)
Degradation of environmental pollutants by solar energy. Part 3.: Visible light enhancement of the degradation of organophosphorous compounds by hydrogen peroxide in presence of iron salt, 18:24115 (IA;JP;In Japanese)
Environmental transport and human exposure: A multimedia approach in health-risk policy, 18:24798 (R;US)
Spatial and temporal variability of precipitation and chemistry: Case studies from the Frontal Boundary Study, 18:24638 (R;US)
The impact of recent visibility litigation on siting/modifying power plants: Survey and analysis, 18:23352 (R;US)
[The North Atlantic Regional Experiment (NARE)]: Foreign trip report, January 25, 1993–January 30, 1993, 18:24569 (R;US)
POLLUTION REGULATIONS
CO2 emission reduction by global permit trade, 18:23730 (IA;JP;In Japanese)
POLY(ISOBUTYLENE OXIDE)
See ORGANIC POLYMERS
POLY(VINYLIDENE FLUORIDE)
See FLUORINATED ALIPHATIC HYDROCARBONS
POLYACRYLONITRILE
See ORGANIC POLYMERS
POLYCHLORINATED BIPHENYLS
Biological Monitoring and Abatement Program for the Oak Ridge K-25 Site, 18:23092 (R;US)
POLYCYCLIC AROMATIC HYDROCARBONS
Air pollution by polycyclic aromatic hydrocarbons (PAH) in the city of Hamburg, 18:24591 (I;DE;In German)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, January 1, 1992–March 31, 1992, 18:22765 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, October 1, 1992–December 31, 1992, 18:23339 (R;US)
Sorption and chemical transformation of PAHs on coal fly ash: Technical progress report No. 6, 18:24103 (R;US)
POLYETHYLENES
Ion implantation effects on surface-mechanical properties of metals and polymers, 18:23180 (R;US)
Lead macro-encapsulation conceptual and experimental studies: Final report, 18:23079 (R;US)
Polyethylene encapsulation of single-shell tank low-level wastes: Annual progress report, 18:22922 (R;US)
POLYMERS
See also ORGANIC POLYMERS
Charactristics of wave shifting device.: Effect of the diffused reflection face, 18:23247 (IA;JP;In Japanese)
Measurement of glass transitions and other properties of polymers by positron spectroscopy, 18:23995 (RA;US)
Performance aspects of de Laval spray-forming nozzles, 18:23933 (R;US)
Potential applications of PAS techniques to industrial research in polymeric materials, 18:23909 (RA;US)
Sensing glass transitions in thin polymer films on acoustic wave microsensors, 18:24043 (R;US)
Theoretical treatment of the bulk and surface properties of fluids containing long, flexible molecules, 18:25200 (R;US)
Use of de Laval nozzles in spray forming, 18:23934 (R;US)
[Polymer applications], 18:23996 (RA;US)
POLYMETHYLMETHACRYLATES
See PMMA
POLYNUCLEAR AROMATIC HYDROCARBONS
See POLYCYCLIC AROMATIC HYDROCARBONS
POLYPROPYLENE
Ion implantation effects on surface-mechanical properties of metals and polymers, 18:23180 (R;US)
POLYSACCHARIDES
See also CELLULOSE
CarbBank: A structural and bibliographic database for complex carbohydrates: Progress report, September 15, 1991–September 14, 1992, 18:24843 (R;US)
The center for plant and microbial complex carbohydrates at the University of Georgia Complex Carbohydrate Research Center: Five-year report, September 15, 1987–December 31, 1992, 18:24841 (R;US)
POLYSTYRENE

POROUS MATERIALS
Engineering considerations for the recovery of cesium from geologic materials, 18:24731 (R;US)
Fabrication of HTGR core components by the method of volume gas-phase impregnation of porous media with pyrocarbon - main characteristics of the materials and products, 18:24020 (RA;XA)
Heat transfer in unsaturated, porous media, 18:24247 (R;US)
Imaging techniques applied to the study of fluids in porous media: Scaling up in Class 1 reservoir type rock, 18:22823 (R;US)
Pore scale flow and examination of the effects of scaling on improved oil recovery processes: Final report, 18:22821 (R;US)
Scale-up of miscible flood processes, 18:22793 (R;US)
PORTLAND CEMENT
Investigations of deteriorated concrete from the liner of the Waste Isolation Pilot Plant Waste Shaft, 18:23035 (R;US)
PORTSMOUTH GASEOUS DIFFUSION PLANT
Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations: Generator training manual, 18:22974 (R;US)
Environmental Restoration Program pollution prevention performance measures for FY 1993 and 1994 remedial investigations: Management training manual, 18:25344 (R;US)
Quadrant III RFI draft report: Volume 1, 18:23032 (R;US)
PORTUGAL
Health Ministry - Regulatory Decree No 3/92 of 6 March, 18:23168 (I;XN;In Portuguese)
Wind measurement and modelling in mountainous regions of Portugal: Preliminary results, 18:23323 (RA;DK)
POSITIONING
Machine tool error analysis: Final report, 18:24160 (R;US)

POSITRON BEAMS
High flux positron beams for positron reemission microscopy and positron annihilation microprobe defect studies, 18:23918 (RA;US)
Positron annihilation in materials science with a pulsed positron beam of variable energy, 18:23903 (RA;US)
Positron microscopy in materials sciences, 18:23902 (RA;US)
Present status of design study for the positron factory, 18:23905 (RA;US)
The application of positron spectroscopy to materials sciences the perspective from the Idaho National Engineering Laboratory, 18:23900 (RA;US)

POSITRON COMPUTED TOMOGRAPHY
New techniques for positron emission tomography in the study of human neurological disorders: Progress report, June 1990–June 1993, 18:24857 (R;US)
Scintillation materials for medical applications: Annual progress report, January 1, 1991–December 31, 1992, 18:24858 (R;US)

POSITRON-MOLECULE COLLISIONS
Formation of positronium compounds in slow positron beams, 18:25199 (RA;US)
Fundamental parameters and interactions of positrons with molecules, 18:25182 (RA;US)

POSITRONIUM COMPOUNDS
Formation of positronium compounds in slow positron beams, 18:25199 (RA;US)

POSITRONS
Angular Correlation
2D-ACAR and monoenergetic positron beams, 18:23994 (RA;US)
Challenges for positron analysis in materials science, 18:25226 (RA;US)
Theoretical aspects of positron annihilation in condensed matter, 18:23907 (RA;US)
Two dimensional ACAR measurements in high-T_c materials; recent results and future perspectives, 18:25227 (RA;US)

Annihilation

Fuel Elements
Analysis of fission gas behavior and foaming of molten uranium-aluminum alloy fuel for nuclear reactors: New Production Reactors Program, 18:23547 (R;US)
New fuel element development report of meeting held March 18, 1952, 18:23570 (R;US)
Reactor fuel elements, 18:23567 (R;US)
[Progress on chromium barrier layers for extended surface fuel elements]: Trip report, November 18, 1953, 18:23559 (R;US)
[Travel to Monsanto to discuss the problem of decontaminating the cave in the disassembly area in the event of 5Y3 slug rupture]: Trip report, November 21, 1951, 18:23564 (R;US)
[Travel to New York to attend a meeting which was held at the New York Operations Office for the discussion of thorium]: Trip report, November 6, 1951, 18:23566 (R;US)

Fuel Plates
Weekly report, September 7–11, 1953, Sylvania Electric Products Company (25730-700), 18:23558 (R;US)

Heat Exchangers
[Heat exchangers for Savannah River Reactors], 18:23562 (R;US)

Loss Of Coolant
Flow instability testing of annular geometry fuel elements for LOCA and slow ramp transient with upflow of coolant, 18:23684 (R;US)

Measurement of local void fraction in a ribbed annulus, 18:23682 (R;US)
RELAP5/MOD3 code assessment with flow instability testing of an annular geometry fuel assembly, 18:23678 (R;US)

Meltdown
Heavy Water New Production Reactor design review guidelines: Volume 1, Main report: Final report, 18:23671 (R;US)
Heavy Water New Production Reactor design review guidelines: Volume 2, Appendices: Final report, 18:23672 (R;US)
Molten fuel fragmentation experiments: Stage 1: New Production Reactors Program, 18:23619 (R;US)
Numerical predictions of natural convection in a uniformly heated pool, 18:23621 (R;US)

Pipes
[Travel to France and New Orleans to discuss the analysis and testing work at the New Production Reactor-Heavy Water Reactor]: Foreign trip report, June 10–25, 1992, 18:23600 (R;US)

Pressure Vessels
[Travel to France and New Orleans to discuss the analysis and testing work at the New Production Reactor-Heavy Water Reactor]: Foreign trip report, June 10–25, 1992, 18:23600 (R;US)

Primary Coolant Circuits
Nuclear reactor coolant spill as result of multichannel flow, 18:23681 (R;US)
Pipe break testing of primary loop piping similar to Department of Energy's New Production Reactor-Heavy Water Reactor, 18:23549 (R;US)

Reactor Channels
Flow instability and flow reversal in heated annular multichannels with initial downward flow, 18:23609 (R;US)

Reactor Components
NYX construction progress, 18:23569 (R;US)

Reactor Control Systems
Automatic control, 105 reactors, 18:23521 (R;US)
Background flux in Pu producer, 18:23571 (R;US)

Reactor Cooling Systems
Decontamination of Savannah piles, 18:23541 (R;US)
Suggested program for decontamination studies, 18:23540 (R;US)
Two-phase interfacial area and flow regime modeling in FLOWTRAN-TF code, 18:23610 (R;US)

Reactor Internals
Transient analysis of dissolution of a reactor bottom head into a melt pool, 18:23620 (R;US)

Reactor Safety
Fire safety lessons learned from the design and operation of commercial nuclear reactor facilities, 18:23669 (R;US)
Screening criteria for design basis events, 18:23607 (R;US)

Secondary Coolant Circuits
Reactor cooling water expansion joint bellows: The role of the seam weld in fatigue crack development, 18:23611 (R;US)

Seismic Effects
Analyses and evaluation of the cooling water reservoir and process effluent sump structures, Savannah River Site: Volume 1, 18:23685 (R;US)
Analyses and evaluation of the cooling water reservoir and process effluent sump structures, Savannah River Site: Volume 2, 18:23686 (R;US)
Earthquake ground motion evaluations for the proposed new production reactor at the Idaho National Engineering Laboratory: Volume 2, Probabilistic evaluation, 18:23633 (R;US)

Seismic Isolation
Shake table tests of long period isolation system for nuclear facilities at soft-soil sites: Volume 1: New Production Reactors Program, 18:23618 (R;US)

Steam Generators
[Travel to the Lummus Company, New York City for review of Heat Exchanger Tube Sheet Design, Savannah River Plant, 400D Area]: Trip report, October 23, 1951, 18:23560 (R;US)

PRODUCTIVITY
Influence of coke oven width on coking time, 18:22688 (IA;JP;In Japanese)
Microbial EOR technology, 18:22807 (IA;JP;In Japanese)

PRODUCTIVITY FACTOR
See FORMATION DAMAGE

PROGRAM MANAGEMENT
General Employee Radiological Training and Radiological Worker Training: Program management manual, 18:23109 (R;US)
Radiological control technician: Training program management manual, 18:23117 (R;US)

PROTECTION (CORROSION)
See CORROSION PROTECTION

PROTECTION (RADIATION)
See RADIATION PROTECTION

PROTECTIVE CLOTHING
Safety harness, 18:23136 (PA;US)

PROTEIN SEQUENCING
See AMINO ACID SEQUENCE

PROTON BEAMS
Efficiency of high energy proton beam deflection with optimal bent single crystal. Temperature dependence of efficiency, 18:25221 (R;RU)

On construction of numerical methods in problems of beam control, 18:24315 (IA;RU;In Russian)
Parity nonconservation in proton scattering at higher energies, 18:25020 (R;US)

PROTON BLOCKING
See PROTON CHANNELING

PROTON CHANNELING
Efficiency of high energy proton beam deflection with optimal bent single crystal. Temperature dependence of efficiency, 18:25221 (R;RU)

PROTON REACTIONS
Clusterization of secondary particles in cumulative hadron and nucleus-nucleus interactions, 18:25143 (IA;RU;In Russian)
Intermediate energy nuclear data at the Radium Institute, 18:25123 (RA;XA)
Measurement and analysis of double-differential neutron emission spectra in (P,N) and (α,N) reactions: Summary report, 18:25108 (R;XA)
On the fast neutron spectra shape in the nuclear constant measurement experiments with an electrostatic accelerator, 18:25113 (RA;XA)
Quasifree ($\vec{p}$, $\vec{n}$) reactions and enhancement of pionic processes, 18:25152 (R;US)
Status report of RIKEN Nuclear Data Group, 18:25462 (RA;XA)
The influence of target impurities on the accuracy of reaction cross section measurements, 18:25110 (RA;XA)
Transfer results for odd-odd ^{196}Au and the extended supersymmetry, 18:25075 (R;FR)

PROTON-ANTIPROTON INTERACTIONS
Contribution at the study of nucleon-antinucleon interaction at low energy and at the proton-antiproton transition in two pions or kaons, 18:25039 (R;FR;In French)
Inclusive jet cross sections at the Dv detector, 18:25036 (R;US)
Pontecorvo reactions as a general class of antiproton annihilation on nuclei, 18:25149 (R;RU)

PROTON-INDUCED X-RAY EMISSION ANALYSIS
See PIXE ANALYSIS

PROTON-PROTON INTERACTIONS
Novel spin effects in quantum chromodynamics, 18:25049 (R;US)
Production of D-mesons in pp-collisions and quark-gluon string model, 18:25040 (R;RU)

PROTONS
See also DIPROTONS
SOLAR PROTONS
Characteristics of the pion production and nucleon emission processes in pion-carbon nuclear collisions at 40 GeV/.c, 18:25148 (R;RU)
Characteristics of the pion production and proton emission processes in proton-carbon nuclear collisions at 4.2 GeV/c momentum, 18:25147 (R;RU)
Clusterization of secondary particles in cumulative hadron and nucleus-nucleus interactions, 18:25143 (IA;RU;In Russian)
Novel spin effects in quantum chromodynamics, 18:25049 (R;US)

PROTOPLASTS
See PLANT CELLS

PSEUDOMONAS
Small scale laboratory studies of flow and transport phenonmena in pores and fractures, Phase II: Second yearly progress report, 18:24730 (R;US)

PUBLIC HEALTH
Pilot study risk assessment for selected problems at the Fernald Environmental Management Project (FEMP), 18:23726 (R;US)

PUBLIC LANDS
An investigation of sulfur concentrations in soils and pine needles in Bandelier National Monument, New Mexico, 18:24754 (R;US)
An investigation of sulfur concentrations in soils and pine needles in Canyonlands National Park, Utah, 18:24755 (R;US)
An investigation of sulfur concentrations in soils and pine needles in Chaco Culture National Historical Park, New Mexico, 18:24756 (R;US)

PUBLIC TRANSPORTATION SYSTEMS

HIGHWAY 3.1: An enhanced HIGHWAY routing model: Program description, methodology, and revised user's manual, 18:22901 (R;US)

RUBIDIUM
Transmission electron microscopy studies of multilayer structures: Report on work through November 30, 1991, 18:25218 (R;US)

RUBIDIUM 85 TARGET
Evaluation of isomeric excitation functions in neutron induced reactions, 18:25134 (RA;XA)

RUNOFF
The observations of the Finnish river ice research project, 18:23219 (R;FI)

RUPTURES
Experimental study on a simulated primary-pipe rupture accident of HTGR: Experimental results of air ingress behavior, 18:23641 (R;JP;In Japanese)

RURAL AREAS
[Travel to Honduras to discuss plans to incorporate renewable energy technologies into rural electrification and water pumping programs]: Foreign trip report, October 28–November 12, 1992, 18:23745 (R;US)

RUSSIAN FEDERATION
Governmental structure of the Russian Federation with respect to environmental and energy programs, 18:23698 (R;US)

RUTHENIUM COMPLEXES
Photoinduced charge separation in linked donor-chromophore-acceptor systems: Progress report, September 1, 1993–May 31, 1993, 18:24099 (R;US)

RUTHENIUM OXIDES
Crystallographic phase identification in the scanning electron microscope: Backscattered electron Kikuchi patterns, 18:24087 (R;US)

RUTILE
Prism-film coupling in anisotropic planar waveguides of epitaxial (101) rutile thin films, 18:24468 (R;US)

S

S CODES
Code-to-code benchmarking of SPEEDUP™ versus WATFAM, 18:23080 (R;US)
Sandia Ocean Modeling System programmer's guide and user's manual, 18:24833 (R;US)
Validation of the CSAS25 module of SCALE: Part 2, Highly enriched uranium metal systems, 18:23489 (R;US)
Validation of the CSAS25 module of SCALE: Part 3, Highly enriched uranium oxide systems, 18:23490 (R;US)

SAFETY
See also OCCUPATIONAL SAFETY
REACTOR SAFETY
Danger identifying power.: Difference between aged and young persons, 18:24939 (IA;JP;In Japanese)
Hazard evaluation on mixed contacts in reaction reagents, 18:24505 (IA;JP;In Japanese)

SAFETY (NUCLEAR)
See RADIATION PROTECTION

SAFETY (REACTOR)
See REACTOR SAFETY

SAFETY ENGINEERING
Development of gas fields in arctic region, 18:22851 (IA;JP;In Japanese)
Evaluation on reliability of air-bag ignition device, 18:23870 (IA;JP;In Japanese)
Hazard evaluation on peracetic acid manufacturing process, 18:24127 (IA;JP;In Japanese)
Proceedings of the 25th Safety Engineering Study Meeting, 18:23731 (I;JP;In Japanese)

SAFETY RODS
See SCRAM RODS

SAFETY STANDARDS
Personnel dose assignment practices, 18:24905 (R;US)
Towards world nuclear safety standards, 18:23639 (RA;CS)

SALINE ZONE
See OIL SHALES

SALMON
A paleoscience approach to estimating the effects of climatic warming on salmonid fisheries of the Columbia River Basin, 18:24636 (R;US)

SALT CAVERNS
Effects of cavern spacing on the performance and stability of gas-filled storage caverns, 18:22859 (R;US)

SALT DEPOSITS
1986 WIPP horizon permeability measurements, 18:22937 (R;US)
A modeling approach to address spatial variability within the Culebra Dolomite transmissivity field, 18:23044 (R;US)
Field operations plan for permeability testing in the WIPP-site underground facility, 18:22939 (R;US)
Mechanical properties and modeling of seal-forming lithologies: Technical progress report No. 3, March 15, 1992–June 14, 1993, 18:22778 (R;US)
Test plan: Intermediate scale borehole test–WIPP in situ testing, 18:22940 (R;US)
Test plan: WIPP horizon in situ permeability measurements, 18:22936 (R;US)
Three-dimensional finite element simulation of creep deformation in rock salt, 18:23037 (R;US)
Waste Isolation Pilot Plant Salado hydrology program data report No. 2, 18:23043 (R;US)

SALT TALKS
Disarmament. Newsletter. V. 11, no. 1, 18:23888 (I;XU)

SALTS
See also MOLTEN SALTS

Waste salt recovery, recycle, and destruction, 18:23055 (R;US)

SAMARIUM 151
A new matrix for the "ageless" 21.6-keV ^{151}Eu nuclear gamma ray Moessbauer source, 18:25206 (R;US)

SAMPLERS
A multilayer groundwater sampler for characterizing contaminant plumes: Final report, 18:24663 (R;US)

SAND
Shemya AFB, Alaska 1992 IRP field investigation report: Volume 1: Final report, 18:24745 (R;US)

SANDIA LABORATORIES
Testing technology: A Sandia technology bulletin, 18:23754 (R;US)
Waste minimization/pollution prevention at R&D facilities: A cradle-to-grave tracking and information system for Sandia National Laboratories, 18:22903 (R;US)

SANDSTONES
Inverting ultrasonic data on solid/fluid mixtures for Biot-Gassmann parameters, 18:24964 (R;US)
Pore pressure buildup coefficient in synthetic and natural sandstones, 18:24963 (R;US)

SANITARY LANDFILLS
Cross borehole electromagnetic imaging of chemical and mixed waste landfills, 18:24706 (RA;US)
Ecological investigation of a hazardous waste site, Warner Robins, Georgia, 18:24719 (R;US)
Human-factors-based implementation of the remote characterization system high-level control station, 18:24718 (R;US)

See GARONA REACTOR

SANTA MARIA DE GARONA POWER REACTOR
See GARONA REACTOR

SARCOSINE
Thermal stability of morpholine, AMP and sarcosine in PWR secondary systems. Laboratory and loop experiments, 18:24091 (R;FR)

SATELLITES
Automated net shaped molding of continuous fiber composites, 18:24052 (R;US)
Estimation of the attitude motion of the small satellite "ORIZURU", 18:23823 (R;JP;In Japanese)
In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT), 18:23824 (R;JP;In Japanese)
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Proton transport methods for satellite shield modeling, 18:25165 (R;US)
Spacecraft Fabrication and Test MODIL: Quarterly report, December 1991–February 1992, 18:24561 (R;US)

SAVANNAH RIVER
Application of a simple parameter estimation method to predict effluent transport in the Savannah River, 18:24837 (R;US)
Pilot study risk assessment for selected problems at the Savannah River Site (SRS), 18:24873 (R;US)

SAVANNAH RIVER PLANT

Aerial Monitoring
An aerial radiological survey of Par Pond and associated drainage pathways of the Savannah River Site, Aiken, South Carolina: Date of survey: August 19–November 11, 1991, 18:24582 (R;US)

Alarm Systems
The need of coupled differential and integral spectral radiation measurements, 18:24184 (R;US)

Baseline Ecology
Wildlife Management Assistance Program: Final technical report, July 1, 1987–June 30, 1992, 18:24739 (R;US)

Budgets
[Budgetary concerns for construction of the Explosives Department at the Savannah River Plant], 18:23554 (R;US)

Chemical Wastes
The effects of soil mineral phases on the abiotic degradation of selected organic compounds: Annual progress report, 18:24741 (R;US)

Construction
[Minutes of meeting of Atomic Energy Division, Engineering Department, Explosives Department], 18:23557 (R;US)
[Minutes of meeting of Atomic Energy Division, Engineering Department, Explosives Department], 18:22875 (R;US)
[Minutes of meeting of Atomic Energy Division, Engineering Department, Explosives Department], 18:22874 (R;US)

Criticality
Summary of the Savannah River Site Criticality Dosimetry Program, 18:23185 (R;US)

Dosimetry
Summary of the Savannah River Site Criticality Dosimetry Program, 18:23185 (R;US)

Emergency Plans
Enhancement of the source term algorithm for emergency response at the Savannah River Site, 18:23606 (R;US)

Energy Expenses
Savannah River Plant estimated power costs, fiscal year 1953–1956, 18:23568 (R;US)

Environment
Environmental Implementation Plan, 18:23744 (R;US)

Hazardous Materials
Savannah River Site offsite hazardous waste shipment data validation report, 18:22893 (R;US)

Historical Aspects
Savannah River Plant history plantwide activities, July 1954–December 1972, 18:23129 (R;US)

Hydrogen Storage
P-V-T-C accuracy for RTF metal hydride bed calibration, 18:22908 (R;US)

Information Dissemination
Trip report to Washington AEC to discuss document distribution: Trip report, January 11, 1952, 18:25454 (R;US)

Occupational Safety
Summary of the Savannah River Site Criticality Dosimetry Program, 18:23185 (R;US)

Production Reactors
Enhancement of the source term algorithm for emergency response at the Savannah River Site, 18:23606 (R;US)
SRS supplemental safety system injection (gas pressurizer) test, 18:23612 (R;US)
Screening criteria for design basis events, 18:23607 (R;US)
Two-phase interfacial area and flow regime modeling in FLOWTRAN-TF code, 18:23610 (R;US)
[Minutes of meeting of Atomic Energy Division, Engineering Department, Explosives Department], 18:23557 (R;US)

Public Lands
Natural resources management activity and biodiversity maintenance: Progress report, July 1, 1992–June 30, 1993, 18:24740 (R;US)

Radioactive Waste Disposal
Performance assessment for low-level radioactive waste management and disposal at DOE facilities: Requirements, review process, and lessons learned, 18:23019 (R;US)

Radioactive Waste Management
Projected radionuclide inventories of DWPF glass from current waste at time of production: Revision 1, 18:23081 (R;US)
Savannah River Plant Nuclear Material Production and Defense Waste Management Facilities upgrading study, Savannah River Plant: First annual reappraisal, 18:22931 (R;US)
Savannah River Site offsite hazardous waste shipment data validation report, 18:22893 (R;US)

Radioactive Waste Processing
Application of probabilistic risk assessment methods to incinerator design and permitting, 18:23070 (R;US)
Canister disposition plan for the DWPF Startup Test Program: Revision 1, 18:23077 (R;US)
Canyon building ventilation system dynamic model – Parameters and validation, 18:23083 (R;US)
Combustibility of tetraphenylborate solids, 18:23076 (R;US)
Effects of temperature and radiation on the nuclear waste glass product consistency leach test, 18:23071 (R;US)
Factors influencing chemical durability of nuclear waste glasses, 18:22912 (R;US)

Implementation impacts of PRL methodology, 18:22917 (R;US)
Safety analysis, 200 Area, Savannah River Plant separations area operations: Liquid radioactive waste handling facilities: Supplement 18, 18:22963 (R;US)
The Product Composition Control System at Savannah River: The statistical process control algorithm: Revision 1, 18:23069 (R;US)

Radioactive Waste Storage
Investigation of the corrosion behavior of cooling coil material in a simulated concrete environment, 18:23084 (R;US)

Reactor Safety
Reverse flow through a large scale multichannel nozzle, 18:23683 (R;US)

Safety Analysis
Safety analysis, 200 Area, Savannah River Plant H-Canyon operations: Supplement 5, 18:23130 (R;US)

Storage Facilities
Code-to-code benchmarking of SPEEDUP™ versus WATFAM, 18:23080 (R;US)

Waste Management
Safety analysis, 200 Area, Savannah River Plant separations area operations: Liquid radioactive waste handling facilities: Supplement 18, 18:22963 (R;US)

Waste Water
Metal finishing wastewater pressure filter optimization, 18:24838 (R;US)

Water Requirements
100 Area, water requirements, 18:23561 (R;US)

SAVANNAH RIVER PLANT K REACTOR
See K REACTOR

SCANDIUM 45 TARGET
Problems associated with the production of monoenergetic neutrons, 18:25114 (RA;XA)

SCATTERING
An anisotropic scattering treatment for the even parity transport equation, 18:23481 (R;FR)

SCHMEHAUSEN THTR REACTOR
See THTR-300 REACTOR

SCIENTIFIC PERSONNEL
Summer investigations into the metabolic diversity of the microbial world: Progress report, May 5, 1992–April 30, 1993, 18:24866 (R;US)

SCINTILLATION CHAMBERS
See SCINTILLATION COUNTERS

SCINTILLATION COUNTERS

SCRAM RODS
GRISET certification package: Revision 2, 18:23537 (R;US)

SCREENS
Flash reducing performance and explosion force dissipating effect of a metal-screen type flame arrestor, 18:24510 (IA;JP;In Japanese)

SCRUBBERS
Advanced separation technology for flue gas cleanup: Quarterly Technical Report No. 3, January 1993, 18:23340 (R;US)
Recovery and utilization of gypsum and limestone from scrubber sludge: Technical report, December 1, 1992–February 28, 1993, 18:22741 (R;US)

SEA BED
Travel to Bermuda to attend meetings of the JOIDES Panel Chairs Committee and the JOIDES Planning Committee for discussion of the Ocean Drilling Program: Foreign trip report, November 30–December 5, 1992, 18:24951 (R;US)

SEALED SOURCES
Sealed source and device removal and consolidation feasibility study: National Low-Level Waste Management Program, 18:22949 (R;US)

SEALS
Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump, 18:23863 (R;JP;In Japanese)
Extensions of "Some guidelines for the mechanical design of coaxial compression pin seals", 18:24496 (R;US)
Test series C of the small scale seal performance tests, 18:22938 (R;US)

SEAS
See also MEDITERRANEAN SEA
Basic research for environmental data in the arctic regions, 18:22784 (IA;JP;In Japanese)
Development and evaluation of alternative radioanalytical methods, including mass spectrometry for marine materials: Proceedings of an advisory group meeting held in Monaco, 6-9 June 1989, 18:24071 (R;XA)
Ocean acoustic processing: A model-based approach, 18:24961 (R;US)

SEAWATER
Accelerator mass spectrometry, 18:24073 (RA;XA)
Chemical and biological factors affecting bioavailability of contaminants in seawater, 18:24836 (R;US)
Conventional radiometric methods of analysis including neutron activation, 18:24072 (RA;XA)
Development and evaluation of alternative radioanalytical methods, including mass spectrometry for marine materials: Proceedings of an advisory group meeting held in Monaco, 6-9 June 1989, 18:24071 (R;XA)
Surface geochemical prospecting.: Development for marine geochemical survey system, 18:22779 (IA;JP;In Japanese)
Thermal ionization mass spectrometry, 18:24074 (RA;XA)

SEBACEOUS GLANDS
See SKIN

SECONDARY BATTERIES
See ELECTRIC BATTERIES

SECONDARY COOLANT CIRCUITS
Acceptance criteria for corroded carbon steel piping containing weld defects, 18:23960 (R;US)
Reactor cooling water expansion joint bellows: The role of the seam weld in fatigue crack development, 18:23611 (R;US)
Thermal stability of morpholine, AMP and sarcosine in PWR secondary systems. Laboratory and loop experiments, 18:24091 (R;FR)
Transport of lead in secondary systems of PWR plants: laboratory and plant investigations, 18:23380 (R;FR)

SECONDARY RECOVERY
See ENHANCED RECOVERY

SEDIMENTS
Accelerator mass spectrometry, 18:24073 (RA;XA)
Bacterial distribution and metabolic activity in subsurface sediments from a gasoline spill, 18:22845 (R;US)
Quadrant III RFI draft report: Volume 1, 18:23032 (R;US)
Shemya AFB, Alaska 1992 IRP field investigation report: Volume 3, Appendixes B, C, and D: Final report, 18:24746 (R;US)
Transport processes of Cs-137 in lake environments, 18:24817 (R;GB)

SEEDLINGS
Effects of acid rain on forest vegetation: Morphological and nonmensurational growth effects, 18:24918 (RA;CA)

SEISMIC EVENTS
See also EARTHQUAKES
A neural network approach to seismic phase identification, 18:24959 (R;US)
Assessment of the load capacity of the dowel and socket system in the HTTR hexagonal block, 18:23435 (RA;XA)

SEISMIC P WAVES
Petrophysics and elastic wave technology for evaluation of rock properties.: Development of data analysis technique (fundamental research on PSP method), 18:24953 (IA;JP;In Japanese)

Alternating Current
Photovoltaic generating system of EMH (Energy Management House), 18:23233 (IA;JP;In Japanese)

Amorphous State
Control method against the long period deterioration of the solar cell, 18:23243 (IA;JP;In Japanese)
Development of excellent practically usable solar electric vehicle, 18:23253 (IA;JP;In Japanese)
Evaluation of photovoltaic modules considered spectral solar radiation, 18:23244 (IA;JP;In Japanese)
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)
System interconnection photovoltaic power generation system which assumes the existence of power counterflow for the first time in the actual living house, 18:23229 (IA;JP;In Japanese)

Annealing
Control method against the long period deterioration of the solar cell, 18:23243 (IA;JP;In Japanese)

Conversion Ratio
Characteristics of PV module output considered the environmental factors, 18:23232 (IA;JP;In Japanese)

Coverings
Studies of solar air collectors with solar cell modules as the cover, 18:23251 (IA;JP;In Japanese)

Dc Systems
Reasonable method for the use of P.V. systems from the international viewpoint, 18:23234 (IA;JP;In Japanese)

Decomposition
Control method against the long period deterioration of the solar cell, 18:23243 (IA;JP;In Japanese)

Detection
Estimation of the attitude motion of the small satellite "ORIZURU", 18:23823 (R;JP;In Japanese)

Direct Current
Photovoltaic generating system of EMH (Energy Management House), 18:23233 (IA;JP;In Japanese)

Economic Analysis
Appraisal of solar energy installation from view point of repaymental period, 18:23274 (IA;JP;In Japanese)

Electric Batteries
Development of excellent practically usable solar electric vehicle, 18:23253 (IA;JP;In Japanese)

Electric Charges
Make and appraise the performance of SEG hybrid car, 18:23252 (IA;JP;In Japanese)

Energy Conservation
Reasonable method for the use of P.V. systems from the international viewpoint, 18:23234 (IA;JP;In Japanese)

Environmental Effects
Characteristics of PV module output considered the environmental factors, 18:23232 (IA;JP;In Japanese)

Experimental Data
Characteristics of PV module output considered the environmental factors, 18:23232 (IA;JP;In Japanese)

Houses
Simulation study on energy consumption of single family house with solar heating and PV systems, 18:23254 (IA;JP;In Japanese)

Hybrid Systems
Appraisal of solar energy installation from view point of repaymental period, 18:23274 (IA;JP;In Japanese)

Incidence Angle
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)
Optical properties of solar cells using the static concentrator, 18:23238 (IA;JP;In Japanese)

Insolation
Windmill of solar-cell blades, 18:23269 (IA;JP;In Japanese)

Inverters
Photovoltaic generating system of EMH (Energy Management House), 18:23233 (IA;JP;In Japanese)

Lenses
Optical properties of solar cells using the static concentrator, 18:23238 (IA;JP;In Japanese)

Manufacturing
Reasonable method for the use of P.V. systems from the international viewpoint, 18:23234 (IA;JP;In Japanese)

Modular Structures
Characteristics of PV module output considered the environmental factors, 18:23232 (IA;JP;In Japanese)
Evaluation of photovoltaic modules considered spectral solar radiation, 18:23244 (IA;JP;In Japanese)
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)
Optical properties of solar cells using the static concentrator, 18:23238 (IA;JP;In Japanese)
Simulation study on energy consumption of single family house with solar heating and PV systems, 18:23254 (IA;JP;In Japanese)
Studies of solar air collectors with solar cell modules as the cover, 18:23251 (IA;JP;In Japanese)
System interconnection photovoltaic power generation system which assumes the existence of power counterflow for the first time in the actual living house, 18:23229 (IA;JP;In Japanese)

Monocrystals
Development of excellent practically usable solar electric vehicle, 18:23253 (IA;JP;In Japanese)

Off-Peak Power
Reasonable method for the use of P.V. systems from the international viewpoint, 18:23234 (IA;JP;In Japanese)

Optical Properties
Optical properties of solar cells using the static concentrator, 18:23238 (IA;JP;In Japanese)

Orbits
Estimation of the attitude motion of the small satellite "ORIZURU", 18:23823 (R;JP;In Japanese)

Photovoltaic Power Supplies
Evaluation of photovoltaic modules considered spectral solar radiation, 18:23244 (IA;JP;In Japanese)
Maximum-power-point control of photovoltaic at high frequency switching, 18:23242 (IA;JP;In Japanese)
Windmill of solar-cell blades, 18:23269 (IA;JP;In Japanese)

Polycrystals
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)

System interconnection photovoltaic power generation system which assumes the existence of power counterflow for the first time in the actual living house, 18:23229 (IA;JP;In Japanese)

Power Generation
Studies of solar air collectors with solar cell modules as the cover, 18:23251 (IA;JP;In Japanese)
Windmill of solar-cell blades, 18:23269 (IA;JP;In Japanese)

Power Range 01-10 Kw
Reasonable method for the use of P.V. systems from the international viewpoint, 18:23234 (IA;JP;In Japanese)

Power Range 01-10 Mw
Photovoltaic power generation.: Its recent progress and new role in the global environmental problems, 18:23230 (IA;JP;In Japanese)

Power Supplies
Appraisal of solar energy installation from view point of repaymental period, 18:23274 (IA;JP;In Japanese)

Research Programs
Photovoltaic Subcontract Program: Annual report, FY 1992, 18:23263 (R;US)

Silicon
Characteristics of PV module output considered the environmental factors, 18:23232 (IA;JP;In Japanese)
Development of excellent practically usable solar electric vehicle, 18:23253 (IA;JP;In Japanese)
Evaluation of photovoltaic modules considered spectral solar radiation, 18:23244 (IA;JP;In Japanese)
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)
Photovoltaic power generation.: Its recent progress and new role in the global environmental problems, 18:23230 (IA;JP;In Japanese)

Solar Air Heaters
Studies of solar air collectors with solar cell modules as the cover, 18:23251 (IA;JP;In Japanese)

Solar Concentrators
Optical properties of solar cells using the static concentrator, 18:23238 (IA;JP;In Japanese)

Solar Radiation
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)

Solar Space Heating
Appraisal of solar energy installation from view point of repaymental period, 18:23274 (IA;JP;In Japanese)
Simulation study on energy consumption of single family house with solar heating and PV systems, 18:23254 (IA;JP;In Japanese)

Solar Tracking
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)

Solar Water Heating
Appraisal of solar energy installation from view point of repaymental period, 18:23274 (IA;JP;In Japanese)

Stacks
Photovoltaic power generation.: Its recent progress and new role in the global environmental problems, 18:23230 (IA;JP;In Japanese)

Temperature Dependence
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)

Wind
Measurements and analysis of influence factor and efficiency of PV system. Part 1.: Summary of measurement system and results in summer, 18:23231 (IA;JP;In Japanese)

SOLAR COLLECTORS
See also SOLAR PONDS
Appraisal of solar energy installation from view point of repaymental period, 18:23274 (IA;JP;In Japanese)
Evaluation of thermal enviornment with a system for a solar house employing an air-type roof collector, 18:23283 (IA;JP;In Japanese)
Simulation study on energy consumption of single family house with solar heating and PV systems, 18:23254 (IA;JP;In Japanese)
Use of solar heat in industry: Perspectives and possibilities for development. Final report, 18:23286 (R;DK;In Danish)

SOLAR CONCENTRATORS
Developing solar collecting system condensing and transmitting a large capacity of solar energy. 1st Report, 18:23291 (IA;JP;In Japanese)
New design of non-imaging refractive concentrator and its optical characteristics, 18:23239 (IA;JP;In Japanese)

SOLAR CYCLE
Comments on possible causes of recent global warming, 18:24656 (R;US)

SOLAR DISTILLATION
Study on the natural circulating type desalination system by the solar heat, 18:23281 (IA;JP;In Japanese)

SOLAR ENERGY
1992 JSES (Japan Solar Energy Society)/JWEA (Japan Wind Energy Association) Joint Conference, 18:23227 (I;JP;In Japanese)
Past and present of research and development of solar energy and the problems, 18:23221 (IA;JP;In Japanese)
Reflectance and absorptance of silica gel bed used in the desiccant/regenerator, 18:23275 (IA;JP;In Japanese)

SOLAR ENERGY CONVERSION
Thermal properties of the pressurized solar water heater, 18:23273 (IA;JP;In Japanese)

SOLAR EQUIPMENT

Wind/solar: A regulatory guide to leasing, permitting, and licensing in Idaho, Montana, Oregon, and Washington, 18:23295 (R;US)

SOLAR PROCESS HEAT
DOE Solar Process Heat Program: FY1991 Solar Process Heat Prefeasibility Studies activity, 18:23287 (R;US)
Economic status and prospects of solar thermal industrial heat, 18:23288 (R;US)

SOLAR PROTON EVENTS
See SOLAR PROTONS

SOLAR PROTONS
Proton transport methods for satellite shield modeling, 18:25165 (R;US)

SOLAR RADIATION
Buildup
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Daily Variations
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Errors
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Fluctuations
Thermal response of low heat loss thermal insulation pipe for cyclic temperature fluctuation, 18:23290 (IA;JP;In Japanese)
Forecasting
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Incidence Angle
New design of non-imaging refractive concentrator and its optical characteristics, 18:23239 (IA;JP;In Japanese)
Thermal properties of the pressurized solar water heater, 18:23273 (IA;JP;In Japanese)
Inclination
Simple recording film for measurement of global solar tediation. 4.: Wavelength dependency and fading on slopes, 18:23222 (IA;JP;In Japanese)
Integrals
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Least Square Fit
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Maps
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Prediction Equations
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Pyranometers
Simple recording film for measurement of global solar tediation. 4.: Wavelength dependency and fading on slopes, 18:23222 (IA;JP;In Japanese)
Radiation Flux
Steady and unsteady characteristics of photovoltaic array exposed to natural environment, 18:23240 (IA;JP;In Japanese)
Reflection
Thermal properties of the pressurized solar water heater, 18:23273 (IA;JP;In Japanese)
Regional Analysis
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Satellites
Irradiation estimation by using meteorological satellite images, 18:23224 (IA;JP;In Japanese)
Seasonal Variations
Characteristics of PV module output considered the environmental factors, 18:23232 (IA;JP;In Japanese)
Spectra
Characteristics of PV module output considered the environmental factors, 18:23232 (IA;JP;In Japanese)
Wavelengths
Simple recording film for measurement of global solar tediation. 4.: Wavelength dependency and fading on slopes, 18:23222 (IA;JP;In Japanese)
SOLAR RECEIVERS
Concentration ratio and collection efficiency of a luminescent solar concentrator, 18:23248 (IA;JP;In Japanese)
SOLAR REGENERATORS
Studies of open cycle absorption dehumidifying/drying system. Part 9.: Simulation model for a natural convective glazed solar regenerator, 18:23280 (IA;JP)
SOLAR SIMULATORS
Performance of various solar ponds, 18:23279 (IA;JP;In Japanese)
SOLAR SPACE HEATING
Evaluation of solar heating system with thermal core type soil heat storage. Part 1, 18:23292 (IA;JP;In Japanese)
SOLAR THERMAL RECEIVERS
See SOLAR RECEIVERS
SOLAR WIND
Solar wind channels for MeV particles, 18:24995 (R;US)
SOLENOIDS
Improved focus solenoid design for linear induction accelerators, 18:24425 (R;US)
On the electrical toroidal solenoids, 18:24991 (R;RU)
SOLID ELECTROLYTE FUEL CELLS
Advanced alternate planar geometry solid oxide fuel cells: Final report, 18:23790 (R;US)
Anodes for solid oxide fuel cells, 18:23793 (RA;DK)
Automatic performance of electrochemical experiments, 18:23794 (RA;DK)
Current status of research and development of fuel cell power generation technology, 18:23783 (IA;JP;In Japanese)
Electrocatalysis issues in polymer electrolyte fuel cells, 18:23791 (R;US)
High temperature fuel cells based on oxygen ion conductors: Final report, 18:23792 (R;DK;In Danish)
Statement for early commercialization of solid oxide fuel cell, 18:23789 (IA;JP;In Japanese)
SOLID SCINTILLATION DETECTORS
See also PLASTIC SCINTILLATION DETECTORS
Experimental efforts and results in finding new heavy scintillators, 18:24449 (R;US)
Main characteristics of scintillation phoswich-detectors for the 4π-experimental setup PHOBOS, 18:24444 (R;RU;In Russian)
[Travel to Switzerland and France to discuss current scintillation crystal technology]: Foreign trip report, May 5–9, 1992, 18:24451 (R;US)
SOLID SOLUTIONS
Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x-ray and neutron diffraction and solid-state photochemistry, 18:24090 (R;US)
SOLID WASTES
See also MINERAL WASTES
TAILINGS
Characterization of oil and gas waste disposal practices and assessment of treatment costs engineering: [Quarterly] report, January 1, 1993–March 31, 1993, 18:22838 (R;US)
Notes on meeting of Waste Processing Committee, 18:22964 (R;US)
Quadrant III RFI draft report: Volume 1, 18:23032 (R;US)
Solid waste disposal, 18:22965 (R;US)
SOLIDIFICATION
Determination of the shape of a plutonium deposit from a leaking crucible, 18:23456 (R;US)
SOLIDS
A methodology to predict the uniformity of double-shell waste slurries based on mixer pump operation, 18:23018 (R;US)
Investigation of optically generated electronic defects and protonic transport in hydrogen-bonded molecular solids: Isomorphs of potassium dihydrogen phosphate, 18:24056 (R;US)
Micromechanical strength effects in shock compression of solids, 18:23942 (R;US)
Theoretical aspects of positron annihilation in condensed matter, 18:23907 (RA;US)
X-ray and γ-ray spectroscopy of solids under pressure: Annual technical progress report, October 1990–October 1993, 18:25210 (R;US)
SOLITONS
Soliton equations and self-dual gauge fields, 18:24967 (R;RU)
SOLUTES
Preparation of ultrafine catalyst powders using a flow-through hydrothermal process, 18:22730 (R;US)
SOLUTION MINING
Some economy problems associated with keeping down the uranium mining by leaching in the Straz block, 18:22864 (IA;CS;In Czech)

SOLUTIONS
See also AQUEOUS SOLUTIONS
FUEL SOLUTIONS
LEACHATES
SOLID SOLUTIONS
Studies on use conditions for steel containers for high-concentration alkaline aqueous solution, 18:23922 (IA;JP;In Japanese)

SOLVENT EXTRACTION
Formation characteristics and its numerical models of the third phase in the U(IV)-HNO_3-TBP-n-dodecane system, 18:22886 (R;JP;In Japanese)
Interfacial chemistry in solvent extraction systems: Progress report, June 1, 1992–May 31, 1993, 18:24063 (R;US)

SOLVENTS
See also ORGANIC SOLVENTS
Active species in Zn-butyl iodide system for coal solubilization, 18:22663 (IA;JP;In Japanese)
Product properties in coal flash pyrolysis, 18:22672 (IA;JP;In Japanese)
Ultrasonic cleaning as a replacement for chlorinated solvents, 18:24186 (R;US)

SONIC PROBES
Multiple-frequency acoustic wave devices for chemical sensing and materials characterization in both gas and liquid phase, 18:24482 (PA;US)

SOOT
Non-combustive gasification of KOH-treated fuel soot, 18:23874 (IA;JP;In Japanese)

SORBENT INJECTION PROCESSES
Ohio Coal Development Office test program at TRW's Cleveland, Ohio entrained coal combustion facility: Final report, 18:23345 (R;US)
Study of in-duct spray drying using condensation aerosol: Final report, June 16, 1990–June 15, 1992, 18:23344 (R;US)

SOUND
See SOUND WAVES

SOUND WAVES
See also ULTRASONIC WAVES
Comments on computational underwater acoustics, 18:25434 (R;US)
Virtual sound for virtual reality, 18:25446 (R;US)

SOUTHEAST REGION
See USA

SOUTHERN OSCILLATION
Coupled ocean-atmosphere GCM simulation of Southern Oscillation phenomena, 18:24652 (R;US)

SOUTHWEST REGION

SOVIET UNION
See USSR

SPACE
A modular gas-cooled cermet reactor system for planetary base power, 18:23468 (R;US)

SPACE FLIGHT
In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT), 18:23824 (R;JP;In Japanese)

SPACE HEATING
See also SOLAR SPACE HEATING
Evaluation of performance for solar house with trombe-wall. Part 2.: Thermal performance in heating, 18:23282 (IA;JP;In Japanese)

SPACE POWER REACTORS
See also SPACE PROPULSION REACTORS
A modular gas-cooled cermet reactor system for planetary base power, 18:23468 (R;US)

SPACE POWER UNIT REACTOR
See SPACE POWER REACTORS

SPACE PROPULSION REACTORS
Design, qualification and operation of nuclear rockets for safe Mars missions, 18:23636 (R;US)
Gas core nuclear thermal rocket engine research and development in the former USSR, 18:23470 (R;US)
Nuclear propulsion systems engineering, 18:23469 (R;US)
[Space nuclear technology]: Foreign trip report, September 11–October 12, 1992, 18:23467 (R;US)

SPACE REFLECTION
See P INVARIANCE

SPACE VEHICLES
Comparison of analytic Whipple bumper shield ballistic limits with CTH simulations, 18:24171 (R;US)
Cryocooler producibility, within a MODIL concept, 18:24563 (R;US)
Interagency Advanced Power Group, Electrical Working Group meeting minutes, 18:24489 (R;US)
Spacecraft Fabrication and Test MODIL: Quarterly report, December 1991–February 1992, 18:24561 (R;US)
Spacecraft Fabrication and Test Manufacturing Operations and Development Integration Laboratory (MODIL): Establishing a spacecraft fabrication culture, 18:24562 (R;US)
The MASH 1.0 code system: Utilization of morse in the adjoint mode, 18:25157 (R;US)
Whistler wave driven plasma thruster, 18:23854 (R;US)

SPACE-TIME
Remarks on the Robinson-Trautman solutions, 18:24993 (R;HU)

SPACECRAFT POWER SUPPLIES
GPHS-RTGs in support of the Cassini mission: Semi annual technical report, 28 September 1992–28 March 1993, 18:23183 (R;US)

SPARK CHAMBERS
See also STREAMER SPARK CHAMBERS
GEM muon tracking R and D: Progress report, August 1992–July 1993, 18:24436 (R;US)

SPARKS (ELECTRIC)
See ELECTRIC SPARKS

SPECIAL PRODUCTION REACTORS
See also K REACTOR
FLOWTRAN-TF user guide, 18:23466 (R;US)
Final report for the flow excursion follow-on testing, 18:23455 (R;US)
Numerical modeling of the expansion phase of steam explosions: Part 1, Method and validation, 18:23687 (R;US)
Pin Monitoring System, 18:23519 (R;US)
Structural integrity analysis of process water system Bingham pumps: Task Number: 91-086-1, 18:23614 (R;US)
Summary of the SRS Severe Accident Analysis Program, 1987–1992, 18:23472 (R;US)
User's manual for GILDA: An infinite lattice diffusion theory calculation, 18:23465 (R;US)
Verification, validation, and benchmarking report for TRIMHX: A three dimensional hexagonal transient diffusion theory code, 18:23615 (R;US)
[Budgetary concerns for construction of the Explosives Department at the Savannah River Plant], 18:23554 (R;US)

SULFUR-OXIDIZING BACTERIA
See also RHODOCOCCUS
Characterization of the organic-sulfur-degrading enzymes: [Quarterly] technical report, December 1, 1992–February 28, 1993, 18:22720 (R;US)
Microbial stabilization of sulfur-laden sorbents: Technical report, December 1, 1992–February 29, 1993, 18:22740 (R;US)

SULFURIC ACID
Binary homogeneous nucleation: Temperature and relative humidity fluctuations and non-linearity, 18:24637 (R;US)

SUNSHINE PROJECT
Demonstration research on islanding preventing methods for small scale PV systems, 18:23236 (IA;JP;In Japanese)

SUPERALLOYS
See HEAT RESISTING ALLOYS

SUPERCOMPUTERS
An account of Sandia's research booth at Supercomputing '92: A collaborative effort in high-performance computing and networking, 18:25425 (R;US)
Connecting UNICOS data migration to a UniTree storage system, 18:25440 (R;US)
EXCHANGE: Volume 3-93, March 1993, 18:25395 (R;US)
The DOE Program in High-Performance Computing and Communications (HPCC), 18:25391 (R;US)

SUPERCONDUCTING CAVITY RESONATORS
Broadband higher-order mode (HOM) damper for SSC LEB ferrite-tuned cavity, 18:24416 (R;US)
Low energy booster radio frequency cavity structural analysis, 18:24399 (R;US)
Non linear effects in ferrite tuned cavities, 18:24334 (R;US)
Three-dimensional model of a liquid-cooled, low energy booster radio- frequency cavity tuner at the Superconducting Super Collider, 18:24396 (R;US)
Work on RF superconducting cavities done at Institute for High Energy Physics: 1. Experimental technological equipment, 18:24349 (R;RU;In Russian)

SUPERCONDUCTING COILS
Heat load analysis on the cable-in-conduit with central core conductor for the TF coil Rebut layer design, 18:25319 (R;US)
Method of fabricating a completely ordered wound coil, 18:24398 (R;US)
[Travel to Japan Atomic Energy Research Institute, Tokai, Japan to observe the second DPC-EX test]: Foreign trip report, July 11–27, 1992, 18:25228 (R;US)

SUPERCONDUCTING COMPOSITES
Preparation and characterisation of the compound $Tl_{0.65}$ $Bi_{0.35}Ca_{0.8}$ $Sr_{1.7}$ Cu_2 O_y using oxalate coprecipitation and analytical CBED and an initial preparation of Bi_2 Ca_{n-1} Sr_2 Cu_n O_{4+2n} for n=5, 18:23984 (R;AU)

SUPERCONDUCTING MAGNETIC ENERGY STORAGE
Technology assessments of advanced energy storage systems for electric and hybrid vehicles, 18:23867 (R;US)

SUPERCONDUCTING MAGNETS
Design and analysis of the cryostat system for a 15 m long prototype quadrupole magnet, 18:24403 (R;US)
Effective stress of a 4.2 K beam tube in a quenching collider 50 mm dipole magnet for the SSC, 18:24401 (R;US)
High-field conductor testing at the FENIX facility, 18:25336 (R;US)
Magnetic field properties of SSC model dipole magnets, 18:24347 (R;US)
Method of fabricating a completely ordered wound coil, 18:24398 (R;US)
Quench and quench protection for the SSC collider correctors, 18:24414 (R;US)
Quench simulation of the 40 mm aperture SSC-Quadrupole Magnet connected in series with 50 mm aperture SSC-Dipole Magnets, 18:24394 (R;US)
Reducing the energy requirements of quench protection heaters for SSC dipoles – Test results, 18:24409 (R;US)
Strain gauge pack in process measurement system for the collider quadrupole, design and technology transfer, 18:24410 (R;US)
Supplier Performance Evaluation and Rating System (SPEARS), 18:24392 (R;US)
Systems analysis determining critical items, critical assembly processes, primary failure modes and corrective actions on ASST magnets, 18:24385 (R;US)
Test performance of the QSE series of 5 cm aperture quadrupole model magnets, 18:24404 (R;US)
The Accelerator Systems String Test Program, 18:24413 (R;US)
The Accelerator Systems String Test cryogenics, 18:24393 (R;US)
Time-dependent hydrogen and helium pressure profiles in a long, cryogenically cooled tube, pumped at periodic intervals, 18:24341 (R;US)
Tune shift effect due to the sextupole longitudinal periodic structure in the superconducting dipole magnets, 18:24331 (R;US)
[Travel to Japan Atomic Energy Research Institute, Tokai, Japan to observe the second DPC-EX test]: Foreign trip report, July 11–27, 1992, 18:25228 (R;US)

SUPERCONDUCTING SUPER COLLIDER

Accelerator Facilities
Design status report on the collider utility straight insertions, 18:24411 (R;US)

Beam Bending Magnets
Conceptual design of the cryostat system for the 2:1 vertical bending dipole magnet of the SSC collider ring, 18:24402 (R;US)
Parameters and conceptual design of a vertical bending magnet for the Super Collider, 18:24406 (R;US)

Beam Bunching
Bunch coalescing studies for the SSC, 18:24336 (R;US)
Simulation of the transverse dipole mode multibunch instability for the SSC Collider, 18:24405 (R;US)

Beam Dumps
Hydrodynamic calculations of 20-TeV beam interactions with the SSC beam dump, 18:24374 (R;US)

Beam Dynamics
A parallel implementation of particle tracking with space charge effects on an Intel iPSC/860: Revision 1, 18:24329 (R;US)

Beam Extraction
Effect of betatron motion on the spetum flux in superslow extraction at the SSC, 18:24420 (R;US)

Beam Monitors
Beam diagnostic layout requirements for SSCL linac, 18:24422 (R;US)

Beam Optics
Dynamic aperture of the chromatically corrected Collider lattice, 18:24337 (R;US)

Beam-Beam Interactions
Head-on and long-range beam-beam tune shift spread in the SSC, 18:24332 (R;US)

Construction
Status of the SSC, 18:24307 (R;US)

Cooling Systems
An experimental and analytical study of a buoyancy driven cooling system for a particle accelerator, 18:24419 (R;US)
Low conductivity water plants – Issues of process control, 18:24390 (R;US)

Cryostats
[Travel to Kiev, Ukraine to present a paper describing work done at Fermilab on the development of advanced cryogenic insulation systems at the International Cryogenic Engineering Conference (ICEC-14)]: Foreign trip report, June 5–13, 1992, 18:24975 (R;US)

Ground Motion
Measurements of the ground motion vibrations at the SSC, 18:24305 (R;US)

Kicker Magnets
Consequences of kicker failure during HEB to collider injection and possible mitigation, 18:24417 (R;US)
Using a ceramic chamber in kicker magnets, 18:24408 (R;US)

Linear Accelerators
Physics requirements of commissioning diagnostics for SSCL linac, 18:24421 (R;US)

Liners
Beam coupling impedance measurements and simulations of a beam pipe liner with pumping holes or slots, 18:24333 (R;US)
Effective stress of the SSC 80-K synchrotron radiation liner in a quenching dipole magnet, 18:24423 (R;US)
The heat load of an 80 K liner for the SSC, 18:24412 (R;US)
The longitudinal coupling impedance of a slot on the SSC Collider linear, 18:24395 (R;US)

Memory Devices
SSCL DD2 driver port and project update, 18:24391 (R;US)

Particle Boosters
Design and preliminary testing of the LEB extraction kicker magnet at the SSC, 18:24400 (R;US)
Emittance growth in MEB and its control, 18:24335 (R;US)
Low energy booster radio frequency cavity structural analysis, 18:24399 (R;US)
Modification of the short straight sections of the high energy booster of the SSC, 18:24415 (R;US)
Non linear effects in ferrite tuned cavities, 18:24334 (R;US)
Structural and thermal analysis of a solid-cooled, low energy booster, radio-frequency-cavity tuner at the Superconducting Super Collider, 18:24397 (R;US)

Power Transmission
An experimental evaluation of joint electrical resistance on power lead thermal performance, 18:24384 (R;US)

Refrigerating Machinery
Stress analysis on SSC cryogenic shaft transfer line suspension system, 18:24386 (R;US)

Rf Systems
RF system analyses for the SSC collider rings, 18:24418 (R;US)

Shower Counters
System-level description of the SDC detector, 18:24462 (R;US)

Superconducting Magnets
Design and analysis of the cryostat system for a 15 m long prototype quadrupole magnet, 18:24403 (R;US)
Effective stress of a 4.2 K beam tube in a quenching collider 50 mm dipole magnet for the SSC, 18:24401 (R;US)
Magnetic field properties of SSC model dipole magnets, 18:24347 (R;US)
Quench and quench protection for the SSC collider correctors, 18:24414 (R;US)
Quench simulation of the 40 mm aperture SSC-Quadrupole Magnet connected in series with 50 mm aperture SSC-Dipole Magnets, 18:24394 (R;US)
Systems analysis determining critical items, critical assembly processes, primary failure modes and corrective actions on ASST magnets, 18:24385 (R;US)
Test performance of the QSE series of 5 cm aperture quadrupole model magnets, 18:24404 (R;US)
The Accelerator Systems String Test Program, 18:24413 (R;US)
The Accelerator Systems String Test cryogenics, 18:24393 (R;US)
Tune shift effect due to the sextupole longitudinal periodic structure in the superconducting dipole magnets, 18:24331 (R;US)

Supports
Structural behavior of the six-strut support system, 18:24407 (R;US)

Vacuum Systems
Photodesorption experiments on SSC collider beam tube configurations, 18:24424 (R;US)

SUPERCONDUCTORS
See also HIGH-TC SUPERCONDUCTORS
High field superconductor development and understanding: A. Establishing the limits of performance of niobium titanium; B. Establishing whether Chevrel Phase materials can become useful high field superconductors: Progress report, June 1, 1992–May 31, 1993, 18:23927 (R;US)

SUPERCRITICAL FLOW
See TURBULENT FLOW

SUPERNOVA REMNANTS
The interaction of a supernova remnant with interstellar clouds using high order local adaptive mesh refinement methods, 18:24228 (RA;US)

SUPERNOVAE
Nuclear astrophysics, 18:25101 (R;US)

SUPERSONIC FLOW

Boundary Layers
The structure of supersonic turbulent boundary layers: What we know and what we think we know, 18:24214 (RA;US)

Density
Instantaneous velocity profiles and density cross sections in supersonic shear layers, 18:24207 (RA;US)

Historical Aspects
The structure of supersonic turbulent boundary layers: What we know and what we think we know, 18:24214 (RA;US)

Instability
Shock-wave/shear layer interaction in circular supersonic jets, 18:24225 (RA;US)
Vortex formation in the wake of a flat plate for subsonic and supersonic freestream mach numbers, 18:24198 (RA;US)

Mathematical Models
A second-order closure for supersonic turbulent flows application to the supersonic mixing, 18:24223 (RA;US)
Pseudo-spectral numerical simulations of sub and supersonic compressible viscous flows, 18:24193 (RA;US)

Mixing
A second-order closure for supersonic turbulent flows application to the supersonic mixing, 18:24223 (RA;US)
Numerical simulation of enhanced mixing and turbulence in supersonic flows, 18:24216 (RA;US)

Numerical Solution
A numerical study of inviscid, supersonic mixing layers, 18:24202 (RA;US)
Computations of supersonic flows: Shears, shocks, and detonations, 18:24231 (RA;US)
Essentially non-oscillatory shock capturing methods applied to turbulence amplification in shock wave calculations, 18:24232 (RA;US)
Navier-Stokes simulation of supersonic free shear layer flows, 18:24215 (RA;US)
Numerical simulations of turbulent supersonic flows, 18:24234 (RA;US)
Shock enhancement of a turbulent flow, 18:24235 (RA;US)
Shock-generated turbulence, 18:24233 (RA;US)

Shock Waves
Shock-wave/shear layer interaction in circular supersonic jets, 18:24225 (RA;US)
Vortex formation in the wake of a flat plate for subsonic and supersonic freestream mach numbers, 18:24198 (RA;US)

Turbulence
Preliminary data on the dynamics of turbulent shocklets, 18:24227 (RA;US)
Velocity
Instantaneous velocity profiles and density cross sections in supersonic shear layers, 18:24207 (RA;US)
Vortices
Vortex formation in the wake of a flat plate for subsonic and supersonic freestream mach numbers, 18:24198 (RA;US)

SUPERVOLTAGE RADIOTHERAPY
See RADIOTHERAPY

SUPPLY AND DEMAND
Australian coals expected of real cost competitive edge.: Through comparing them with U.S. coals, 18:22771 (R;JP;In Japanese)

SUPPORTS
Component test of the core support post of the HTTR, 18:23434 (RA;XA)
Preliminary evaluation of snubber single failures, 18:23664 (R;US)
Stress analysis on SSC cryogenic shaft transfer line suspension system, 18:24386 (R;US)
Structural behavior of the six-strut support system, 18:24407 (R;US)

SUPPORTS (CATALYST)
See CATALYST SUPPORTS

SURFACE AIR
Boundary layer structure over areas of heterogeneous heat fluxes, 18:24635 (R;US)

SURFACE CONTAMINATION
Direct analysis of involatile contaminants using molecular beam surface analysis (in situ SIMS analysis), 18:24062 (RA;US)

SURFACE IONIZATION
Thermal ionization mass spectrometry, 18:24074 (RA;XA)

SURFACE TREATMENTS
Production technology under high-temperature and corrosive environment.: Corrosion-resistant materials and sealing technology, 18:23937 (IA;JP;In Japanese)

SURFACE WATERS

SWITCHING CIRCUITS
Maximum-power-point control of photovoltaic at high frequency switching, 18:23242 (IA;JP;In Japanese)

SYNCHROTRON RADIATION
Proceedings of the workshop on applications of synchrotron radiation to trace impurity analysis for advanced silicon processing, 18:24088 (R;US)

SYNTHESIS
Fundamental studies in production of C_2-C_4 hydrocarbons from coal: Final report, 1 September 1988–31 August 1992, 18:22699 (R;US)

SYNTHESIS GAS
A novel process for methanol synthesis: Progress report, December 1, 1992–February 28, 1993, 18:23214 (R;US)
Bench-scale demonstration of biological production of ethanol from coal synthesis gas: Quarterly report, September 24, 1992–December 31, 1992, 18:24104 (R;US)
Biological conversion of synthesis gas: Project status report, January 1, 1993–March 31, 1993, 18:23213 (R;US)
Future prospect of coal hydrogasification techniques, 18:22686 (IA;JP;In Japanese)
High octane ethers from synthesis gas-derived alcohols: Quarterly technical progress report, April–June 1992, 18:22704 (R;US)
Novel approaches to the production of higher alcohols from synthesis gas: Quarterly Technical progress report No. 8, July 1, 1992–September 30, 1992, 18:23215 (R;US)
Status and future opportunities for conversion of synthesis gas to liquid energy fuels: Final report, 18:23216 (R;US)
Synthesis of hydrocarbons from natural gas and carbon dioxide, 18:23187 (IA;JP;In Japanese)

SYNTHETASES
See LIGASES

SYNTHETIC-APERTURE RADAR
Feature discovery on segmented objects in SAR imagery using self-organizing neural networks, 18:24492 (R;US)
Fusion of LADAR and SAR for terminal guidance, 18:24498 (R;US)

SYNTHINE PROCESS
See FISCHER-TROPSCH SYNTHESIS

SYSTEMS ANALYSIS
A "SUPERCODE" for systems analysis of tokamak experiments and reactors, 18:25325 (R;US)

T

T CODES
TRIPM: Water & Solute Transport Porous Media, 18:25399 (CM;US)
Tripoli 3: a Monte Carlo code with a powerful and automatic biasing, 18:23458 (R;FR)
Verification, validation, and benchmarking report for TRIMHX: A three dimensional hexagonal transient diffusion theory code, 18:23615 (R;US)

T INVARIANCE
Aspects of symmetry violation, 18:25015 (R;US)
Discrete space-time symmetries, 18:25014 (R;US)

TAILINGS
See also MILL TAILINGS
Critical conditions of managing the MAPE mill tailings ground in relation to land reclamation, 18:22866 (IA;CS;In Czech)
Effects of uranium industry tailings on the population, 18:24887 (IA;CS;In Czech)
Principles and methodology of land reclamation at abandoned uranium tailings grounds, 18:23088 (IA;CS;In Czech)
Radiation protection in the surroundings of the MAPE Mydlovary chemical treatment plant, 18:24888 (IA;CS;In Czech)

TANDEM ELECTROSTATIC ACCELERATORS
Annual report of the Tandem Accelerator Center, University of Tsukuba: April 1, 1991 - March 31, 1992, 18:25382 (R;JP)

TANK FARMS
See STORAGE FACILITIES

TANKS
Closure report for Building 875 sump encased in concrete, 18:23048 (R;US)
P-V-T-C accuracy for RTF metal hydride bed calibration, 18:22908 (R;US)
Safety analysis, 200 Area, Savannah River Plant separations area operations: Liquid radioactive waste handling facilities: Supplement 18, 18:22963 (R;US)
Seismic design and evaluation guidelines for the Department of Energy high-level waste storage tanks and appurtenances, 18:22921 (R;US)
Tank 241-CX-70 waste removal and packaging, 18:23065 (R;US)

TANTALUM 180 TARGET
Implications of the IAEA CRP on long-lived activation cross sections on waste disposal and materials recycling for fusion reactor materials, 18:25135 (RA;XA)

TANZANIA
Country programme review. United Republic of Tanzania, 18:24868 (R;XA)
The Agency's Technical Co-operation programme with the United Republic of Tanzania, 1982-1992. Country programme summaries, 18:25352 (R;XA)

Appendix 1, 18:24976 (RA;XA)
Appendix 5 (Foils and targets produced by MICROMATTER Co.), 18:24977 (RA;XA)
Examples of problems caused by impurities in targets and/or research samples, 18:25115 (RA;XA)
On the necessity of alternative methods to determine sample thicknesses and masses, 18:25059 (RA;XA)
Some general considerations on the influence of sample characteristics on nuclear data measurements, 18:25058 (RA;XA)
Supply of samples and targets by CBNM, Geel, Belgium, 18:23171 (RA;XA)
The influence of target and sample properties on nuclear data measurements: Summary report of the IAEA advisory group meeting in co-operation with the International Nuclear Target Development Society (INTDS), held in Darmstadt, Germany, 5-9 September 1988, 18:25057 (R;XA)
The supply of stable and active isotopes and targets from the Harwell Laboratory, 18:23173 (RA;XA)

Use of Rutherford Backscattering to determine uranium deposit uniformity, 18:24980 (RA;XA)

TATB
Fabry Perot velocimetry on detonating LX-17 in planar and spherically divergent geometries, 18:24527 (R;US)
Temperature effects on failure thickness and deflagration-to-detonation transition in PBX 9502 and TATB, 18:24521 (R;US)

TBP
In situ secondary ion mass spectrometry analysis: 1992 Summary report, 18:24070 (R;US)

TECHNETIUM
Japanese chemical separations (partitioning) and transmutation activities: Foreign trip report, July 17–25, 1992, 18:22880 (R;US)
Quadrant III RFI draft report: Appendix B-I, Volume 3, 18:24784 (R;US)

TECHNETIUM 99
Leach testing of in situ stabilization grouts containing additives to sequester contaminants, 18:23015 (R;US)

TECHNETIUM COMPLEXES
Development of more efficacious T_c-99m organ imaging agents for use in nuclear medicine by analytical characterization of radiopharmaceuticals: Annual technical progress report, September 1, 1992–August 31, 1993, 18:24856 (R;US)

TECHNOLOGY TRANSFER
A special evaluation: The ARCAL programme, 18:25373 (R;XA)
Technology development in materials working for nuclear sector and its consequences for the Brazilian market, 18:25378 (I;BR;In Portuguese)

TELEPHONES
System to identify a person in room at fire using infrared sensor and telephone response system, 18:23801 (IA;JP;In Japanese)

TELESCOPES
Laser system design for the generation of a sodium-layer laser guide star, 18:25006 (R;US)

TEM (MICROSCOPY)
See TRANSMISSION ELECTRON MICROSCOPY

TEMELIN-1 REACTOR
A new diagnostic concept for the primary circuit of WWER 1000 reactors, 18:23426 (RA;CS)

TEMPERATURE (0400-1000 K)
See TEMPERATURE RANGE 0400-1000 K

TEMPERATURE (AMBIENT)
See AMBIENT TEMPERATURE

TEMPERATURE DEPENDENCE
Beam of electrons for emission control, 18:24974 (IA;JP;In Japanese)
Considerations on thermal stability evaluation. 5.: Evaluation on thermal decomposability of azobenzene using DSC, 18:24094 (IA;JP;In Japanese)
Measurement of flash point and ignition point of brake fluids, 18:23871 (IA;JP;In Japanese)

TEMPERATURE EFFECTS
See TEMPERATURE DEPENDENCE

TEMPERATURE RANGE 0400-1000 K
Past and present of research and development of solar energy and the problems, 18:23221 (IA;JP;In Japanese)

TENDONS (STRUCTURAL)
See CABLES

TENSILE PROPERTIES
See also ELASTICITY
The effect of volume on the tensile strength of several nuclear-grade graphites, 18:24026 (RA;XA)

TENSILE STRENGTH
See TENSILE PROPERTIES

TERBIUM 159 TARGET
Excitation functions of $^{151}Eu(n,2n)^{150m}Eu$ and $^{159}Tb(n,2n)^{158}Tb$ reactions, 18:25128 (RA;XA)
Implications of the IAEA CRP on long-lived activation cross sections on waste disposal and materials recycling for fusion reactor materials, 18:25135 (RA;XA)
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)
Measurements of long-lived activation cross sections at 14.7 MeV in the inter-laboratory collaboration with ANL/LANL/JAERI, 18:25130 (RA;XA)

TERTIARY RECOVERY
See ENHANCED RECOVERY

TERYLENE
See DACRON

TEST FACILITIES
Bench-scale testing of the multi-gravity separator in combination with Microcel: Second Quarterly report, January 1, 1993–March 31, 1993, 18:22652 (R;US)
High-field conductor testing at the FENIX facility, 18:25336 (R;US)
The Accelerator Systems String Test Program, 18:24413 (R;US)
The Accelerator Systems String Test cryogenics, 18:24393 (R;US)

TEST REACTORS

TETRACHLOROMETHANE
See CARBON TETRACHLORIDE

TEVATRON
See FERMILAB TEVATRON

TEXAS
Feasibility study of heavy oil recovery in the Permian Basin (Texas and New Mexico), 18:22822 (R;US)
Revitalizing a mature oil play: Strategies for finding and producing unrecovered oil in Frio Fluvial-Deltaic reservoirs of South Texas: Technical progress report, January 1, 1993–March 31, 1993, 18:22803 (R;US)

TEXTILE INDUSTRY
The AMTEX Partnership, 18:23753 (R;US)

TEXTURE
Roles of non-covalent interactions in coal structure, 18:22731 (IA;JP;In Japanese)

TFTR DEVICE
See TFTR TOKAMAK

TFTR REACTORS
See TFTR TOKAMAK

TFTR TOKAMAK
Achieving high fusion reactivity in high poloidal beta discharges in TFTR, 18:25281 (R;US)
ICRF heating on TFTR-effect on stability and performance, 18:25278 (R;US)
The high density and high B_{pol} disruption mechanism on TFTR, 18:25277 (R;US)

THALLIUM OXIDES
Preparation and characterisation of the compound $Tl_{0.65}$ $Bi_{0.35}Ca_{0.8}$ $Sr_{1.7}$ Cu_2 O_y using oxalate coprecipitation and analytical CBED and an initial preparation of Bi_2 Ca_{n-1} Sr_2 Cu_n O_{4+2n} for n=5, 18:23984 (R;AU)

THERMAL CRACKING
Hazard evaluation on organic peroxides, 18:24504 (IA;JP;In Japanese)
Studies on coal chemical structure based on combined data of solid state NMR spectroscopy and thermal pyrolysis, 18:22734 (IA;JP;In Japanese)

THERMAL DECOMPOSITION
See PYROLYSIS

THERMAL EFFECTS
See TEMPERATURE DEPENDENCE

THERMAL EXPANSION
Investigation of coking pressure during carbonization of coke oven, 18:22680 (IA;JP;In Japanese)

THERMAL INSULATING GLASS
See DOUBLE GLAZING
THERMAL INSULATION
Considerations on thermal stability evaluation. 4, 18:24093 (IA;JP;In Japanese)
THERMAL POLLUTION (AIR)
See AIR POLLUTION
THERMAL POWER PLANTS
See also COMBINED-CYCLE POWER PLANTS
FOSSIL-FUEL POWER PLANTS
GEOTHERMAL POWER PLANTS
NUCLEAR POWER PLANTS
REFUSE-FUELED POWER PLANTS
Present status and future aspects of combustion technologies to establish the advanced utilization of thermal energy, 18:24265 (IA;JP;In Japanese)
THERMAL PROPERTIES
See THERMODYNAMIC PROPERTIES
THERMAL RECOVERY
Feasibility study of heavy oil recovery in the Permian Basin (Texas and New Mexico), 18:22822 (R;US)
Heavy oil EOR technology.: Application of thermal reservoir simulation technology to a steam flood field pilot test in a heavy oil reservoir, 18:22812 (IA;JP;In Japanese)
Heavy oil EOR technology.: Basic research on a steam flooding process under high pressure and high temperature for whole core, 18:22811 (IA;JP;In Japanese)
Heavy oil EOR technology.: Monitoring technology for EOR process, 18:22810 (IA;JP;In Japanese)
Heavy oil EOR technology.: Well completion technology for EOR field pilot test, 18:22809 (IA;JP;In Japanese)
THERMAL STORAGE
See HEAT STORAGE
THERMOCHEMICAL HEAT STORAGE
Basic investigation on solar thermochemical heat storage and temperature history of reactant pellet under dehydration, 18:23294 (IA;JP;In Japanese)
THERMOCHEMICAL PROCESSES
See also COMBUSTION
GASIFICATION
PYROLYSIS
Basic investigation on solar thermochemical heat storage and temperature history of reactant pellet under dehydration, 18:23294 (IA;JP;In Japanese)
THERMODYNAMIC MOLECULAR MODEL
Molecular movement of electronic acceptor-doped coal and its interaction with solvent.: Change of intermolecular cohesion in coal by heat treatment, 18:22732 (IA;JP;In Japanese)
THERMODYNAMIC PROPERTIES
Thermal explosion limit temperatures in liquids, 18:24133 (IA;JP;In Japanese)
THERMOELECTRIC CELLS

TIME-REVERSAL INVARIANCE
See T INVARIANCE
TIN
Analytical investigations for the determination of the chemical bonds (speciation) of tin in the sediments of the river Elbe by means of GC-AAS, GC-MS, TRFA and GFAAS, 18:24825 (R;DE;In German)
X-ray production ~130 Å from laser-produced plasmas for projection x-ray lithography applications, 18:25181 (R;US)
TIN 122 TARGET
Calculations of long-lived isomer production in neutron reactions, 18:25133 (RA;XA)
TIN ALLOYS
See also ALLOY-ZR98SN-4
High-field conductor testing at the FENIX facility, 18:25336 (R;US)
TIRES
Evaluation of products recovered from scrap tires for use as asphalt modifiers, 18:23835 (R;US)
TITANIUM
Catalytic fabric filtration for simultaneous NO_x and particulate control: Quarterly technical progress report, October 1–December 31, 1992, 18:23335 (R;US)
Experimental technique to launch flier-plates representing orbital debris to hypervelocities, 18:24261 (R;US)
TITANIUM 46 TARGET
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)
TITANIUM 47 TARGET
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)
TITANIUM 48 TARGET
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)
TITANIUM ALLOYS
High field superconductor development and understanding: A. Establishing the limits of performance of niobium titanium; B. Establishing whether Chevrel Phase materials can become useful high field superconductors: Progress report, June 1, 1992–May 31, 1993, 18:23927 (R;US)
Processing, properties, and wear resistance of aluminides, 18:23936 (R;US)
TITANIUM BORIDES
Investigation of PACVD protective coating processes using advanced diagnostics techniques: Performance report, 1 September 1992–30 April 1993, 18:23969 (R;US)
TITANIUM OXIDES
Photocatalysis for the treatment of waste water: Applications involving the removal of metals, 18:23268 (R;US)
Photochemical CO2 reduction using modified titanium oxide catalyst, 18:23733 (IA;JP;In Japanese)
TLD (DOSEMETERS)

TUBES
Burst tests to measure the tangential strength of CFC tubes, 18:24018 (RA;XA)
Deformation behaviour of thick walled tubes of X10NiCrAlTi 32 20 under cyclic thermomechanical loadings (ratcheting), 18:23940 (R;DE;In German)
Effective stress of a 4.2 K beam tube in a quenching collider 50 mm dipole magnet for the SSC, 18:24401 (R;US)
NYX construction progress, 18:23569 (R;US)
Photodesorption experiments on SSC collider beam tube configurations, 18:24424 (R;US)
Technology to make waste RDF and study of its applicability to the power generation system. 2, 18:23331 (R;JP;In Japanese)
Time-dependent hydrogen and helium pressure profiles in a long, cryogenically cooled tube, pumped at periodic intervals, 18:24341 (R;US)
[Travel to the Lummus Company, New York City for review of Heat Exchanger Tube Sheet Design, Savannah River Plant, 400D Area]: Trip report, October 23, 1951, 18:23560 (R;US)

TUBES (CONDUITS)
See PIPES

TUFF
An inverse procedure for estimating the unsaturated hydraulic conductivities of volcanic tuffs, 18:23000 (R;US)
Assessment of geophysical logs from borehole USW G-2, Yucca Mountain, Nevada, 18:23057 (R;US)
Containment phenomenology using a new shear-strain-based computational damage model for TUFF, 18:24541 (RA;US)
Flow and transport in hierarchically fractured systems (Yucca Mountain Project), 18:23004 (R;US)
Investigation of fracture-matrix interaction: Preliminary experiments in a simple system, 18:23041 (R;US)
Nuclear magnetic resonance determination of the non-pore water content of zeolite tuffs and its application to correction of epithermal-neutron-log-derived water content, 18:24529 (RA;US)
Sensitivity and uncertainty analyses applied to one-dimensional radionuclide transport in a layered fractured rock: MULTFRAC –Analytic solutions and local sensitivities: Phase 2, Iterative performance assessment: Volume 1, 18:23006 (R;US)
The role of fault zones in affecting multiphase flow at Yucca Mountain (Yucca Mountain Project), 18:23003 (R;US)

TUMORS
See NEOPLASMS

TUNGSTEN
Characterization of metal-loaded plastics: [Final report], 18:24519 (R;US)
Single crystal tungsten kinetic energy penetrators, 18:24501 (R;US)

TUNGSTEN 182 TARGET
Implications of the IAEA CRP on long-lived activation cross sections on waste disposal and materials recycling for fusion reactor materials, 18:25135 (RA;XA)
Measurements of activation cross sections for some long-lived nuclides important in fusion reactor technology, 18:25136 (RA;XA)

TUNING
See also MODE SELECTION
Non linear effects in ferrite tuned cavities, 18:24334 (R;US)

TURBOMACHINERY
High performance steam systems (HPSS): Mechanical drive market assessment: Final report, 18:23328 (R;US)

TURBULENCE
Analysis of shock-interface and shock-turbulence interactions by direct simulation and turbulence transport modeling, 18:24219 (RA;US)
Application of a two-equation turbulence mix model, 18:24201 (RA;US)
Experimental observations of shock stability and shock-induced turbulence, 18:24218 (RA;US)
Numerical simulation of enhanced mixing and turbulence in supersonic flows, 18:24216 (RA;US)

TURBULENT FLOW
Density
Evolution of the laser ablatively driven Rayleigh-Taylor mix layer, 18:24191 (RA;US)
Extension of second-moment turbulence models in cases with large density non-uniformity, 18:24206 (RA;US)
Similarity theory of incompressible random Rayleigh-Taylor instability, 18:24192 (RA;US)

Experimental Data
An experimental study of turbulent mixing by Rayleigh-Taylor instabilities and a two-fluid model of the mixing phenomena, 18:24188 (RA;US)
Extension of second-moment turbulence models in cases with large density non-uniformity, 18:24206 (RA;US)

Mathematical Models
Downstream evolution of turbulence from heated screens: Experimental and analytical results, 18:24255 (R;US)
Euler equation of one-dimensional compressible gas and locally-equilibrium molecular dynamics, 18:24213 (RA;US)
Extension of second-moment turbulence models in cases with large density non-uniformity, 18:24206 (RA;US)
Is a laminar flame front a passive surface of the turbulent field?, 18:24196 (RA;US)
Quasisymmetry of flows and chaos of streamlines, 18:24190 (RA;US)
Turbulent jump relations in the interaction of a shock wave with a turbulent region, 18:24221 (RA;US)

Meetings
[A trip to Germany to present four lectures on flow turbulence and combustion]: Foreign trip report, September 12–30, 1992, 18:24245 (R;US)

Mixing
The stability of vortex arrays, 18:24197 (RA;US)

Numerical Solution
Analysis of shock-interface and shock-turbulence interactions by direct simulation and turbulence transport modeling, 18:24219 (RA;US)
Computations of supersonic flows: Shears, shocks, and detonations, 18:24231 (RA;US)
Essentially non-oscillatory shock capturing methods applied to turbulence amplification in shock wave calculations, 18:24232 (RA;US)
Inviscid simulations of turbulent shear layers - mean flow analysis, 18:24200 (RA;US)
Numerical simulations of turbulent supersonic flows, 18:24234 (RA;US)
Shock enhancement of a turbulent flow, 18:24235 (RA;US)
Shock-generated turbulence, 18:24233 (RA;US)

Rayleigh-Taylor Instability
Creation and enhancement of turbulent mixing zones due to high mach number shock-interface interaction, 18:24226 (RA;US)
Evidence of Rayleigh-Taylor instabilities in tri-layer targets, 18:24224 (RA;US)

Shock Waves
Effect of particulate additives on heat transfer from a shock-induced turbulent boundary layer, 18:24210 (RA;US)
Numerical simulations with a k-ε mixing model in the presence of shock waves, 18:24222 (RA;US)
Shock enhancement of a turbulent flow, 18:24235 (RA;US)
Shock-generated turbulence, 18:24233 (RA;US)
Turbulent jump relations in the interaction of a shock wave with a turbulent region, 18:24221 (RA;US)

Statistical Models
Statistical theories of Rayleigh-Taylor instability for compressible fluids, 18:24194 (RA;US)

TURKEY
Heavy oil EOR technology.: EOR field pilot test in the Ikiztepe oil field, Turkey, 18:22808 (IA;JP;In Japanese)

TURKEY POINT-3 REACTOR
Effect of Hurricane Andrew on the Turkey Point Nuclear Generating Station from August 20–30, 1992: [Final report], 18:23430 (R;US)

TURKEY POINT-4 REACTOR
Effect of Hurricane Andrew on the Turkey Point Nuclear Generating Station from August 20–30, 1992: [Final report], 18:23430 (R;US)

TURTLES
Effects of egg incubation condition on the post-hatching growth and performance of the snapping turtle, Chelydra serpentina, 18:24724 (R;US)
Energetics of free-living box turtles (Terrapene carolina) near Aiken, South Carolina, 18:24725 (R;US)

TWO-PHASE FLOW
A high fidelity model and code generator for the simulation of BOP systems, 18:24249 (RA;CS)
Implicit approximate Riemann solver for two fluid two phase flow models, 18:23374 (R;FR)

UNSTEADY FLOW
Inviscid simulations of turbulent shear layers - mean flow analysis, 18:24200 (RA;US)
URANIUM
See also DEPLETED URANIUM
ENRICHED URANIUM
Chemistry
Travel to Germany and France to present two talks at the international conference on interaction of iron based materials with water and steam: Foreign trip report, May 16, 1992–June 10, 1992, 18:24111 (R;US)
Corrosion
Pyrophoricity of uranium, 18:24139 (R;US)
Dosimetry
Technical basis for the internal dosimetry program at the Y-12 Plant, 18:24916 (R;US)
Emission
Effluent testing for the Oak Ridge mixed waste incinerator: Emissions test for August 27, 1990, 18:22985 (R;US)
Ignition
Pyrophoricity of uranium, 18:24139 (R;US)
Laser Isotope Separation
Beam quality improvements in copper vapor laser oscillators, 18:22871 (RA;US)
High-average power copper-pumped dye lasers, 18:22872 (RA;US)
Lung Clearance
A model for uranium lung clearance at the Y-12 Plant, 18:24915 (R;US)
Machining
Results of the radiological survey at the former Alba Craft Laboratory site properties, Oxford, Ohio (OXO001), 18:24772 (R;US)
Mixtures
Opacities of uranium-hydrogen gas mixtures at high temperatures and pressures, 18:23471 (R;US)
Optical Properties
Measurements of the thermal radiative properties of liquid uranium, 18:23956 (R;US)
Oxidation
Pyrophoricity of uranium, 18:24139 (R;US)
Physical Properties
Measurements of the thermal radiative properties of liquid uranium, 18:22873 (RA;US)
Potentiometry
Potentiometric titration of uranium reduced by chromic salts in chloridic solutions, 18:24078 (R;BR;In Portuguese)
Production
100 and 300 Areas monthly report, December 1954, 18:23585 (R;US)
Radioecological Concentration
Quadrant III RFI draft report: Appendix B-I, Volume 3, 18:24784 (R;US)
Quadrant III RFI draft report: Appendix J, Baseline risk assessment: Volume 4, 18:24785 (R;US)
Removal
Technology needs study: Fernald Environmental Management Project, 18:23132 (R;US)
Solvent Extraction
Formation characteristics and its numerical models of the third phase in the U(IV)-HNO_3-TBP-n-dodecane system, 18:22886 (R;JP;In Japanese)
Japanese chemical separations (partitioning) and transmutation activities: Foreign trip report, July 17–25, 1992, 18:22880 (R;US)
Spatial Distribution
In situ mapping of radionuclides in subsurface and surface soils, 18:24709 (RA;US)
Spectrophotometry
Uranium determination by spectrophotometry, in chloride solutions, using titanium (III) as reducer, 18:24079 (R;BR;In Portuguese)
Thermal Radiation
Measurements of the thermal radiative properties of liquid uranium, 18:23956 (R;US)
Thermodynamic Properties
Measurements of the thermal radiative properties of liquid uranium, 18:22873 (RA;US)
URANIUM 232 TARGET
Status of thorium cycle nuclear data evaluations: Comparison of cross-section line shapes of JENDL-3 and ENDF-B-VI files for ^{230}Th, ^{232}Th, ^{231}Pa, ^{233}Pa, ^{232}U, ^{233}U and ^{234}U, 18:25120 (R;XA)
URANIUM 233 TARGET
Status of thorium cycle nuclear data evaluations: Comparison of cross-section line shapes of JENDL-3 and ENDF-B-VI files for ^{230}Th, ^{232}Th, ^{231}Pa, ^{233}Pa, ^{232}U, ^{233}U and ^{234}U, 18:25120 (R;XA)
URANIUM 234 TARGET
Status of thorium cycle nuclear data evaluations: Comparison of cross-section line shapes of JENDL-3 and ENDF-B-VI files for ^{230}Th, ^{232}Th, ^{231}Pa, ^{233}Pa, ^{232}U, ^{233}U and ^{234}U, 18:25120 (R;XA)
URANIUM 235
Studies of the effect of the properties of neutron producing targets and sample backings on neutron cross section measurements, 18:25109 (RA;XA)
URANIUM 236 TARGET
Formation of 102-element isotopes in ^{22}Ne+^{236}U and ^{26}Ng+^{232}Th reactions, 18:25145 (R;RU;In Russian)
URANIUM 238
Results of the radiological survey at the former Alba Craft Laboratory site properties, Oxford, Ohio (OXO001), 18:24772 (R;US)
URANIUM 238 TARGET
Measured fast-neutron activation cross sections of Ag, Cu, Eu, Fe, Hf, Ni, Tb and Ti at 10.3 and 14.8 MeV and for the continuum neutron spectrum produced by 7-MeV deuterons on a thick Be-metal target, 18:25131 (RA;XA)
Total neutron cross-section of U-238 as measured with filtered neutrons of 55 keV and 144 keV, 18:25137 (R;XA)
URANIUM COMPLEXES
Tris(Cyclopentadienyl)Uranium-t-Butyl: Synthesis, reactions, and mechanisms, 18:24110 (R;US)

WIND TUNNELS
Investigation on the effectiveness of the piping interference removal system for STOL aricraft wind tunnel tests, 18:23822 (R;JP;In Japanese)
Numerical wind tunnel project computational fluid dynamics at National Aerospace Laboratory, Japan, 18:24251 (R;JP)
WIND TURBINE ARRAYS
Full scale measurements in wind turbine arrays, 18:23319 (RA;DK)
Turbulence in windfarms, 18:23322 (RA;DK)
WIND TURBINES
A 10 sec. forecast of wind turbine output with neural networks, 18:23313 (RA;DK)
A theoretical and experimental investigation of new tip shapes, 18:23314 (RA;DK)
Active pitch control: The controllers influcence on performance and loads of a wind turbine, 18:23315 (RA;DK)
Application of a general purpose navier-stokes code to wind turbine flow problems, 18:23316 (RA;DK)
Engineering design tools for wind diesel systems: Presentation and validation of the logistic modelling package, 18:23317 (RA;DK)
Engineering design tools for wind-diesel systems: Presentation and validation of the modular dynamic model, 18:23318 (RA;DK)
Environmental measurements - External noise. "Windflower", Denmark, 18:23311 (I;DK;In Danish)
Stall induced vibrations, 18:23320 (RA;DK)
The Danish code of practice for loads and reliability of wind turbines, 18:23308 (RA;DK)
Windmill gearboxes: Reported damage 1987 - 1992, 18:23310 (R;DK;In Danish)
Windmill of solar-cell blades, 18:23269 (IA;JP;In Japanese)
WINDSCALE REPROCESSING PLANT
See SELLAFIELD REPROCESSING PLANT
WIPP
A modeling approach to address spatial variability within the Culebra Dolomite transmissivity field, 18:23044 (R;US)
Test phase plan for the Waste Isolation Pilot Plant: Revision 1, 18:22961 (R;US)
Test plan: Air intake shaft performance test – Addendum for obtaining cores in the Culebra for radionuclide retardation studies, 18:22934 (R;US)
Test plan: Gas-threshold-pressure testing of the Salado Formation in the WIPP underground facility, 18:22941 (R;US)
Test series C of the small scale seal performance tests, 18:22938 (R;US)
Waste retrieval plan for the Waste Isolation Pilot Plant: Revision 1, 18:22962 (R;US)
WOLFRAM
See TUNGSTEN
WOOD
Accessibility of smoke, heat and CO gas to three-element fire sensor, 18:23802 (IA;JP;In Japanese)

WOOD ALCOHOL
See METHANOL
WOOD BURNING APPLIANCES
Biomass in scattered buildings: Experience gained, status and preparation of demonstration projects, 18:23207 (R;DK;In Danish)
WOOD STOVES
See WOOD BURNING APPLIANCES
WORKERS
See PERSONNEL
WORKING FLUIDS
See also REFRIGERANTS
Transmittance of working fluid (water and salt-water solution) for solar pond, 18:23692 (IA;JP;In Japanese)
WORLD-WIDE FALLOUT
See GLOBAL FALLOUT
WWER TYPE REACTORS
See also BOHUNICE V-2 REACTOR
LOVIISA-1 REACTOR
LOVIISA-2 REACTOR
PAKS-1 REACTOR
TEMELIN-1 REACTOR
Advanced core monitoring technology for WWER reactors, 18:23423 (RA;CS)
An investigation of axial xenon stability in WWER-1000 reactor designs, 18:23527 (RA;CS)
Development of MAAP-WWER, 18:23416 (RA;CS)
Experimental and computation method for determination of burnup and isotopic composition of the WWER-440 fuel using the ^{134}Cs and ^{137}Cs concentrations, 18:23534 (R;RU;In Russian)
Staff training and education: Eastern point of view, 18:23384 (RA;CS)
The Westinghouse approach - an I and C modernization program for WWERs, 18:23418 (RA;CS)
'Kazmer' a complex noise diagnostic system for 1000 MWe PWR WWER type nuclear power units, 18:23429 (R;HU)

X

X RADIATION
See also SOFT X RADIATION
Dose-to-risk conversion factors for low-level tritium exposures, 18:24853 (R;US)
High spatial resolution x-ray microanalysis: Comparison of experiment and incoherent scattering calculations, 18:25217 (R;US)
Simulated A&PCT data to study the mixed waste forms characterization problem, 18:23054 (R;US)
X-ray conversion in preformed plasmas, 18:25169 (R;US)
X-RASERS
See X-RAY LASERS
X-RAY DOSIMETRY
Comparative measurements using chemical dosemeters, and extension of compulsory calibration to include high energies, 18:24458 (RA;DE;In German)
Dosimetry from the point of view of clinical physicists - practical implementation and problems, 18:24461 (RA;DE;In German)
The correction factor k_Q for radiation quality of high-energy photon radiation, 18:24457 (RA;DE;In German)
X-RAY EQUIPMENT
See also X-RAY SOURCES
Electrical characteristics of short pulse gated microchannel plate detectors, 18:25324 (R;US)
Needs for super-smooth surfaces, 18:24488 (R;US)
Remote real time x-ray examination of fuel elements in a hot cell environment, 18:24477 (R;US)
X-RAY FLUORESCENCE ANALYSIS
Proceedings of the workshop on applications of synchrotron radiation to trace impurity analysis for advanced silicon processing, 18:24088 (R;US)
X-RAY LASERS
High power z pinches as x-ray laser photopumps, 18:24281 (R;US)
Oscillator-amplifier experiments in neon-like yttrium, 18:24288 (R;US)
Selenium x-ray laser line profile measurements, 18:24287 (R;US)
Spatial coherence of soft x-ray lasers, 18:24289 (R;US)
Three dimensional time-dependent hydrodynamic and propagation modeling of x-ray laser emission, 18:25327 (R;US)
X-ray lasers as sources for x-ray microscopy, 18:23182 (R;US)
X-RAY RADIOGRAPHY
REX - a program for the analysis of X-ray reflectivity data: user guide and programmer manual, 18:25390 (R;GB)
X-RAY SOURCES
Physical optics modelling of soft x-ray projection lithography (SXPL) imaging experiments, 18:25166 (R;US)
Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch, 18:25177 (R;US)
X-ray lasers as sources for x-ray microscopy, 18:23182 (R;US)
X-ray production ~130 Å from laser-produced plasmas for projection x-ray lithography applications, 18:25181 (R;US)
X-RAY SPECTRA
Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch, 18:25177 (R;US)
XENON
A search for strong-field direct two electron ionization using coincidence spectroscopy, 18:25193 (R;US)
Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems: Progress report, 1 November 1992–31 October 1993, 18:25211 (R;US)
Kinetic studies following state-selective laser excitation: Progress report, May 1, 1990–April 29, 1993, 18:25173 (R;US)
XENON 131 TARGET
On studies of the hadron-nucleus collision processes, 18:25146 (R;RU)
XENON CHLORIDES
Kinetic studies following state-selective laser excitation: Progress report, May 1, 1990–April 29, 1993, 18:25173 (R;US)
XYLANS
[Hydroxyproline: Rich glycoproteins of the plant and cell wall]: Annual technical progress report, 1993, 18:23195 (R;US)

Y

Y-12 PLANT
A model for uranium lung clearance at the Y-12 Plant, 18:24915 (R;US)
RCRA Closure Plan for the Bear Creek Burial Grounds B Area and Walk-In Pits at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee: Energy Systems Environmental Restoration Program; Y-12 Environmental Restoration Program, 18:22953 (R;US)
Remedial investigation work plan for Bear Creek Valley Operable Unit 4 (shallow groundwater in Bear Creek Valley) at the Oak Ridge Y-12 Plant, Oak Ridge, Tennessee, 18:23127 (R;US)
Technical basis for the internal dosimetry program at the Y-12 Plant, 18:24916 (R;US)
YIELD (BIOLOGICAL)
See PRODUCTIVITY
YIELD (FISSION)
See FISSION YIELD
YOLK
See EGGS
YTTRIUM
Electron temperature measurements of x-ray laser plasmas, 18:25284 (R;US)
YTTRIUM ALUMINIUM GARNETS
See ALUMINIUM OXIDES
YTTRIUM IONS
Oscillator-amplifier experiments in neon-like yttrium, 18:24288 (R;US)
YTTRIUM OXIDES
Flux-pinning related defect structures in melt-processed $YBa_2Cu_3O_{7-x}$, 18:23968 (R;US)
Formation of textured YBCO films by laser ablation, 18:23981 (R;US)

YUCCA MOUNTAIN
Assessment of geophysical logs from borehole USW G-2, Yucca Mountain, Nevada, 18:23057 (R;US)
DOE's Yucca Mountain studies, 18:22957 (R;US)
Identification and characterization of conservative organic tracers for use as hydrologic tracers for the Yucca Mountain Site Characterization Project: Quality Assurance Project Plan: Quarterly technical progress report, January 1, 1993–March 31, 1993, 18:22951 (R;US)
Preliminary near-field environment report: Volume 2, Scientific overview of near-field environment and phenomena, 18:23056 (R;US)
The Lathrop Wells volcanic center: Status of field and geochronology studies, 18:22990 (R;US)
The role of fault zones in affecting multiphase flow at Yucca Mountain (Yucca Mountain Project), 18:23003 (R;US)

Z

Z PINCH DEVICES (LINEAR)
See LINEAR Z PINCH DEVICES
ZAIRE REPUBLIC
The Agency's Technical Co-operation programme with Zaire, 1982-1992. Country programme summaries, 18:25358 (R;XA)
ZAMBIA
The Agency's Technical Co-operation programme with Zambia, 1982-1992. Country programme summaries, 18:25359 (R;XA)
ZEOLITES
Anchoring strategies for bimetallic species in zeolites: Progress report, 18:24097 (R;US)
Selective reduction of nitrogen monoxide in oxidizing atmosphere over transition metal ion-exchanged zeolite catalysts, 18:23879 (IA;JP;In Japanese)
ZERO POWER REACTORS
See also FCA REACTOR
IFR REACTOR
Realization of the technique for evaluation of integral experiments under the BFS bench conditions, 18:23584 (R;RU;In Russian)
[Travel to Argonne National Laboratory for discussions concerning ZPR-2]: Trip report, November 15, 1951, 18:23563 (R;US)
ZINC IODIDES
Active species in Zn-butyl iodide system for coal solubilization, 18:22663 (IA;JP;In Japanese)
ZINC OXIDES
Optimization of transparent and reflecting electrodes for amorphous silicon solar cells: Annual subcontract report, 1 May 1991–30 April 1992, 18:23266 (R;US)
ZION STATION UNIT-1
See ZION-1 REACTOR
ZION-1 REACTOR
Evaluation of severe accident risks, Zion, Unit 1: Appendices B, C, D, and E: Volume 7, Revision 1, Part 2B, 18:23658 (R;US)
Evaluation of severe accident risks, Zion, Unit 1: Appendix A: Volume 7, Revision 1, Part 2A, 18:23657 (R;US)
Evaluation of severe accident risks: Zion, Unit 1, Main report: Volume 7, Revision 1, Part 1, 18:23656 (R;US)
ZIRCONIUM
Surface modification on zirconium and its reactivity, 18:23921 (IA;JP;In Japanese)
ZIRCONIUM 91
Progress in zirconium resonance ionization spectroscopy, 18:23958 (R;US)
ZIRCONIUM OXIDES
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic, 18:23967 (R;US)

Contract Number Index

Numbers assigned to DOE contracts announced in documents in this publication are listed. Contract numbers are sorted alphanumerically and list the primary corporate author of the document cited, the citation number, and the report number or other document identification.

Contract No.	Abstract No.	Report No.
AC01-90CE90053	**Horizon Data Corp., Reston, VA (United States). Power Information Center**	
	18:23701	DOE/CE/90053–T44
	18:23780	DOE/CE/90053–T47

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

Codes Used on Index Lines

Following the citation numbers in the Corporate Author, Personal Author, and Subject Indexes, codes are used to designate the type of document, country of publication, and language of the document, e.g., (R;SU;In Russian). The language designator does not appear if the document is published in English.

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no.

☐ Check/Money Order enclosed for $

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____
Account Number **Card expiration date**

☐ Ship and Bill (see below for restrictions)

Employer identification number (9 digits) _ _–_ _ _ _ _ _ _

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
